BILLING CODE 4210-32-M

Office of the Secretary

24 CFR Parts 3700, 3710 and 3720

[Docket No. R-84-1157; FR-1924]

Removal of Chapter XXII—New Community Development Corporation

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This rule removes Chapter XXII—New Community Development Corporation from Title 24 of the Code of Federal Regulations, reflecting the abolishment of the New Community Development Corporation (NCDC).

EFFECTIVE DATE: May 7, 1984.

FOR FURTHER INFORMATION CONTACT: Grant E. Mitchell, Assistant General Counsel, Room 10248, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410, (202) 755-6550. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: HUD is removing 24 CFR Chapter XXII—New Community Development Corporation from the Code of Federal Regulations because Section 474 of the Housing and Urban-Rural Recovery Act of 1983, Pub. L. 98-181, repealed several sections under Title IV of the Housing and Urban Development Act of 1968, 42 U.S.C. 3901, and Title VII of the Housing and Urban Development Act of 1970, 42 U.S.C. 4501, which gave HUD the authority to operate the New Communities Program.

One of the repealed sections, 42 U.S.C. 4532, had created a New Community Development Corporation with a Board of Directors chaired by the HUD Secretary. By statute, NCDC administered certain functions under Title VII, and all other functions under Title IV and Title VII were administratively delegated by the HUD Secretary to NCDC (36 FR 5304, March 19, 1971). Before the repeal of 42 U.S.C. 4532, the Secretary had redelegated NCDC's functions with respect to grants under Section 107 of the Housing and Community Development Act of 1974 (48 FR 11776, March 21, 1983), surplus land disposition under Section 414 of the Housing and Urban Development Act of 1969 (48 FR 24211, May 31, 1983) and supplemental grants under Section 718 of the Housing and Urban Development Act of 1970 (48 FR 24211, May 31, 1983). Upon repeal, the Secretary redelegated all remaining functions under the New Communities Program to the Assistant Secretary for Community Planning and Development (48 FR 55340, December 12, 1983 and 49 FR 3935, January 31, 1984).

Part 3700 contains the bylaws of NCDC, which are no longer relevant. Part 3710 explains the procedures for assistance under Title IV, and Part 3720 explains the procedures for assistance under Title VII. These parts explain the application, approval and monitoring procedures for New Community projects developed with the proceeds of HUD-guaranteed debt obligations. These procedures are obsolete, since no applications for guarantees were processed after 1975 and none of the 13 projects that received guarantees are still being developed as HUD-approved New Communities. The remaining functions under the New Communities program consist of debt collection and payment of guarantees which are beyond the scope of Parts 3710 and 3720. The rights and obligations of the Secretary with respect to the issuers and holders of guaranteed debt obligations are set forth in the debt obligations themselves and related trust indentures.

Note that until a recent published restructuring of HUD's rules, the contents of Chapter XXII, being removed in this rulemaking, were located in 24 CFR Chapter VII. (See 49 FR 6712, February 23, 1984.)

Notice and public procedure are considered impracticable and unnecessary because HUD's removal of Chapter XXII is an internal administrative housekeeping matter that will not affect any person's substantive rights. Accordingly, the Department has determined that notice and public procedure are unnecessary and this document is being published as a final rule.

HUD's removal of Chapter XXII is the kind of internal administrative procedure that 24 CFR 50.20(k) excludes from the requirements in 24 CFR Part 50, which implement Section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulations, issued by the President on February 17, 1981. Analysis of the rule indicates that it does not: (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule would not have a significant economic impact on a substantial number of small entities. Since no person's rights or obligations are affected by this rule, it would have no economic impact.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 17, 1983, 48 FR 47429, under Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects

24 CFR Part 3700

Organization and functions (Government agencies), New communities.

24 CFR Parts 3710 and 3720

Grant programs: housing and community development, Loan programs: housing and community development, New communities, Securities, Community development, Housing.

Accordingly, the Department amends Title 24 of the Code of Federal Regulations by removing Chapter XXII in its entirety.

Authority: Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

Dated: March 19, 1984.

Samuel R. Pierce, Jr.,

Secretary, Department of Housing and Urban Development.

BILLING CODE 4210-32-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 1 and 156

[CGD 79-160]

Special Requirements for Cargo Lightering Operations

AGENCY: Coast Guard, DOT.

ACTION: Final rule

SUMMARY: This final rule establishes regulations for the lightering of oil and hazardous material cargoes in bulk from one vessel to another in the marine environment surrounding the United States. The rule requires vessels engaged in lightering to hold a Certificate of Inspection, or for foreign vessels a Certificate of Compliance (or Tank Vessel Examination Letter); and to comply with MARPOL 73/78 (The International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto). The rule also requires lightering vessels to give pre-arrival notices and report certain incidents; and delegates the authority to establish lightering zones to the Coast Guard District Commander.

DATE: These regulations are effective April 26, 1984.

FOR FURTHER INFORMATION CONTACT: Lieutenant Clayton W. Evans, Project Manager, Office of Marine Environment and Systems (G-WPE/3), Room 1611, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C., 20593, (202) 426-9578. Normal office hours are between 7:00 a.m. and 3:30 p.m. Monday through Friday except Federal holidays.

SUPPLEMENTARY INFORMATION: Section 3715 of Pub. L. 98-89 (97 Stat 526), which was formerly Section 17 of The Port and Tanker Safety Act of 1978 (R.S. 4417a), requires the Secretary of the Department in which the Coast Guard is operating to prescribe regulations for the lightering of oil and hazardous materials which takes place in the navigable waters of the United States or in the marine environment if the cargo is destined for a port or place subject to the jurisdiction of the United States. Congress took this action in response to an increased number of tank vessel casualties, an increasing number of lightering operations, and increasing public awareness of these activities.

A notice of Proposed Rulemaking (NPRM) regarding lightering was published on May 31, 1979 (44 FR 31486). Comments on this proposal reflected a wide variety of opinion on the subject of lightering and ranged from suggestions for very minimal or no regulation of lightering operations to requests for a total prohibition on lightering within 200 miles of land and complex licensing and permit fee systems. Many of the equipment and performance requirements in the original proposal were found restrictive or inappropriate. Additionally, lightering superintendent and personnel experience and qualifications required in the NPRM were considered too selective.

The comments were carefully evaluated, and the Coast Guard also observed lightering operations in the Gulf of Mexico. As a result of the comments received and the Coast Guard's observations, it became apparent that the proposal should be simplified, and a Supplemental Notice of Proposed Rulemaking issued.

Offshore lightering has decreased approximately 60 percent from 1979 levels and this is additional incentive to simplify the regulations. Contributing to this decline are: The decreased use of foreign crude oil, increased costs of supertanker operation, and opening of the Louisiana Offshore Oil Port (LOOP) that now receives Very Large and Ultra Large Crude Carriers. Despite these decreases, there will be a continuing need to regulate offshore lightering. For example, in 1981 two substandard tankships were denied entry into port by Coast Guard Captains of the Port and subsequently lightered their cargoes beyond the contiguous zone. Accordingly, pollution prevention requirements must be placed upon vessels lightering offshore.

On September 9, 1983, the Coast Guard published a Supplemental Notice of Proposed Rulemaking (48 FR 40741) and invited comments. It contained substantial changes to the notice of proposed rulemaking that was published on May 31, 1979. Fourteen written comments were received from oil industry, shipping and Government interests. There was one request for a public hearing. A public hearing will not be held, because the Coast Guard is satisfied that all significant issues raised by public comment have been addressed in the final rule.

The final rule requires vessels engaged in lightering to hold a Certificate of Compliance (or Tank Vessel Examination Letter); and to comply with MARPOL 73/78 (The International Convention for the Prevention of Pollution From Ships, 1973, as modified by the Protocol of 1978 relating thereto). The rule also requires lightering vessels to give pre-arrival notices and report certain incidents, and delegates the authority to establish lightering zones to the Coast Guard District Commander.

Drafting Information

The principal persons involved in drafting this final rule are: LT Clayton W. Evans, Project Manager, Office of Marine Environment and Systems, and LCDR William B. Short, Project Attorney, Office of the Chief Counsel.

Discussion of the Comments

One comment indicated casualty, spill and transfer statistics do not support the need for lightering regulations. Additionally, if established, uniform rules were not desirable. This comment also indicated specific requirements, left up to the Coast Guard District Commander for offshore lightering, and the Captain of the Port for lightering in U.S. waters, would be more appropriate. The Coast Guard agrees that the available information shows a good record of safety and pollution prevention in cargo lightering operations. The regulations, however, are required by 46 U.S.C. 3715, and supported by the need to prevent substandard tank vessels from lightering beyond the contiguous zone. The regulations have been constructed as simply as possible, without sacrificing essential pollution prevention requirements. The District Commander has been given a large measure of responsibility to ensure local needs are addressed, by establishing lightering zones when they prove necessary.

Two comments stated the Coast Guard has underestimated the number of vessel lighterings conducted annually The decline in offshore lightering activity from 1979 levels has been examined in consultation with industry. The Coast Guard recognizes, however, that the number of annual lightering operations fluctuates widely (now between 150-500 operations annually), depending on demand for petroleum and other factors.

One comment suggested the title of Part 156 be revised to indicate that it pertains to hazardous materials, as well as oil. This suggestion has been adopted in the final rule.

One comment indicated a need for a dedicated support vessel present during lightering operations, for safety and pollution response. The Coast Guard

understands that the majority of lightering operations do have a support vessel present. In the absence of such a vessel, other methods for tending fenders, for example, and staging pollution response equipment are being used.

Section 156.200 Applicability

Five comments pointed out that, as written, applicability included vessels in all navigable waters, (including harbors and inland), and that the actual intention of the regulations was to govern offshore lightering. This has been corrected in the final rule. The subpart will apply to vessels which engage in oil and hazardous materials lightering in the marine environment beyond the baseline from which the breadth of the territorial sea is measured. The subpart will not apply to lightering operations involving public vessels.

Section 156.205 Definitions

Ten comments pointed out the definition of hazardous material included oil, and therefore, lightering of oil required application to the Commandant of the Coast Guard 90 days prior to the planned start of transfer (§ 156.210(b)). The final rule has been clarified. Lightering of hazardous materials, other than oil, will be subject to the prior approval of the Commandant.

One comment indicated the term "vessel to be lightered" could be construed to include semi-submersible drilling rigs and offshore supply vessels. Drilling platforms of any nature have been exempted in the final rule. If an offshore supply vessel transfers only cargo intended for use as fuel or lubricant aboard the receiving vessel, it is also exempted from the lightering regulations.

One comment stated "vessel to be lightered" should read "ship to be lightered" to conform with the internationally accepted terminology. The Coast Guard recognizes that the definition of "ship" under MARPOL 73/78 does include barges. The lightering regulations however are not issued under MARPOL 73/78, and for clarity the term "vessel to be lightered" is retained in the final rule.

Section 156.210 General

Five comments indicated the 90 day advance notice to the Commandant required prior to each transfer of hazardous materials was not realistic. Advance notice of 90 days to the Commandant for each transfer was not intended, and the 90 day requirement has been deleted in the final rule. The Commandant will issue "blanket" prior approval for the lightering of hazardous materials. Vessels lightering hazardous materials then must give the pre-arrival notice required in § 156.215. Lightering of oil does not require prior Commandant approval. Persons now engaged in the lightering of hazardous materials, other than oil, should request Commandant approval as soon as possible after the effective date of the final rule. The information required in all requests to lighter hazardous materials, other than oil, is included in the final rule.

Three comments stated U.S. vessels which were not required to carry an International Oil Pollution Prevention (IOPP) Certificate must obtain one to engage in lightering. The language in this paragraph has been clarified. Only those U.S. oil tankers of 150 gross tons and above and other U.S. ships of 400 gross tons and above, that engage in voyages to ports or offshore terminals under the jurisdiction of other parties to MARPOL 73/78, are required to carry a valid IOPP Certificate.

One comment indicated "equivalent documentation" of compliance with MARPOL 73/78 was vague in its requirement. Parties not signatory to MARPOL 73/78 whose vessels engage in voyages to MARPOL 73/78 signatory countries must have on board a certificate very similar to the IOPP Certificate (§ 151.21(b)). "Equivalent documentation" is accepted terminology for this certificate.

Section 156.215 Pre-Arrival Notices

Eight comments said the 24 hour pre-arrival notice was unreasonable in an emergency or in the event of changing plans. This paragraph has been amended to allow for immediate notification in the event of emergency lightering, and additional notification to the Captain of the Port if the estimated time of arrival in the lightering location changes by more than six hours.

One comment stated the vessel to be lightered frequently does not know the name of the service vessel or the quantity of cargo required by the refinery. The Coast Guard is satisfied that the names of service vessels are available to the master, owner or agent of the vessel to be lightered. Only notice of "the approximate amount" of cargo on board is required, not the amount to be offloaded.

Section 165.220 Reporting of Incidents

Three comments indicated the service vessel often does not know of the activity on the vessel to be lightered, and placing the incident reporting responsibility upon the service vessel is not reasonable. The Coast Guard believes that events such as fire, explosion, collision, grounding or similar emergency, which pose a threat to the vessels involved, as well as the discharge of cargo during lightering, are of such magnitude that the service vessel would be aware of their occurrence. This requirement has been retained in the final rule.

One comment suggested that the word "cargo" in §156.220(b) be replaced with "oil or hazardous substance" in describing the discharges that must be reported. This clarification has been incorporated into the final rule.

Section 156.225 Designation of Lightering Zones

The use of lightering zones has been clarified in the final rule. When a lightering zone has been designated, lightering operations in a given geographic area may only be conducted within the designated lightering zone.

Section 156.230 Factors Considered in Designating Lightering Zones

Two comments said that under deteriorating weather conditions some lightering zones could become restrictive, and flexibility for such contingencies must be included when zones are established. The Coast Guard recognizes that provisions for unfavorable wind and sea conditions must be considered when lightering zones are established, and these will be addressed by the District Commander.

One comment requested that proximity of a lightering zone to National Parks, Wilderness Systems and other allied national lands be considered in establishing a lightering zone. In the final rule these lands have been included as factors to be considered.

Final Evaluation and Environmental Assessment

The Coast Guard has evaluated this final rule under Executive Order 12291 and the Department of Transportation's "Policies and Procedures for Simplification, Analysis, and Review of Regulations" (DOT Order 2100.5 dated 22 May 1980), and has determined that it is neither a major nor a significant rulemaking. The cost of the regulations to the marine industry is anticipated to be so minimal that further evaluation is not necessary. As stated in the Supplemental Notice of Proposed Rulemaking, the only industry costs arising from this rulemaking are those for the required notices, estimated to be approximately five dollars per notice, or in total, less than $5,000 per year.

This rule will require vessels engaged in lightering to give a pre-arrival notice, and report cargo spills and serious casualties. The collection of information requirements contained in the rule have been approved by the Office of Management and Budget (OMB) under Section 3504(h) of the Paperwork Reduction Act, Pub. L. 96-511 and have been assigned OMB control number 2115-0539.

The Coast Guard certifies that this rule will not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96-354, September 19, 1980 (5 U.S.C. 603). The companies involved in lightering are generally large oil companies. The costs have been identified and are minimal.

This action will not produce a significant impact on the environment. It is designed to prevent degradation of the environment from spills during lightering activity.

The Final Evaluation and Environmental Assessment are available for inspection at the Marine Safety Council (G-CMC/44), U.S. Coast Guard, 2100 Second Street, SW., Washington, D.C. 20593, (202) 426-1477.

List of Subjects

33 CFR Part 1

Administrative practice and procedure, Authority delegations (Government agencies), Freedom of information, Penalties.

33 CFR Part 156

Oil pollution.

PART 1—[AMENDED]

In consideration of the foregoing the Coast Guard amends Chapter I of Title 33, Code of Federal Regulations as follows:

1. By adding paragraph § 1.05-1(g)(2) to read as follows:

§ 1.05-1 General.

* * * * *

(g) * * *

(2) The designation of lightering zones.

* * * * *

PART 156—OIL AND HAZARDOUS MATERIAL TRANSFER OPERATIONS

2. By revising the authority citation for Part 156 to read as follows:

Authority: Sec. 2, Pub. L. 92-500, 86 Stat. 868, (33 U.S.C. 1321(j)(1)(C) and (D)), E.O. 11735, 3 CFR, 1971-1975 COMP., p. 793; 49 CFR 1.46(m). Subpart B is issued under Pub. L. 98-89, (46 U.S.C. 3715); 49 CFR 1.46(n)(4).

3. By revising the heading of Part 156 to read "Oil and Hazardous Material Transfer Operations".

4. By designating § 156.100 through § 156.170 as "Subpart A—Pollution Prevention Regulations for Oil Transfer Operations.

5. By revising § 156.100 to read as follows:

§ 156.100 Applicability.

This subpart applies to the transfer of oil on the navigable waters or contiguous zone of the U.S. to, from, or within any vessel and to or from a public vessel with a capacity of 250 or more barrels of that oil, except that this subpart does not apply to the transfer operation within or on a public vessel.

6. By revising § 156.105 to read as follows:

§ 156.105 Definitions.

The definitions in § 154.105 of this chapter apply to this subpart.

7. By adding a new "Subpart B" to read as follows:

Subpart B—Special Requirements for Lightering of Oil and Hazardous Material Cargoes

Sec.
156.200 Applicability.
156.205 Definitions.
156.210 General.
156.215 Pre-arrival notices.
156.220 Reporting of incidents.
156.225 Designation of lightering zones.
156.230 Factors considered in designating lightering zones.

Subpart B—Special Requirements for Lightering of Oil and Hazardous Material Cargoes

§ 156.200 Applicability.

This subpart applies to vessels which engage in oil and hazardous materials lightering operations in the marine environment beyond the baseline from which the territorial sea is measured, when the cargo lightered is destined for a port or place subject to the jurisdiction of the United States. This subpart does not apply to lightering operations involving public vessels. Within the contiguous zone and navigable waters of the United States these rules are in addition to the rules in Subpart A of this Chapter, as well as the rules in 33 CFR Part 155 and the applicable sections of 33 CFR Part 157.

§ 156.205 Definitions.

(a) In addition to the terms defined in this section, the definitions in § 154.105 of this chapter apply to this subpart.

(b) As used in this subpart:

"Hazardous material" means any liquid material or substance which is:

(1) Flammable or combustible; or

(2) Designated a hazardous substance under section 311(b) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1321);

(3) Designated a hazardous material under section 104 of the Hazardous Materials Transportation Act (49 U.S.C. 1803).

"Lightering" or "Lightering operation" means the transfer of a cargo of oil or a hazardous material in bulk from one vessel to another, including all phases of the operation from the beginning of the mooring operation to the departure of the service vessel from the vessel to be lightered, except when that cargo is intended only for use as fuel or lubricant aboard the receiving vessel.

"Marine environment" means the navigable waters of the United States, the waters of any area over which the United States asserts exclusive fishery management authority, and the waters over the Outer Continental Shelf of the United States.

"Oil" means oil of any kind or in any form, including, but not limited to petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil.

"Service vessel" means the vessel which receives a cargo of oil or a hazardous material from another vessel in a lightering operation.

"Vessel to be lightered" means the vessel which transports a cargo of oil or a hazardous material to a place within the marine environment for transfer of that cargo to another vessel for further transport to a port or place subject to the jurisdiction of the United States. The term "vessel to be lightered" does not include drilling rigs, or offshore supply vessels transferring cargo intended for use as fuel or lubricant aboard the receiving vessel.

§156.210 General.

(a) No vessel may transfer oil or hazardous materials in a port or place subject to the jurisdiction of the United States, if the cargo has been lightered from another vessel, unless:

(1) The regulations in this subpart have been complied with;

(2) Both the vessel to be lightered and service vessel have, on board, at the time of transfer, a valid Certificate of Inspection, Certificate of Compliance, or a Tank Vessel Examination Letter, as would have been required under 46 U.S.C. 3710 or 3711, had the transfer taken place in a port or place subject to the jurisdiction of the United States; and

(3) The vessel to be lightered has on board, at the time of transfer, an International Oil Pollution Prevention (IOPP) Certificate or equivalent

documentation of compliance with Annex I of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 relating thereto (MARPOL 73/78), as would be required by Part 151 of this chapter for vessels in navigable waters of the United States. The IOPP Certificate or documentation of compliance shall be that prescribed by § 151.19 and § 151.21 of this chapter, and shall be effective under the same timetable as specified in § 151.19.

(b) Lightering operations involving hazardous materials, other than oil, may be conducted only with the specific approval of the Commandant. A request to lighter hazardous materials, other than oil, must be submitted to Commandant (G–WPE) prior to the planned beginning of lightering operations. The request must include the information described in § 156.215(a) to the extent known, for the initial transfer, and the estimated frequency of subsequent lightering operations. After the entry into force of Annex II to MARPOL 73/78, vessels lightering hazardous materials shall carry an International Pollution Prevention Certificate for the Carriage of Noxious Liquid Substances in Bulk (1973), if required by Annex II to MARPOL 73/78, or equivalent documentation of compliance with the annex.

§156.215 Pre-arrival notices.

(a) The master, owner or agent of each vessel to be lightered must give at least 24 hours advance notice to the Captain of the Port nearest the lightering location or zone, prior to arrival in the lightering location or zone. This advance notice must include:

(1) The vessel's name, call sign or official number, and registry:

(2) The cargo type (if oil) or shipping name (if hazardous material) and approximate amount on board;

(3) The number of transfers expected;

(4) The lightering location or zone to be used;

(5) The estimated time of arrival in the lightering location or zone;

(6) The estimated duration of transfer operations; and

(7) The name and destination of service vessel(s).

(b) In the event the estimated time of arrival in the lightering location or zone changes by more than six hours, the Master, owner or agent of each vessel to be lightered must advise the Captain of the Port of this change as soon as possible.

(c) Where lightering is conducted as a result of collision, grounding, tank rupture or any similar emergency, immediate notice must be given to the Captain of the Port.

§ 156.220 Reporting of incidents.

(a) An immediate report must be made to the nearest Captain of the Port, by the service vessel, if fire, explosion, collision, grounding or any similar emergency, which poses a threat to the vessels involved, occurs during lightering.

(b) Any discharge of oil or hazardous material into the water shall be reported, by the service vessel, in accordance with the procedures specified in § 151.15 of this chapter.

§ 156.225 Designation of lightering zones.

The District Commander is delegated the authority to designate lightering zones and their operating requirements, where they are necessary for safety or environmental protection. When a lightering zone has been designated, lightering operations in a given geographic area may only be conducted within the designated lightering zone.

§ 156.230 Factors considered in designating lightering zones.

The following factors are considered in designating a lightering zone:

(a) The findings of the environmental analysis or, if prepared, the Environmental Impact Statement;

(b) The proximity of the zone to:

(1) Shipping lanes;

(2) Vessel traffic schemes or vessel separation systems;

(3) Anchorages;

(4) Fixed structures;

(5) Designated marine sanctuaries;

(6) Commerical and recreational fishing areas;

(7) Environmentally sensitive areas; and

(8) Designated units of the National Park System, National Wild and Scenic Rivers System, National Wilderness Preservation System, properties included on the National Register of Historic Places and National Registry of Natural Landmarks, and National Wildlife Refuge System.

(c) The traditional use of areas for lightering operations;

(d) The normal weather and sea conditions in the areas, and their effect on lightering operations, and the fate of possible cargo discharges;

(e) The depth of water and underwater obstructions that may adversely impact anchorages and clearance of vessels;

(f) Other relevant safety, environmental, or economic data.

I. S. Gracey,

Admiral, U.S. Coast Guard Commandant.

[FR Doc. 84–7730 Filed 3–23–84; 8:45 am]

BILLING CODE 4910–14–M

VETERANS ADMINISTRATION

38 CFR Part 36

Increase in Maximum Permissible Interest Rates on Guaranteed Manufactured Home Loans, Home and Condominium Loans, and Home Improvement Loans

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is increasing the maximum interest rates on guaranteed manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans. In addition, the maximum interest rates applicable to fixed payment and graduated payment home and condominium loans, and to home improvement and energy conservation loans are also increased. These increases are necessary because previous rates were not competitive enough to induce lenders to make guaranteed or insured home loans without substantial discounts, or to make manufactured home loans. The increase in the interest rates will assure a continuing supply of funds for home mortgages, home improvement and manufactured home loans.

EFFECTIVE DATE: March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. George D. Moerman, Loan Guaranty Service (264), Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, N.W. Washington, D.C. 20420, (202–389–3042).

SUPPLEMENTARY INFORMATION: The Administrator is required by section 1819(f), title 38, United States Code, to establish maximum interest rates for manufactured home loans guaranteed by the VA as he finds the manufactured home loan capital markets demand. Recent market indicators—including the prime rate, the general increase in interest rates charged on conventional manufactured home loans, and the increase in other short-term and long-term interest rates—have shown that the manufactured home capital markets have become more restrictive. It is now necessary to increase the interest rates on manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans in order to

assure an adequate supply of funds from lenders and investors to make these types of VA loans.

The Administrator is also required by section 1803(c), title 38, United States Code, to establish maximum interest rates for home and condominium loans, including graduated payment mortgage loans, and for loans for home improvement purposes. Recent market indicators—including the rate of discount charged by lenders on VA and Federal Housing Administration loans and the general increase in interest rates charged by lenders on conventional loans, have shown that the mortgage money market has become more restrictive. The maximum rates in effect for VA guaranteed home and condominium loans and those for energy conservation and home improvement purposes have not been sufficiently competitive to induce private sector lenders to make these types of VA guaranteed or insured loans without imposing substantial discounts. To assure a continuing supply of funds for home mortgages through the VA loan guaranty program, it has been determined that an increase in the maximum permissible rates applicable to home and improvement loans is necessary. The increased return to the lender will make VA loans competitive with other available investments and assure a continuing supply of funds for guaranteed and insured mortgages.

Regulatory Flexibility Act/Executive Order 12291

For the reasons discussed in the May 7, 1981 **Federal Register** (46 FR 25443), it has previously been determined that final regulations of this type which change the maximum interest rates for loans guaranteed, insured, or made pursuant to chapter 37 of title 38, United States Code, are not subject to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601–612.

These regulatory amendments have also been reviewed under the provisions of Executive Order 12291. The VA finds that they do not come within the definition of a "major rule" as defined in that Order. The existing process of informal consultation among representatives within the Executive Office of the President, OMB, the VA and the Department of Housing and Urban Development has been determined to be adequate to satisfy the intent of this Executive Order for this category of regulations. This alternative consultation process permits timely rate adjustments with minimal risk of premature disclosure. In summary, this consultation process will fulfill the intent of the Executive Order while still permitting compliance with statutory responsibilities for timely rate adjustments and a stable flow of mortgage credit at rates consistent with the market.

These final regulations come within exceptions to the general VA policy of prior publication of proposed rules as contained in 38 CFR 1.12. The publication of notice of a regulatory change in the VA maximum interest rates for VA guaranteed, insured, and direct home and condominium loans, loans for energy conservation and other home improvement purposes, and loans for manufactured home purposes would create an acute shortage of funds pending the final rule publication date which would necessarily be more than 30 days after publication in proposed form. Accordingly, it has been determined that publication of proposed regulations prior to publication of final regulations is impracticable, unnecessary, and contrary to the public interest.

(Catalog of Federal Domestic Assistance Program numbers, 64.113, 64.114, and 64.119)

These regulations are adopted under authority granted to the Administrator by sections 210(c), 1803(c)(1), 1811(d)(1) and 1819(f) and (g) of title 38, United States Code. The regulations are clearly within that statutory authority and are consistent with Congressional intent.

These increases are accomplished by amending sections 36.4212(a)(1), (2), and (3), and 36.4311(a), (b), and (c), and 36.4503(a), title 38, Code of Federal Regulations.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing, Loan programs—housing and community development, Manufactured homes, Veterans.

Approved: March 20, 1984.

By direction of the Administrator:

John W. Hagan, Jr.,

Deputy Chief Benefits Director.

PART 36—LOAN GUARANTY

The Veterans Administration is amending 38 CFR Part 36 as follows:

1. In § 36.4212, paragraph (a) is revised as follows:

§ 36.4212 Interest rates and late charges.

(a) The interest rate charged the borrower on a loan guaranteed or insured pursuant to 38 U.S.C. 1819 may not exceed the following maxima except on loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration prior to the respective effective date: (38 U.S.C. 1819(f))

(1) Effective March 21, 1984, 15 percent simple interest per annum for a loan which finances the purchase of a manufactured home unit only.

(2) Effective March 21, 1984, 14½ percent simple interest per annum for a loan which finances the purchase of a lot only and the cost of necessary site preparation, if any.

(3) Effective March 21, 1984, 14½ percent simple interest per annum for a loan which will finance the simultaneous acquisition of a manufactured home and a lot and/or the site preparation necessary to make a lot acceptable as the site for the manufactured home.

* * * * *

2. In § 36.4311, paragraphs (a), (b), and (c) are revised as follows:

§ 36.4311 Interest rates.

(a) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 13 per centum per annum, effective March 21, 1984, the interest rate on any home or condominium loan, other than a graduated payment mortgage loan, guaranteed or insured wholly or in part on or after such date may not exceed 13 per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

(b) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 13¼ per centum per annum, effective March 21, 1984, the interest rate of any graduated payment mortgage loan guaranteed or insured wholly or in part on or after such date may not exceed 13¼ per centum per annum. (38 U.S.C. 1803(c)(1))

(c) Effective March 21, 1984, the interest rate on any loan solely for energy conservation improvements or other alterations, improvements or repairs, which is guaranteed or insured wholly or in part on or after such date may not exceed 14½ per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

* * * * *

3. In § 36.4503, paragraph (a) is revised as follows:

§ 36.4503 Amount and amortization.

(a) The original principal amount of any loan made on or after October 1, 1980, shall not exceed an amount which bears the same ratio to $33,000 as the amount of the guaranty to which the veteran is entitled under 38 U.S.C. 1810 at the time the loan is made bears to $27,500. This limitation shall not

preclude the making of advances, otherwise proper, subsequent to the making of the loan pursuant to the provisions of § 36.4511. Except as to home improvement loans, loans made by the Veterans Administration shall bear interest at the rate of 13 percent per annum. Loans solely for the purpose of energy conservation improvements or other alterations, improvements, or repairs shall bear interest at the rate of 14½ percent per annum. (38 U.S.C. 1811(d)(1) and (2)(A))

BILLING CODE 8325-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[NC-002; A-4-FRL 2551-3]

Approval and Promulgation of Implementation Plans; North Carolina: 1982 Revision to Charlotte CO Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On February 3, 1983 (48 FR 5052), EPA proposed to approve North Carolina's revision to its carbon monoxide (CO) State Implementation Plan (SIP) for the Charlotte area since the revision meets the requirements of the Clean Air Act and EPA policy. There were no public comments in response to the proposal. At the time of the proposal, portions of the SIP dealing with the inspection/maintenance program and commitments to certain transportation control measures (TCM's) were lacking, although the draft versions had been found to be approvable. These remaining portions of the SIP still have not been officially submitted, but North Carolina has submitted a schedule for submitting them by May 1, 1984. EPA is approving this schedule and the other officially submitted portions of the SIP. EPA, however, is not yet finding that the SIP as a whole meets the requirements of the Act. EPA will approve the total plan only if North Carolina submits the missing elements.

DATE: This action is effective April 25, 1984.

ADDRESS: Copies of the revision are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC 20408.

Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460.

Environmental Protection Agency, Region IV, Air Management Branch, 345 Courtland Street, Atlanta, GA 30365.

Air Quality Section, Division of Environmental Management, NC Department of Natural Resources and Community Development, P.O. Box 26787, Raleigh, NC 27611.

FOR FURTHER INFORMATION CONTACT: Tom Lyttle, EPA, Region IV, Air Management Branch at 404/881-2864 (FTS: 257-2864).

SUPPLEMENTARY INFORMATION: The 1977 Amendments added a new Part D to Title I of the Clean Air Act. Under this Part, the States were required to revise their SIP's for all nonattainment areas and submit the revisions to EPA by January 1, 1979 (Section 171-178 of the Act; Section 129(c) (uncodified) of Pub. L. 95-95). The revised plans were to provide for attainment by December 31, 1982, unless the State demonstrated that they could not attain either the ozone or CO standard by that date despite the implementation of all reasonably available control measures (Sections 172(a)(1), 172(a)(2)), and requested an extension.

If EPA approved this demonstration, the attainment date for ozone or CO could be extended up to December 31, 1987. States receiving such extensions were to submit a second SIP revision that provides for attainment by the approved attainment date and complies with all of the Part D requirements (Section 172(c)). These second SIP revisions had to be submitted by July 1, 1982 (Section 129(c) (uncodified), Pub. L. 95-95).

North Carolina submitted its initial SIP revision for the Charlotte CO nonattainment area in June 1979. The State requested that EPA extend the attainment date for the CO standard in this area to December 31, 1987. EPA granted this request and approved the initial plan revision on March 19, 1981 (46 FR 17556). North Carolina submitted its 1982 CO SIP revision on June 17, 1982. A full discussion of the SIP revision and of EPA's evaluation was contained in the February 3, 1983, proposal notice and will not be repeated in detail here.

The 1982 revision utilized a localized modeling analysis to demonstrate attainment of the CO standard at various "hot spot" intersections in the Charlotte area. After adoption of I/M and various site-specific TCM's, attainment of the CO standard by 1987 was demonstrated for all "hot spot" intersections.

Most portions of the SIP revision meet all requirements for approval by EPA. However, two portions of the SIP dealing with I/M and with TCM commitments have not been submitted officially. EPA proposed approval of the I/M portion of the plan on February 3, based on the draft I/M plan submitted in September 1982. These regulations were adopted by the North Carolina Department of Motor Vehicles in September 1982, and the I/M program has been in operation since December 1, 1982. The SIP also lacked commitments from the North Carolina Department of Transportation (NCDOT) to fund certain intersection improvements necessary to meet the CO standard. We have since received letters from NCDOT and the North Carolina Department of Natural Resources and Community Development (NCDNRCD) committing to the construction of these intersection improvements and identifying funding for them.

The SIP revision originally included construction of two parallel roads to assist in meeting the CO standard. NCDNRCD performed an analysis of the impact of these two parallel facilities which indicates they are not necessary to expeditious attainment of the CO standard. As a result, North Carolina intends to delete these two road construction projects from the SIP. Because deletion of the parallel facilities will not affect expeditious attainment of the CO standard, EPA concurs with the deletion of these two projects. The analysis performed by NCDNRCD will be adopted as a part of the SIP.

In a letter dated December 12, 1983, NCDNRCD informed us that a public hearing on these two outstanding items will be held on January 31, 1984. After a 30-day comment period, these remaining items will be adopted by the Environmental Management Commission on April 12, and submitted promptly within 20 days thereafter.

A 45-day comment period was provided following the February 3, 1983, proposal to approve the SIP revision. No comments were received during that time.

Final Action

EPA has found that most portions of North Carolina's 1982 CO SIP revision meet all requirements of the Clean Air Act and EPA policy. The remaining portions, which EPA has reviewed in draft form, will meet all requirements if North Carolina submits them as final SIP revisions. Moreover, North Carolina has submitted a schedule calling for the submittal of the missing elements by May 1, 1984. EPA is approving this

schedule and the other, fully-submitted portions of the SIP. EPA, however, is not acting today on the revision as a whole. EPA will not approve the revision as a whole until North Carolina submits an acceptable final I/M program and acceptable final TCM commitments. If the official submittal is consistent with the draft submittal for these two items, EPA will approve the plan in full.

Under Executive Order 12291, today's action is not "major". It has been submitted to the Office of Management and Budget (OMB) for review.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See sec. 307(b)(2).)

Note.—Incorporation by reference of the State Implementation Plan for the State of North Carolina was approved by the Director of the Federal Register on July 1, 1982.

40 CFR Part 52

[Docket No. AW049VA; A-3-FRL 2552-1]

Approval and Promulgation of Implementation Plans; Approval of a Revision to the Virginia State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Commonwealth of Virginia has submitted a Consent Agreement and Order for an alternative emissions reduction plan (also referred to as a "bubble") for the Reynolds Aluminum Company's Bellwood reclamation facility located in Chesterfield County, Virginia. The bubble will allow an increase of total suspended particulate (TSP) from some individual sources while calling for the decrease of others.

The overall effect of the changes in TSP emissions will result in an overall reduction of TSP emissions from the facility. EPA has reviewed this bubble and has concluded that it meets all of the requirements of the Clean Air Act, 40 CFR Part 51, and EPA's Emission Trading Policy of April 7, 1982. Therefore, EPA approves this bubble as a revision of the Virginia State Implementation Plan (SIP).

EFFECTIVE DATE: April 25, 1984.

ADDRESSES: Copies of the revision and accompanying support material are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Air Management Branch, Curtis Building, Sixth and Walnut Streets, Philadelphia, PA 19106, Attn: Patricia Guaghan.

Virginia State Air Pollution Control Board, Room 801, Ninth Street Office Building, Richmond, VA 23219, Attn: Mr. John M. Daniel, Jr.

Public Information Reference Unit, EPA Library, Room 2922, U.S. Environmental Protection Agency, 401 M. Street SW., Washington, DC 20460.

The Office of the Federal Register, 1100 L. Street NW., Room 8401, Washington, DC 20408.

FOR FURTHER INFORMATION CONTACT: Mr. Harold A. Frankford at the Region III address stated above or telephone 215/597-8392.

SUPPLEMENTARY INFORMATION:

Background/Description of Revision

On April 1, 1983, the Commonwealth of Virginia submitted to EPA an alternative emissions reduction plan (also referred to as a "bubble") for the Reynolds Aluminum Company's Bellwood reclamation facility located in Chesterfield County. A Consent Agreement and Order containing the terms of the bubble has been agreed to by the Reynolds Metals Company and the Virginia State Air Pollution Control Board.

Under the terms of the bubble, casthouse melting furnaces #2, #4, and #5 will be limited to 6.25 pounds per hour (lb/hr) for TSP emissions as opposed to the SIP-allowable emission of 8.85 lb/hr. At the same time, the bubble would allow TSP emissions from the Herreshoff process of 11.00 lb/hr. The Herreshoff process includes the Hereshoff furnace, charring kiln, "B" mill, carbon separater and screening operations. The allowable SIP emission limit of 17.25 lb/hr would equal the SIP-allowable TSP emissions limitations from the Bellwood reclamation plant. The Order specifies the emission limits for the Herreshoff furnace, the casthouse melting furnaces, the charring kiln and the screening operation. Pre-bubble actual emissions from the casthouse melting furnaces have been 3.30 lb/hr and 24.45 lb/hr from the Herreshoff process. Therefore, actual emissions under this bubble will decrease by at least 10.50 lb/hr (27.75–17.25).

The visible emissions from the casthouse melting furnaces/charring kiln baghouse complex stacks and from the screening operations stacks may not exceed 10% opacity and are subject to the requirements of Section 4.02, Virginia Air Pollution Control Regulations. The State Order also contains provisions for stack testing, emissions testing, recordkeeping and monthly procedures, operation of equipment by trained personnel, and maintenance of air pollution control equipment, including an inventory of bags and other spare parts.

In order to assure that this bubble would not violate National Ambient Air Quality Standards (NAAQS) for TSP, the State performed a modeling analysis using the single source CRSTER model. The results show that the bubble will not cause any significant annual or 24 hour impacts on ambient TSP levels in the Chesterfield County area. This county is presently designated as "better than national standards" for TSP. See 40 CFR 81.347, 40 FR 55258 (1981).

Certification of Public Hearing

The Commonwealth of Virginia has certified that a public hearing, required by 40 CFR 51.4, was held on January 4, 1983 in the Chesterfield Courthouse, Virginia.

Proposed Rulemaking Notice

On November 22, 1983, 48 FR 52754, EPA proposed to approve this bubble for the Reynolds Aluminum Company's Bellwood reclamation facility. Comments on the proposed variance were requested at that time. During the 30-day public comment period, no comments were received.

EPA Evaluation/Action

EPA considers this TSP bubble to be a Level I emissions trade under EPA's proposed Emissions Trading Policy Statement (47 FR 15076, April 7, 1982), as the following criteria are met: (1) All of the stacks are located within 250 meters of each other; (2) the stacks handling the increased emissions are higher (and are within GEP limits) than the stacks handling the sources with decreasing emissions; (3) there is no net allowable or actual emissions increase; and (4) no complex terrain is within the area of significant impact. When meeting the above conditions, Level I bubbles do not require an air qualify modeling analysis. EPA considers the CRSTER modeling performed by Virginia to be acceptable as a supplementary air quality analysis.

Under the proposed Emissions Trading Policy Statement, States may use SIP-allowable emissions as the trading baseline, if proper consideration of Prevention of Significant Deterioration (PSD) increment consumption is assured. This bubble relies on an allowable emissions trading baseline. As indicated above, the emission limitations under this bubble will bring all of the affected facilities into compliance by requiring a net reduction in actual emissions. Accordingly, total actual emissions will be lower than the total actual emissions of the last several years. Due to this, the bubble will not consume PSD increment.

Conclusion

In view of the above evaluation, the Administrator approves the above alternative emissions reduction plan for TSP at the Reynolds Aluminum Company's Bellwood reclamation facility as a revision to the Virginia State Implementation Plan. EPA is approving this revision as it meets the requirements of Section 110(a)(2) of the Clean Air Act and of 40 CFR Part 51.

General

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

(c) The Plan revision listed below was submitted on the date specified * * *

(83) Approval of an alternative emissions reduction plan for total suspended particulates at the Reynolds Aluminum Company's Bellwood reclamation facility located in Chesterfield County, Virginia submitted on April 1, 1983 by the Commonwealth of Virginia.

[FR Doc. 84–8021 Filed 3–23–84; 8:45 am]

BILLING CODE 6560–50–M

---

40 CFR Part 81

[A–10–FRL 2551–7]

Designation of Areas for Air Quality Planning Purposes; Revision to the State of Idaho

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this Notice, EPA announces its approval of revisions to nonattainment boundaries for total suspended particulates (TSP) in Pocatello and Soda Springs, Idaho. The reduction in the size of the two nonattainment areas is based on documentation submitted by the Idaho Department of Health and Welfare (IDHW) pursuant to Section 107(d) of the Clean Air Act. Air quality data and emission reductions achieved through control strategy implementation support these boundary changes.

EFFECTIVE DATE: March 26, 1983.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Air Programs Branch, M/S 532, Environmental Protection Agency (10A–83–4), 1200 Sixth Avenue, Seattle, Washington 98101–3188.

State of Idaho, Department of Health and Welfare, 450 W. State Street, Boise, Idaho 83720.

FOR FURTHER INFORMATION CONTACT: Michael J. Schultz, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone (206) 442–1985 (FTS) 399–1985.

SUPPLEMENTARY INFORMATION:

I. Background

On November 1, 1983 (48 FR 50361) EPA proposed approval of boundary changes for the Pocatello and Soda Springs TSP primary standard nonattainment areas. Two corrections to this proposal were published on November 29, 1983 (48 FR 53721). These two **Federal Registers** may be consulted for additional background information and a discussion of the two nonattainment areas.

II. Response to Comments

A 30-day public comment period was provided following publication of the proposed rulemaking. Comments were received from two companies in Idaho. One commentor suggested that the Soda Springs nonattainment boundary not be changed but the entire area be redesignated to "unclassifiable." Arguments for this position focused on uncertainty of air quality data. The commenter argued that: (1) Certain special study ambient data from 1979 and earlier was ignored, (2) ambient monitoring data was not collected to confirm that part of the nonattainment area now meets primary standards, (3) recent data from two industry operated monitors was ignored, (4) data showing continuing violations of primary standards is from a monitor that may be improperly sited and thus the data is questionable, and (5) EPA incorrectly identified emission increases for two sources.

EPA concurs with many of the statements made by the commentor, but not with the logic presented and conclusions reached. EPA's response to each of the above arguments are as follows: (1) EPA agrees that data was ignored from a certain special purpose monitor for the purposes of this redesignation analysis. This data was purposely omitted since monitoring at the site was discontinued in 1979 after it was determined that the monitor did not meet EPA siting criteria. (2) As pointed out, no recent data exists to document that primary TSP standards are being met where a special study monitor showed violations of the 24-hour standard in 1978–79. However, EPA has every reason to believe that at least primary standards are now being met at this site since the adjacent industrial facility has reduced its particulate emissions by 87% and the specific source of fugitive emissions which appeared to cause high readings was eliminated. (3) Again EPA agrees that certain industry generated data was ignored. However, neither of the two monitors in question meet quality assurance requirements. Further, data from one of the monitors showed a violation of the primary standard in 1982. (4) EPA disagrees with the commentor that the monitor in the Conda area showing recent violations of primary standards has siting problems. Past EPA investigations of this claim have shown that the monitor does meet EPA siting criteria. (5) EPA understands that reported increases in emissions from industrial operations in Conda were in fact due to improved inventory procedures and not due to actual increase in emissions. Nonetheless, ambient data shows the Conda area to be exceeding primary TSP standards.

The second commentor supported our proposed approval of smaller boundaries for the two primary standard nonattainment areas but contended that EPA should not have retained the larger boundaries for the secondary standard nonattainment areas. The commentor felt that ambient data supported a much smaller secondary standard nonattainment area for Pocatello and possibly for Soda Springs as well.

EPA proposed the subject boundary revisions because of a request and justification submitted by the IDHW. Air quality data provided with the IDHW request supported the proposed boundary revisions.

EPA policy requires that redesignations to attainment, that are not supported by dispersion modeling, be supported by a minimum of eight calender quarters of ambient data showing no violation of the applicable standards. Documentation submitted by IDHW did not include dispersion modeling and did show violations of secondary standards within the preceding eight quarters. In both Soda Springs and Pocatello, one or more monitors located outside the proposed nonattainment boundary but inside the original larger boundary had violations of secondary standards. Thus, the State had no basis for requesting and EPA had no basis for approving the smaller, revised boundaries as being appropriate for both primary and secondary TSP nonattainment.

III. Final Action

EPA approves the revised smaller boundaries for primary standard TSP nonattainment areas in Pocatello and Soda Springs—Conda, Idaho. The previous boundaries shall remain in effect for nonattainment of secondary standards. Detailed boundary descriptions and maps are contained in the docket.

Pursuant to the provisions of 5 U.S.C. 605(b) I certify that attainment status redesignations under Section 107(d) of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 8709 January 27, 1981). This rule constitutes an attainment status redesignation under Section 107(d) within terms of the January 27 certification. This action imposes no regulatory requirements but only changes area air quality designations. Any regulatory requirements which may become necessary as a result of this action will be dealt with in a separate action.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

(Secs. 107(d) and 301(a) of the Clean Air Act as amended (42 U.S.C. 7407(d) and 7601(a))

Dated: March 16, 1984.

William D. Ruckelshaus,

Administrator.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

Part 81 of Chapter I, Title 40, Code of Federal Regulations should be amended as follows:

Subpart C—Section 107 Attainment Status Designations

In § 81.313, the following status designation table for total suspended particulates is revised to read as follows:

§ 81.313 Idaho

Designated area	Does not meet primary standards	Does not meet secondary standards	Cannot be classified	Better than national standards
Idaho TSP				
Silver Valley (Shoshone County)			×	
Pocatello—12 square mile industrial area east of Pocatello	×	×		
Pocatello—336 square mile area from Schiller at the east to Inkom at the west, including Pocatello.				
Soda Springs—4½ square mile area encompassing Conda and the surrounding industrial area.	×			
Soda Springs—86 square miles area encompassing Soda Springs, Conda, and the industrial area in between.		×		
Lewiston	×			×
Remainder of State

BILLING CODE 6560-50-M

40 CFR Part 145

[WH-FRL 2552-3]

Arkansas Oil and Gas Commission; Underground Injection Control; Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of state program.

SUMMARY: The State of Arkansas has submitted an application under Section 1425 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing Class II oil and natural gas related injection wells. After careful review of the application and comments received from the public, the Agency has determined that the State's injection well program for Class II wells meets the requirements of Section 1425 of the Act. Therefore, this application covering Class II injections is approved.

EFFECTIVE DATE: March 26, 1984.

FOR FURTHER INFORMATION CONTACT: Shirley Augurson, Groundwater Protection Section, Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270. PH: (214) 767-9903. Copies of EPA's summary response to public comment are available at the above address.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SDWA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which in his judgment a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under Section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The SDWA was amended on December 5, 1980, to include Section 1425, which establishes an alternative method by which a State may obtain primary enforcement responsibility for those portions of its UIC program related to the recovery and production of oil and natural gas (Class II wells). Specifically, instead of meeting the Federal Regulations (40 CFR Parts 124, 144, and 145) and related Technical Criteria and Standards (40 CFR Part 146), a State may demonstrate that its program meets the more general statutory requirements of Section 1421(b)(1) (A) through (D) and represents an effective program to prevent endangerment of underground sources of drinking water.

The State of Arkansas was listed as needing a UIC program on September 25, 1978 (43 FR 43420). The State submitted an application under Section 1425 on June 17, 1983, for the approval of a UIC program governing Class II injection wells to be administered by the Arkansas Oil and Gas Commission (AOGC). EPA published notice of its receipt of the application, requested public comments, and scheduled a public hearing on the UIC program submitted by the AOGC on June 29, 1983 (47 FR 5262). A public hearing was held in El Dorado, Arkansas, on August 11, 1983. After careful review of this application and comments received from the public, I have determined that the Arkansas UIC program submitted by the AOGC for Class II injection wells meets the requirements of Section 1425 of the SDWA, and hereby approve it. The effect of this approval is to establish this program as the applicable underground injection control program under the SDWA for the State of Arkansas. The requirements of this program include State statutes and regulations set forth at: Arkansas Statute 53; 101 *et al.*; 82; 1901 *et al.*, as amended by Act 523 (1981), and State of Arkansas General Rules and Regulations of the Oil and Gas Commission as amended March 22, 1983, as amended February 20, 1984.

Since this action simply adopts as the Federal program the State laws and regulations already in effect, EPA is publishing this approval effective immediately. This will enable Arkansas to begin immediately issuing UIC permits for Class II injection wells under the Federally approved program.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 145, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 145

Indians—lands, Reporting and recordkeeping requirements, Intergovernmental relations, Penalties, Confidential business information, Water supply.

OMB Review

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that approval by EPA under Section 1425 of the Safe Drinking Water Act of the application by the Arkansas Oil and Gas Commission will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

[WH-FRL 2547-6]

Connecticut Department of Environmental Protection; Underground Injection Control; Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of state program.

SUMMARY: The State of Connecticut has submitted an application under Section 1422 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing Classes I, II, III, IV, and V injection wells. After careful review of the application, the Agency has determined that the State's injection well program for all classes of injection wells meets the requirements of Section 1422 of the Act and, therefore, approves it.

EFFECTIVE DATE: April 25, 1984.

FOR FURTHER INFORMATION CONTACT: Jerome J. Healey, Water Supply Branch, Environmental Protection Agency.

Region I, JFK Federal Building, Boston, Massachusetts 02203. PH: (617) 723–6486.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SDWA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which, in his judgment, a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under Section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The State of Connecticut was listed as needing a UIC program on March 19, 1980 (45 FR 17632). The State submitted an application under Section 1422 on September 29, 1983, for a UIC program to be administered by the Connecticut Department of Environmental Protection (CDEP). On December 20, 1983, EPA published notice of receipt of the application, requested public comments, and offered a public hearing on the UIC program submitted by the CDEP (48 FR 56244). Neither requests for public hearing nor requests to offer testimony at such hearings were received by EPA. Therefore, pursuant to the provisions of 40 CFR 145.31(c), the public hearing was cancelled because of lack of sufficient public interest. After careful review of the application, I have determined that the Connecticut UIC program for Classes I, II, III, IV, and V injection wells submitted by the CDEP meets the requirements established by the Federal regulations pursuant to Section 1422 of the SDWA and, hereby, approve it. The effect of this approval is to establish this program as the applicable underground injection control program under the SDWA for the State of Connecticut. The requirements of this program include State statutes and regulations set forth at: Conn. Gen. Stat. sections 1–19, 22a–6, 22a–7, 22a–16, 22a–19, 22a–20, 22a–137, 22a–416, 22a–423, 22a–430, 22a–431, 22a–435, 22a–438, 52–107, and Conn. Agencies Regs: 22a–430–8.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 145, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

Hazardous Waste Management System: General; Standards for Generators of Hazardous Waste; State Hazardous Waste Program Requirements; Correction

AGENCY: Environmental Protection Agency.

ACTION: Final rule; correction.

SUMMARY: This document corrects the final rule on the Uniform Hazardous Waste Manifest regulations that appear at pages 10490–10507 in the **Federal Register** of Tuesday, March 20, 1984, (45 FR 10490). This action is necessary to correct technical errors.

FOR FURTHER INFORMATION CONTACT: Carolyn K. Barley, (202–382–5235).

The following corrections are made in FR Document 84–7166 appearing on 10490 in the issue of March 20, 1984:

1. On page 10493, column one, first paragraph, first sentence under E. Implementation Date "after September 20, 1984" is corrected to read "on September 20, 1984."

2. On page 10493, column three, first full paragraph, second sentence "15,000 or two percent or more of the shipments are interstate." is corrected to read "30,000 or two percent more of the shipments are interstate."

3. On page 10495, column three, second full paragraph, third sentence "that only one uniform manifest is required" is corrected to read "that only one manifest is required".

4. On page 10498, column two, first full paragraph, third sentence "(e.g., "* * * and the laws/regulations of the State regulations of the State of (name of State)" is corrected to read "(e.g., "* * * and the laws/regulations of the State of (name of State)".

5. On page 10499, second column, item 8 at the bottom of the page "the federal identification (in item 16); " is corrected to read "the federal certification (in item 16); ".

[OPTS-82007A; TSH-FRL 2446-2]

Chlorinated Terphenyl; Submission of Notice of Manufacture or Importation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule requires that the Environmental Protection Agency (EPA) be notified of any manufacture or importation of chlorinated terphenyl, a chemical recommended for testing by the Interagency Testing Committee established under section 4(e) of the Toxic Substances Control Act. Manufacture or importation by a small business (as defined in 40 CFR 704.3(s)) is exempt from this notice requirement. The purpose of the notice requirement is to alert the Agency if the chemical will be manufactured in, or imported into the United States, and to ensure that EPA has the opportunity to investigate the health and environmental impacts of such activity.

EFFECTIVE DATE: May 25, 1984.

FOR FURTHER INFORMATION CONTACT: Jack P. McCarthy, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, D.C. 20460, Toll free: (800-424-9065), In Washington, D.C.: (554-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION:

I. Authority

The Agency is promulgating a rule under section 8(a) of the Toxic Substances Control Act (TSCA) requiring notice of any current manufacture or import of chlorinated terphenyl and notice of any proposed manufacture or import. TSCA section 8(a) authorizes the Administrator to promulgate rules under which each person (other than a small manufacturer or processor) who manufactures or processes or who proposes to manufacture or process a chemical substance or mixture shall submit such reports as the Administrator may reasonably require.

Under this rule, which was proposed in the **Federal Register** of April 29, 1983 (48 FR 19419), the reporting requirement consists of a notice to EPA stating that a person is manufacturing or proposing to manufacture chlorinated terphenyl, or is importing or proposing to import chlorinated terphenyl as a chemical substance in bulk or as part of a mixture. The notice also would include information on uses, production quantities, and chemical composition. If EPA is notified of chlorinated terphenyl manufacture or import, the Agency will reconsider the need for action to require testing under section 4 of TSCA or for control of the reported activity.

II. Reasons for This Rule

A. ITC Concerns

The Interagency Testing Committee (ITC) designated the category of polychlorinated terphenyls for testing consideration in April 1978 (43 FR 16684). Chlorinated terphenyl is a member of this category and is the only member of the category on the TSCA Chemical Substance Inventory. Other members of the category are subject to Premanufacture Notification under section 5 of TSCA.

The ITC recommended that polychlorinated terphenyls be tested for carcinogenicity, mutagenicity, teratogenicity, other chronic health effects, and for environmental effects. The recommendations were based on (1) a chemical structure similar to PCBs, (2) increasing quantities imported after domestic production stopped in 1972, (3) wide environmental dispersion from polychlorinated terphenyls' use in waxes for investment casting, (4) chlorinated terphenyl residues found in human blood, fat and milk, and in samples of water and sludge, (5) an indication from available data of a potential for bioaccumulation, and (6) no data on suspected carcinogenic, mutagenic, and teratogenic effects, with incomplete characterization of chronic health and environmental effects.

Chlorinated terphenyl is produced commercially by chlorination of commercial terphenyl, and is a mixture of ortho-, meta-, and para-terphenyl. As a commercial product, chlorinated terphenyl is a mixture of chloroterphenyls having varying numbers and arrangements of chlorine atoms. Commercial-grade chlorinated terphenyl is a light yellow crystalline solid. Chlorinated terphenyl is identified by Chemical Abstract Service registry number 61788-33-8.

Chlorinated terphenyl has been used during this century for various commercial purposes. Before 1973, chlorinated terphenyl was used primarily as a plasticizer in adhesives, inks, sealants, caulking compounds, and waxes. Peak domestic production occurred in 1971 when about 20 million pounds were produced. However, Monsanto, the sole domestic producer, discontinued chlorinated terphenyl production in 1972 because of concern over the environmental effects of the chemically similar polychlorinated biphenyls (PCBs). After that time, chlorinated terphenyl was imported and used mainly in waxes for investment casting. According to information supplied by the United States Customs Service under Customs Information Exchange 36/72, chlorinated terphenyl was last imported into the United States in November 1979. A 1976 European Economic Community (EEC) law banned its use except under certain conditions such as closed-system electrical equipment. Currently, chlorinated terphenyl is not known to be manufactured anywhere.

Chlorinated terphenyl is very similar in chemical structure to PCBs and could have toxicological properties similar to PCBs. PCBs have a very stable chemical structure, so they persist in the environment. Chlorinated terphenyl, likewise, is known to persist in the environment, and potentially has similar adverse effects as PCBs. However, inadequate data are available on the health and ecological effects of chlorinated terphenyl. PCBs and chlorinated terphenyl were widely used and dispersed into the environment before their potential and real adverse effects were recognized; they are now ubiquitous in the environment, resulting in wide range human exposure.

In addition, the commercial chlorinated terphenyl previously manufactured and imported was normally contaminated by PCBs (.05-5 percent). Thus, the manufacture of chlorinated terphenyl is indirectly controlled by section 6(e) of TSCA and the regulations thereunder. That section severely restricts the manufacture, processing, distribution in commerce, or use of PCBs. The history and specific requirements of the rules implementing section 6(e) are explained in the following editions of the **Federal Register**: 44 FR 31514 (May 31, 1979), 47 FR 17426 (April 22, 1982), 47 FR 24976 (June 8, 1982), 47 FR 37342 (August 25, 1982), and 47 FR 46980 (October 21, 1982) (requirements are listed in 40 CFR Part 761).

B. EPA Considerations and Response to Comments

Because domestic production and importation of chlorinated terphenyl apparently has ceased, EPA has concluded that the section 4 testing recommended by the ITC is not warranted at present (see EPA's response to the ITC 46 FR 54482).

In EPA's response to the ITC, several alternatives to testing were discussed and comments were requested on the alternatives. Five alternatives were outlined: (1) Develop a significant new

use rule (SNUR) under section 5(a); (2) list chlorinated terphenyl under section 5(b)(4) in combination with a SNUR (triggering notification requirements under section 5); (3) develop a section 8(a) reporting rule; (4) list chlorinated terphenyl under section 5(b)(4) in combination with a section 8(a) rule and thus require small businesses to report also; and (5) take no further action on chlorinated terphenyl since it appears to be adequately controlled by the PCB regulations. See 48 FR 19420 for a discussion of these alternatives and why EPA chose to propose a section 8(a) rule to track chlorinated terphenyl.

In response to EPA's proposal to subject chlorinated terphenyl to a section 8(a) reporting rule, comments were received from the Chemical Manufacturers Association (CMA) and the Natural Resources Defense Council, Inc. (NRDC).

CMA supports EPA's use of section 8(a) to track chlorinated terphenyl and all other chemicals designated by the ITC for testing consideration but not now produced or imported in measurable quantities. While EPA believes that a section 8(a) rule is appropriate for tracking chlorinated terphenyl because of the reasons stated in the proposal, other chemicals recommended by the ITC that are found to be not produced or imported may be more appropriately subject to a SNUR or section 5(b)(4) listing (with an accompanying SNUR and section 8(a) rule). Alternatively, EPA may decide that some of these chemicals require no follow-up activity. A chemical's production and use history, other regulations (both foreign and domestic), existing health and environmental effects data, and its likelihood of manufacture in the future (especially by small business), are all factors that must be considered in addition to the lack of current production. Thus, the facts surrounding each chemical must be examined before proposing a particular course of action; a section 8(a) rule will not always be the outcome.

Finally, CMA seems to suggest that EPA must develop a full scientific record before subjecting a chemical to a SNUR or section 5(b)(4) listing and that section 8(a) can monitor future commercial activities without making risk determinations that unjustifiably restrict future manufacture or use.

EPA will not forgo the use of a SNUR or section 5(b)(4) listing in the absence of a full scientific record. If EPA has sufficient data to show that a chemical may pose an unreasonable risk for example, the Agency would be justified in pursuing section 5(b)(4) listing. Very few chemicals have full scientific records. Waiting until records are fully developed would needlessly delay appropriate regulatory action.

While in partial agreement with EPA's decision to track chlorinated terphenyl with a section 8(a) rule, NRDC believes that chlorinated terphenyl should also be subject to section 5(b)(4) listing and an accompanying SNUR. EPA rejected this alternative and its reasoning is set forth at 48 FR 19420 and 19421. However, some additional discussion is appropriate.

For a chemical that is no longer in commercial use, NRDC is recommending three rulemakings: A section 8(a) rule, a section 5(b)(4) listing, and a SNUR. NRDC's scheme would appear to reserve section 8(a) reporting for chlorinated terphenyl's previous uses, in waxes for investment casting, tooling compounds, etc., and the SNUR for unknown new uses, which conceivably could be any use not identified in EPA's section 8(a) proposal. Since chlorinated terphenyl would be on the section 5(b)(4) list under NRDC's scheme, any person wanting to manufacture chlorinated terphenyl for any significant new use would be required to submit data that show that "the intended significant new use of the chemical substance will not present an unreasonable risk of injury to health or the environment."

The NRDC scheme has merit only if it is likely that chlorinated terphenyl will be manufactured for new uses; as stated in the proposal, EPA believes that this is unlikely. If chlorinated terphenyl were manufactured again for known uses, e.g., investment casting, then, except for the exemption of small businesses, EPA's and NRDC's schemes would yield the same data because chlorinated terphenyl's inclusion on the section 5(b)(4) list would have no impact since there is no data-generating link between section 5(b)(4) and section 8(a) as there is with a SNUR. Placing a chemical on the section 5(b)(4) list does, however, allow EPA to remove the small manufacturer exemption from section 8(a) rules. While this does not require a different level of reporting, as does the section 5(b)(4) and SNUR link, it does expand the respondent population. However, EPA believes that small businesses are unlikely to manufacture chlorinated terphenyl because of the expense of preparing chlorinated terphenyl free of PCB contamination and the need to manufacture large quantities to capture lost markets (see 48 FR 19420).

Thus, in the absence of the likelihood of new uses, NRDC's scheme would in effect mirror EPA's approach. However, NRDC's scheme would be resource intensive and require EPA to develop three rules instead of one.

NRDC's comments close with the statement that "it [EPA] does not seem to recognize that if use and exposure levels had been high enough at this time, all requisite section 4(a) findings could have been made and a test rule issued."

It was just this recognition that led us to propose that chlorinated terphenyl be tracked with a section 8(a) rule. In the event production is resumed for any use, EPA will consider a section 4 test rule or other regulatory action.

III. Requirements

This rule requires notice of any current or proposed manufacture or import of chlorinated terphenyl. Chlorinated terphenyl means a chemical substance, CAS No. 61788-33-6, comprised of various proportions of chlorinated ortho-, meta-, and para-terphenyl. Chlorinated terphenyl is produced by the chlorination of terphenyl. Consequently, the reaction product of the chlorination process (which under TSCA is a chemical substance) is composed of the mixed chlorinated isomers of terphenyl.

Persons who propose to manufacture or import chlorinated terphenyl must notify EPA within 15 days of the date they make this decision. Persons who are manufacturing or importing chlorinated terphenyl on the effective date of the rule must submit a notice within 30 days of the effective date. The notice must include company name and address, principal technical contact, and, to the extent that it is known to or reasonably ascertainable by the company, a description of the use or intended use of the chlorinated terphenyl; chemical composition information (including PCB impurity level); estimated production volume; and, as appropriate, the proposed date for initiating manufacture or import. This rule does not require testing to determine chemical composition information. However, for subsequent rules, similar information may be required to be submitted which EPA believes is reasonably ascertainable even if it involves testing to determine the information.

After receiving notice of current or proposed manufacture or import, EPA will carry out a follow-up investigation to determine whether the activity may present a risk to health or the environment. If a significant risk may result, EPA will consider additional regulatory action to investigate or control the proposed chlorinated terphenyl activity.

The codified material following this preamble will appear in Part 704 of Title 40 of the Code of Federal Regulations. Part 704 was recodified in the **Federal Register** of May 25, 1983 (48 FR 23420). The scope and compliance, general definitions, exemptions, and confidentiality claim sections of the proposal are now part of Subpart A of recodified 40 CFR Part 704. Therefore, this material will not be published again today. Persons should familiarize themselves with Part 704 so that they are aware of all the provisions of this rule.

IV. Exempt Persons

Small manufacturers and importers are not subject to this rule. The small business exemption standards are set out in the rule and have been designed to reduce the paperwork burden on small chemical manufacturers, while ensuring that EPA will receive a sufficient amount of chemical use, production, and exposure information to support an assessment of chemical risks. EPA believes that these standards serve the purpose of this rule. The rule also exempts persons who manufacture or import chlorinated terphenyl solely for research and development, as part of an article, or as a byproduct or impurity.

EPA is exempting importers of articles from this rule for several reasons. Past imports of chlorinated terphenyl were only in bulk form, and importing of the chemical in articles is unlikely. In addition, EEC countries forbid production of chlorinated terphenyl for use in articles, and known imports of chlorinated terphenyl originated in an EEC country. Moreover, EPA believes that it would be a significant and needless burden on importers of articles to try to ascertain if they contain chlorinated terphenyl. The exemption also is consistent with previous Agency reporting provisions for the Inventory (42 FR 64572 *et seq.*) and the Premanufacture Notification Regulations (48 FR 21722 *et seq.*).

EPA is exempting manufacture and import of chlorinated terphenyl as a byproduct because it was the intentional use of chlorinated terphenyl in products which caused the wide environmental dispersion of chlorinated terphenyl. EPA is not aware of any chemical manufacture that would lead to the production of chlorinated terphenyl as a byproduct. Chlorinated terphenyl may have been manufactured as a byproduct during the production of PCBs, but since the manufacture of PCBs has been banned, any manufacture of chlorinated terphenyl as a byproduct from this source has ceased.

This rule does require reporting from importers of mixtures containing chlorinated terphenyl. Since TSCA defines manufacture as importation, EPA considers an importer of a mixture as the manufacturer of each chemical substance contained in the mixture. Therefore a person intending to import a mixture containing chlorinated terphenyl is required by this rule to submit a notice to EPA. An importer of a mixture may be exempt from reporting if the small business exclusion is applicable. Thus, if a person with annual sales of less than $40 million but more than $4 million is importing a mixture containing chemicals A and B, the importer is a small manufacturer and need not submit notice to EPA. However, if chemical A is subject to a section 8(a) rule, and more than 45,400 kilograms of chemical A were imported, (not 45,400 kilograms of mixture AB), then the small business exclusion would no longer apply and the importer must submit notice.

V. Confidentiality

Any person submitting a notice may claim any part or all of the notice as confidential. Information which is claimed confidential will be disclosed by EPA only to the extent and by means of the procedures set forth in 40 CFR Part 2.

VI. Economic Impact

EPA estimates that compliance costs will range from $225–$716 for each notice. The cost estimate for Data Acquisition below assumes that the data are known to or reasonably ascertainable by the person submitting the notice. It does not include the laboratory cost of determining isomeric ratios for example. Costs include:

Data Acquisition	$107–$430
Notice Preparation (Typing)	17–51
Managerial Review	101–235
Total	225–716

Because available information shows that there was only one manufacturer and one importer of chlorinated terphenyl, EPA expects to receive few notices under this rule.

Because the cost of this rule is expected to be low and because it will effectively alert the Agency to commercial activity involving a potentially hazardous chemical, thereby allowing EPA to take appropriate action to require testing or control risks, the Agency believes that this action will benefit the public.

Upon receipt of a notice under this rule, EPA will decide what, if any, further information gathering, testing, or control actions are needed. Estimates of the costs of some possible actions are included in the economic support document that is contained in the public record for this rule. The actual costs of such actions will be assessed by EPA in the development of the appropriate follow-up rulemaking.

VII. Public Record

EPA has established a public record (docket number OPTS–82007) for this rulemaking document which, along with a complete index, is available for inspection in Rm. E–107, 401 M St., SW., Washington, D.C., 20460, from 8:00 a.m. to 4:00 p.m. Monday through Friday, except legal holidays. This record includes basic information considered by the Agency in developing this rule. Following is a list of the documents which constitute the record for this rulemaking. Public comments on the proposed rule are not individually listed, but will be available upon request in the OPTS Reading Room. EPA requests that it be notified of any additions to or deletions from this record within the next 30 days.

(1) Polychlorinated Terphenyls; Response to the Interagency Testing Committee (46 FR 54482) and all commments received thereon.

(2) 2nd Report of the Interagency Testing Committee (ITC) (43 FR 16684).

(3) Polychlorinated Biphenyls (PCBs); Manufacturing, Processing, Distribution in Commerce and Use Prohibitions Rule (44 FR 31514).

(4) Polychlorinated Biphenyls (PCBs); Use in Electrical Equipment; Proposed Rules (47 FR 17426).

(5) Chlorinated Biphenyls (PCBs); Manufacture, Processing, Distribution, and Use in Closed and Controlled Waste Manufacturing Processes; Proposed Rule (47 FR 24976).

(6) Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce and Use Prohibitions; Use in Electrical Equipment (47 FR 37342).

(7) Chlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce and Use Prohibitions; Use in Closed and Controlled Waste Manufacturing Processes (47 FR 46980).

(8) Economic Analysis of Section 8(a) Rule on Chlorinated Terphenyl.

(9) Economic Analysis of Final Section 8(a) Rule on Chlorinated Terphenyl.

VIII. Regulatory Assessment Requirements

A. Paperwork Reduction Act

The information collection requirements in this rule will be submitted for approval to the Office of

Management and Budget (OMB) under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Once the requirements have been approved and assigned an OMB control number a technical amendment to this rule will be published in the **Federal Register**.

B. Regulatory Flexibility Act

This rule will not have a significant economic impact on a substantial number of small entities. Only two companies manufactured or imported chlorinated terphenyl since 1971. Currently, no company is known to manufacture or import chlorinated terphenyl. This rule also contains a small manufacturer exemption (see definitions "Small Manufacturer"). Therefore, in accordance with the Regulatory Flexibility Act (Pub. L. 95–354), EPA has determined that this rule will not have a significant economic impact on a substantial number of small entities.

C. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this regulation is not major because it does not have an effect of $100 million or more on the economy. It is expected to have an annual cost of less than $2,000. It does not have a significant effect on competition, costs, or prices.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

IX. List of Subjects in 40 CFR Part 704

Environmental protection, Hazardous materials, Imports, Recordkeeping and reporting requirements.

Dated: March 16, 1984.

William D. Ruckelshaus,

Administrator.

PART 704—[AMENDED]

Therefore, 40 CFR Part 704 is amended as follows:

1. By redesignating the existing Subpart E as Subpart D.

2. By adding a new § 704.85 to read as follows:

§ 704.85 Chlorinated terphenyl.

(a) *Definitions.* (1) "Chlorinated terphenyl" means a chemical substance, CAS No. 61788–33–6, comprised of chlorinated ortho-, meta-, and paraterphenyl.

(2) "Extent of chlorination" means the percent by weight of chlorine for each isomer (ortho, meta, and para).

(3) "Isomeric ratio" means the ratios of ortho-, meta-, and parachlorinated terphenyls.

(4) "Polychlorinated biphenyl" means any chemical substance that is limited to the biphenyl molecule that has been chlorinated to varying degrees.

(5) "Small manufacturer" means a manufacturer (importers are defined as manufacturers under TSCA) who meets either of the following standards under this rule:

(i) First standard. A manufacturer of an existing chemical substance is small if its total annual sales, when combined with those of its parent company (if any), are less than $40 million. However, if the annual production volume of a particular chemical substance at any individual site owned or controlled by the manufacturer is greater than 45,400 kilograms (100,000 pounds), the manufacturer shall not qualify as small for purposes of reporting on the production of that chemical substance at the site, unless the manufacturer qualified as small under paragraph (a)(5)(ii) of this section.

(ii) Second standard. A manufacturer of an existing chemical substance is small if its total annual sales, when combined with those of its parent company (if any), are less than $4 million, regardless of the quantity of chemicals produced by that manufacturer.

(b) *Persons who must report.* Except for small manufacturers and as provided in § 704.5, the following persons are subject to the rule:

(1) Persons who manufacture or propose to manufacture chlorinated terphenyl.

(2) Persons who import (importers) or propose to import chlorinated terphenyl as a chemical substance in bulk or as part of a mixture.

(c) *What information to report.* Persons subject to this rule as described in paragraph (b) of this section must notify EPA of current or proposed manufacture or import of chlorinated terphenyl. The notice must include, to the extent that it is known to the person making the report or is reasonably ascertainable, the following information:

(1) Company name and address.

(2) Name, address, and telephone number of principal technical contact.

(3) A description of the use(s) or intended use(s) for chlorinated terphenyl.

(4) A description of the isomeric ratio and extent of chlorination of the chlorinated terphenyl and the impurity level of polychlorinated biphenyls.

(5) The quantity (by weight) manufactured or imported within 12 months prior to the effective date of the rule, if any, and the estimated quantity (by weight) to be manufactured or imported for the first three years following the date of the report or the date of the intended start of production, whichever occurs later.

(6) The proposed date for the initiation of manufacturing or importation of chlorinated terphenyl, if appropriate.

(d) *When to report.* Persons who are manufacturing or importing chlorinated terphenyl on the effective date of the rule must notify EPA within 30 days of the effective date of the rule. Persons who propose to manufacture or import chlorinated terphenyl must notify EPA within 15 days after making the management decision described in § 704.3(p).

(e) *Where to send reports.* Notices must be submitted by certified mail to the United States, Environmental Protection Agency, Document Processing Center, P.O. Box 2070, Rockville, Md. 20852. Attn: Chlorinated terphenyl notification.

Proposed Rules

Federal Register
Vol. 49, No. 59
Monday, March 26, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 991

Hops of Domestic Production; Proposed Marketing Policy for the 1984–85 Marketing Year; Proposed Salable Quantity and Allotment Percentage; Extension of Time for Transferring Allotment Bases; and Waiver of Bona Fide Effort Requirement

AGENCY: Agricultural Marketing Service, USDA

ACTION: Proposed rule.

SUMMARY: This proposed rule would establish the quantity of hops that may be freely marketed from the 1984 crop, extend the date for producers to transfer allotment bases, and waive the bona fide effort requirement for the 1984–85 marketing year. These marketing policy actions are under the marketing order for domestic hops, and should promote orderly marketing of hops for 1984–1985 marketing year.

DATE: Written comments should be submitted by April 5, 1984.

ADDRESS: Comments should be sent to the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written material should be submitted, and they shall be made available for public inspection at the office of the Hearing Clerk, during regular business hours.

FOR FURTHER INFORMATION CONTACT: Frank Mr. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–5053.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

The proposal is being published with less than a 60-day comment period because handlers and growers are making preparations for handling and growing 1984-crop hops. To enable handlers and growers to make these preparations in a timely fashion, it is critical that they know as soon as possible what salable quantity and allotment percentage will be effective for the 1984–85 marketing year. Also, growers should be given additional time after April 1 to transfer allotment bases so they can plan their operations accordingly.

The proposed establishment of a salable quantity and allotment percentage, the extension of time for producers to transfer allotment base, and suspension of the bona fide effort requirement, are in accordance with the provisions of Marketing Order No. 991, as amended (7 CFR Part 991), regulating the handling of hops of domestic production. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). These proposed actions were recommended by the Hop Administrative Committee which works with the Department in administering the marketing order program.

Pursuant to §§ 991.36 and 991.37 of the order, the salable quantity and allotment percentage for the 1984–85 marketing year, which begins August 1, 1984, and based upon a recommendation of the Committee, and the following estimates:

(1) Total domestic consumption of 39,500,000 pounds of hops;

(2) Minus imports of 12,000,000 pounds of hops, to result in domestic consumption of U.S. hops of 27,500,000 pounds;

(3) Plus total exports of 34,000,000 pounds of hops, to equal 61,500,000 pounds total usage of U.S. hops;

(4) Plus 2,000,000 pounds to adjust for weight loss of hops processed into pellets and extract;

(5) Minus inventory adjustment of 5,282,000 pounds;

(6) Plus an adjustment of 11,119,000 pounds to provide for adequate supplies should some producer allotments not be fully produced; and

(7) This results in a salable quantity for the 1984–85 marketing year of 69,337,000 pounds.

The salable percentage of 115 percent is computed by substracting from this salable quantity a total of 1,177,000 pounds for additional allotment bases for hops of the Fuggle variety granted pursuant to § 991.38(b) and § 991.138(c) and dividing the remainder by 59,269,877 pounds, the total of all other allotment bases.

Section 991.146(c) of Subpart—Administrative Rules and Regulations (7 CFR 991.130–991.938) currently provides that a producer can transfer all or part of his allotment base to another producer only if the transfer is effective prior to the issuance of annual allotment to the transferor or prior to April 1, whichever is earlier. The delay in the establishment of the salable quantity and allotment percentage for the 1984–85 marketing year makes it necessary to extend the April 1 cut-off date to May 1 for the 1984 calendar year. This would enable growers to transfer base under the order and complete their growing plans for the 1984–85 marketing year. This proposal is pursuant to § 991.46 of the order.

Pursuant to § 991.38(a)(5) of the order, the right of each producer to retain all or part of his allotment base depends on his continuing to make a bona fide effort to produce his annual allotment. If a producer fails to make a bona fide effort to produce his annual allotment, his allotment base must be reduced by an amount equivalent to the unproduced proportions. Subparagraph (5) also authorizes the Committee, with approval of the Secretary, to waive the bona fide effort requirement.

The Committee recommended waiving the bona fide effort requirement for the 1984–85 marketing year because it concluded that its implementation would result in additional and unneeded production. Currently, the hop market is inactive and an oversupply of hops exists, and enforcement of the bona fide effort requirement for the 1984–85 marketing year could further depress the market.

Notice was published in the **Federal Register** (49 FR 1380) January 11, 1984, inviting interested persons to submit proposals by March 12, 1984, to amend the order. That time has since been

extended to April 10, 1984 (49 FR 9740). The proposals contained in this notice are independent of that action and should not be considered to establish any precedent for actions taken in subsequent marketing years. Any findings and conclusions on proposals to amend the hop marketing order will be based on the record compiled at public hearings in the formal rulemaking proceeding.

List of Subjects in 7 CFR Part 991

Marketing agreements and orders, and Hops.

PART 991—[AMENDED]

Therefore, the proposal is to amend Subpart—Administrative Rules and Regulations (7 CFR 991.130–991.938) by amending §§ 991.146(c) and 991.938 and adding a new § 991.222 as follows: (§§ 991.222 and 991.938 will not be published in the Code of Federal Regulations).

1. Section 991.146(c) is revised to read as follows:

§ 991.146 Transfer of allotment bases.

* * * * *

(c) Whenever a producer transfers all or part of his allotment base to another producer, annual allotment referable to such transferred allotment base, or part thereof, shall be issued to the transferee only if the transfer is effective prior to the issuance of an annual allotment to the transferor or prior to April 1, whichever is the earlier: *Provided,* That for the 1984 calendar year that date shall be May 1 instead of April 1.

2. A new § 991.222 is added to read as follows:

§ 991.222 Allotment percentage and salable quantity for hops during the marketing year beginning August 1, 1984.

The allotment percentage during the marketing year beginning August 1, 1984, shall be 115 percent, and the salable quantity shall be 69,337,000 pounds.

3. Section 991.938 is revised to read as follows:

§ 991.938 Waiver of bona fide effort requirement for the 1984–85 marketing year.

The bona fide effort requirement provided for in § 991.38(a)(5) shall be waived for the 1984–85 marketing year beginning August 1, 1984.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated March 19, 1984.

Charles R. Brader,

Director, Fruit and Vegetable Division.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[EE–44–78; EE–17–81]

Cooperative Hospital Service Organizations; Computation of "Income" of an Electric Cooperative Under Section 501(c)(12); Public Hearings on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearings on proposed regulations.

SUMMARY: This document provides notice of public hearings on proposed regulations relating to cooperative hospital service organizations and proposed regulations relating to the computation of "income" of an electric cooperative under section 501(c)(12) of the Internal Revenue Code of 1954.

DATES: The public hearings will be held on Thursday, May 31, 1984, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Thursday, May 17, 1984.

ADDRESS: The public hearings will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, D.C. The requests to speak and outlines of oral comments on the proposed regulations relating to cooperative hospital service organizations should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (EE–44–78), Washington, D.C. 20224. The requests to speak and outlines of oral comments on the proposed regulations relating to electric cooperatives under section 501(c)(12) should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (EE–77–81), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Lou Ann Craner of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, telephone 202–566–3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subjects of the public hearings are:

1. Proposed regulations under section 501(e) of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Wednesday, January 11, 1984 (49 FR 1384).

2. Proposed regulations under section 501(c)(12) of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Tuesday, January 10, 1984 (49 FR 1244).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearings. Persons who have submitted written comments within the time prescribed in the respective notices of proposed rulemaking and who also desire to present oral comments at the respective hearing on such proposed regulations should submit, not later than Thursday, May 17, 1984, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Jonathan P. Marget,

Acting Director, Employee Plans and Exempt Organizations Division.

[FR Doc. 84–8061 Filed 3–23–84; 8:45 am]

BILLING CODE 4830–01–M

26 CFR Parts 1 and 301

Corporate Estimated Income Tax; Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations which provide guidance to corporations with respect to estimated tax requirements. Changes to the applicable tax law were made by the Omnibus Reconciliation Act of 1980, the Economic Recovery Tax Act of 1981, and the Tax Equity and Fiscal Responsibility Act of 1982. The regulations would provide corporations with the guidance needed to comply with applicable provisions of these acts.

DATES: Written comments and requests for a public hearing must be delivered by May 25, 1984. Generally, these regulations are proposed to be effective for taxable years beginning after December 31, 1982. The regulations providing guidance to "large

corporations" are proposed to be effective for taxable years beginning after December 31, 1980.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR–228–82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: George T. Magnatta of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 111, Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3294).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 6152, 6164, 6654, and 6655 of the Internal Revenue Code of 1954 and to the Regulations on Procedure and Administration (26 CFR Part 301) under section 6655 of the Code. These amendments are proposed to conform the regulations to section 1111 of the Omnibus Reconciliation Act of 1980 (Pub. L. 96–499; 94 Stat. 2681), section 731 of the Economic Recovery Tax Act of 1981 (Pub. L. 97–34; 95 Stat. 346), and section 234 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248; 96 Stat. 503) and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

General Rules

A corporation is required to make payments of estimated tax if it reasonably expects to have an estimated tax liability for the taxable year of $40 or more (*see* section 6154). Generally, a corporation is required to pay a percentage of its current year's tax liability in quarterly estimated tax installments. Under section 6655, if a corporation fails to pay its estimated tax installment when due and does not meet any exception to an underpayment, the corporation is subject to a penalty for underpayment of estimated taxes. The amount of the penalty is determined at the rate established under section 6621.

Under prior law, the penalty with respect to any underpayment of any installment was not imposed in any case where the total amount of all payments of estimated tax made on or before the last date prescribed for the payment of such installment equalled or exceeded the amount which would have been due had the estimated tax been based on any of the following: (1) The tax shown on the return for the preceding taxable year, if a return showing a tax liability was filed for the preceding taxable year and such preceding year was a taxable year of 12 months; (2) the tax computed at the rates applicable to the current taxable year but using the facts and law applicable to the preceding taxable year; or (3) 80 percent of the taxes which would have been due if the corporation's taxable income for specified preceding periods of the taxable year were annualized (annualization exception).

Additionally, for taxable years beginning prior to 1983, a corporation could elect under section 6152 to pay only half of its unpaid tax 2½ months after the end of its taxable year and the remaining one-half 3 months later.

The Omnibus Reconciliation Act of 1980 amended section 6655 to provide that, in order to come within exception (1) (relating to the preceding year's tax) or (2) (relating to the preceding year's facts and law), described above, a large corporation's estimated tax payments must in no event be less than 60 percent of the current year's tax. The Economic Recovery Tax Act of 1981 further amended section 6655 to provide that for taxable years beginning in 1984 and thereafter exceptions (1) and (2) are no longer available to large corporations. A transitional rule provides that for taxable years beginning in 1981, 1982, or 1983, a large corporation's estimated tax payments shall in no event be less than 60 percent, 65 percent, and 75 percent, respectively, of the current year's tax in order to come within exception (1) or (2). Exception (3) (relating to the annualization of income) is still available to a large corporation.

For purposes of section 6655, a corporation is considered a large corporation if it (or its predecessor) had taxable income of at least $1 million or more in any of the 3 taxable years immediately preceding the taxable year involved ("testing period").

In determining a corporation's taxable income for any of the taxable years during the testing period, the proposed regulations provide that items which may be carried back under other Code provisions (*e.g.*, those described in sections 172 and 1212) from one of the years in the testing period to another year in the testing period are taken into account. Additionally, if a corporation's taxable income for a year during the testing period is redetermined during that testing period, by reason of an examination by the Internal Revenue Service or otherwise, such redetermination shall be taken into account in determining whether the corporation is "large" for its present taxable year. Any items that are carried forward under other Code provisions are also taken into account in determining a corporation's taxable income during the testing period.

In the case of component members of a controlled group of corporations (as defined in section 1563), the proposed regulations provide that the $1 million amount for any taxable year in the 3-year testing period is divided equally among the component members of such group unless all of such component members consent to an apportionment plan providing for an unequal allocation of such amount. There are special rules for the computation of taxable income for a year in the 3-year testing period where a transaction described in section 351 or section 381(a) occurs.

For taxable years beginning after December 31, 1982, the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) increases from 80 percent to 90 percent the amount of a corporation's current tax liability that must be paid in installments. If a corporation makes estimated tax payments of at least 80 percent of its tax liability, the penalty for underpayment of estimated taxes is imposed at three-quarters of the full rate on underpayments determined under section 6621.

Similarly, TEFRA increases from 80 percent to 90 percent the amount of taxes that must be paid under the annualization exception.

An additional exception to the underpayment penalty is added by TEFRA. This new exception applies to a corporation with recurring seasonal income. Under this exception, income may be annualized by assuming that income earned in the current year is earned in the same pattern as in the 3 preceding taxable years. Thus, if a corporation pays its estimated tax installments as if taxable income for the taxable year is earned in the same seasonal pattern as in the preceding 3 years, no penalty for underpayment will be imposed. This exception is available to a large corporation.

TEFRA repealed section 6152 as it applies to corporations. The proposed regulations reflect this change.

Finally, the proposed regulations provide guidance with respect to how a corporation must compute its taxable income for a period of less than a full taxable year when using the annualization exceptions to the underpayment penalty.

Regulatory Flexibility Act

Although this document is a notice of proposed rulemaking which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and

public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Non-Application of Executive Order 12291

The Treasury Department has determined that this proposed regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 29, 1983.

Comments and Requests for a Public Hearing

Before the adoption of these proposed regulations, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

Paperwork Reduction Act

The collection of information requirements contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act. Comments on these requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, D.C. 20503. The Internal Revenue Service requests that persons submitting comments on these requirements to OMB also send copies of those comments to the Service.

Drafting Information

The principal author of these proposed regulations is George T. Magnatta of the Legislation and Regulation Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

List of Subjects

26 CFR 1.6151–1—1.6165–1

Income taxes, Administration and procedure, Payment of tax.

26 CFR 1.6654–1—1.6696–1

Income taxes, Administration and procedure, Penalties, Additions to tax.

26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

Proposed amendments to the regulations

The proposed amendments to 26 CFR Parts 1 and 301 are as follows:

PART 1—INCOME TAX REGULATIONS

Paragraph 1. Paragraph (a)(1) of § 1.6152–1, relating to privilege of corporation to elect to make installement payments, is amended by removing "ending on or after December 31, 1954," and adding "beginning before January 1, 1983," in lieu thereof.

Par. 2. Paragraph (a) of § 1.6164–4 is revised to read as follows:

§ 1.6164–4 Payment of remainder of tax where extension relates only to part of the tax.

(a) *Time for payment.* If an extension of time relates only to part of the tax, the time for payment of the remainder of the tax shall be considered to be the date of which payment would have been required if such remainder had been the tax.

* * * * *

Par. 3. Paragraph (a) of § 1.6164–8 is revised to read as follows:

§ 1.6164–8 Payments on termination.

(a) *In general.* If an extension of time under section 6164 is terminated with respect to any amount either (1) by the filing of a new statement by the taxpayer under section 6164 (e) extending the time for payment of a lesser amount than was extended in a prior statement, or (2) by action of the district director under section 6164(f) after making an examination of the statement filed by the corporation, no further extension of time may be made under section 6164 with respect to such amount. The time for payment of such amount shall be the date on which payment would have been required if there had been no extension with respect to such amount.

* * * * *

Par. 4. Paragraph (d)(1)(i) of § 1.6654–2 is revised to read as follows:

§ 1.6654–2 Exceptions to imposition of the addition to the tax in the case of individuals.

* * * * *

(d) *Determination of taxable income for portion of taxable year*—(1) *In general.* (i) In determining the applicability of the exceptions described in paragraph (a) (2) and (3) of this section, there must be a reasonably accurate determination of the amount of income and deductions for the calendar months in the calendar year preceding the installment date as of which the determination is made, that is, for the period terminating with the last day of the third, fifth, or eighth month of the taxable year. See paragraph (e) of § 1.6655–2 (relating to a similar requirement with respect to corporations) for special rules to be used in computing such income and deductions.

* * * * *

Par. 5. Section 1.6655–1 is revised to read as follows:

§ 1.6655–1 Addition to the tax in the case of a corporation.

(a) *In general.* Section 6655 imposes an addition to the tax under chapter 1 of the Code in the case of any underpayment of estimated tax by a corporation (with certain exceptions described in section 6655 (d) and (e)). This addition to the tax is in addition to any applicable criminal penalties and is imposed whether or not there was reasonable cause for the underpayment.

(b) *Amount of underpayment*—(1) *Installments for taxable years beginning before January 1, 1983.* In the case of an installment for a taxable year beginning before January 1, 1983, the amount of the underpayment for any installment date is the excess of—

(i) 80 percent of the tax shown on the return for the taxable year or, if no return was filed, 80 percent of the tax for such year, multiplied by the percentage of estimated tax required to be paid on or before the installment date, over

(ii) The amount, if any, of the installment paid on or before the last prescribed for such payment.

(2) *Rate of addition and period of underpayment—Installments due for taxable years beginning before January 1, 1983.* With respect to an amount of underpayment determined under paragraph (b)(1) of this section, the amount of the addition is determined at the annual rate referred to in the regulations under section 6621 upon the underpayment of any installment of estimated tax for the period from the date such installment is required to be paid until the 15th day of the 3rd month

following the close of the taxable year, or the date such underpayment is paid, whichever is earlier. For purposes of determining the period of the underpayment, (i) the date prescribed for payment of any installment of estimated tax shall be determined without regard to any extension of time, and (ii) a payment of estimated tax on any installment date, to the extent that it exceeds the amount of the installment determined under paragraph (b)(1)(i) of this section for such date, shall be considered a payment of the previous underpayment, if any.

(3) *Installments for taxable years beginning after December 31, 1982.* In the case of an installment for a taxable year beginning after December 31, 1982, the amount of the underpayment for any installment date is the excess of—

(i) 90 percent of the tax shown on the return for the taxable year or, if no return was filed, 90 percent of the tax for such year, multiplied by the percentage of estimated tax required to be paid on or before the installment date, over

(ii) The amount, if any, of the installment paid on or before the last date prescribed for such payment.

(4) *Rate of addition and period of underpayment—Installments due for taxable years beginning after December 31, 1982.* (i) Except as provided in paragraph (b)(4)(ii) of this section, with respect to an amount of underpayment determined under paragraph (b)(3) of this section, the amount of the addition is determined at the annual rate referred to in the regulations under section 6621 upon the underpayment of any installment of estimated tax for the period of the underpayment.

(ii) In any case where there would be no underpayment if "80 percent" in paragraph (b)(3) of this section, were substituted for "90 percent" each place it appears, the addition to tax shall be 75 percent of the amount otherwise determined under section 6621 and paragraph (b)(4)(i) of this section.

(iii) The period of the underpayment of any installment shall run from the date the installment was required to be paid until the 15th day of the 3rd month following the close of the taxable year, or the date such underpayment is paid, whichever is earlier. For purposes of determining the period of the underpayment, (A) the date prescribed for payment of any installment of estimated tax shall be determined without regard to any extension of time, and (B) a payment of estimated tax on any installment date, to the extent that it exceeds the amount of the installment determined under paragraph (b)(3)(i) of this section for such date, shall be considered a payment of the previous underpayment, if any.

(5) *Definition of term "tax".* The term "tax" as used in paragraph (b)(1)(i) and (3)(i) of this section means the excess of—

(i) The tax imposed by section 11 or 1201(a), or subchapter L of chapter 1 of the Code, whichever is applicable, over

(ii) The sum of—

(A) The credits against tax provided by part IV of subchapter A of chapter 1 of the Code, plus

(B) [Reserved].

(6) *Special rules for consolidated returns.* For special rules relating to the determination of the amount of the underpayment in the case of a corporation whose income is included in a consolidated return, see § 1.1502–5(b).

(c) *Statement relating to underpayment.* If there has been an underpayment of estimated tax as of the installment date prescribed for its payment and the taxpayer believes that one or more of the exceptions described in § 1.6655–2 or § 1.6655–3 precludes the assertion of the addition to the tax under section 6655, it should attach to its income tax return for the taxable year a Form 2220 showing the applicability of any exception upon which the taxpayer relies.

(d) *Examples.* The method prescribed in paragraph (b) (3) and (4) of this section may be illustrated by the following examples:

Examples (1). X, a corporation which reports on a calendar year basis, anticipates that its estimated tax for 1983 will be in the amount of $54,000. It makes payments of $13,500 each on April 15, 1983, June 15, 1983, September 15, 1983, and December 15, 1983. On March 15, 1984, X files its income tax return showing a tax imposed of $70,000, with a total of $5,000 of allowable credits against tax. The addition to tax under section 6655(a) is computed as follows:

(1) Tax as defined in (b)(5) of this section ($70,000–$5,000)	$65,000
(2) 90% of item (1)	58,500
(3) Amount of estimated tax required to be paid on each installment date (25% of $58,500)	14,625
(4) Deduct amount paid on each installment date	13,500
(5) Amount of underpayment for each installment date (item (3) minus item (4))	1,125

(6) Addition to tax, assuming that none of the exceptions provided by section 6655 (d) and (e) and §§ 1.6655–2 and 1.6655–3 are applicable, and assuming the addition is computed at the rate of 11 percent per annum applicable to periods of underpayment under section 6621:

(i) First installment (period 4–15–83 to 3–15–84)	$113.27
(ii) Second installment (period 6–15–83 to 3–15–84)	92.64
(iii) Third installment (period 9–15–83 to 3–15–84)	61.54
(iv) Fourth installment (period 12–15–83 to 3–15–[illegible]	30.77
(v) Total of items (i) through (iv)	298 [illegible]

Since X Corporation paid at least 80% of the tax due in equal quarterly installments, the amount of the addition under section 6655(a)(2) is $223.67 (*i.e.*, 75 × $298.22).

Example (2). Y, a corporation which reports on a calendar year basis, anticipates that its estimated tax for 1983 will be in the amount of $70,000. It makes no payments on April 15, 1983, June 15, 1983, and September 15, 1983, but makes a payment of $63,000 on December 15, 1983. On March 15, 1984, Y files its income tax return showing a tax imposed of $70,000. The addition to tax under section 6655(a) is computed as follows:

(1) Tax as defined in (b)(5) of this section	$70,000
(2) 90% of item (1)	63,000

	First, second, and third installments	Fourth installment
(3) Amount of estimated tax required to be paid on each installment date (25% of $63,000)	$15,750	$15,750
(4) Amount paid on each installment date	0	63,000
(5) Amount of underpayment for each date	15,750	0

(6) Addition to tax, assuming that none of the exceptions provided by section 6655 (d) and (e) and §§ 1.6655–2 and 1.6655–3 are applicable, and assuming the addition is computed at the rate of 11 percent per annum applicable to periods of underpayment under section 6621:

(i) First installment (period 4–15–83 to 12–15–83)	$1,158.16
(ii) Second installment (period 6–15–83 to 12–15–83)	868.62
(iii) Third installment (period 9–15–83 to 12–15–83)	431.94
(iv) Fourth installment	0
(v) Total of items (i) through (iv)	2,458.72

Par. 6. Section 1.6655–2 is revised to read as follows:

§ 1.6655–2 Exceptions to imposition of the addition to the tax in the case of corporations.

(a) *In general.* The addition to the tax under section 6655 will not be imposed for any underpayment of any installment of estimated tax if, on or before the date prescribed for payment of the installment, the total amount of all payments of estimated tax made equals or exceeds the amount which would have been required to be paid on or before such date if the estimated tax

were the least of the following amounts—

(1) The amount of tax shown on the return for the preceding taxable year, provided that the preceding taxable year was a year of 12 months and a return showing a liability for tax was filed for such year;

(2) An amount equal to a tax determined on the basis of the tax rates for the taxable year but otherwise on the basis of the facts shown on the return for the preceding taxable year and the law applicable to such year, in the case of a corporation required to file a return for such preceding taxable year; or

(3) An amount equal to 90 percent (80 percent in the case of a taxable year beginning on or before December 31, 1982) of the tax determined by placing on an annual basis the taxable income for—

(i) The first 3 months of the taxable year, in the case of the installment required to be paid in the 4th month,

(ii) Either the first 3 months or the first 5 months of the taxable year (whichever results in no addition being imposed), in the case of the installment required to be paid in the 6th month,

(iii) Either the first 6 months or the first 8 months of the taxable year (whichever results in no addition being imposed), in the case of the installment required to be paid in the 9th month, and

(iv) Either the first 9 months or the first 11 months of the taxable year (whichever results in no addition being imposed), in the case of the installment required to be paid in the 12th month.

The taxable income so determined shall be placed on an annual basis by first multiplying it by 12, and then dividing the resulting amount by the number of months in the taxable year for which the taxable income was so determined.

(b) *Special rules.* (1) In the case of a taxpayer whose taxable year consists of 52 or 53 weeks in accordance with section 441(f), the rules prescribed by paragraph (b) of § 1.441–2 shall be applicable in determining—

(i) Whether a taxable year was a year of 12 months for purposes of paragraph (a)(1) of this § 1.6655–2, and

(ii) When the 3-month period, or the 3- or 5-month period, or the 6- or 8-month period, or the 9- or 11-month period (whichever is applicable) commences for purposes of paragraph (a)(3) of this § 1.6655–2.

For example, if a taxable year begins on December 26, 1982, taxable income for the first 6 months of such year, for purposes of paragraph (a)(3) of this § 1.6655–2, shall be taxable income for the period beginning on December 26, 1982, and ending on June 30, 1983, since such taxable year is deemed to commence on January 1, 1983, under section 441(f).

(2) If the end of any accounting period employed by the taxpayer (*e.g.*, any of either thirteen 4-week periods or four 13-week periods) does not correspond to the termination date of the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period, taxable income for the applicable period shall equal—

$(a+(b\times c+d))$,

where

a = taxable income from the beginning of the taxable year to the close of the accounting period ending immediately before the termination date of the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period,

b = number of days from the close of the accounting period ending immediately before the termination date of the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period to the close of the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period,

c = taxable income from the beginning of the taxable year to the close of the accounting period within which the termination date of the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period falls, minus a, and

d = number of days between the termination dates of the accounting period ending immediately before the termination date of the applicable 3-month, or 3- or 5-month, or 6- or 8-month or 9- or 11-month period and the accounting period within which the termination date of the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period falls.

Thus, for example, a taxpayer whose taxable year consists of 52 or 53 weeks in accordance with section 441(f) has a taxable year beginning on December 26, 1982, and thirteen 4-week accounting periods are employed in determining taxable income. Taxable income from December 26, 1982, to the close of the 4-week accounting period ending on June 11, 1983, is $200,000, and taxable income from December 26, 1982, to the close of the 4-week accounting period ending on July 9, 1983, is $228,000. Under the provisions of this paragraph (b)(2), taxable income for the 6-month period ending on June 30, 1983, is $219,000 (*i.e.*, ($200,000 + (19 × 28,000 ÷ 28)).

(c) *Meaning of terms*—(1) *Meaning of term "tax".* For the purpose of the exceptions described in paragraph (a) of this section, the term "tax" means the excess of—

(i) The tax imposed by section 11 or 1201 (a), or subchapter L of chapter 1 of the Code, whichever is applicable, over

(ii) The sum of—

(A) The credits against tax provided by part IV of subchapter A of chapter 1, plus

(B) [Reserved].

For purposes of paragraph (a)(2) of this section, the amount of tax paid from recomputing a prior year's investment credit under section 47 is a fact shown on the return for the preceding taxable year and is included in computing the prior year's tax. For example, X Corporation timely filed its 1977 income tax return. The return showed no taxable income, but it included an amount of tax from recomputing a prior year's investment credit. For 1978, X had taxable income and a liability for income tax. X was required to pay its tax in installments under section 6154, but made no installment payments. X is subject to the addition to tax for underpayment of estimated tax imposed by section 6655(a), because X failed to pay, on or before the prescribed installment due dates, an amount equal to the tax resulting from the recomputation of the prior year's investment credit.

(2) *Credits against tax.* The credits against the tax allowed by part IV of subchapter A of chapter 1 are—

(i) In the case of the exception described in paragraph (a)(1) of this section, such credits shown on the return for the preceding taxable year,

(ii) In the case of the exception described in paragraph (a)(2) of this section, such credits shown on the return for the preceding taxable year, except that if the amount of any such credits would be affected by any change in rates, the credits shall be determined by reference to the rates applicable to the current taxable year, and

(iii) In the case of the exception described in paragraph (a)(3) of this section, such credits computed under the law and rates applicable to the current taxable year.

The provisions of paragraph (c)(2)(ii) of this section are illustrated by the following example:

Example. Assume that during a taxable year within which the graduated tax rates in section 11 are lowered, Corporation X has an underpayment of estimated tax. One-fourth of the taxable income of Corporation X for the taxable year preceding that in which such underpayment occurs was from sources within foreign country Y and the remainder of the taxable income was from sources within the United States. The return of Corporation X for such preceding year shows taxable income of $325,000 and a tax, without regard to any credits, of $163,500. For such preceding year, Corporation X paid more taxes to foreign country Y than may be allowed as a credit under section 33 by reason of the

limitation of section 904. The credit allowed by section 33 on account of taxes paid to foreign country Y may not, under section 904, exceed one-fourth of the tax without regard to any credits, or $40,875. The tax for the preceding year, computed by using the rates applicable to the year during which the underpayment occurs, would be reduced to $147,250, and the limitation under section 904 on the credit allowed under section 33 for taxes paid to foreign country Y would be reduced to $36,812.50, for purposes of determining the applicability of the exception described in paragraph (a)(2) of this section. Therefore, the exception described in paragraph (a)(2) of this section will be applicable if, on or before the date prescribed for such payment, the total amount paid by Corporation X equals or exceeds the amount which would have been required to be paid by such date if the estimated tax were $110,437.50 ($147,250 less $36,812.50).

(3) *Definition of return for the preceding taxable year.* For the purpose of the exceptions described in paragraph (a) (1) and (2) of this section, the term "return for the preceding taxable year" means the income tax return for such year which is required by section 6012(a)(2). However, if an amended return has been timely filed, then the term "return for the preceding taxable year" means the income tax return as amended and as timely filed.

(d) *Examples.* The application of the exceptions to the imposition of the addition to tax is illustrated by examples employing the following statement of facts:

Statement of Facts

Y, a corporation which reports on a calendar year basis, expected that it would have an estimated tax liability of $62,000 for its taxable year ending December 31, 1983. Y is not a "large corporation" (see section 6655 (i) and § 1.6655–4). Y paid four installments of estimated tax, each in the amount of $15,500 (25 percent of $62,000), on April 15, 1983, June 15, 1983, September 15, 1983, and December 15, 1983, respectively. Y reported a tax liability of $88,900 on its return due March 15, 1984, with no credits against tax. There was an underpayment in the amount of $4,502.50 on each of the four installment dates, determined as follows:

(1) Tax as defined in paragraph (c)(1) of this section	$88,900.00
(2) 90% of item (1)	80,110.00
(3) Amount of estimated tax required to be paid on each installment (25% of $80,010)	20,002.50
(4) Deduct amount paid on each installment date	15,500.00
(5) Amount of underpayment for each installment date	4,502.50

The application of each exception described in paragraph (a) of this section is determined as follows:

(1) Assume Y reported a liability of $74,900 on its return for the taxable year ending December 31, 1982. If the exception described in paragraph (a)(1) of this section were to apply, the amount which would have been required to be paid on or before each of the four installment dates would be 25 percent of $74,900, or $18,725. Since this amount exceeds the amount actually paid on each installment date, $15,500, the exception does not apply.

(2) Assume that the facts shown on the return for the previous year (1982) showed Y to have a taxable income of $184,167 and no credits against tax. The amount of tax determined under paragraph (a)(2) of this section and the amounts required to be paid on or before each installment date are as follows: the tax liability on the basis of the 1983 rates but on the basis of the calendar year 1982 return is $64,467; the amount which would have been required to be paid on or before each of the four installment dates is 25 percent of $64,467, or $16,116.75. Since this amount exceeds the amount actually paid on each installment date, $15,500, the exception described in paragraph (a)(2) of this section does not apply.

(3) The total amount of all payments of estimated tax actually paid on or before the installment dates of April 15, 1983, June 15, 1983, September 15, 1983, and December 15, 1983, are $15,500, $31,000, $46,500, and $62,000, respectively. Assume Y determined that its taxable income for the first 3, 5, 6, 8, 9, and 11 months was $45,000, $90,000, $105,000, $145,000, $160,000, and $195,000 respectively. The income for each period is annualized as follows:

$45,000×12÷3=$180,000
$90,000×12÷5=$216,000
$105,000×12÷6=$210,000
$145,000×12÷8=$217,500
$160,000×12÷9=$213,333.33
$195,000×12÷11=$212,727.27

(i) To determine whether the installment payment made on April 15, 1983, equals or exceeds the amount which would have been required to have been paid if the estimated tax were equal to 90 percent of the tax computed on the annualized income for the 3-month, period, the following computation is necessary:

	[illegible] months
(1) Annualized income	$180,000.
(2) Tax on item (1)	[illegible]
(3) 90% of item (2)	[illegible]
(4) 25% of item (3)	14,073.75

Since the total amount of estimated tax actually paid on the first installment date (*i.e.*, $15,500) exceeds the amount required to be paid on this date if the estimated tax were 90 percent of the tax determined by placing on an annualized basis the taxable income for the first 3-month period, the exception described in paragraph (a)(3) of this section applies, and no addition to tax will be imposed for the installment paid on April 15, 1983.

(ii) To determine whether the installment payments made on or before June 15, 1982, equal or exceed the amount which would have been required to have been paid if the estimated tax were equal to 90 percent of the tax computed on the annualized income for either the 3- or 5-month period, the following computation is necessary:

	3 months	[illegible] months
(1) Annualized income	[illegible]	[illegible]
(2) Tax on item (1)	[illegible]	79,110
(3) 90% of item (2)	[illegible]	71,199
(4) 50% of item (3)	28,147.50	[illegible]

Since the total amount of estimated tax actually paid on the second installment date (*i.e.*, $31,000) exceeds the amount required to be paid on such date if the estimated tax were 90 percent of the tax determined by placing on an annualized basis the taxable income for the first 3- or 5-month period for the taxable year, the exception described in paragraph (a)(3) of this section applies, and no addition to tax will be imposed for the installment paid on June 15, 1983.

(iii) To determine whether the installment payments made on or before September 15, 1983, equal or exceed the amount which would have been required to have been paid if the estimated tax were equal to 90 percent of the tax computed on the annualized income for either the 6- or 8-month period, the following computation is necessary:

	6 months	[illegible] months
(1) Annualized income	$210,000.	217,500
(2) Tax on item (1)	[illegible]	[illegible]
(3) 90% of item (2)	68,715	71,820
(4) 75% of item (3)	51,536.25	[illegible]

Since the total amount of estimated tax actually paid on or before the third installment date (*i.e.*, $46,500) does not equal or exceed the amount required to be paid on such this date if the estimated tax were 90 percent of the tax determined by placing on an annualized basis the taxable income for the first 6- or 8-month period, the exception described in paragraph (a)(3) of this section does not apply, and an addition to tax will be imposed with respect to the underpayment of the September 15, 1983, installment unless another exception applies to this installment payment.

(iv) To determine whether the installment payments made on or before December 15, 1983, equal or exceed the amount which would have been required to have been paid if the estimated tax were equal to 90 percent of the tax computed on the annualized income for either the 9- or 11-month period, the following computation is necessary:

	[illegible] months	11 months
(1) Annualized income	$213,333.33	212,727.27
(2) Tax on item (1)	[illegible]	77,604.54
(3) 90% of item (2)	[illegible]	[illegible]
(4) 100% of item (3)	70,095	[illegible]

Since the total amount of estimated tax actually paid on or before the fourth installment date (*i.e.*, $62,000) does not equal or exceed the amount required to be paid on such date if the estimated tax were 90 percent of the tax determined by placing on an annualized basis the taxable income for the first 9- or 11-month period, the exception described in paragraph (a)(3) of this section does not apply, and an addition to tax will be imposed with respect to the underpayment of

the December 15, 1983, installment unless another exception applies to this installment payment.

(e) *Determination of taxable income for portion of taxpayer year when using annualization exceptions*—(1) *In general.* In determining the applicability of the exception described in paragraph (a)(3) of this section (relating to the annualization of income) and the exception described in § 1.6655–3 (relating to annualization of income for corporations with seasonal income), there must be a reasonably accurate determination of the items of income, gain, loss, deduction, and credit properly includible under the taxpayer's method of accounting for the appropriate period, that is, for the first 3, 5, 6, 8, 9, or 11 months of the taxable year. Generally, deductions which are not properly accruable during an applicable installment period because all the events which fix the fact of a liability have not yet occurred or because the amount of the deduction cannot be estimated with reasonable accuracy are not taken into account in that period for purposes of the annualization exception, even if such amounts are accruable by the end of the taxable year.

(2) *Exception for recurring expenditures.* (i) When a taxpayer has a history of incurring a specific category of expense, which, while attributable to income earned throughout the year, has not become a fixed liability until the end of the taxable year, the taxpayer may take into account for each installment period the amount of such expense properly allocable to such period provided—

(A) The amount so allocated to a particular installment period is determinable with reasonable accuracy, and

(B) The amount of the item so allocated is properly deductible by the taxpayer during the taxable year under the taxpayer's method of accounting.

(ii) The provisions of paragraph (e)(2)(i) of this section may be illustrated by the following example:

Example. Corporation X, a calendar year taxpayer, used the accrual method of accounting. X has historically adopted a program at the beginning of each taxable year which provides for the distribution of year-end cash bonuses to its employees. The aggregate amount of bonuses to be distributed is determined at the beginning of the taxable year. In accordance with this program, the amount of the bonus payable to each employee is to be determined by the management in December. Under the provisions of subparagraph (2)(i), X may allocate a portion of the total amount of such year-end bonus to each installment period since X can determine that amount with reasonable accuracy and the amount of the bonus is properly deductible during X's taxable year under its method of accounting.

(3) *Items that substantially impact taxable income but cannot be determined accurately by the installment due date.* In determining the applicability of the annualization exceptions described in paragraph (a)(3) of this section and § 1.6655–3, reasonable estimates may be made from existing data for items that substantially impact income when the amount of such items cannot be determined accurately by the installment due date. Examples of these items are the LIFO index for taxpayers using the dollar-value LIFO inventory method, the deferred gross profit for taxpayers with revolving charge accounts, intercompany adjustments for taxpayers that file consolidated returns, and the liquidation of a LIFO layer at the installment date that the taxpayer reasonably believes would be replaced at the end of the year. Thus, for example, reasonable estimates by a taxpayer using the dollar-value LIFO method of accounting would be made by interpolating from an available inflation index for the same months in the previous year to calculate the cost of goods sold in the present period of less than a full taxable year if no reliable inflation index for the present period is available. See also § 1.6654–2(d) (1) and (2).

(4) *Events arising after installment due date which were not reasonably foreseeable.* Events arising subsequent to the installment due date which cause the taxpayer's computation of its taxable income for the short period to be understated will not result in a recomputation of its taxable income for the short period. The preceding sentence applies only if at the time the installment payment is made, based on all the facts and circumstances, it was not reasonably foreseeable that these subsequent events would occur. Thus, for example, assume that Congress enacts retroactively effective legislation which causes the taxable income for the applicable 3-month, or 3- or 5-month, or 6- or 8-month, or 9- or 11-month period to be understated. This event, which occurred after the applicable installment due date, will not result in a recomputation of a corporation's taxable income for the applicable installment period because such an event was unforeseeable.

Par. 7. Section 1.6655–3 is revised to read as follows:

§ 1.6655–3 Additional exception for corporation with recurring seasonal income.

(a) *In general*—(1) *Additional exception for corporations with recurring seasonal income.* Except as provided in paragraph (b)(4) of this section, for taxable years beginining after December 31, 1982, notwithstanding section 6655(b) (relating to the general rule for amount of underpayment of estimated tax) and section 6655(d) (relating to the exceptions to the underpayment of estimated tax), the addition to the tax with respect to any underpayment of any installment shall not be imposed if the total amount of all payments of estimated tax made on or before the last date prescribed for the payment of such installment equals or exceeds 90 percent of the applicable amount determined under subparagraph (2) of this paragraph.

(2) *Applicable amount.* To determine the applicable amount—

(i) Total the taxable income for all months during the taxable year preceding the filing month (as defined in paragraph (b)(3)),

(ii) Divide the amount in paragraph (a)(z)(i) of this section by the base period percentage (as defined in paragraph (b)(1)) for all months during the taxable year preceding the filing month,

(iii) Determine the tax (as defined in § 1.6655–2(c)(1)) on the amount determined in subdivision (ii),

(iv) Multiply the amount determined in subdivision (iii) by the base period percentage for the filing month and all months during the taxable year preceding the filing month.

(b) *Definition and limitation on application of exception*—(1) *Base period percentage.* The base period percentage for any period of months shall be the average of the three percentages calculated by dividing—

(i) The taxable income for the corresponding months in each of the 3 preceding taxable years, by

(ii) The taxable income for each of the 3 preceding taxable years.

(2) *Determination of base period percentage in a year in which there occurs a transaction to which section 381 applies.* (i) In a year in which there occurs a transaction to which section 381 applies, the acquiring corporation's taxable income shall be the sum of—

(A) The taxable income of the acquiring corporation for its taxable year, plus

(B) The taxable income of the distributor or transferor corporation (or corporations) for that portion of the acquiring corporation's taxable year up to and including the date of distribution or transfer (as defined in § 1.381(b)–1 (b)).

(ii) The corresponding monthly taxable income of the acquiring corporation in a year in which there occurs a transaction to which section 381 applies shall be the sum of—

(A) The corresponding monthly taxable income of the acquiring corporation, plus

(B) The corresponding monthly taxable income of the distributor or transferor corporation (or corporations) for those months of the acquiring corporation's taxable year up to and including the date of distribution or transfer (as defined in § 1.381(b)–1 (b)).

(3) *Filing month.* The term "filing month" means the month in which the installment is required to be paid. A corporation must make estimated tax payments in installments in accordance with the provisions of section 6154(b). Thus, for example, a corporation which, before the 1st day of the 4th month of its taxable year, reasonably expects its estimated tax for such taxable year to be $40 or more, must make quarterly installments of estimated tax on or before the 15th day of the 4th, 6th, 9th, and 12th months of its taxable year.

(4) *Limitation on use of exception for corporations with recurring seasonal income.* This section shall apply only if the base period percentage (as defined in paragraph (b)(1) of this section) for the same 6 consecutive months of the 3 preceding taxable years equals or exceeds 70 percent.

(c) *Illustration.* The provisions of this section may be illustrated by the following example:

Example. Y, a corporation which reports on a calendar year basis, expected that it would have an estimated tax liability of $1,380,000 for its taxable year ending December 31, 1983. Y therefore paid four installments of estimated tax, each in the amount of $345,000 (25 percent of $1,380,000), on April 15, 1983, June 15, 1983, September 15, 1983, and December 15, 1983, respectively. Y reported a tax liability of $1,539,150 on its return due March 15, 1984, with no credits against tax. Under the general provision of section 6655 (b), there was an underpayment in the amount of $1,308.75 on each of the four installment dates, determined as follows:

(1) Tax as defined in section 6655 (d)	[illegible]
(2) 90% of item (1)	1,385,235.00
(3) Amount of estimated tax required to be paid on each installment (25% of $1,385,235.00	346,308.75
(4) Deduct amount paid on each installment date under general rule of section 6655 (b)	[illegible]
(5) Amount of underpayment for each installment date under general rule of section 6655 (b)	1,308.75

(b) Y corporation wants to determine if it qualifies under the exception of this section. Y Corporation determines that its monthly taxable income for the preceding 3 taxable years and for the current taxable year 1983 is as follows:

	January	February	March	April	May	June
1980	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	$20,000
1981	[illegible]	170,000	170,000	130,000	[illegible]	[illegible]
1982	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
1983	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

	July	August	September	October	November	December
1980	[illegible]	$10,000	$10,000	[illegible]	[illegible]	[illegible]
1981	21,000	19,000	[illegible]	20,000	[illegible]	[illegible]
1982	40,000	40,000	40,000	[illegible]	[illegible]	[illegible]
1983	70,000	60,000	50,000	[illegible]	[illegible]	[illegible]

Y Corporation must initially determine if its base period percentage for the same 6 consecutive months of the 3 preceding taxable years equals or exceeds 70 percent (*see* section 6655(e)(3)(C) and § 1.6655–3(b)(4)). By using its taxable income for the first 6 months of 1980, 1981, and 1982, Y qualifies since its base period percentage is 87.5 percent (which exceeds 70 percent) computed as follows:

(1) Taxable income for first 6 months of 1980	$420,000
(2) Total taxable income for 1980	[illegible]
(3) Divide item (1) by item (2)	[illegible]
(4) Taxable income for first 6 months of 1981	[illegible]
(5) Total taxable income for 1981	[illegible]
(6) Divide item (4) by item (5)	[illegible]
(7) Taxable income for first 6 months of 1982	[illegible]
(8) Total taxable income for 1982	1,920,000
(9) Divide item (7) by item (8)	.875
(10) Add items (3), (6), and (9)	2.625
(11) Divide item (10) by 3	[illegible]

(c) To determine whether the installment payment made on April 15, 1983, equals or exceeds 90 percent of the applicable amount (computed under the rules of section 6655(e)(2) and § 1.6655–3(a)(2)) for the 3-month period, the following computation is necessary:

(1) Taxable income for first 3 months of 1983	[illegible]
(2) Taxable income for first 3 months of 1980 ($270,000) divided by total taxable income for 1980 ($480,000)	.5625
(3) Taxable income for first 3 months of 1981 ($540,000) divided by total taxable income for 1981 ($960,000)	[illegible]
(4) Taxable income for first 3 months of 1982 ($1,090,000) divided by total taxable income for 1982 ($1,920,000)	[illegible]
(5) Add items (2), (3), and (4) and divide by 3	.5642
(6) Divide item (1) by item (5)	3,420,772.76
(7) Determine the tax on item (6)	1,553,305.48
(8) Taxable income for first 4 months of 1980 ($340,000) divided by total taxable income for 1980 ($480,000)	[illegible]
(9) Taxable income for first 4 months of 1981 ($670,000) divided by total taxable income for 1981 ($960,000)	[illegible]
(10) Taxable income for first 4 months of 1982 ($1,360,000) divided by total taxable income for 1982 (1,920,000)	[illegible]
(11) Add items (8), (9), and (10) and divide by 3	.7048
(12) Multiply item (7) by item (11)	1,094,769.76
(13) 90% of item (12)	[illegible]

(d) To determine whether the installment payment made on or before June 15, 1983, equals or exceeds 90 percent of the applicable amount (computed under the rules of section 6655(e)(2) and § 1.6655–3(a)(2)) for the 5-month period, the following computation is necessary:

(1) Taxable income for first 5 months of 1983	[illegible]
(2) Taxable income for first 5 months of 1980 ($400,000) divided by total taxable income for 1980 ($480,000)	[illegible]
(3) Taxable income for first 5 months of 1981 ($795,000) divided by total taxable income for 1981 ($960,000)	[illegible]
(4) Taxable income for first 5 months of 1982 ($1,600,000) divided by total taxable income for 1982 ($1,920,000)	[illegible]
(5) Add items (2), (3), and (4) and divide by 3	[illegible]
(6) Divide item (1) by item (5)	3,547,378.55
(7) Determine the tax on item (6)	1,611,544.13
(8) Taxable income for first 6 months of 1980 ($420,000) divided by total taxable income for 1980 ($480,000)	.875
(9) Taxable income for first 6 months of 1981 ($840,000) divided by total taxable income for 1981 ($960,000)	.875
(10) Taxable income for first 6 months of 1982 ($1,680,000) divided by total income for 1982 ($1,920,000)	.875
(11) Add items (8), (9), and (10) and divide by 3	.875
(12) Multiply item (7) by item (11)	1,410,101.11
(13) 90% of item (12)	1,269,091.00

(e) To determine whether the installment payment made on or before September 15, 1983, equals or exceeds 90 percent of the applicable amount (computed under the rules of section 6655(a)(2) and § 1.6655–3(e)(2)) for the 8-month period, the following computation is necessary:

(1) Taxable income for first 8 months of 1983	[illegible]
(2) Taxable income for first 8 months of 1980 ($440,000) divided by total taxable income for 1980 ($480,000)	.9167
(3) Taxable income for first 8 months of 1981 ($880,000) divided by total taxable income for 1981 ($960,000)	.9167
(4) Taxable income for first 8 months of 1982 ($1,760,000) divided by total taxable income for 1982 ($1,920,000)	.9167
(5) Add items (2), (3), and (4) and divide by 3	.9167
(6) Divide item (1) by item (5)	[illegible]
(7) Determine the tax on item (6)	1,610,599.79
(8) Taxable income for first 9 months of 1980 ($450,000) divided by total taxable income for 1980 ($480,000)	.9375
(9) Taxable income for first 9 months of 1981 ($90,000) divided by total taxable income for 1981 ($960,000)	.9375
(10) Taxable income for first 9 months of 1982 ($1,800,000) divided by total taxable income for 1982 ($1,920,000)	.9375
(11) Add items (8), (9), and (10) and divide by 3	.9375
(12) Multiply item (7) by item (11)	[illegible]
(13) 90% of item (12)	1,358,943.57

(f) To determine whether the installment payment made on or before December 15, 1983, equals or exceeds 90 percent of the applicable amount (computed under the rules

of section 6655(e)(2) and § 1.6655–3(a)(2)) for the 11-month period, the following computation is necessary:

(1) Taxable income for first 11 months of 1983	$3,376,080
(2) Taxable income for first 11 months of 1980 ($470,000) divided by total taxable income for 1980 ($480,000)	.9792
(3) Taxable income for first 11 months of 1981 ($940,000) divided by total taxable income for 1981 ($960,000)	.9792
(4) Taxable income for first 11 months of 1982 ($1,880,000) divided by total taxable income for 1982 ($1,920,000)	.9792
(5) Add items (2), (3), and (4) and divided by 3	.9792
(6) Divide item (1) by item (5)	3,441,584.97
(7) Determine the tax on item (6)	1,562,879.09
(8) 90% of item (7)	1,406,591.18

The total amounts of all payments of estimated tax actually paid on or before the installment dates of April 15, 1983, June 15, 1983, September 15, 1983, and December 15, 1983, are $345,000, $690,000, $1,035,000, and $1,380,000, respectively. Since the total amounts of estimated tax actually paid on the first, second, third, and fourth installment dates does not equal or exceed the amounts required to be paid on such dates if the estimated tax were 90 percent of the applicable amount (computed under the rules of section 6655(e)(2) and § 1.6655–3(a)(2)) for the first 3-month period, first 5-month period, first 8-month period, and first 11-month period of the taxable year, the exception described in section 6655(e) and this section does not apply, and the addition to the tax with respect to the underpayment for all installments will be imposed unless another exception (*see* § 6655(d)) applies with respect to these installments.

Par. 8. A new § 1.6655–4 is added immediately following § 1.6655–3 to read as follows:

§ 1.6655–4 Estimated tax payments in the case of large corporations.

(a) *Elimination of certain exceptions to underpayment penalty for large corporations.* For taxable years beginning after December 31, 1983, section 6655(d) (1) and (2) and § 1.6655–2(a)(1) and (2) (relating to exceptions to underpayment of estimated tax) shall not apply to large corporations (as defined in paragraph (e) of this section). However, the exception relating to the annualization of income (*see* section 6655(d)(3) and § 1.6655–2(a)(3)) remains available to large corporations for taxable years beginning after such date. For taxable years beginning after December 31, 1982, the additional exception for corporations with recurring seasonal income is available to large corporations (*see* section 6655 (e) and § 1.6655–3).

(b) *Transitional rule; minimum percentage requirement.* For taxable years beginning before January 1, 1984, in the case of large corporations, the amount treated as estimated tax for the taxable year under section 6655(d) (1) and (2) shall in no event be less than the minimum estimated tax (as defined in paragraph (c)). Payment by a large corporation of less than the minimum estimated tax is an underpayment of estimated tax to which the addition to tax provided under section 6655 (a) applies unless an exception provided under section 6655(d)(3) and § 1.6655–2(a)(3) and section 6655(e) and § 1.6655–3 (for taxable years beginning after 1982) applies.

(c) *Minimum estimated tax defined.* For purposes of this section, the term "minimum estimated tax" means—

(1) For taxable years beginning after December 31, 1980, and before January 1, 1982, an amount which is not less than 60 percent of the tax shown on its income tax return for such year or, if no return was filed for such year, 60 percent of the tax for such year;

(2) For taxable years beginning after December 31, 1981, and before January 1, 1983, an amount which is not less than 65 percent of the tax shown on its income tax return for such year or, if no return was filed for such year, 65 percent of the tax for such year; and

(3) For taxable years beginning after December 31, 1982, and before January 1, 1984, an amount which is not less than 75 percent of the tax shown on its income tax return for such year or, if no return was filed for such year, 75 percent of the tax for such year.

(d) *Payment in installments.* Every large corporation required to make payments of minimum estimated tax for a taxable year must make payments in installments in accordance with the provisions of section 6154(b). Thus, for example, a large corporation which, before the 1st day of the 4th month of the taxable year, reasonably expects its estimated tax for such taxable year to be $40 or more, shall make quarterly installments of its minimum estimated tax on or before the 15th day of the 4th, 6th, 9th, and 12th month of its taxable year.

(e) *Large corporation*—(1) *In general.* For purposes of this section, a corporation is a large corporation if the corporation (or a predecessor corporation) had taxable income of at least $1 million for any of the 3 taxable years immediately preceding the taxable year involved ("testing period"). For purposes of this section, a predecessor corporation is the distributor or transferor corporation in a transaction to which section 381 (relating to carryovers in certain corporate acquisitions) applies.

(2) *Short taxable year.* In the case of a corporation (or predecessor corporation) which had a short taxable year for any of the 3 taxable years immediately preceding the taxable year involved, for purposes of determining whether the $1 million amount referred to in paragraph (e)(1) of this section is equaled or exceeded, the "taxable income" for the short taxable year shall be computed by—

(i) Multiplying by 12 the taxable income for the short taxable year, and

(ii) Dividing the resulting amount by the number of months in the short taxable year.

(3) *Component members of controlled group.* (i) For purposes of applying paragraph (e)(1) of this section to any of the 3 taxable years immediately preceding the taxable year involved with respect to corporations that are component members of a controlled group of corporations (as defined in section 1563(a)) for such taxable year, the $1 million amount shall be divided equally among the component members of such group unless all of such component members consent to an apportionment plan providing for an unequal allocation of such amount. The procedure for making and filing this plan shall be the same as the procedure used for making and filing an apportionment plan under section 1561. See section 1561 and the regulations thereunder. The provisions of section 6655(i) and this section shall not apply to component members of a controlled group for any taxable year in which the aggregate taxable income of the component members of the controlled group is less than $1 million.

(ii) In the case of any corporation which was a component member of a controlled group of corporations at any time during the 3 preceding taxable years but is not a member of such group during its current taxable year, taxable income for the 3 preceding taxable years shall be determined as if such corporation were not a member of a group at any time during those years. With respect to the controlled group, the taxable income of its former member shall not be taken into account in determining such group's taxable income for any of the 3 preceding taxable years in making a determination whether such group is a "large corporation" for the current taxable year.

(4) *Computation of taxable income in year where there occurs a transaction to which section 381 applies.* (i) For purposes of determining whether an acquiring corporation had taxable income of $1 million or more for a year in which there occurs a transaction to which section 381 applies, its taxable income shall be the sum of—

(A) The taxable income of the acquiring corporation for its taxable year, plus

(B) The taxable income of the distributor or transferor for that portion of the acquiring corporation's taxable year up to and including the date of distribution or transfer (as defined in § 1.381 (b)–1 (b)).

(ii) For purposes of determining whether a transferor or distributor corporation had taxable income of $1 million or more for a year in which there occurs a transaction to which section 381 applies, its taxable income shall be reduced by the amount of its taxable income for that portion of its taxable year corresponding to the acquiring corporation's taxable year up to and including the date of distribution or transfer (as defined in § 1.381(b)–(b)).

(5) *Consolidated returns.* [reserved].

(6) *Illustration.* The provisions of subparagraphs (1) and (4) of this paragraph (e) may be illustrated by the following example:

Example. X Corporation and Y Corporation are calendar year taxpayers. In 1983 Y Corporation acquires all of the assets of X Corporation in a transaction to which section 381 applies. Y Corporation's taxable income for both 1981 and 1982 was less than $1 million. X Corporation's taxable income for 1983 is determined under subparagraph (4) to be $300,000 for that portion of the acquiring corporation's taxable year up to and including the date of transfer. Y Corporation's taxable income for 1983 is $800,000. Under the provisions of subparagraph (4), Y Corporation's 1983 taxable income for purposes of determining whether it is a large corporation for taxable year 1984 is $1,100,000 (*i.e.*, $800,000+$300,000). If Y Corporation's 1983 taxable income as determined under subparagraph (4) had been less than $1 million but X Corporation's taxable income in 1981 or 1982 had been $1 million or more, then Y Corporation would be a large corporation for taxable year 1984 since X Corporation is a predecessor corporation.

(7) *Effect on a corporation's taxable income of items which may be carried back to a prior taxable year.* (i) In determining whether a corporation (or predecessor corporation) is a "large corporation" for its present taxable year, that is, whether it had taxable income of $1 million or more during any of the 3 taxable years preceding its present taxable year ("testing period"), items which could be carried back under other Code provisions (*e.g.*, those described in sections 172 and 1212) from one of the years in the testing period to another year in the testing period shall be taken into account. Additionally, if a corporation's taxable income for a year during the testing period is redetermined during that testing period, by reason of an examination by the Internal Revenue Service or otherwise, such redetermination shall be taken into account in determining whether the corporation is a large corporation for its present taxable year. Any items which are carried forward under other Code provisions shall also be taken into account in determining a corporation's taxable income.

(ii) The provisions of paragraph (e)(7)(i) of this section may be illustrated by the following example:

Example. X Corporation's taxable income for taxable years 1981 and 1982 was $1 million. Therefore, X was a large corporation for 1982 and 1983. X incurred a net operating loss in 1983 which was carried back under section 172 to taxable years 1981 and 1982. This carryback reduced X's taxable income for both 1981 and 1982 to below $1 million. For taxable year 1984, X is not a large corporation since the net operating loss sustained during one of the years in the 3-year testing period may be carried back to the other years in the 3-year testing period. However, this net operating loss which is carried back does not affect X's large corporation status for taxable years 1982 and 1983 because the 1983 net operating loss was not sustained during the respective 3-year testing periods for 1982 and 1983.

Par. 9. Section 1.6655–5 is redesignated as § 1.6655–6, and a new § 1.6655–5 is added to read as follows:

§ 1.6655–5 Short taxable years in the case of corporations.

(a) *In general.* The provisions of section 6655, with one exception described in paragraph (b) of this section and with certain modifications relating to the application of subsections (d) and (e) thereof which are explained in paragraphs (c) and (d) of this section, are applicable in the case of a short taxable year for which a payment of estimated tax is required to be made.

(b) *Exception to payment of estimated tax.* In the case of a short taxable year, no payment of estimated tax is required if the short taxable year is either—

(1) A period of less than 4 months, or

(2) A period of 4 or more months but less than 12 months and the requirements of section 6154(a) are not met before the 1st day of the last month in the short taxable year.

For purposes of this section a taxable year of 52 or 53 weeks shall be deemed a period of 12 months in the case of a corporation which computes its taxable income in accordance with the election permitted by section 441(f).

(c) *Rules as to application of section 6655(d).* In any case in which the taxable year for which an underpayment of estimated tax exists is a short taxable year due to a change in annual accounting periods, in determining the tax—

(1) Shown on the return for the preceding taxable year (for purposes of section 6655(d)(1)):

(2) Based on the current year's rates but otherwise on the basis of the facts shown on the return for the preceding taxable year and the law applicable to such year (for purposes of section 6655(d)(2)); or

(3) Computed by placing taxable income for a portion of the current year on an annual basis under section 6655(d)(3):

the tax will be reduced by multiplying it by the number of months in the short taxable year and dividing the resulting amount by 12. The application of the exception provided in section 6655(d)(3) shall be determined as if the estimated tax were 90 percent of the tax so reduced (80 percent of the tax so reduced for taxable years beginning before January 1, 1983).

(d) *Rules as to application of section 6655(e).* In any case in which the taxable year for which an underpayment of estimated tax exists is a short taxable year due to a change in annual accounting periods, in determining the applicable amount under section 6655(e)(2), this amount will be reduced by multiplying it by the number of months in the short taxable year and dividing the resulting number by 12. The application of the exception provided in section 6655(e) shall be determined as if the estimated tax were 90 percent of the applicable amount so reduced.

(e) *Preceding taxable year a short taxable year.* If "the preceding taxable year" referred to in section 6655(d)(2) was a short taxable year, the tax computed on the basis of the facts shown on the return for such preceding year, for purposes of determining the applicability of the exception described in section 6655(d)(2), shall be the tax computed on the annual basis in the manner described in section 443(b)(1) (prior to its reduction in the manner described in the last sentence thereof). If the tax rates for the taxable year with respect to which the underpayment occurs differ from the rates applicable to the preceding taxable year, the tax determined in accordance with the preceding sentence shall be recomputed using the rates applicable to the year with respect to which the underpayment occurs.

Par. 10. Paragraph (a)(1) of § 1.6655–6 as redesignated is amended by removing "Section 6655(g)" and adding "Section 6655(h)" in lieu thereof. Paragraph (a)(6) of § 1.6655–6 as redesignated is amended by removing "§ 1.6655–1 through § 1.6655–3" and adding

"§ 1.6655–1 through § 1.6655–5" in lieu thereof.

PART 301—REGULATIONS ON PROCEDURE AND ADMINISTRATION

Par. 11. Section 301.6655–1 is revised to read as follows:

§ 301.6655–1 Failure by corporation to pay estimated income tax.

For regulations under section 6655, see §§ 1.6655–1 to 1.6655–6, inclusive of this chapter (Income Tax Regulations).

These amendments are proposed to be issued under the authority contained in section 7805 of the Internal Revenue Code (68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–9–FRL 2544–6]

Approval and Promulgation of Implementation Plans; Yuba, Sutter and Butte Counties; Air Pollution Control Regulations; State of California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The counties of Yuba, Sutter and Butte have adopted New Source Review (NSR) Rules on June 14, 1983; July 12, 1983; and July 26, 1983 respectively. The three rules are almost identical and satisfy EPA's requirement for NSR. The three rules regulate construction and operation of new and modified major sources of nonattainment pollutants. The rules were submitted as State Implementation Plan (SIP) revisions on the following dates: Yuba, August 2, 1983; Sutter, August 30, 1983; and Butte, October 4, 1983. In this Notice, EPA is proposing to approve the submitted rules with certain changes in the Butte rule and with the exception of Sections 202 and 203 of the Butte rule which will be disapproved.

DATE: Comments may be submitted by April 25, 1984.

ADDRESSES: Comments may be sent to: Regional Administrator, Attn: Air Management Division, Air Operations Branch, New Source Section, Environmental Protection Agency Region 9, 215 Fremont Street, San Francisco, CA 94105.

Copies of EPA's Evaluation Report are available for public inspection during normal business hours at the EPA Region 9 office at the above address and at the following locations:

California State Air Resources Boards, 1102 "Q" Street, Scramento, CA 95814
Yuba County APCD, 938 14th Street, Marysville, CA 95901
Sutter County APCD, 142 Garden Highway, Yuba City, CA 95991
Butte County APCD, 316 Nelson Avenue, Oroville, CA 95965

FOR FURTHER INFORMATION CONTACT: Willard Chin, New Source Section, Air Operations Branch, Air Management Division, Environmental Protection Agency, Region 9 (415) 974–8216.

SUPPLEMENTARY INFORMATION:

Background

The rules under consideration are almost verbatim versions of the NSR portion of the NSR/PSD rule developed by the California Air Pollution Control Officer's Association (CAPCOA) and the California Air Recources Board. This model NSR/PSD rule was approved by EPA Region 9, the Office of General Counsel and the Office of Air Quality and Planning Standards. (See EPA Memo: California New Source Siting Rule, December 10, 1982.) EPA requires NSR rules for pollutants for which an area is designated nonattainment. Yuba and Sutter Counties are designated nonattainment for ozone, and Butte County is designated nonattainment for ozone and carbon monoxide.

NSR—Part D of the Clean Air Act (Section 171 to 173) and 40 CFR 51.18 define the requirements for NSR programs, which apply to nonattainment pollutants. The most important requirements are that local NSR rules and programs require applicants for new sources or modifications to: (a) meet the Lowest Achievable Emission Rate, (b) provide reductions at least equal to the emission increase (offsets) and consistent with RFP, and (c) certify that all major sources they own in the State comply with all air pollution emission limitations. The Yuba, Sutter and Buttle Counties currently administer the NSR program under their conditionally approved Rule.

Description of Regulations

In response to the NSR requirements, Yuba, Sutter and Butte submitted SIP revisions to rules 4.6, 4.6, and 4.5 respectively. The three rules are almost identical and include the following sections.

Part 100 General
Part 200 Exemptions
Part 300 Definitions
Part 400 Requirements
Part 500 Administrative Requirements
Part 600 Calculations
Part 700 Power Plants
Part 800 Cogeneration and Resource Recovery Projects
Part 900 Air Quality Impact Analysis (Butte rule only)

The rule will require nonattainment pollutant sources to undergo a review process to obtain the permits to construct and operate. The provisions outlined above require source applicants to submit the necessary technical analysis to demonstrate that the regulations (such as control technology and offsets) are fulfilled.

Evaluation

EPA has evaluated the regulation to determine whether they satisfy all of the criteria for an NSR program. The Yuba, Sutter and Butte county regulations do meet EPA regulations. The rules will: (1) require pre-construction review of the sources which would be subject to the federal guidelines; (2) require certification of statewide compliance and (3) require application of LAER and offsets in a manner consistent with EPA's NSR requirements (40 CFR 51.18).

As previously mentioned, the submittal rules are near verbatim adoption of the NSR portion of PSD/NSR CAPCOA rule. The substantive differences between the Yuba, Sutter and Butte rules and the December 1982 CAPCOA (NSR only) rule are few. The new provisions include: Sections 402.3, "Use of Emissions Credits from Shutdowns" and 316, "Definition of Reconstruction;" both are required to fulfill EPA regulations. The other new provision is an exemption for seasonal TSP sources from BACT; however, all three counties are designated attainment for TSP. If there is a change in the TSP designation, EPA will then reassess this provision of the rule. The use of effective stack height for the Impact Table provision is not an issue in any of the three rules. The Sutter and Yuba rules do not have the Impact Table provision; the Butte rule does have the table, but it contains language which corrects the deficiencies of previous CAPCOA rules.

All three Districts have made a commitment not to exempt federally defined major sources or major modifications from EPA's permit review requirements. The assurances were made in each of the District's Resolution of Adoption.

The three rules are evaluated in EPA's technical support document which is available at the location listed in the **ADDRESSES** section of this Notice.

It should be noted that Yuba, Sutter and Butte Counties are rural ozone areas and thus exempted from the Clean Air Act, Section 173(1)(B) requirements for hydrocarbon sources.

However, there are three remaining issues in the Butte rule. Two of the deficiencies can be remedied if the District: (1) Revises Section 402.2 of the rule to add the requirement to meet Reasonable Further Progress (RFP) and (2) includes in the District's Resolution of Adoption or in a letter to EPA, a commitment not to use Section 201 to exempt sources from the LAER requirement.

The third issue will require a more complex resolution. Sections 202 and 203 exempt cogeneration and resource recovery sources from offsets requirements. The District is nonattainment for CO so in order to use this exemption, an approvable growth allowance to mitigate CO emissions from cogeneration or resource recovery sources must be developed (See EPA memo: California New Source Siting Rule, December 10, 1982). No growth allowance exists at this time; therefore, EPA proposes to disapprove the exemption provisions. If however, an approvable growth allowance is submitted and incorporated in the SIP prior to final rulemaking, EPA will approve the exemption.

Proposed Action

EPA proposes to approve, under Section 110 and Part D of the Clean Air Act, the Yuba, Sutter and Butte NSR rules, provided that changes noted above are made in the Butte rule and to disapprove Sections 202 and 203 of the Butte rule. Sections 202 and 203 can only be approved if the District submits an approvable growth allowance for the applicable sources.

Under Executive Order 12291, today's action is not major. It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA and any EPA response are available for public inspection at the locations listed in the **ADDRESSES** section of the notice.

List of Subjects in 40 CFR Part 52

Environmental Protection Agency, Air Pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

Under 5 U.S.C. Section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709). The disapproval portion of today's action will also not have a significant economic impact on a substantial number of small entities. The NSR rules apply only to major sources (100 tons per year). At the present time, there are no major sources of carbon monoxide in operation in Butte County. The disapproval will only affect future sources of carbon monoxide locating in the urban Chico area of Butte County (Designation of Areas for Air Quality Planning Purposes; Attainment Status Designations in California, 40746 FR September 9, 1983).

Authority: Sections 110, 129, 171 to 173, and 301(a) of the Clean Air Act as amended (42 U.S.C. 7410, 7429, 7501 to 7503 and 7601(a)).

Dated: November 3, 1983.

John Wise,

Acting Regional Administrator.

BILLING CODE 6560-50-M

---

40 CFR Part 52

[A-5-FRL 2551-4]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of Deficiency.

SUMMARY: The EPA today notifies the State of Indiana that its State Implementation Plan (SIP) for sulfur dioxide (SO_2) is substantially inadequate to assure the attainment and maintenance of the SO_2 National Ambient Air Quality Standards (NAAQS) in three counties. These are Porter, Warrick, and Wayne, EPA is giving the State of Indiana 60 days to provide it with a schedule for correcting these deficiencies for Porter and Warrick Counties and one year to submit enforceable strategies for these counties which assure the attainment and maintenance of the SO_2 NAAQS. EPA is requiring a plan for Wayne County (the only one of these counties which has been designated nonattainment) within 60 days of today's notification.

DATES: Schedules for correcting the SIP deficiencies for Porter and Warrick Counties are due by May 25, 1984. Enforceable strategies for Porter and Warrick Counties must be submitted by March 25, 1985. Enforceable strategies for Wayne County are due by May 25, 1984.

ADDRESSES: Copies of the documents associated with this notice are available for inspection at: (it is recommended that you telephone Robert B. Miller at (312) 886-6031 before visiting the Region V Office).

FOR FURTHER INFORMATION CONTACT: Robert B. Miller, Air and Radiation Branch (5AR-26), Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886-6031.

SUPPLEMENTARY INFORMATION: On January 31, 1972 and April 11, 1972, Indiana submitted a plan intended to assure the attainment and maintenance of the SO_2 NAAQS throughout the State.[1] This plan included the first SO_2 regulation submitted to EPA called APC 13. EPA approved in part and disapproved in part the plan and regulation as the Indiana SO_2 State Implementation Plan on March 31, 1972 (37 FR 10842).

The State submitted a revised plan, including a revised APC 13 (1972 APC 13), on September 15, 1972. EPA approved this regulation and plan in toto as the Indiana SO_2 SIP on May 14, 1973 (38 FR 12696). This revised plan required SO_2 sources throughout most of the State to limit their emissions to between 1.2 poinds of SO_2 per million British Thermal Units (lbs/MMBTU) and 6.0 lbs/MMBTU, depending upon the size and location of the source. Compliance with 1972 APC 13 was required no later than 1975.

Under section 307 of the Clean Air Act, various Indiana utilities petitioned the U.S. Court of Appeals for the Seventh Circuit to review EPA's approval of 1972 APC 13.[2] The Court generally upheld EPA's approval of the plan. It did note, however, that the "reasonableness" of state plans may be challenged in state courts.

On December 5, 1974, Indiana submitted a new APC 13 (1974 APC 13). This regulation replaced for State purposes 1972 APC 13 and, when combined with the nonattainment designation regulation APC 22 (which was submitted on October 3, 1974), required existing sources in Dearborn, Lake, Marion, and Warrick Counties

---

[1] The primary SO_2 NAAQS are violated when, in a calendar year, either: (1) The annual arithmetic mean value of monitored SO_2 concentration exceeds 80 micrograms per cubic meter of air (80 $\mu g/m^3$) (the annual primary standard), or (2) the maximum 24-hour concentration of SO_2 at any site exceeds 365 $\mu g/m^3$ more than once (the 24-hour primary standard). The secondary SO_2 NAAQS is violated when the maximum 3-hour concentration at any site exceed 1,300 $\mu g/m^3$ more than once.

[2] See *Indiana & Michigan Electric Co.* v. *EPA*, 509 F.2d 839 (7th Cir. 1975).

and all new sources to limit their emissions to between 1.2 lbs/MMBTU and 6.0 lbs/MMBTU. Emission limits were removed for all other existing sources. All sources in Lake County were required to comply by 1975, and sources in Dearborn, Marion, and Warrick Counties by 1978. EPA partially approved this regulation on August 24, 1976 (41 FR 35677) for all counties except Jefferson, Laporte, Porter, Vigo, and Warrick. For these five counties only, the SIP remained 1972 APC 13.

The utilities challenged Indiana's adoption of 1972 APC 13 and 1974 APC 13 through the State courts, which ultimately held that both of these regulations were improperly adopted at the State level and were void.[3] Notwithstanding the State Courts invalidation of these regulations, EPA believed at this time that these regulations were still effective at the Federal level.

In 1977 the Clean Air Act was amended by adding the nonattainment area[4] requirements of Part D.[5] In response to these requirements, on June 26, 1979 Indiana submitted a revised SO_2 regulation (1979 APC 13), which applied both in designated nonattainment areas and throughout the remainder of the State. This regulation replaced for State purposes 1974 APC 13. The 1979 APC 13 was recodified as 325 IAC Article 7 and resubmitted on October 6, 1980. EPA conditionally approved 325 IAC Article 7 on March 12, 1982 (47 FR 10825) and May 13, 1982 (47 FR 20586) for most Indiana Counties. However, EPA disapproved the regulation for Dearborn, Jefferson,[6] Porter, Warrick, and Wayne Counties. It took no action on the regulation as it applies to Floyd County. For Jefferson, Porter, and Warrick Counties the SIP remained 1972 APC 13 and for Dearborn, Floyd, and Wayne Counties the SIP remained 1974 APC 13.

In 1982 the Sierra Club sought under the section 304 citizens' enforcement provisions of the Act to enforce 1972 APC 13 against an electrical generating facility in Jefferson County and 1974 APC 13 against an electrical generating facility in Dearborn County. The U.S. District Court for the Southern District of Indiana held that these two regulations were not enforceable as a portion of the SIP and the U.S. Court of Appeals for the Seventh Circuit affirmed.[7] This finding is based on State court decisions which held that the regulations were invalid from their inception because they had never been properly adopted at the State level. Because the regulations are unenforceable, the SIP for these six counties is inadequate, i.e., there are significant SO_2 sources in these counties with no enforceable emission limitations which assure attainment and maintenance of the standards.

The State State has been working on revised strategies for all of these counties, except Wayne, and has submitted plans for three of them, Dearborn, Floyd, and Jefferson, covering all sources. For Floyd County, EPA proposed on May 26, 1982, to approve 325 IAC Article 7, because it protects the primary SO_2 standards, but notified the State under section 110(a)(2)(H) that the regulation is inadequate to protect the secondary standard. EPA will take final action on this proposal for Floyd County in the future. On April 30, 1982, Indiana submitted a revised plan for Jefferson County which consists of source specific emission limits for one source and 325 IAC Article 7 for the remainder. On November 16,1 983, Indiana submitted a revised strategy for Dearborn County which consists of source specific emission limits on three sources and 325 IAC Article 7 for the remainder. Both the Dearborn and Jefferson County plans involve changes in stack configurations. EPA will propose action on these plans in a future **Federal Register** notice. At that time, EPA will determine if the Dearborn and Jefferson County strategies are approvable under section 123 of the Clean Air Act.[8]

The State has advised EPA that it is enjoined at this time by a City of Richmond suit from work on the Wayne County plan.[9] EPA proposed to disapprove the Wayne County plan on February 3, 1983 (48 FR 4972) because of the State's failure to submit an adequate Part D plan. However, on November 2, 1983 (48 FR 50686) EPA revised its policy on the consequences of failure to attain the NAAQS by the end of 1982, and stated that it would issue section 110(a)(2)(H) notices of inadequacy and calls for SIP revision instead of proposed disapprovals in such cases. Today's action affecting Wayne County should be considered a follow-up to the November 2, 1983 policy revision in that it issues such a notice.

Finally, the State has been actively working on revised plans for Porter and Warrick Counties but, as of December 1, 1983, has not submitted approvable plans for these counties. Because Porter and Warrick Counties are not designated nonattainment, EPA did not propose any action on those counties' plans in the February 3, 1983 notice.

Finding and Call for Revision

Based on the Seventh Circuit Court's *Sierra Club* decision, EPA finds that there are no federally enforceable emission limits in six counties in Indiana; Dearborn, Floyd, Jefferson, Porter, Warrick, and Wayne. Normally this would require new plans to be developed for all six of these counties. However, in three (Dearborn, Floyd, and Jefferson) of the counties, EPA currently has complete plans before it on which EPA has not taken final action. Therefore, EPA is not formally notifying the State of Indiana of SIP inadequacy and calling for SIP revisions in these three counties at this time. If EPA ultimately disapproves any substantive part of the plan for either Dearborn, Floyd, or Jefferson Counties, the Agency will at that time issue a notice of SIP inadequacy for the County(s) in question and call for a SIP revision under section 110(a)(2)(H).

---

[3] See *Indiana Environmental Management Board v. Indiana-Kentucky Electric Corp.*, 393 N.E. 2d 213 (Ind. App. 1979).

[4] EPA designated, among others, a portion of Wayne County nonattainment; Dearborn, Jefferson, Porter, and Warrick Counties "unable to be classified"; and Floyd County attainment for the primary SO_2 NAAQS on March 3, 1978 (43 FR 8962) and October 5, 1978 (45093). It proposed to redesignate Jefferson County nonattainment for the primary SO_2 NAAQS on January 27, 1981 (46 FR 8588). EPA will take further action on the Jefferson County redesignation in a future **Federal Register** notice. On September 2, 1983, EPA notified Indiana that an SO_2 redesignation request to nonattainment may be warranted for (among other) Dearborn, Floyd, Porter and Warrick Counties and, under section 107 of the Clean Air Act, requested all available SO_2 data for these counties. EPA will make a determination as to Dearborn, Floyd, Porter, and Warrick Counties' attainment status upon review of the State's data and response.

[5] The requirements for an approvable Part D SIP are described in a "General Preamble" for Part D rulemakings published at 44 FR 20372 (April 4, 1979), 44 FR 38583 (July 2, 1979), 44 FR 50371 (August 28, 1979), 44 FR 53761 (September 17, 1979), and 44 FR 67182 (November 23, 1979).

[6] EPA disapproved 325 IAC Article 7 for Jefferson County in a separate rulemaking at 46 FR 8473 (January 27, 1981).

[7] See *Sierra Club v. Indiana-Kentucky Electric Corporation and Indiana & Michigan Electric Company*, 716 F.2d 1145 (7th Cir. 1983).

[8] The U.S. Court of Appeals for the District of Columbia Circuit has recently disapproved portions and remanded to the Agency portions of EPA's policy for implementing the "tall stack" provisions of section 123 of the Clean Air Act. See *Siegra Club v. EPA*, Slip Op., Nos. 82-1384, 82-1412, 82-1845, and 82-1889 (D.C. Cir. Oct. 11, 1983). Based on this decision, EPA is currently reviewing its policy for implementing section 123. Although the attainment demonstrations submitted in support of the Dearborn and Jefferson County SO_2 strategies complied with EPA's previous policy (47 FR 5864, February 8, 1982), the strategies may no longer be approvable. The State of Indiana should be aware of this potential problem and that it may have to develop new strategies for Dearborn and Jefferson Counties if EPA's previous stack height credit policy is changed as it applies to these counties.

[9] See *Indiana Air Pollution Control Board v. City of Richmond*, No. 1283-S 472, Slip Op., (Ind. December 30, 1983).

EPA is, however, notifying the State of Indiana under section 110(a)(2)(H) of the Clean Air Act that the SIP is substantially inadequate to assure attainment and maintenance of the NAAQS in the other three Counties: Porter, Warrick, and Wayne. In keeping with the time frame suggested in EPA's policy on section 110(a)(2)(H) notifications in nonattainment areas,[10] EPA is giving the State of Indiana under section 110(c)(1)(C) 60 days to submit a schedule for submission of enforceable plans and regulations for Porter and Warrick Counties. Submission of the final plans can be no later than one year from today.

Because Wayne County is a designated nonattainment area and its Part D plan is now well over four years overdue, the plan itself for this county is required within 60 days of today's notice. This time frame is detailed in the November 2, 1983 **Federal Register** notice. If EPA does not receive in a timely manner either acceptable schedules or plans for Porter, Warrick and Wayne Counties, it will disapprove the State plans and develop plans itself under section 110(c)(1) of the Clean Air Act, propose them, and, after considering public comments, promulgate them. Additionally, EPA will consider the appropriateness of imposing the funding restrictions of section 176(b) for the failure to implement under section 110 the requirement for a revised implementation plan.

Under Executive Order 12291, today's action is not "Major." It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA, and any EPA response, are available for public inspection at the EPA Region V Office listed above.

40 CFR Part 52

[A-6-FRL 2550-8]

Plan for Exxon U.S.A. Baytown Refinery, Baytown, Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: EPA is proposing approval of the Exxon U.S.A. Baytown Refinery Alternative Emission Reduction Plan ("Bubble") as a revision to the Texas State Implementation Plan (SIP). The Bubble uses replacement of leaded gasoline in two (2) storage tanks and light naphtha in a third with relatively nonvolatile lube distillate in lieu of controls on five (5) other fixed roof storage tanks; three (3) in laktane and two (2) in heptane service. The use of a process change to produce emission reduction credits is consistent with EPA's Emission Trading Policy Statement of April 7, 1982 (47 FR 15076).

DATE: Comments must be received by April 25, 1984.

ADDRESSES: Copies of the State's submittals are available for review during normal business hours at the following locations:

Texas Air Control Board, 6330 Hwy 290 East, Austin, Texas 78723

Environmental Protection Agency, Region 6, Air Branch, 1201 Elm Street, Dallas, Texas 75270

FOR FURTHER INFORMATION CONTACT: John R. Hepola, Chief, State Implementation Plan Section, Air Branch, Air & Waste Management Division, EPA Region 6, 1201 Elm Street, Dallas, Texas 75270, (214) 767-1518.

SUPPLEMENTARY INFORMATION: On May 13, 1983 the State of Texas submitted a revision to the Texas SIP for an Alternative Emissions Reduction Plan for the Exxon U.S.A. Baytown Refinery in Baytown, Texas. The submittal contained certification that adequate notice and a public hearing were provided for the proposed alternative controls. EPA is proposing to approve the revision and invites comments from all interested persons. Comments received within 30 days of the publication of this notice will be considered by EPA.

Background

At the Baytown Refinery, Exxon is proposing to change the service of two (2) storage tanks containing leaded gasoline and one (1) tank containing light naphtha over to storage of heavy, relatively nonvolatile lube distillate. The emission reduction credits earned from this service change would be applied in lieu of placing controls on five (5) smaller, fixed roof tanks. Three (3) of the uncontrolled tanks contain laktane (octane), and the remaining two (2) contain heptane. The revised limits for the Exxon Baytown Refinery are as follows:

Source (tank No.)	Previous RACT limits (tons VOC per year)[1]	New emission limits (tons VOC per year)	Net change in emissions (tons VOC per year)
[illegible]	0.75	3.83	+3.08
91	0.75	3.83	+3.08
92	0.75	3.83	+3.08
[illegible]	1.43	11.50	+10.07
[illegible]	1.43	11.50	+10.07
715	19.92	0.11	-19.81
720	0.81	0.06	-0.75
1072	12.00	[illegible]	-11.92
[illegible]	37.84	34.74	-3.10

[1] Emission estimates based on use of emission factors from EPA Publication AP-42, Section 12 Part 4.3 "Storage of Organic Liquids."

Review

The proposed bubble was reviewed against the proposed Emissions Trading Policy Published in the **Federal Register** on April 7, 1982 (47 FR 15076). EPA has reviewed the State's submittal and developed an Evaluation Report.[1] This evaluation report is available for inspection by interested parties during normal business hours at the EPA Region 6 Office and the other address listed above. Briefly, the review is summarized below.

To qualify for approval as an Alternate Emissions Reduction, the proposed reductions must be surplus, enforceable, permanent, and quantifiable. First, the reductions are surplus because credit is only given for emissions reductions beyond the Texas requirements for Reasonably Available Control Technology (RACT).[2] The

[1] EPA Review of the Exxon Bubble in October 1983.

[2] EPA proposed to approve all portions of the ozone attainment demonstration for Harris County, Texas on February 3, 1983 (48 FR 5114), except the vehicle inspection/maintenance (I/M) portion. EPA indicated in that notice that no changes are needed in the stationary source control provisions Texas submitted for the County. Based on that proposal, EPA is proposing to treat Harris County as an ozone nonattainment area with an approved demonstration for purposes of acting on this emissions trade. Under the proposed Emissions Trading Policy Statement and the notice of August 31, 1983 soliciting comment on certain aspects of the policy (48 FR 39580), the proper trading baseline in such areas is the set of requirements in the approved plan. For the facilities involved in this trade, the Harris County plan requires RACT. Therefore, the RACT baseline relied on in this trade is appropriate. Final action on this bubble, however, is contingent on whether EPA finally approves the Harris County demonstration.

credits for emission reductions were achieved by a process change and gasoline production cutbacks. The trade will not result in any increase in tankage throughput. Exxon has indicated that should gasoline production increase again there would be no increased throughput to other tanks. In any event, EPA has determined that the maximum increase possible in emissions due to such an increased throughput would be less than .1 ton per year.

Second, the limits in the bubble are enforceable because TACB, through Executive Order, has established enforceable emission requirements for each tank. Since the documents will be a part of the Texas SIP, they will be federally enforceable.

Third, upon approval, the new emission limits become a permanent part of the federally enforceable SIP.

Fourth, EPA has determined that the emissions involved are quantifiable in the creation of emission reduction credits.

The proposed bubble also meets the further criteria given in the Emissions Trading Technical Issues Document published in the April 7, 1982 **Federal Register** (47 FR 15076) and which are as follows:

1. Emissions trades must involve the same pollutant. Volatile Organic Compound (VOC) emissions increases from one source are traded for even greater decrease in VOC emissions from another source under the proposed trade.

2. All uses of Emission Reduction Credits must satisfy ambient tests. EPA considers pound for pound trades of VOC emissions to have no net impact on the environment. Therefore, since the Exxon bubble is such a trade with a surplus of 3.10 tons per year of decreased VOC emissions it meets this requirement.

3. Trades should not increase net baseline emissions in nonattainment areas. Net emissions of the proposed bubble after the trade will be lower than the RACT baseline approved by EPA for Harris County in the 1979 SIP (45 FR 19231). In addition the trade is consistent with the reasonable further progress portion of the 1982 SIP for Harris County (48 FR 5114).

4. Emissions trades should not increase hazardous pollutants. The only emissions involved in this trade that are covered under section 112 of the Clean Air Act (NESHAPS) are benzene emissions. Under this trade, however, benzene emissions would decrease.

5. Emissions trades connot be used to meet technology based requirements. The Exxon Baytown Refinery is an existing source so NSPS, BACT and LAER do not apply.

The Exxon bubble meets all of the criteria for an acceptable bubble as outlined in the April 7, 1982 **Federal Register** policy statement. Therefore EPA is proposing to approve this alternative emission reduction plan.

Interested persons are invited to submit comments on this proposed approval. EPA will consider all comments received within thirty days of the publication of this notice.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator certifies that the attached rule will not have a significant economic impact on a substantial number of small entities since it proposes no new requirements.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 1291.

This notice of approval is issued under the authority of section 110 of the Clean Air Act, as amended, 42 U.S.C. 7410.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Corbon monoxide, Hydrocarbons, Intergovernmental relations.

Dated October 28, 1983.

Dick Whitting,

Acting Regional Administrator.

[FR Doc. 84-8022 Filed 3-23-84; 8:45 am]

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR PART 67

[Docket No. FEMA-6592]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premimum rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts

flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67.

Flood insurance, Flood plains.

The proposed modified base flood elevations for selected locations are:

PROPOSED MODIFIED BASE FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet	
				Existing	Modified
Connecticut	Norwich, City, New London County.	Trading Cove Brook	At confluence with Thames River	*13	*14
			Approximately 350' downstream of West Thames Street	*13	*14
		Thames River	Downstream corporate limits	*13	*14
			Shipping Street (extended)	*14	*15
			Confluence with Yantic and Shetucket Rivers	*14	*15
		Yantic River	Confluence with Thames River	*14	*15
		Shetucket River	Confluence with Thames River	*14	*15
			Upstream of State Highway 2	*14	*15
		Spaulding Pond Brook	Confluence with Shetucket River	*14	*15
		Tributary F	Confluence with Thames River	*13	*15

Maps available for inspection at the City Hall, Norwich, Connecticut.

Send comments to Honorable Charles Whitty, City Manager of Norwich, City Hall, Norwich, Connecticut 06360.

Georgia	(C) Atlanta, Fulton and DeKalb Counties.	Chattahoochee River	About 0.63 mile downstream of Bankhead Highway	*762	*766
			About 0.40 mile upstream of Interstate Route 75	*782	*778
		Lenox Road Tributary	At mouth	None	*823
			About 0.64 mile upstream of the mouth	None	*829
		Proctor Creek	At mouth	*782	*788
			About 0.4 mile upstream of Bolton Road	*770	*788
		Whetstone Creek	At mouth	*770	*773
			Just downstream of Marietta Road	*788	*773
		East Fork Whetstone Creek	At mouth	None	*773
			Just downstream at Adams Drive	None	*773
		Peachtree Creek	At mouth	None	*774
			Just downstream of Ridgewood Road	None	*774

Maps available for inspection at the Bureau of Highways and Streets, 3rd Floor, City Hall, 68 Mitchell Street SW, Atlanta, Georgia.

Send comments to Honorable Andrew J. Young, Mayor, City of Atlanta, 68 Mitchell Street SW, Atlanta, Georgia 30335.

Georgia	City of Warner, Robins, Houston County.	Bay Gall Creek	About 500 feet upstream of mouth	*283	*283
			About 1,300 feet upstream of mouth	*285	*285
			Just downstream of Richard Russell Parkway	*None	*293
			Just upstream of Moody Road	*296	*296
			About 1,500 feet upstream of Moody Road	*303	*303
		Howard Branch	At mouth	*301	*301
			At confluence with Robins Run	*316	*316
			About 5,750 feet above the mouth	*355	None
		Robins Run	At confluence with Howard Branch	None	*316
			About 1,700 feet upstream of Angus Boulevard	None	*337

Maps available for inspection at the Engineering Department, City Hall Building, 700 Watson Boulevard, Warner Robins, Georgia.

Send comments to Honorable Foy S. Evans, Mayor, City of Warner Robins, P.O. Box 1466, Warner Robins, Georgia 31099.

Illinois	Village of Crestwood, Cook County.	Crestwood Drainage Ditch East	Just upstream of Cicero Avenue	*601	None
			Just upstream of Kostner Avenue	*610	None
		Tinley Creek	Just upstream of 127th Street	*597	*595
			Just upstream of Central Avenue	*600	*604
			About 900 feet upstream of Elementary Christian School Road	*606	*609

Maps available for inspection at the Village Office, 13840 South Cicero Avenue, Crestwood, Illinois 60445.

Send comments to Honorable Chester Stanczak, Mayor, Village of Crestwood, 13840 South Cicero Avenue, Crestwood, Illinois 60445.

Illinois	City of Joliet, Will County	Rock Run North	Approximately 0.5 mile downstream of Essington Road	*576	*576
			Approximately 0.3 mile upstream of Theodore Street	None	*584
		Sunnyland Drain	Approximately 1.9 miles above confluence with DuPage River.	*602	*602
			Approximately 950 feet upstream of confluence of Sunnyland Drain Tributary.	*606	*608
		Sunnyland Drain Tributary	At confluence with Sunnyland Drain	*602	*602
			Just upstream of Hennepin Drive	*602	*603
			Just upstream of U.S. Route 30	*608	*606
		St. Francis Academy Creek	Just upstream of Theodore Street	None	*627
			Approximately 1,150 feet upstream of Theodore Street	None	*654
		St. Anne School Tributary	Just upstream of Theodore Street	None	*627
			Approximately 800 feet upstream of Catherine Street	None	*654
		Rock Run Tributary No. 2	At confluence with Rock Run North	None	*575
			Approximately 860 feet upstream of West Ridge Lane	None	*585

Maps available for inspection at the Office of the Director of Community and Economic Development, City Hall, 150 West Jefferson Street, Joliet, Illinois 60431.

Send comments to Honorable John Bourg, Mayor, City of Joliet, City Hall, 150 West Jefferson Street, Joliet, Illinois 60431.

Nebraska	City of Beatrice, Gage County	Indiana Creek	At confluence with Big Blue River	*1,260	*1,259
			At 1,600 feet upstream of Highway 77	*1,262	*1,263
			At 23,360 feet above confluence with Big Blue River	*1,272	*1,273
		Big Blue River	Approximately 3,600 feet above confluence with Bear Creek (at downstream limit of detailed study).	*1,253	*1,253
			At confluence with Indian Creek	*1,260	*1,259

PROPOSED MODIFIED BASE FLOOD ELEVATIONS—Continued

[redacted]	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet	
				Existing	Modified
			Approximately 11,600 feet above confluence with Indian Creek (at upstream limit of detailed study).	*1,261	*1,261

			Confluence of Hell Creek	[illegible]
			Downstream of confluence of Elk Creek	*716
			Approximately .81 mile upstream of confluence of Pigeonroost Creek.	*740
			Approximately 0.1 mile downstream of County Route 49/1.	*777
			Confluence of Evans Ferrell Branch	*826
			Upstream County Route 9	*862
			Approximately 1.0 mile upstream of County Route 9	[illegible]
			Approximately 1.7 miles upstream of County Route 9	*922
			Upstream County Route 52/24	*952
			Upstream County Route 52/25	[illegible]
			Approximately 0.9 mile upstream of County Route 52/25.	*1,021
			Approximately 0.2 mile upstream of confluence of Spice Branch.	*1,058
			Confluence of Longtail Lick Branch	*1,094
			Approximately 0.1 mile downstream of confluence of Rover Branch.	*1,127
			Upstream County Route 52/26	*1,158
			Confluence of Little Muncy Branch	*1,192
			Approximately 0.04 mile upstream of confluence of Grant Branch.	*1,232
		Laurel Fork	Confluence of Pigeon Creek	*641
			Confluence of Right Fork	*646
			Upstream of sixth crossing of County Route 3/5	*676
			Confluence of Toms Branch	*700
			Upstream of County Route 3	*723
			Approximately 0.2 mile upstream of confluence of Lick Branch.	*756
			Upstream of Laurel Lake Dam	*789
			Confluence of Laurel Branch	[illegible]
			Approximately 0.1 mile upstream of confluence of Paw Paw Branch.	[illegible]
			Approximately 0.8 mile upstream of confluence of Paw Paw Branch.	*857
		Trace Fork	Confluence with Pigeon Creek	[illegible]
			Upstream State Route 65, 2nd crossing	*716
			Approximately 0.1 mile upstream of confluence of Duncan Fork.	*731
		Rockhouse Fork	Approximately 0.1 mile downstream of County boundary.	*764
			Upstream County Route 65/5, 2nd crossing	*794
			Confluence of Upper Curry Branch	*825
			Approximately 0.7 mile downstream of County Route 65/15.	[illegible]
			Upstream County Route 65/15	*891
			Approximately 0.1 mile upstream of most upstream private road.	[illegible]

PROPOSED BASE FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
		Buffalo Creek	Confluence with Tug Fork	*669
			Approximately 50 feet upstream of County Route 14/2	*667
		[illegible] Creek	Upstream of County boundary at Matewan	*708
			Approximately 0.2 mile upstream of County Route 9/3	*739
			Upstream of County Route 9/11	*770
			Upstream of County Route 6, third crossing	*811
			Approximately 0.8 mile upstream of County Route 6, 3rd crossing.	*846
			Approximately 1.4 miles upstream of County Route 6, 3rd crossing.	*881
			Confluence of Chafin Branch	*919
			Approximately 0.2 mile upstream of County Route 6, 4th crossing.	*948
			Approximately 0.6 mile upstream of County Route 6, 4th crossing.	*978
			Confluence of Marks Branch	*1,004
			Approximately 180 feet upstream of confluence of Double Camp Fork.	*1,032
		Guyandotte River	Downstream County boundary	*788
			Confluence of Harrys Branch	*801
			Upstream County Route 52/4	*846
			Upstream of abandoned railroad bridge	*863
			At most upstream County boundary	*889
		Gilbert Creek	Downstream County boundary	*871
			Confluence of Axe Branch	*900
			Upstream of footbridge and confluence of Big Fork	*937
			Approximately 0.4 mile upstream of Norfolk and Western Railway.	*977 *1,007
			Approximately 0.5 mile downstream of confluence of Old House Branch.	*1,042
			Confluence of Old House Branch	*1,150
			Approximately 106 feet upstream of County Route 13/2.	
		Horsepen Creek	Confluence with Gilbert Creek	*881
			Approximately 0.8 mile upstream of County Route 13	*908
			Confluence of Browning Fork	*932
			Approximately 0.7 mile upstream of confluence of Browning Fork.	*978
			Confluence of Smith Branch	*1,016
			Approximately 320 feet upstream of confluence of Coon Branch.	*1,108
		West Fork Twelvepole Creek	Approximately .14 mile downstream of confluence of Shell Branch.	*825 *854
			Confluence of Camp Branch	*893
			Approximately 0.4 mile upstream County Route 3/12, 1st crossing.	*1,028
			Approximately 85 feet upstream of most upstream crossing of County Route 3/2.	
		Mosses Fork	Confluence with West Fork Twelvepole Creek	*1,039
			Approximately 300 feet upstream of County Route 3/2	*1,060
			Approximately 0.3 mile upstream of County Route 3/2, 2nd crossing.	*1,096
			Approximately 1.1 miles upstream of confluence with West Fork Twelvepole Creek.	*1,129

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-6581]

Revision of Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed modified base (100-year) flood elevations listed below for selected locations in the City of Temple, Bell County, Texas.

Due to recent engineering analysis, this proposed rule revises the proposed modified determinations of base (100-year) flood elevations published in the **Federal Register** at 49 FR 1772 on January 13, 1984, and hence supersedes those previoulsy published proposed rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in each community.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone areas and the proposed flood elevations are available for review at the Muncipal Building, Temple, Texas.

Send comments to: Honorable John F. Sammons, Jr., Mayor of Temple, Municipal Building, 702 East Houston, Temple, Texas 76501.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: Proposed modified base (100-year) flood elevations are listed below for selected locations in the City of Temple, Bell County, Texas, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 84-231; FCC 84-86]

Increasing the Availability of FM Broadcast Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign FM channels in various parts of the United States as the first stage of implementation of BC Docket 80-90, which concerns the Increase of Availability of Commercial FM Broadcast Assignments. This action is taken to propose 684 FM allotments in order to provide new or additional local service.

DATES: Comments must be filed on or before May 14, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Notice of Proposed Rule Making

In the matter of implementation of BC Docket No. 80-90 to increase the availability of FM Broadcast Assignments; MM Docket No. 84-231.

Adopted: March 1, 1984.

Released: March 14, 1984.

By the Commission.

Introduction

1. In this proceeding, the Commission takes the first step towards implementing BC Docket No. 80-90 [1] by listing 684 communities as proposed locations for new FM channel assignments. We intend to proceed with these proposals as we typically do in FM channel assignment cases (see §§ 1.411 *et seq.*, and 73.202 *et seq.* of the Commission's Rules) with some variations as discussed below. After setting forth the background to this proceeding, this *Notice* describes how the list of proposed channel assignments was generated, sets forth the procedures for filing comments and counterproposals, and discusses other issues related to the application process for these proposed assignments.

Background

2. The Commission's current FM channel assignment rules were adopted approximately two decades ago and have remained substantially unchanged. However, during that period, a significant growth in FM service has spawned an increased demand for new stations, particularly in those communities lacking aural service. In recent years, the demand for new FM service has far outstripped the availability of FM frequencies in many areas of the country. Recognizing this situation, the Commission initiated Docket 80-90 proposing changes in its FM channel assignment rules. Those changes, in addition to providing for a substantial increase in the number of FM stations, were designed to protect the service areas of existing stations to the extent provided by the Commission's technical rules. The *Report and Order* adopted rules which:

(1) Allowed Class A stations (previously confined to 20 channels) to operate on any of the 60 Class B/C channels;

(2) Created a new class of station in Zones I and I-A (Class B1) and two new classes in Zone II (Class C1 and C2);

(3) Required existing stations to meet minimum facility requirements within three years or be reclassified according to the station's actual operating facilities; and

(4) Converted the FM service rules to the metric system.

An amended distance separation table incorporating the classes of stations was also adopted. Further, the *Report and Order* modified the rules governing "major" and "minor" modifications to station authorizations. Previously, all modifications changing the area within a station's predicted 1 mV/m field strength contour by 50 percent or more were considered major. However, because the distance separation requirements are based upon the use of maximum facilities, applications to increase facilities in order to maintain the classification of an existing station shall now be processed as "minor." [2]

3. The *Report and Order* anticipated that a significant demand for new stations would be unleashed as a result of adoption of the new rules. Typically, the Commission initiates separate rule making proceedings for each petition filed to amend the FM Table of Assignments. However, it was deemed impractical to follow such a procedure here, where in excess of 1,000 new stations could be added producing a potential of several thousand petitions and counterproposals. In the *Report and Order*, we recited the Commission policy to respond to requests for new stations as quickly as possible and to minimize backlogs of mutually exclusive petitions. We noted, however, that the existing staff resources were inadequate to do so in light of the expected heavy demand for newly available stations. Accordingly, the effective date of the new rules was delayed pending the availability of sufficient staff resources. These resources were provided in Congressional action on our FY 1984 budget on November 14, 1983. Thus, as provided in the *Report and Order* the effective date of the new rules will be the date of adoption of the instant *Notice* in this "omnibus" proceeding, March 1, 1984. This date is particularly important to licensees of Class B and C stations currently operating below the minimum specifications of 25 kw (Class B) and 100 kw and 300 meters (984 ft.) HAAT (Class C) which may wish to submit applications to upgrade their facilities in order to retain their Class B or C status. Failure to apply for minimum facilities by March 1, 1987 will subject all such Class B and Class C stations to reclassification.

4. The Commission has also considered several requests for reconsideration of portions of the *Report and Order* in Docket 80-90. In the accompanying *Memorandum Opinion and Order* (see fn. 1) the Commission addresses concerns expressed on behalf of existing Class B and C stations which are currently operating with lesser facilities than required by the new rules.[3] In this regard, the petitions requested that the Commission extend the time period within which existing stations must upgrade their facilities in order to avoid downward classification and during which they will receive additional protection from new allotments. The Commission reiterated

[1] *Report and Order*, 48 FR 29486, pub. June 27, 1983; *Memorandum Opinion and Order*, 49 FR ——, pub. March —, 1984.

[2] Subsequently in a separate rule making proceeding (MM Docket 83-1377), *Notice of Proposed Rule Making*, 49 FR 1252, published January 10, 1984, the Commission proposed to designate all changes in a station's power, height and antenna location as minor. Only modifications in frequency or station location would continue to be processed as major.

[3] These licensees have opted for lesser facilities for a variety of reasons, including the use of facilities necessary to serve their communities, financial considerations, real estate availability, local zoning restrictions, and air hazard determinations by the Federal Aviation Administration.

its previous determination that affording the requested protection would adversely affect the possibility of additional allotments under the new rules. However, the Commission also declared that it does not intend to overly restrict the licensees' opportunities to improve their facilities during the three year grace period. Accordingly, after noting factors such as the lack of available land, zoning restrictions, and air hazard considerations which could limit Class C stations from upgrading at their present sites, the Commission will provide all Class C stations a 10-mile "buffer zone," effective during the three year grace period, to enhance the possibility of upgrading.[4] This distance was selected in order to provide a reasonable "protected area" in which existing Class C licensees could relocate while not unduly restricting the potential number of new stations possible under the new rules.

How the List Was Generated

5. By this *Notice* we adopt, with some modifications, the Stations Requirements List developed for the Second Session of the Administrative Conference on AM Broadcasting in Region 2.[5] Originally the list included some 3,000 communities having no local aural services; containing one or more daytime-only AM stations; or needing minority or public radio stations. That list has been reduced to approximately 1,400 communities for the purposes of this omnibus proceeding. We have eliminated all communities already having one or more fulltime radio stations except those identified as needing minority or public radio service. We have also updated the list to exclude those communities which have been allocated FM or fulltime AM stations or have pending proceedings for such stations. The remaining communities fall within the following classifications:

"L" denotes communities with no local service and are located more than 10 miles from cities with populations of at least 25,000 (noncommercial FM stations, many of which are low-powered, 10-watt stations were not taken into account for this purpose).

"A" denotes communities which have daytime-only AM stations and are located more than 10 miles from cities with populations of at least 25,000.

"M" denotes communities for which the National Black Media Coalition ("NBMC") asserted the existence of a need for stations to serve the minority population (Black, Hispanic, American Indian, Alaska Native, or Asian/Pacific Islander).[6]

"P" denotes communities for which the National Public Radio ("NPR" network asserted the existence of a need for noncommercial educational radio service which cannot be satisfied within the reserved portion (88–92 MHz) of the FM band.[7]

The number of participating communities considered in our study according to the category designations were as follows:

658 type "L" communities;
352 type "A" communities;
321 type "M" communities; and
70 type "P" communities.

6. With the aid of a computer program the Commission initially determined which of these communities could be allotted FM channels consistent with the distance protections to existing stations. In order to optimize allotments, the program model included the capability to impose a site restriction. For purposes of this calculation, the maximum amount a new station of a given class was allowed to vary from the center city coordinates is shown in the following Table:

Class	Distance (in miles)
A	5.0
B1	10.0
B	15.0
C2	15.0
C1	20.0
C	25.0

7. Furthermore, the class of a potential assignment depended upon community population. For purposes of selecting the class allowed a community we set forth the following criteria:

Population	Largest class	Smallest class
Less than 10,000	A	A
More than 10,000 but less than 300,000	B or C	A
More than 300,000	B or C	B1 or C2

Another consideration in the structure of the computer model was the ability to make one allocation available for each community before any community could obtain a second channel. Although not all communities were able to be designated a first channel, such exclusion did not occur as a result of another community being considered for a second channel. On the other hand, in some cases the choice of a higher class of assignment for communities over 10,000 population did preclude the availability of a first channel to some smaller cities. After the maximum number of communities were given one channel, extra channels were allotted by the program so as to maximize the number of assignments.

8. A computer run was then accomplished considering all L, A, M and P type communities without priority given to any category; however, communities listed in multiple categories were given additional weight. In this run a 10-mile buffer zone was applied. the following results were obtained for the 1,396 communities:

590 (42%) had no possibility of a new channel due to current assignments in the FM band.
684 (49%) were allotted new channels.
122 (9%) were denied new channels.[8]

9. Where two communities could only receive the same or conflicting adjacent channels, the model chose the larger of the two communities. For example, Clearfield, Utah, had only Channel 290A available to it, while Layton, Utah, had only Channel 291A available to it. Since these allotments are mutually exclusive, and Layton's population is larger (22,900 vs. 18,000), the program chose Layton.

10. In selecting a channel suitable only for a Class A station at some of the larger communities (see para. 7, *supra.*), the computer did not consider unique configurations of a community which may cause some doubt as to the provision of a city grade signal (70 dBu or 3.16 mV/m). See Section 73.315(a) of the Commission's Rules. Due to the selection process and the availability of channels elsewhere, it is possible that channels suitable for higher classes of stations of channels are available and actually needed in order to comply with city grade signal requirements.

[4] We note that approximately 20% of all Class C stations are currently at minimum antenna height and not subject to reclassification. However we intend to maintain the 10 mile buffer area for these stations during the pendency of this proceeding to enable us to more expeditiously evaluate the counterproposals.

[5] See Appendix B, footnote 1, of the *Report and Order, supra.*

[6] On October 1, 1980, NBMC submitted a preliminary listing of a minority demand for new stations in the Top 100 markets. The list was submitted in BC Docket 79–164, and entitled *Initial Comments of the National Black Media Coalition in Response to Interim Report and further Notice of Inquiry.* The goal of the study was to identify the markets in which minority ownership was underrepresented. A supplemental filing was submittedon January 26, 1981, entitled *Additional Hispanic-Owned Stations Needed for Market Parity: A Supplement to "Demand for New Minority-Owned Radio Stations."* This submission describes the need for additional Hispanic and Black owned stations based on population estimates for 1980. Both filings were considered in this proceeding.

[7] NPR submitted a list of desired assignments designed to meet the demands for public radio in response to a request from the Advisory Committee on Radio Broadcasting, Subgroup on Radio Spectrum Allocations as an appendix to the *Report on New Station Demand and Viability,* dated december 17, 1980. NPR compiled its list based on the following priorities: (1) A first public radio service for every part of the United states, (2) a second such service, (3) a local service for every city over 100,000 population.

[8] These communities were denied new channels based on a priority scheme which is explained in paragraph 9, *infra.*

Proponents should consider this requirement and other transmitter location problems when stating they intend to apply for a proposed allotment. A special showing of city grade service may be requested in some circumstances.

Procedure for Filing Comments and Counterproposals

11. During the period set forth (see para. 21 *infra*) interested parties may submit comments in support of or in opposition to one or more of the proposed channel allotments. In every case, in order for the Commission to give further consideration to a community proposed in this *Notice*, there must be an expression of interest in applying for the proposed channel allotment at the comment stage.

12. Parties may also submit counterproposals for new allotments. Such counterproposals must include:

(1) A statement by the party that it would apply for the requested channel if it is allotted;

(2) The category which applies to the proposal—Provision for: (a) First or second aural service;[9] (b) First local service; (c) First fulltime local service; (d) Minority service;[10] (e) Public radio service; and

(3) A distance separation showing indicating (a) That the channel can be allotted consistent with the distance requirements to all existing allotments and stations; and (b) That there is, in fact, a short-spacing to one or more of the Commission's proposed allotments as set forth herein.

Any counterproposal which is not mutually exclusive or which does not specify one of the above categories will not be considered in the context of this omnibus proceeding. Instead, the request will be returned without prejudice and may be refiled at the conclusion of this docket. Upon receipt of the counterproposal, the Commission's staff will examine the technical aspects of the filing for compliance with the distance sepasations and for mutual exclusivity. If acceptable, the proposal will be entered into the Commission's computer. Once the comment deadline has passed and all counterproposals have been entered, a list will be released specifying which communities are being considered for new allotments and eliciting reply comments on the various proposals. We shall announce a reply comment period when this second list of proposals is released. Since not all communities can be accommodated with new channels, the reply comment period is offered to provide an opportunity to compare conflicting proposals. Replies should address the comparative needs of the communities.

Evaluation of Proposals

13. The criteria used by the Commission in evaluating conflicting proposals was recently set forth in the companion proceeding, *Revision of FM Assignment Policies and Procedures* (BC Docket 80-130) 90 F.C.C. 2d 88 (1982). In that proceeding the Commission recognized that as the FM service has matured over the last two decades, there was no longer a need to adhere to rigid standards of priorities in order to compare the benefits of conflicting proposals. Rather most areas of the country already have established FM radio services and those lacking local service were not unaware of the FM medium. Nevertheless, the Commission indicated that it would continue to give emphasis to local service. *Supra* at 92. The priorities which were adopted in that proceeding are as follows:

(1) First full-time aural service;
(2) Second full-time aural service;
(3) First local service; and
(4) Other public interest matters.

(Co-equal weight would be given to priorities (2) and (3))

14. It is our intention to convert these priorities to objective numerical factors for application by the computer program. Thus, each community proposed in this *Notice* or accepted as a counterproposal will have a priority weight assigned to it for purposes of the computer run. Interested parties are urged to comment on the appropriate numerical weighting factors. Because there are few areas remaining with no or only one aural service, the provision of first or second aural service would play a decisive role in very few situations in this proceeding. Nevertheless, we believe that this factor remains an important consideration under Section 307(b) of the Communications Act of 1934, as amended. Thus, where first or second service can be shown (see fn. 8, *supra*.) we believe those proposals should receive the highest numerical weight. First local service and first local nighttime service are also significant public interest factors under Section 307(b) and should be weighted accordingly. Finally, provision of service to minority populations and public radio service are public interest matters which are specifically entitled to weight in our considerations. To help focus public comment in this area, we propose and invite comments on the following priority weighting factors:

First aural service	4
Second aural service	3
First local service	3
First fulltime local service	2
Minority or public radio service	2

The weight accorded each community will be equal to that given for the highest priority category for that community.[11]

15. As between communities with equal weighting factors, the one which is the more populous will be preferred. Thus concerning the example in para. 9, *supra.*, where Clearfield, Utah and Layton, Utah both fall into the same category [(L) no local service)] Layton, as the more populous community would receive the allotment. Within the minority category the respective minority populations as set forth in the 1980 U.S. Census will be the general standard for selection. Finally, it is our intention to review the computer's allotment selection to insure that the mechanistic application of these ranking standards do not yield anomolous results.

Procedure for Filing Applications

16. We shall complete the omnibus proceeding by the issuance of a *Report and Order* allotting channels to those communities selected under the process set forth in paragraphs 14 and 15, *supra.* Upon adoption of the *Report and Order*, applications will be accepted for some of the assignments. In order to maintain control of the application processing we intend to stagger the effective dates of the channel assignments thereby spreading out the filing of applications for the newly available channels. The order of availability could be based on any of several factors including: (1) Geographic regions, by states; (2) alphabetical, by communities; (3) largest communities, by population; (4) channel numbers (221–300). Commentors are urged to address these or other methods of making the new channels available for application.

17. At the termination of this proceeding, we intend to accept petitions for rule making to assign FM channels as we have done in the past. As long as the number of petitions

[9] Proponents claiming such service should submit a showing pursuant to the method set forth in *Roanoke Rapids, N.C.*, 9 F.C.C. 2d 672 (1967) and *Anamosa, Iowa*, 46 F.C.C. 2d 520 (1974).

[10] For purposes of this omnibus proceeding, we have defined the term "minority service" to apply to a city with a significant minority population which the interested party plans to serve.

[11] A proposal which falls into more than one category would be given an enhanced priority value by the addition of a factor equal to one-tenth the priority value of the additional category. Thus, a proposal that would provide a first aural service from a community with no local station and provide a minority service in that community would get a priority factor of 4.5 under the weighting factors suggested above. That is, 4 for first aural service, 0.3 for first local service and 0.2 for minority service.

received are at a manageable level, we will process each request in a separate proceeding. However if the number of petitions becomes unmanageable, it is possible that a second omnibus proceeding could be conducted based on the petitions on hand.

Other Matters

18. In the *Notice of Inquiry and Notice of Proposed Rule Making* in BC Docket No. 82–538, 47 FR 38937, published September 3, 1982, we considered a broad range of problems faced by daytime-only AM licensees. One such problem involved the relative handicap these licensees may encounter in comparative licensing proceedings for FM channels newly allotted to their principal communities. Existing comparative criteria could entitle competing applicants for such FM facilities to a diversification preference over daytime-only licensees [12], thus potentially foreclosing a means by which these experienced broadcasters could expand their service to the public. Because the instant proceeding involves numerous FM channel allotments to communities now served by daytime-only stations, we believe it appropriate to inquire whether daytime-only stations should be granted special consideration in this comparative context and, if so, what should be the nature of that consideration. One possible remedy would be to simply disregard the daytime-only facility for purposes of making diversity determinations in comparative proceedings involving an FM channel in the daytime-only station's principal community. This approach would enhance daytime-only braodcasters' capacity to compete with other applicants by removing the negative diversity consequences that would normally result from their ownership of daytime-only facilities. However, daytime-only stations that are not licensed to the same community as the proposed FM channel would be considered for diversity purposes. Another possible remedy on which we seek comments is whether it would be desirable to designate a preference to licensees of daytime-only stations over other competing applicants for an FM channel newly assigned to the same community. Further, we request comments on whether it should be necessary for the licensee of the daytime-only station to divest itself of the AM station as a prerequisite to the licensee being granted a preference for an FM channel or being given neutral diversity treatment. See *WHW Enterprises, Inc.*, 89 FCC 2d 799 (1982).

19. *Regulatory Flexibility Act.*

I. *Reason for Action.* This action derives from BC Docket 80–90. In this proceeding we have proposed various FM channel allotments for public comment to elicit support or opposition to these particular locations and to determine whether there are communities in greater need of an affected frequency.

II. (a) *Objective.* This proceeding will elicit comments on the need for the proposed FM channel allotments based on statements of support or on proposals which demonstrate a greater need in another community.

(b) *Legal Basis.* The legal basis for eliciting comments is Sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

III. *Description, Potential Impact and Number of Small Entities Affected.* Small entities could be affected in two ways. Those small businesses already holding licenses for radio stations could suffer increased competition in their markets. Many small businesses will be interested in applying for one or more of the proposed allotments to be made available at the termination of this proceeding. It is unknown how many small entities may be affected either favorably or adversely.

IV. *Federal Rules Which Overlap, Duplicate or Conflict with the Proposed Rules.* None.

V. *Any Significant Alternative Minimizing Impact on Small Entities and Consistent With Stated Objectives.* None.

20. It is ordered that the Secretary SHALL SEND a copy of this *Notice of Proposed Rule Making* to the Small Business Administration.

Proposed List of Communities

21. Accordingly, it is proposed to amend § 73.202(b) of the Commission's Rules, the FM Table of Assignments, for the following communities listed in the Appendix.

22. Authority is found in Sections 4(i), 5(c)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules.

23. Interested parties may file comments on or before May 14, 1984. The reply comment date will be announced when the list of proposed assignments generated by the counterproposals is released.

24. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any such comment constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

The following list of communities includes the channels presently assigned and those which we are now proposing for assignment. Where a site restriction is necessary in order for the particular channel to conform to the distance separation requirements, we have indicated that information in parenthesis. The site restrictions are expressed in miles and with the bearings. In addition we have indicated the instances where a particular assignment will need the concurrence of Canada or Mexico (to be requested by the Commission). The particular channel listed for many of the communities does not represent the only channel that can be assigned. Where applicable we have selected the channel with the smallest site restriction or the highest class available.

[12] *See Policy Statement on Comparative Hearings*, 1 F.C.C. 2d 393 (1965).

BILLING CODE 4910-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 195

[Docket No. PS-80, Notice No. 1]

Transportation of Hazardous Liquids by Pipeline; Regulation of Intrastate Pipelines

AGENCY: Materials Transportation Bureau (MTB), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The existing Federal safety standards for pipelines transporting hazardous liquids apply to pipelines operating in interstate or foreign commerce. This notice proposes to extend the applicability of these standards to include pipelines transporting hazardous liquids that affect interstate or foreign commerce. The Hazardous Liquid Pipeline Safety Act of 1979 requires this action to provide for consistent State regulation of risks associated with intrastate transportation of hazardous liquids.

DATE: Interested persons are invited to submit written comments on this proposal by May 25, 1984. Late filed comments will be considered as far as practicable.

ADDRESS: Comments should identify the docket and notice numbers and be submitted in triplicate to the Dockets Branch, Materials Transportation Bureau, Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590. All comments and other docket material are available in Room 8426 for inspection and copying between the hours of 8:30 a.m. and 5:00 p.m. working day.

FOR FURTHER INFORMATION CONTACT: Frank Robinson, (202) 426-2392, regarding the content of this proposal, or the Dockets Branch (202) 426-3148, regarding copies of this proposal or other information in the docket.

SUPPLEMENTARY INFORMATION:

Requirement for Regulation

Section 203(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (HLPSA) (49 U.S.C. 2002) requires the Secretary of Transportation to establish minimum Federal Safety standards for the pipeline transportation of hazardous liquids in or affecting interstate or foreign commerce. Prior to enactment of the HLPSA, the Department's jurisdiction over hazardous liquid pipelines was derived from the Transportation of Explosives Act (18 U.S.C. 831-835), which applied only to carriers engaged in interstate or foreign commerce in the United States. The HLPSA repealed this Act and granted the Secretary enlarged safety jurisdiction to include pipelines in Puerto Rico and pipelines that are not in interstate or foreign commerce, called intrastate pipelines.

The legislative history of the HLPSA shows that Congress intended Federal safety regulation of intrastate pipelines not only to control the risk of transporting hazardous liquids, but also to provide continuity among State regulations through the establishment of a Federal minimum level of pipeline safety. Currently, in the absence of Federal minimum standards, safety regulation of intrastate hazardous liquid pipelines is open to all States or municipalities, with the potential for inconsistent regulations from State to State. In § 203(d) of the HLPSA, Congress foreclosed this undesirable possibility by providing that "Any State agency may adopt additional or more stringent safety standards for intrastate pipeline facilities and the transportation of hazardous liquids associated with such facilities if such standards are compatible with the Federal standards issued under this title."

In adopting this limited Federal preemption of the exercise of State regulatory powers, Congress was guided by similar preemptive language in § 3 of the Natural Gas Pipeline Safety Act of 1968 (NGPSA) (49 U.S.C. 1672). The clear purpose was to establish a uniform Federal policy governing State safety regulation of pipelines transporting hazardous materials in gas or liquid form that are subject to the two statutes. This purpose will be realized upon issuance of Federal safety standards for intrastate hazardous liquid pipelines.

Under the NGPSA, MTB has established minimum Federal safety standards for intrastate gas pipelines (49 CFR Part 192). These standards provide the basis for well developed State-run safety regulatory programs for intrastate gas pipelines. The HLPSA has a similar purpose with respect to intrastate hazardous liquid pipelines. In addition to the continuity required by section 203 of the HLPSA, section 205 of the Act encourages State agencies to take the lead in regulating intrastate hazardous liquid pipelines, paralleling the role for State agencies regarding natural gas pipelines under the NGPSA. Like the gas programs, the section 205 programs are to be a cooperative effort, with State agencies adopting applicable Federal safety standards under State laws. Also, State agencies that so participate become eligible for Federal funding of up to 50 percent of their program costs. To meet these objectives under section 205 of the HLPSA, minimum Federal safety standards applicable to intrastate hazardous liquid pipelines must be issued. (It should be noted, however, that Congress has not appropriated funds for State programs. Furthermore, adoption by MTB of the standards being

proposed does not mean that funds will become available or be sought by MTB. Funding is a matter that can be considered only in the context of future Federal budget proposals and appropriation proceedings.)

In summary, prior to enactment of the HLPSA, there was no Federal statute guiding State safety regulation of intrastate pipelines transporting hazardous liquids. Because the HLPSA: (1) Has extended the Department's regulatory authority to include intrastate pipelines, (2) has provided for State participation in the safety regulation of intrastate pipelines together with possible Federal funding of part of the State safety programs, and (3) has made Federal preemption and participation contingent upon adoption by the Department of minimum Federal safety standards, MTB believes there is a clear Congressional intent for Federal intrastate hazardous liquid pipeline safety standards.

Choice of Standards

MTB's experience with the pipeline industry shows that intrastate pipelines are designed, constructed, tested, maintained, and operated in the same manner as interstate pipelines. Further, most intrastate operators voluntarily utilize the current Federal safety standards now applicable to interstate facilities or the industry code, ANSI B31.4, upon which the Federal standards were based, totally or in part as their safety standards. Consequently, MTB proposes that the exising Federal safety standards in Part 195 for interstate pipelines transporting petroleum, petroleum products, or anhydrous ammonia be adopted as appropriate safety standards for intrastate pipelines carrying these commodities.

MTB reissued the Federal safety standards in Part 195 under the authority of the HLPSA on July 27, 1981, (46 FR 38357). The Supplementary Information in the reissuance document set forth, among other things, the distinction between interstate and intrastate pipeline facilities and MTB's plans to apply Part 195 to intrastate pipelines. MTB said the Federal regulations would not be applied to intrastate pipelines for at least two years to allow the States time to amend or adopt the necessary authorizing statutes and time to consider whether they should assume the intrastate regulatory responsibility or leave it to the Federal government. In responses to the reissuance document, both the American Petroleum Institute (API), speaking for the petroleum industry, and the National Transportation Safety Board (NTSB) argued against the two year period and urged quick application of the existing Federal safety standards to intrastate pipelines. Clearly, the API and NTSB comments solidly support the proposition that the existing Federal safety standards for interstate pipelines are the appropriate standards for intrastate pipelines.

Status of State Programs

Since Part 195 was reissued, the MTB has formally solicited the participation of all of the States, the District of Columbia, and the Commonwealth of Puerto Rico in a Federal/State program as provided in Section 205 of the HLPSA. Fifteen States (Texas, California, Wyoming Pennsylvania, Kansas, New Mexico, Montana, Ohio, North Dakota, Arkansas Arizona, New York, Iowa, Nevada, and Hawaii) currently have enabling legislation to regulate intrastate liquid pipelines. Seven States (Louisiana, Oklahoma, Mississippi, Alabama, West Virginia, Washington, and Wisconsin) are considering enactment of the necessary legislation. The remaining States, the District of Columbia, and the Commonwealth of Puerto Rico have not as yet expressed an interest in safety regulation of intrastate liquid pipelines. MTB estimates that total of 11,000 miles of intrastate pipelines would be affected by this rulemaking proceeding (another 33,000 miles of intrastate pipelines would be excepted from the applicability of Part 195 by § 195.1(b)). Of this total, approximately 64 percent are in the fifteen states which have legislation enabling the States to regulate intrastate pipelines. Further, the States seeking the necessary legislation have an additional 24 percent of the total intrastate pipelines, making possible the regulation of the great bulk of the affected intrastate pipelines via Federal/State programs.

Proposed Amendments

Only minor changes are needed in the text of Part 195 to make the Federal safety standards for hazardous liquid pipelines applicable to intrastate pipelines and to provide for various extended compliance times beyond the proposed overall effective date of 30 days; following publication of the final rule. On the whole, these changes would establish identical safety standards for interstate and intrastate pipelines. It is not the purpose of this rulemaking proceeding to examine the need for or merits of particular standards. While comments in this regard cannot be ignored if they impact intrastate pipelines, MTB intends to handle substantive matters involving the appropriateness of individual standards in separate proceedings involving both interstate and intrastate pipelines.

Gathering Lines. Movement of hazardous liquids through gathering lines in rural areas is outside the scope of the HLPSA. Under the existing regulatory language, MTB does not apply Part 195 to any part of a gathering system that is in a rural area even though other parts of the same system are in nonrural areas. To make sure that the language limiting the scope of Part 195 is consistent with this regulatory intent, MTB is proposing a clarifying change to § 195.1(b)(4). For interstate pipelines and intrastate pipelines, § 195.1(b)(4) would be amended to provide that Part 195 does not apply to "transportation of a hazardous liquid in those parts of an onshore pipeline system that are located in rural areas between a production facility and an operator trunkline reception point.

With regard to interstate pipelines, there has not been a serious problem under the existing § 195.1(b)(4) in distinguishing rural from non-rural areas or in distinguishing a gathering line from a trunkline. MTB is concerned, however, that these distinctions may be more of a problem for intrastate pipelines, since there is a significant number of rural intrastate gathering lines in the United States. Therefore, MTB would appreciate comments on the distinction between rural and nonrural and the point that marks the end of a gathering line and the beginning of a trunkline. If the comments indicate a significant problem in distinguishing intrastate gathering lines or in distinguishing rural from non-rural, MTB will make an appropriate change to § 195.1(b)(4) as it applies to intrastate pipelines (other than the change discussed above) either in the final rule or through a separate rulemaking proceeding.

The following gives a section-by-section discussion of the proposed changes:

Section 195.1 Applicability. This section currently limits the application of Part 195 to interstate hazardous liquid pipelines (referred to as those which are subject to the jurisdiction of the Federal Energy Regulatory Commission) and those hazardous liquid pipelines which are on the Outer Continental Shelf. The MTB proposes to extend the applicability of Part 195 to intrastate hazardous liquid pipelines by addition of the term "in or affecting interstate or foreign commerce" to identify the pipeline facilities and transportation to which the regulations would apply. The use of Federal Energy Regulatory Commission (FERC) jurisdiction to refer to interstate pipelines would be deleted

from § 195.1. The new language comports with the language of the HLPSA in order to make sure that the distinction between interstate and intrastate pipelines under the regulations is the same as under the HLPSA. Although FERC's list of jurisdictional pipelines will continue to provide some indication of whether a particular pipeline is interstate or intrastate, as defined below, an "interstate pipeline" is one that is used "in interstate or foreign commerce" while an "intrastate pipeline" is one that affects such commerce but is not an "interstate pipeline." The HLPSA defines "interstate or foreign commerce" as "commerce between any point in a State and any point outside thereof, or between points within the same State but through any place outside thereof."

The regulations currently apply to the transportation of petroleum, petroleum products, or anhydrous ammonia. No change is proposed to this group of regulated commodities. Also, as provided in § 195.1(b), the regulations currently do not apply to certain forms of transportation, including those portions of gathering lines located in rural areas and low stress level pipelines. Other than the clarifying change discussed above regarding rural gathering lines, no change is proposed to the exceptions for these unregulated forms of transportation.

A new paragraph (c) woud except intrastate pipelines from the accident reporting requirements of Subpart B and the recordkeeping requirements of §§ 195.266, 195.310, and 195.404. More is said about this later under "Information Collection."

Section 195.2 Definitions. Because the terms "interstate pipeline" and "intrastate pipeline" are needed to apply the Part 195 regulations to intrastate pipelines, these terms are defined. The definitions of "interstate pipeline" and "intrastate pipeline" parallel the definition of like terms in Section 202 of the HLPSA.

Section 195.300 Scope. This section would be changed to specifically include onshore steel intrastate pipelines constructed before (30 days after publication of the final rule) which transport highly volatile liquids (HVL) among those pipelines to which the hydrostatic testing subpart applies. To make the section easier to read, the proposed revised section is presented in a listing format.

Section 195.302(b) General Requirements. Paragraph (b) would be changed to require that onshore steel intrastate pipelines which transport HVL and are constructed before (30 days after publication of the final rule) meet the hydrostatic test requirements of Subpart E unless operating pressure is reduced. Intrastate pipelines that do not transport HVL that are constructed before (30 days after publication of the final rule) would not be required to meet the hydrostatic test requirements of Subpart E. For existing pipelines in HVL service when the rules being proposed are issued, MTB is proposing a one year period for planning and scheduling the hydrostatic testing or pressure reduction and a five year period for conducting the hydrostatic testing. These periods are consistent with the compliance periods established for similar HVL interstate pipelines.

Section 195.401 General Requirements. Paragraph (c) would be changed to require that intrastate pipelines upon which construction is begun after (29 days after publication of the final rule) be designed and constructed (including hydrostatic testing) in accordance with Part 195. Also, this section would be redrafted to make it easier to read.

Section 195.402 Procedural Manual for Operating, Maintenance, and Emergencies. This section would not become effective with respect to intrastate pipelines until two years after publication of the final rule to provide a reasonable period for preparation of the procedural manual, training employees, and installing equipment. This extended compliance period would be stated in the effective date of the final rule rather than incorporated into § 195.402.

Section 195.406 Maximum Operating Pressure. Paragraph (a)(5) would be changed to limit the maximum operating pressure of onshore steel intrastate pipelines transporting HVL which are constructed before (30 days after publication of the final rule) but not hydrostatically tested under Subpart E. Operating pressure would be limited to 80 percent of a prior test or operating pressure.

Section 195.414 Cathodic Protection. Paragraph (a) would be changed to permit the same 3-year lead time for cathodic protection of coated intrastate pipelines as was provided for coated interstate pipelines. Paragraph (b) would be changed to permit the same 5-year lead time for corrosion control of bare intrastate pipelines as was provided for bare interstate pipelines. Paragraph (c) would be changed to permit the same 3-year lead time for corrosion control of breakout tank areas and buried station piping on intrastate pipelines as was provided for interstate pipelines. Paragraph (d) would be deleted as unnecessary.

Section 195.414(b) refers to §§ 195.416 (f) and (g) as required remedies for corroded pipe. Interested persons should note that MTB has proposed to revise § 195.416(g), which concerns isolated pitting (see 48 FR 46589, Oct. 13, 1983). If the proposed change to § 195.416(g) is adopted, it should apply to intrastate pipelines that may become subject to Part 195 as a result of this proceeding. Therefore, the proposal to revise § 195.416(g) as set forth in 48 FR 46589 is hereby made part of this rulemaking proceeding.

Classification. These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979) based on a Draft Evaluation of the economic impact of this proposal, a copy of which is in the docket. Based on the Draft Evaluation, the agency certifies that this proposal will not have a significant economic impact on a substantial number of small entities.

Information Collection. The information collection requirements of 49 CFR Part 195 (i.e., the accident reporting requirements of Subpart B as well as the recordkeeping requirements of §§ 195.266, 195.310, and 195.404) are currently under review to determine which may create an unnecessary burden and whether any changes are appropriate. Consequently, none of the existing information collection requirements is proposed to be adopted for intrastate pipelines at this time. Upon completion of the review, separate proceedings will be used to propose identical information collection requirements for interstate and intrastate pipelines. In the interim, an exception from the information collection requirements would be included under § 195.1(c) for intrastate pipelines.

List of Subjects in 49 CFR Part 195

Interstate pipeline, Intrastate pipeline, Pipeline safety.

PART 195—[AMENDED]

In view of the foregoing, the MTB proposes to amend 49 CFR Part 195 in the following manner:

1. By revising § 195.1 (a) and (b)(4) and adding a new paragraph (c) to read as follows:

§ 195.1 Applicability.

(a) Except as provided in paragraph (b) of this section, this part applies to pipeline facilities and the transportation of hazardous liquids associated with those facilities in or affecting interstate or foreign commerce, or on the Outer Continental Shelf.

(b) * * *

(4) Transportation of a hazardous liquid in those parts of an onshore pipeline system that are located in rural areas between a production facility and an operator trunkline reception point;

* * * * *

(c) Subpart B of this part and §§ 195.266, 195.310, and 195.404 do not apply to intrastate pipelines.

2. By adding two new definitions to § 195.2 to read as follows:

§ 195.2 Definitions.

* * * * *

"Interstate pipeline" means a pipeline used in the transportation of hazardous liquids in interstate or foreign commerce.

"Intrastate pipeline" means a pipeline to which this part applies that is not an interstate pipeline.

* * * * *

3. By revising § 195.300 to read as follows:

§ 195.300 Scope.

This subpart prescribes minimum requirements for hydrostatic testing of—

(a) Newly constructed steel pipeline systems;

(b) Existing steel pipeline systems that are relocated, replaced, or otherwise changed;

(c) Onshore steel interstate pipelines constructed before January 8, 1971, that transport highly volatile liquids; and

(d) Onshore steel intrastate pipelines constructed before (30 days after publication of the final rule) that transport highly volatile liquids.

However, this subpart does not apply to movement of pipe covered by § 195.424.

4. By revising § 195.302(b) to read as follows:

§ 195.302 General requirements.

* * * * *

(b) No person may transport a highly volatile liquid in an onshore steel interstate pipeline constructed before January 8, 1971, or an onshore steel intrastate pipeline constructed before (30 days after publication of final rule) unless the pipeline has been hydrostatically tested in accordance with this subpart or, except for pipelines subject to § 195.5, its maximum operating pressure is established under § 195.406(a)(5). Dates to comply with this requirement are:

(1) For onshore steel interstate pipelines in highly volatile liquid service before September 8, 1980—

(i) Planning and scheduling of hydrostatic testing or actual reduction in maximum operating pressure to meet § 195.406(a)(5) must be completed before September 15, 1981; and

(ii) Hydrostatic testing must be completed before September 15, 1985, with at least 50 percent of the testing completed before September 15, 1983.

(2) For onshore steel intrastate pipelines in highly volatile liquid service before (publication of the final rule)—

(i) Planning and scheduling of hydrostatic testing or actual reduction in maximum operating pressure to meet § 195.406(a)(5) must be completed before (one year after publication of the final rule); and

(ii) Hydrostatic testing must be completed before (5 years after publication of the final rule) with at least 50 percent of the testing completed before (3 years after publication of the final rule).

* * * * *

5. By revising § 195.401(c) to read as follows:

§ 195.401 General requirements.

* * * * *

(c) Except as provided by § 195.5, no operator may operate any part of any of the following pipelines unless it was designed and constructed as required by this part:

(1) An interstate pipeline on which construction was begun after March 31, 1970.

(2) An interstate offshore pipeline located between a production facility and an operators trunkline reception point on which construction was begun after July 31, 1977.

(3) An intrastate pipeline on which construction was begun after (29 days after publication of the final rule).

6. By revising § 195.406(a)(5) to read as follows:

§ 195.406 Maximum operating pressure.

(a) * * *

(5) In the case of onshore HVL interstate pipelines constructed before January 8, 1971, or onshore HVL intrastate pipelines constructed before (30 days after publication of the final rule), that have not been tested under Subpart E of this part, 80 percent of the test pressure or highest operating pressure to which the pipeline was subjected for four or more continuous hours that can be demonstrated by recording charts or logs made at the time the test or operations were conducted. (See § 195.302(b) for compliance schedules for HVL interstate pipelines in service before September 8, 1980, and for HVL intrastate pipelines in service before (publication of final rule).)

* * * * *

8. By revising § 195.414 to read as follows:

§ 195.414 Cathodic protection.

(a) No operator may operate an interstate pipeline after March 31, 1973, or an intrastate pipeline after (3 years after 1 day before effective date of the final rule), that has an external surface coating material, unless that pipeline is cathodically protected. This paragraph does not apply to breakout tank areas and buried pumping station piping.

(b) Each operator shall electrically inspect each bare interstate pipeline before April 1, 1975, and each bare intrastate pipeline before (5 years after effective date of the final rule) to determine any areas in which active corrosion is taking place. The operator may not increase its established operating pressure on a section of bare pipeline until the section has been so electrically inspected. In any areas where active corrosion is found, the operator shall provide cathodic protection. Section 195.416 (f) and (g) apply to all corroded pipe that is found.

(c) Each operator shall electrically inspect all breakout tank areas and buried pumping station piping on interstate pipelines before April 1, 1973, and on intrastate pipelines before (3 years after effective date of the final rule) as to the need for cathodic protection, and cathodic protection shall be provided where necessary.

(49 U.S.C. 2002; 49 CFR 1.53 and Appendix A of Part 1 and Appendix A of Part 106)

Issued in Washington, D.C. on March 20, 1984.

Richard L. Beam,

Associate Director for Pipeline Safety Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

Ocean Salmon Fisheries Off the Coast of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public hearings.

SUMMARY: This notice sets forth the schedule of the forthcoming public hearings of the Pacific Fishery Management Council (Council), for the 1984 ocean salmon fishing season regulations off of the coasts of

Washington, Oregon, and California. The Council was established by the Magnuson Fishery Conservation and Management Act Magnuson Act (Pub. L. 94–265, as amended), and these hearings are being held in accordance with Section 302 (h)(3) of the Magnuson Act.

DATES: Written comments are invited through April 6, 1984. Public hearings are scheduled to begin at 7:00 p.m. on March 27 through March 29, 1984.

ADDRESSES: Written comments should be sent to the Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201. Copies of the 1984 salmon states report and the Council's regulation options are available at this address.

The public hearings are scheduled to begin at 7:00 p.m. and will be held at the following locations:

March 27: Seattle Marriott, 3201 S. 176th Street, Seattle, Washington; Thunderbird Motor Inn, N. & S. Umpqua Room, 1313 N. Bayshore Drive, Coos Bay, Oregon

March 28: Astoria Middle School, Lunchroom, 1100 Klaskanine Avenue, Astoria, Oregon; Holiday Inn, 245 S. Airport Boulevard, S. San Francisco, California

March 29: Idaho Department of Fish & Game, Conference Room, 500 S. Walnut Street, Boise, Idaho

FOR FURTHER INFORMATION CONTACT: Mr. Joseph C. Greenley, Executive Director, at the Portland, Oregon, address above or telephone 503–221–6352.

SUPPLEMENTARY INFORMATION: These hearings deal with options for the 1984 ocean salmon fishing regulations off the coasts of Washington, Oregon, and California selected by the Council for public review. The Council will meet on April 11–12 at the Holiday Grosvenor Hotel in San Francisco to consider the input from the public hearings and written comments, and hear additional comments from its advisors and the public. The Council will then develop its recommendations for the 1984 ocean salmon fishing season regulations for submission to the Secretary of Commerce.

Dated: March 21, 1984.

Roland Finch,
Director, Office of Fisheries Management, National Marine Fisheries Service.

Federal Register
Vol. 49, No. 59
Monday, March 26, 1984

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

CIVIL AERONAUTICS BOARD

Announcement of Approval of Reporting Requirements by the Office of Management and Budget

On February 28, 1984, the Office of Management and Budget approved the extension of the following reporting requirements under the the Paperwork Reduction Act (44 U.S.C. 35):

Reporting requirements under Article 67 of the Chicago Convention of 1944, as established by the International Civil Aviation Organization—approved through January 31, 1985, under OMB No. 3024–0044.

Dated: March 20, 1984.

Robin A. Caldwell,

Chief, Information Management Division, Office of Comptroller.

BILLING CODE 6320–01–M

Order Establishing Standard Foreign Fare Level

The International Air Transportation Competition Act (IATCA), Pub. L. 96–192, requires that the Board establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically by percentage changes in actual operating costs per available seat-mile. The SFFL thus computed becomes the benchmark for measuring the statutory nonsuspend zone similar to the zone of reasonableness established by the Airline Deregulation Act and set forth in sec. 1002(d) of the Federal Aviation Act of 1958, as amended. Order 80–2–69 established the first interim SFFL and subsequent Order 84–1–124 established the currently effective two-month SFFL applicable through March 31, 1984.

In establishing the SFFL for the two-month period starting April 1, 1984, we have projected nonfuel costs based on the year ended September 30, 1983 and have determined fuel prices on the basis of experienced monthly fuel cost levels as reported to the Board.

By Order 84–3–88 fares may be increased by the following adjustment factors over the October 1, 1979 level:

Atlantic, 1.1985
Western Hemisphere, 1.2055
Pacific, 1.1409
Canada, 1.2225

Copies of the Boards' order are available from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Robert I. Stein, (202) 673–5116.

By the Civil Aeronautics Board: March 21, 1984.

Phyllis T. Kaylor,

Secretary.

National Oceanic and Atmospheric Administration

New England Fishery Management Council

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of Public Meeting and Public Hearing.

SUMMARY: The New England Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), will hold a public meeting and a public hearing on the following topics:

Public Meeting: Discuss reports of the swordfish, surf clam/ocean quahog, gear conflict, groundfish, foreign fishing and scallop oversight committees; reports on the Mid-Atlantic Council meeting and joint meeting of the New England and Mid-Atlantic Executive Committees; as well as other fishery management and administrative matters.

Public Hearing: Discuss the proposed amendment to the Sea Scallop Fishery Management Plan.

DATES: *Public Meeting:* The meeting will convene on Tuesday, April 3, 1984, at approximately 10:00 a.m., and adjourn on Wednesday, April 4, at approximately 12:00 noon. The meeting may be lengthened or shortened, or agenda items rearranged, depending on progress on the agenda.

Public Hearing: The public hearing will convene on Tuesday, April 3, 1984, at approximately 1:30 p.m., and adjourn at approximately 2:30 p.m., on the same day.

ADDRESS: The meeting will take place at Howard Johnson's Motor Lodge, Portsmouth, New Hampshire.

FOR FURTHER INFORMATION CONTACT: Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway (Rte. 1), Saugus, Massachusetts 01906, Telephone: 617-231-0422.

SUPPLEMENTARY INFORMATION: For information on seating arrangements, changes to the agenda, and/or written comments, contact the Executive Director.

Dated: March 21, 1984.

Roland Finch,

Director, Office of Fisheries Management, National Marine Fisheries Service.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

New Officials of the Government of Mexico Authorized To Issue Export Visas and Exempt Certifications for Certain Cotton, Wool, and Man-Made Fiber Textiles and Textile Products

March 21, 1984.

The Government of Mexico has notified the United States Government that it is changing the list of officials authorized to issue export visas and exempt certifications for cotton, wool, and man-made fiber textiles and textile products, which are subject to the terms of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended. A copy of the revised list follows this notice. This list cancels and supersedes all previous such lists.

FOR FURTHER INFORMATION CONTACT: Bill Boyd, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. (202/377-4212).

SUPPLEMENTARY INFORMATION: On May 20, 1981, a letter dated May 15, 1981 to the Commissioner of Customs from the Chairman of the Committee for the Implementation of Textile Agreements was published in the **Federal Register** (46 FR 27516) which established a new export visa requirement and exempt certification for certain cotton, wool, and man-made fiber textile products, produced or manufactured in Mexico and exported to the United States. One of the requirements is that the visas and exempt certifications must be signed by an official authorized by the Government of Mexico. The Government of Mexico has amended the list of officials authorized to issue these documents.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Officers Authorized by the Government of Mexico To Issue Visa and Exempt Certifications for Certain Textile Products Exported to the United States

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: Monday & Tuesday, 16 & 17 April 1984.

Times: 0830–1700 hours, both days (Open).

Place: 16 April, the Pentagon, Washington, D.C.; 17 April, Aberdeen Proving Ground, Maryland.

Agenda: The Manning a Ready Force Subpanel of the Army Science Board 1984 Summer Study on Leading and Manning Army 21 will meet for briefings and discussions in the Pentagon addressing the following: (1) Steps to improve the personnel mobilization and readiness of the total force; (2) evaluation of the Quality of Life factors on readiness. The subpanel will visit Aberdeen Proving Ground to discuss technological thrusts that will significantly alter considerations for the Army in the 21st Century. This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The Army Science Board Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer.

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: Monday, 16 April 1984.

Times: 0830–1700 hours (Closed).

Place: The Pentagon, Washington, D.C.

Agenda: The Personnel Factors Subpanel of the Army Science Board 1984 Summer Study on Leading and Manning Army 21 will meet for classified briefings and discussions. Briefings will cover how the Aviation School participates in the concept development process and how human considerations, manpower, personnel, and training are being integrated into the AH–64 Apache weapon system. Discussions of specific weapons system performance will occur throughout the meeting. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C. specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, Subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The Army Science Board Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer.

Intent To Prepare a Supplement to the 1977 Final Environmental Impact Statement for the ELF Communications System, Clam Lake, Wisconsin, and Republic, Michigan

This notice serves to advise that the Naval Electronic Systems Command intends to prepare a supplement to the 1977 Final Environmental Impact Statement for the Extremely Low Frequency (ELF) Communications System. The ELF Communications System includes an ELF Transmitter Facility installed near Clam Lake, Wisconsin, in 1968–69 which will be upgraded, and an ELF Transmitter Facility to be installed near Republic, Michigan.

This notice is furnished to obtain suggestions and information from other agencies and the public on the issue of biological and health effects of ELF electromagnetic fields. Comments and submission of information of scientific merit are solicited. Written comments should be received no later than April 25, 1984.

Written comments should be addressed to: Commander, Naval Electronic Systems Command, Washington, D.C. 20363 (Attn: Captain R. L. Koontz, PME 110E).

Dated: March 21, 1984.

William F. Roos, Jr.,

LT, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810–AE–M

Final Notice of Decision To Construct an Ammunition Wharf in Outer Apra Harbor, Guam, Mariana Islands

Pursuant to the provisions of the regulations implementing the procedural provisions of the National Environmental Policy Act (NEPA) (§ 1505.2 of Title 40, Code of Federal Regulations), the Department of the Navy announces its decision to construct a new ammunition wharf in the outer Apra Harbor to replace the existing wharf which conflicts with existing and potential uses of the Commercial Port of Guam. The Final Environmental Impact Statement (EIS) for this project was filed on January 10, 1984. The U.S. Department of Commerce (National Marine Fisheries Service) and the U.S. Department of the Interior (Fish and Wildlife Service) were cooperating agencies.

The Navy's existing ammunition handling wharf was constructed during World War II on the Glass Breakwater in Outer Apra Harbor. In the early 1960's, the Commercial Port of Guam was relocated to a site within the explosive safety zone of this wharf. Because of the restrictions imposed by the safety zone, the Commercial Port is not able to grow to its full economic potential. The Navy will construct a new ammunition wharf at Adotgan Point on the Orote Peninsula. A new wharf at this site will accommodate the Navy's new fast combat support ships, will free the Commercial Port from the present safety zone restrictions, and will be a suitable location to homeport an ammunition ship with its appropriate safety zones.

In selecting a site for a new ammunition wharf, over twenty potential sites around Guam were evaluated. Four sites showed promise: Sella Bay, Tarague Beach, Orote Peninsula, and the Glass Breakwater. The first two sites were eliminated due to land use conflicts, adverse environmental effects, and other considerations. In 1974, plans for an ammunition wharf between Orote Point and Orote Island were prepared, but the project was dropped from the Federal construction budget in 1978. The final EIS evaluated the effects of a new ammunition wharf at the two remaining sites: near Adotgan Point on Orote Peninsula, and near the end of the Glass Breakwater. The Adotgan Point site is situated on a coral reef at the base of a steep limestone cliff. The Glass Breakwater site is located on the man-made breakwater which encloses a portion of Apra harbor. Alternative construction methods were compared in terms of cost and environmental effects. The No Action alternative was also evaluated.

The Adotgan Point site is selected, since it has better overall operational characteristics, better security, and would eliminate ammunition truck traffic from the Commercial Port. The Navy has judged the Glass Breakwater site to be impracticable since it would be extremely costly to reinforce the breakwater to provide sufficient protection to the wharf and road from damage by high waves. It would not satisfy the Navy's goal to separate, wherever possible, military and civilian activities, especially those involving handling ammunition. Furthermore, it

would be unsuitable for homeporting an ammunition ship.

Constructing a wharf at the Adotgan Point site will adversely impact approximately 14.7 acres of high quality coral reef, and the access road will pass through native limestone forest. The Navy and the Government of Guam have signed a Memorandum of Understanding (MOU) regarding mitigating measures, including the use of silt curtains, controlled blasting to minimize shock waves, transplanting selected organisms out of the construction area, and avoiding a stand of rare trees. As compensation for the loss of habitat at Adotgan Point, the MOU provides for the establishment of Ecological Reserve Areas on the southerly cliffs of Orote Peninsula and at Haputo Point and reef. Additionally, a wharf and road at Adotgan Point would adversely affect the scenic quality of the area. A memorandum of Agreement between the Navy and the Guam Historic Preservation officer admits unavoidable visual impacts but are deemed acceptable in view of the significance of the project.

There are no substantial issues remaining to be resolved with respect to this project. The cooperating agencies have accepted the Adotgan Point site conditional on the mitigation and compensation measures incorporated in the final EIS. Some of these measures require continued coordination between the cooperating agencies for implementation. Specifically, the U.S. Fish and Wildlife Service and the National Marine Fisheries Service will be given an opportunity to review and comment on the Research Use and Management Master Plans for the Ecological Reserve Areas that are to be established as part of this project.

Dated: March 21, 1984.

William F. Roos, Jr.,

Lieutenant, JAGC, Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Desegregation Assistance Center Program; Final Designation of Service Areas

AGENCY: Department of Education.

ACTION: Notice of Final Designation of Service Areas for the Desegregation Assistance Center Program.

SUMMARY: The Secretary designates the service areas for the Desegregation Assistance Center (DAC) program for race, sex, and national origin desegregation assistance. The service areas define the geographical area for which each DAC is responsible for providing technical assistance and training. Geographical service areas are used to insure that DAC projects are responsive to the desegregation related needs of local education agencies of various regions of the country.

EFFECTIVE DATE: This notice of designation of service areas will take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of this notice, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Curtis F. Coates, Section Chief, Equity Training and Technical Assistance Program, U.S. Department of Education, FOB#6, Room 2031, 400 Maryland Avenue SW., Washington, D.C. 20202, Phone: (202) 245-2181.

SUPPLEMENTARY INFORMATION: The DAC program awards grants to public and private nonprofit organizations (except State education agencies and school boards). The DACs provide technical assistance and training to local education agencies in a DAC's designated service area. The purpose of this assistance is to help local education agencies, upon their request, to solve problems resulting from race, sex, and national origin desegregation.

On December 20, 1983, a Notice of Proposed Designation of Service Areas for the Desegregation Assistance Center Program was published in the **Federal Register** (48 FR 56256). The public had 30 days to submit written comments on the proposed designation of DAC service areas. Three comments were received on the proposed designation of one of the DAC service areas. The Secretary has decided to retain, without change, the service areas that were proposed in the notice published in the **Federal Register** on December 20, 1983.

Authority for this program is contained in Title IV of the Civil Rights Act of 1964, as amended, Pub. L. 88-352. (20 U.S.C. 2000c—2000c-5).

Comments and Responses

The following comments were submitted in response to the proposed notice.

Comment: Three commenters suggested that a separate national origin DAC service area should be established for Maine, Vermont, New Hampshire, Rhode Island, Massachusetts, and Connecticut because the needs of these States cannot be effectively met by a national origin DAC that is also responsible for providing assistance to New York, New Jersey, Puerto Rico, and the Virgin Islands.

Response: No change has been made. Given the limited amount of funds anticipated to be available for all DAC projects in Fiscal Year 1984, the Secretary believes that the administrative cost of establishing an additional DAC would only serve to reduce the level of services that DACs will be able to provide. Since DAC awards are made, in part, on the basis of a management plan that shows promise of providing effective assistance throughout the service area, the concerns of any State or States about the assistance a DAC is providing can be addressed through the application selection process and by subsequent project monitoring to insure that all States are being effectively assisted.

The Secretary will, however, undertake a study of the Desegregation of Public Education program in 1984. The study will include an examination of the DAC service areas to determine whether or not the current service areas continue to be cost effective and responsive to the needs of local education agencies in various regions of the country. The concerns of the commenters will also be taken into account when the study is conducted. If the study indicates that changes to the DAC service areas should be made, those changes will be proposed for Fiscal Year 1985, provided that funds are appropriated for the program.

(a) *Service areas for race desegregation assistance:*

(i) Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island.

(ii) New York, New Jersey, Puerto Rico, Virgin Islands.

(iii) Pennsylvania, Delaware.

(iv) Maryland, Virginia, West Virginia, District of Columbia.

(v) Kentucky, Tennessee, North Carolina, South Carolina.

(vi) Mississippi, Alabama, Georgia, Florida.

(vii) Minnesota, Wisconsin, Michigan.

(viii) Illinois, Indiana.

(ix) Ohio.

(x) Iowa, Nebraska, Kansas, Missouri.

(xi) Arkansas, Louisiana, Oklahoma.

(xii) New Mexico, Texas.

(xiii) North Dakota, South Dakota, Montana, Colorado, Wyoming, Utah.

(xiv) California, Arizona, Nevada.

(xv) Hawaii, Guam, American Samoa, Trust Territory of the Pacific Islands,

Commonwealth of the Northern Mariana Islands.

(xvi) Oregon, Washington, Idaho.

(xvii) Alaska.

(b) *Service areas for sex desegregation assistance:*

(i) Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island.

(ii) New York, New Jersey, Puerto Rico, Virgin Islands.

(iii) Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia.

(iv) North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Kentucky, Tennessee.

(v) Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota.

(vi) Texas, Louisiana, Oklahoma, Arkansas, New Mexico.

(vii) Iowa, Nebraska, Kansas, Missouri.

(viii) North Dakota, South Dakota, Montana, Colorado, Wyoming, Utah.

(ix) California, Nevada, Arizona.

(x) Hawaii, Guam, American Samoa, Trust Territory of the Pacific Islands, Commonwealth of the Northern Mariana Islands.

(xi) Oregon, Washington, Idaho.

(xii) Alaska.

(c) *Service areas for national origin desegregation assistance:*

(i) Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Puerto Rico, Virgin Islands.

(ii) Pennsylvania, Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Kentucky, Tennessee, Georgia, Alabama, Mississippi, Florida.

(iii) Ohio, Indiana, Illinois, Michigan, Minnesota, Wisconsin, Missouri, Kansas, Iowa, Nebraska.

(iv) Texas, Louisiana, Arkansas.

(v) Montana, North Dakota, South Dakota, Wyoming, Colorado, Utah, Oklahoma.

(vi) New Mexico, Arizona, Nevada.

(vii) Southern California (that part of California south of the northern boundaries of San Luis Obispo, Kern, and San Bernardino Counties).

(viii) Northern California (that part of California not included in Area (vii)).

(ix) Washington, Oregon, Idaho.

(x) Hawaii, Guam, Trust Territory of the Pacific Islands, American Samoa, Commonwealth of the Northern Mariana Islands.

(xi) Alaska.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document provides early notification of the Department's specific plans and actions for this program.

(Catalog of Federal Domestic Assistance No. 84.004D Civil Rights Technical Assistance—DAC Program)

Dated: Mardch 7, 1984.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

United Nations Institute for Training and Research; Grant Award

AGENCY: Department of Energy.

ACTION: Notice of grant award.

SUMMARY: The Department of Energy has awarded a three-year $25,000 grant to the United Nations Institute for Training and Research (UNITAR) for continued partial support, in conjunction with several other nations and international corporations, of the UNITAR Information Centre for Heavy Crude and Tar Sands. The Centre will research and compile information on heavy crude and tar sands deposits throughout the world, related laws, international legal issues, and on state of the art for extraction and refining and other associated functions. In accordance with 10 CFR 600.7(b), eligibility for this grant award was restricted to UNITAR because no other organization is presently collecting and disseminating this information on a world-wide basis.

FOR FURTHER INFORMATION CONTACT: Nancy W. Gorman, MA–452.1, U.S. Deparment of Energy, Office of Procurement Operations, 1000 Independence Ave., SW, Washington, D.C. 20585, 252–9738.

Issued in Washington, D.C., on March 19, 1984.

William A. Vaughn,

Assistant Secretary Fossil Energy.

BILLING CODE 6450-01-M

Bonneville Power Administration

Notice of Proposed Section 7(b)(2) Implementation Methodology, Public Hearings, and Opportunities for Public Review and Comment

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice.

BPA File Number: 7(b)(2)–84.

BPA requests that all comments and documents that become part of the Official Record compiled in the process of implementing section 7(b)(2) be identified with the file number designation 7(b)(2)–84.

SUMMARY: The Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act) confirms BPA's obligation to establish and revise BPA's rates for the sale and transmission of electric power. Section 7(b)(2) of the Northwest Power Act provides that "after July 1, 1985, the projected amounts to be charged for firm power for the general requirements of public body, cooperative, and Federal agency customers, exclusive of amounts charged such customers under subsection (g) for the costs of conservation, resource and conservation credits, experimental resources and uncontrollable events, may not exceed in total, as determined by the Administrator, during any year after July 1, 1985, plus the ensuing four years, an amount equal to the power costs for general requirements of such customers if, the Administrator" makes a set of assumptions outlined in the remainder of section 7(b)(2). These assumptions hypothetically remove the effects of certain provisions in the Northwest Power Act. In order to implement the provisions in section 7(b)(2) BPA has formulated a proposed methodology that specifies how BPA will conduct the section 7(b)(2) rate test.

The implementation of section 7(b)(2) in any given BPA rate proceeding can require two distinct steps. The first step is to compare a projection of BPA rates developed under all the provisions of the Northwest Power Act, but without considering the effects of section 7(b)(2) (the program case), with a projection of BPA rates developed under the assumptions outlined in section 7(b)(2) (the 7(b)(2) case). Both projections are of rates applicable to public body, cooperative, and Federal agency customers (7(b)(2) customers) and are based on the costs of power required to serve the general requirements of those customers over a five-year period.

If the projected rates in the program case are determined to be higher than those in the 7(b)(2) case, then the second step is required. The rates for the 7(b)(2) customers being developed in the BPA rate proceedings must be reduced and the difference allocated to other BPA rates pursuant to section 7(b)(3) of the Northwest Power Act. This potential reallocation must be made within the framework of sound ratemaking principles and of BPA's statutory obligations.

BPA has published a proposed legal interpretation of section 7(b)(2), and has provided copies of a proposed section 7(b)(2) rate test methodology to potential parties to the impending section 7(b)(2) hearings process. This **Federal Register** notice serves to initiate a formal hearings process for the section 7(b)(2) methodology under section 7(i) of the Northwest Power Act.

Opportunities will be available for intersted persons to review the proposed section 7(b)(2) methodologies, to participate in hearings, and to submit written comments. Any written comments received before the end of the hearings and the transcripts of the hearings will become part of the Official Record. Consideration of comments may result in the final section 7(b)(2) methodology differing from the initial proposal presented in this Notice.

Responsible Official: Ms. Shirley R. Melton, Director, Division of Rates, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208, 503–230–5651.

DATES: Persons wishing to become a formal "party" to the proceedings must notify BPA in writing of their intention to do so. The notification must be received by April 6, 1984, and should be addressed as follows: Hearing Officer, APR, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212. Customers of BPA who provide notice are parties of right. Others may become parties by demonstrating in their notice and at the prehearing conference that they would represent a significant and otherwise unrepresented interest. The notice should contain: (1) The name of the person or entity claiming status as a party; (2) the person who will be representing the party; (3) whether the person or entity claiming status as a party has a contractual relationship with BPA that could be affected by the proposed section 7(b)(2) methodology; and (4) if no contractual interest exists, the interest the person believes would be served by their being a party. All timely applications will be ruled on by the Hearing Officer.

A prehearing conference, required by the procedures pertaining to rate proceedings, is tentatively scheduled to be held before the Hearing Officer at 9:00 a.m. on April 10, 1984, in the BPA Headquarters Building, Room 464, 1002 NE. Holladay, Portland, Oregon. Registration for the prehearing conference wil begin at 8:30 a.m.

It is expected that during the prehearing conference, hearing dates will be set for the presentation of direct cases, rebuttal cases, cross-examination, and briefs. A notice of the location, dates, and times of the hearings will be mailed to all parties of record. Although the Hearing Officer ultimately is responsible for establishing hearing dates, BPA has proposed a schedule for consideration by the Hearing Officer and the parties. This schedule is as follows:

April 10, 1984: BPA Prefiles Testimony
April 30, 1984: Parties Prefile Testimony
May 14, 1984: Rebuttal Testimony Filed
May 29–June 5, 1984: Cross-Examination
June 15, 1984: Opening Briefs Due
June 26, 1984: Tentative Decision

In addition, the computer model that reflects the tentative decision will be made available July 17, 1984.

Written comments may be submitted until the close of the hearings. The last day for receipt of written comments will be specified in a later **Federal Register** notice.

FOR FURTHER INFORMATION CONTACT: Ms. Kathleen S. Johnson, Public Involvement Office, P.O. Box 12999, Portland, Oregon 97212, 503–230–3478; Oregon caller outside Portland may use the toll-free number 800–452–8429; callers in California, Idaho, Montana, Nevada, Utah, Wyoming, and Washington may use 800–547–6048. Information may also be obtained from:

Mr. George E. Gwinnutt, Lower Columbia Area Manager, Sute 288, 1500 Plaza Building, 1500 NE. Irving Street, Portland, Oregon 97208, 503–230–4551.

Mr. Ladd Sutton, Eugene District Manager, Room 206, 211 East Seventh Street, Eugene, Oregon 97401, 503–687–6952.

Mr. Ronald H. Wilkerson, Upper Columbia Area Manager, Room 561, West 920 Riverside Avenue, Spokane, Washington 99201, 509–456–2518.

Mr. Ronald K. Rodewald, Wenatchee District Manager, P.O. Box 741, Wenatchee, Washington 98801, 509–662–4377, extension 379.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406–329–3860.

Mr. Richard D. Casad, Puget Sound Area Manager, Room 250, 415 First Avenue North, Seattle, Washington 98109, 206–442–4130.

Mr. Thomas Wagenhoffer, Snake River Area Manager, West 101 Poplar, Walla Walla, Washington 99362, 509–525–5500.

Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208–523–2706.

Mr. Frederic D. Rettenmund, Boise District Manager, Owyhee Plaza, Suite 245, 1109 Main Street, Boise, Idaho 83707, 208–34–9138.

SUPPLEMENTARY INFORMATION:

I. Applicable Legislation

BPA's statutory authrity to establish and revise rates for the sale and transmission of electric power is expressed in the Bonneville Project Act of 1937, as amended (16 U.S.C., section 832 e and f, 1976); the Flood Control Act of 1944 (16 U.S.C., section 825 *et seq*, 1976); the Regional Preference Act (16 U.S.C. section 837 *et seq*, 1976); the Federal Columbia River Transmission Act (16 U.S.C., seciton 838 g and h, 1976); and the Pacific Northwest Electric Power Planning and Conservation Act of 1980 (16 U.S.C., section 839 *et seq, Supp. V., 1981). Section 7 of the Northwest Power Act confirms BPA's obligation to develop rates for wholesale power. Section 7(b)(2) requires that "after July 1, 1985, the projected amounts to be charged for firm power for the general requirements of public body, coopertive and Federal agency customers, exclusive of amounts charged such customers under subsection (g) for the costs of conservation, resource and conservation credits, experimental resources and uncontrollable events, may not exceed in total, as determined by the Administrator, during any year after July 1, 1985, plus the ensuing four years, an amount equal to the power costs for general requirements of such customers if, the Administrator" makes a set of assumptions outlined in the remainder of section 7(b)(2). The assumptions listed in section 7(b)(2) hypothetically remove the effects of certain provsions in the Northwest Power Act.*

II. Procedures Governing Rate Adjustments and Public Participation

Section 7(i) of the Northwest Power Act provides procedures for encouraging the particpation of the public in the development of BPA's rates. In order to give the public notice of how it could participate in BPA's rate adjustments and to elaborate on the procedures set out in section 7(i), BPA published "Procedures Governing Bonneville Power Adminstration (BPA) Rate

Adjustments" by **Federal Register** notice (46 FR 6240, February 10, 1982). These procedures were used in the 1983 wholesale power and transmission rate filings. These procedures, as they may be amended, will be applicable to the section 7(i) hearings on the section 7(b)(2) methodology.

The Northwest Power Act prescribes a **Federal Register** notice announcing the proposed rates or rate-related issue; one or more hearings; the opportunity to submit written views, data, questions, and arguments outside the hearings; and a decision by the BPA Administrator based on the record developed during the rate process. BPA's Procedures (cited above) expand these requirements.

The process begins with publication of this notice. The Procedures further provide for a prehearing conference if scheduled by the Hearing Officer. A prehearing conference has been tentatively scheduled before the Hearing Officer at 9:00 a.m. on April 10, 1984, in Room 464 of the BPA Headquarters Building, Portland, Oregon. Registration for the prehearing conference will begin at 8:30 a.m., and the conference will commence at 9:00 a.m.

Issues for discussion at the prehearing conference may include disputes concerning status as a party, discovery, the scope of cross-examination, hearing schedules, and other pertinent matters. BPA will prefile the testimony of its witnesses at the prehearing conference.

BPA may also convene one or more public field hearings at certain locations throughout the region. The purpose of these hearings would be to present to interested members of the public a synopsis of BPA's proposal and to receive comments, views, and opinions from the general public. The public's comments would be subject to cross-examination by the parties and BPA. Presentation of testimony and evidence from formal parties would not be allowed at these sessions. The hearings would be at times and locations to be announced.

BPA finds it necessary to distinguish between "participants in" and "parties to" the hearings. During field hearings, BPA receives comments, views, opinions, and information from "participants," who are defined in the procedures as interested persons who may express their views at a hearing, but who may not cross-examine other witnesses, participate in the prehearing conference, or serve or be served with documents. Participants may request materials presented during the hearings. Participants' written rebuttal will be made part of the official record. The "participants" category of interest has been established to give the public the maximum opportunity to participate and have its views considered without assuming the obligations incumbent upon the "parties."

The second category of interest is that of a "party." A party may be either a party of right because of its legal and/or contractual relationship with BPA, and hence, its direct interest, or it may be a person seeking to represent a significant and otherwise unrepresented interest in the hearings. Parties may participate in prehearing conferences, may call and cross-examine witnesses, and are entitled to service of documents from all other parties. Parties may also be cross-examined and required to serve documents on the other parties. To avoid unnecessary delay, cross-examination by parties may be limited by the Hearing Officer. Where two or more parties have substantially like interests and positions, the Hearing Officer may, to expedite the hearing, order appropriate limitations on the number of attorneys or parties appearing *pro se* who will be permitted to cross-examine witnesses as well as file motions and objections on behalf of such parties. If a party demonstrates that it would not be represented adequately in the joint presentation of an issue or issues, the Hearing Officer may permit separate examination or argument regarding such issue or issues.

The Official Record will include, among other things, the transcripts of the hearings, written material submitted by the parties and participants, documents developed by the BPA staff, and other material accepted into the record by the Hearing Officer. The Hearing Officer then will review the record, will supplement it if necessary, and will certify the record to the Administrator for decision.

III. Major Concepts and Issues

A. Definitions

This section contains definitions applicable to section 7(b)(2). Terms identified in the Northwest Power Act have the same meaning in this proposal, unless further defined.

1. *7(b)(2) Customers.* Those firm power customers of BPA that are listed in section 7(b)(2) of the Northwest Power Act as subject to the rate test, viz, public bodies, cooperatives, and Federal agencies.

2. *Within or Adjacent.* Relating to direct service industrial (DSI) customers' loads determined in accordance with section 7(b)(2)(A) to be geographically within or adjacent to the service territories of 7(b)(2) customers.

3. *Forestcast DSI Loads.* Those loads of direct service industries that are forecast to be served by BPA, during any future period, pursuant to section 5(d)(1) of the Northwest Power Act.

4. *Relevant Rate Case.* The wholesale power rate adjustment proceeding being conducted at the time the projections for section 7(b)(2) are made, and in which any adjustment to rates in accordance with section 7(b)(2) may be reflected.

5. *7(b)(2) Case.* The entire process of projecting rates for the relevant five-year period under the provisions of section 7(b)(2) of the Northwest Power Act, including specific data, assumptions, and results.

6. *Program Case.* The entire process of projecting rates to be charged in the future under the provisions of the Northwest Power Act other than section 7(b)(2), including specific data, assumptions, and results.

7. *Relevant Five-Year Period.* The test year of the relevant rate case, plus the ensuing four years.

8. *7(b)(2) General Requirements.* For the purpose of this methodology, the public body, cooperative and Federal agency customers' electric power assumed to be purchased from BPA in the 7(b)(2) case. General requirements only include power purchased from BPA under section 5(b) of the Northwest Power Act; section 5(c) purchases from BPA are not included.

9. *Applicable 7(g) Costs.* The costs identified in section 7(g) of the Northwest Power Act that are also listed in section 7(b)(2), viz, conservation, resource and conservation credits, experimental resources and uncontrollable events.

B. Introduction

BPA has developed the proposed methodology to implement section 7(b)(2) by concurrently following three paths. One path was the interpretation of the legal provisions of section 7(b)(2) of the Northwest Power Act. After an informal consultation process with interested parties, BPA published a "Notice of Proposed Legal Interpretation of section 7(b)(2) of the Northwest Power Act; Request for Comments" in the **Federal Register** (49 FR 2811, January 23, 1984). The notice opened a comment period, which ended February 15, 1984, followed by a reply comment period, which ended February 29, 1984.

The second path was the development of a computer model to perform the section 7(b)(2) rate test. The criteria for choosing a model for the rate test also were discussed in an informal consultation process with interested

persons. BPA will use its Supply Pricing Model (SPM) for this purpose.

The third path was the preparation and release of a proposed rate test methodology. BPA mailed copies of its "Section 7(b)(2) Proposed Rate Test Methodology" to interested persons and potential parties to the section 7(b)(2) implementation process on February 29, 1984. The document described the proposed statutory interpretation, the modeling effort to date, and how they interrelate; and described how the results of the model will be used to perform the rate test, how an amount to be reallocated in the rate test year will be determined, and how that dollar amount will be treated in the rate development process.

Each of the three paths will be described in more detail below.

C. Statutory Interpretation

The Notice of Proposed Legal Interpretation that BPA prepared and published in the Federal Register on January 23, 1984, served to initiate the formal process of resolving the basic legal issues necessary to implement section 7(b)(2). The notice presented BPA's proposed interpretation of the statute, incorporating principles of statutory construction, review of the legislative history, and consideration of views expressed in the series of informal meetings with interested persons. The scope of the notice was limited to those issues that relied on the statutory language or legislative intent for resolution. The remaining modeling and rate test result application issues are resolved in the proposed rate test methodology and/or in the computer model and its documentation.

Briefly, BPA proposed to interpret section 7(b)(2) as follows:

1. The five-year rate test period will consist of the test year for the relevant rate case plus the ensuing four years.

2. Only the assumptions specified in section 7(b)(2) and any unavoidable consequences or secondary effects of those assumptions will be considered to determine 7(b)(2) customers' power costs in the section 7(b)(2) case.

3. The costs of conservation, resource and conservation credits, experimental resources, and uncontrollable events (section 7(g) costs) will be included in the program case when the projections of loads and rates are made. The final program case power costs will then be reduced by the applicable section 7(g) costs for comparison with the section 7(b)(2) case power costs.

4. The direct service industrial (DSI) loads that are located within or adjacent to the service areas of 7(b)(2) customers will be assumed, in the 7(b)(2) case, to be served by those customers beginning July 1, 1985, unexpired DSI contracts with BPA notwithstanding.

5. The entire amount of DSI load included in the general requirements of the 7(b)(2) customers will be assumed to be served as firm load in the 7(b)(2) case.

6. Information contained in Appendix B to the Senate Report, S. Rept. No. 272, 96th Congress, First Session (1979) (Appendix B) will be used to identify DSI loads within or adjacent to geographic service boundaries of public bodies and cooperatives.

7. To determine Federal base system resources not obligated to "other" entities under existing contracts in the 7(b)(2) case, the DSI load which is not within or adjacent to the service areas of preference customers will be assumed to be served by investor-owned (private) utilities only as the DSI power sales contracts with BPA expire.

8. Three types of resources will be assumed to be available to serve 7(b)(2) customers' loads when the Federal base system (FBS) resources are exhausted in the 7(b)(2) case: (a) The resources actually acquired by BPA from the 7(b)(2) customers in the relevant rate case; (b) the resources owned or purchased by the 7(b)(2) customers that are not dedicated to their own regional loads; and (c) generic resources of whatever size required to serve the preference customers' remaining load, at the average cost of all new resources acquired by BPA from non-7(b)(2) customers during the relevant five-year period. The resources listed in (a) and (b) will be "stacked" in order of cost and assumed to be used as needed to meet loads, least cost first. Should additional resources be needed to serve 7(b)(2) customers' loads, they will come from category (c).

D. Modeling Process

1. *Model Selection.* Performing the section 7(b)(2) rate test requires the use of a computer model to project BPA's wholesale and regional retail electricity rates over the five-year test period for both the program case and the 7(b)(2) case. BPA and interested persons considered the two identified options for choosing a model: A new model could be developed; or one of the existing models in the region, modified for the assumptions necessary to perform the section 7(b)(2) rate test, could be used. Several existing programs model the wholesale and retail ratesetting processes in a manner conducive to reflecting the assumptions required for the two test cases. In addition, time and staff requirements to construct a new model would be prohibitive. Therefore, the decision was made to project the test rates using an existing model.

The requirement that the rate test be conducted over a five-year period precluded the use of the models that are currently used to develop BPA's rate proposals. These models require extremely detailed information and are designed to produce rates for a single test year. Use of these models to produce projections for an additional four years would be administratively infeasible. Extensive effort would be required to project each item of test year data over the additional four years. Even if such an effort were practicable, it is not self-evident that the results would be more plausible than results from a more simplified approach in which data are aggregated for projection purposes and some processes are not modeled in detail. Therefore, BPA decided to use one of the existing models that would simulate the results of the rate development models for the test year on a simplified, but reasonably accurate, basis. In addition, the model used for the rate test must allow reasonable projections of rates for the additional four years in a straightforward and timely manner. Other criteria considered as the basis for the selection of an appropriate model include: the model's adaptability to the rate test assumptions, BPA staff's working knowledge of the model's structure and code, and the model's flexibility for use in other analyses performed by BPA.

BPA's Supply Pricing Model (SPM) was selected under these criteria to perform the section 7(b)(2) rate test. The SPM was developed by BPA, and BPA has used it extensively to project rates for use in midterm and long term load forecasting. It has also been used to analyze the rate impacts of alternative policies and actions. As a result, BPA staff has considerable knowledge of the model. It is already an integral part of BPA's planning process, and its structure is flexible enough to incorporate the rate test assumptions.

The following subsections provide a brief description of the SPM and how it works. A more complete description can be found in the documentation for the model.

2. *Supply Pricing Model.* The SPM is a computer-based model that simulates the BPA ratesetting process and the ratesetting processes of the Pacific Northwest's retail electric utilities. BPA originally developed the model to analyze the probable rate impacts of proposed BPA policy and of alternative policies. The SPM can produce, in conjunction with BPA's electricity

demand forecasting models, long term projections of annual rates and midterm projections of monthly retail rates. Wholesale rates for priority firm power, industrial firm power, new resource firm power, and nonfirm energy, plus the fully allocated cost of surplus firm power, are estimated by the SPM. It also produces retail rates for the residential, commercial, and industrial sectors of both private and publicly owned (public) utilities in the region.

a. *Background.* The current version of the SPM evolved from BPA's original energy model, the Integrated Supply/Demand Model (ISDM), which was developed in 1976. The ISDM combined the relationship between the demand and the supply of electricity, linked by the price of electricity, into a single model. The demand portion of that model was based on a methodology prepared by National Economic Research Associates, Inc. (NERA) for the Pacific Northwest Utilities Conference Committee (PNUCC). The supply and pricing portions of the ISDM were developed by BPA in 1976. The ISDM was used to analyze policy alternatives for the 1979 Rate Environmental Impact Statement (EIS). The ISDM forecasted both loads and rates. The supply and pricing portions were subsequently removed from the ISDM and became the SPM. BPA continues to revise the SPM to reflect the changing conditions and policies in the region. A major modification was the incorporation of the load, resource, and rate provisions of the Northwest Power Act.

In conjunction with BPA's demand models, the SPM is used to produce BPA's long-term and midterm load forecasts. In addition, the SPM has been used to analyze the impacts of BPA's proposed wholesale power rates in each Rate EIS since 1979. The SPM is also used to analyze the rate impacts of BPA policy decisions. For example, the rate impacts of options for terminating, delaying construction, or completing as scheduled the Washington Public Power Supply System nuclear plants were analyzed with the SPM.

The following sections describe how the SPM develops rate projections by simulating BPA's wholesale power ratesetting process and retail utilities' ratesetting processes.

b. *Load/Resource Balance.* The SPM determines a load/resource balance for the entire region. The capability of on-line hydro facilities under critical water and the available energy from on-line thermal resources are compared with loads for the public, private, and Federal systems. The loads of all regional utilities which cannot be served by their own resources are assumed to be served by BPA. The SPM adds previously identified (named) resources not currently on-line on their currently scheduled date of commercial operation. When additional resources are needed, BPA's Least Cost Mix Model (LCMM) may be used to identify generic new resources (including conservation). If resources are insufficient to serve the loads, the SPM adds short term purchase power to balance loads and resources. If resources exceed firm loads in any year, the surplus may be assumed to be sold at its fully allocated cost or in the nonfirm energy market, or both.

The SPM develops three resource pools to serve BPA loads, as specified in the Northwest Power Act: (a) Federal base system (FBS); (b) Exchange; and (c) New Resources. The FBS is defined as consisting of all Federal hydro resources and thermal resources acquired by BPA under contracts prior to the date the Northwest Power Act was passed. The Water Budget, which enhances downstream migration of anadromous fish by providing certain levels of streamflows and which results in reduced firm energy generation capability of the Federal hydro system, is assumed to be implemented in FY 1984. Exchange resources are those resources acquired by BPA from regional utilities under the residential and small farm load exchange provided for in the Northwest Power Act. New resources are all other generating resources acquired by BPA.

The resource pools are used by the SPM in order of priority as specified in the Northwest Power Act to serve each of the three rate pools: (a) Priority Firm Power (PF) as described in section 7(b); (b) Industrial Firm Power (IP) described in section 7(c); and (c) New Resource Firm Power (NR) described in section 7(f). Beginning in 1985, the SPM incorporates the melding of the costs of resource pools that serve the IP and NR loads to reflect changes specified by the Northwest Power Act.

c. *Revenue Requirements.* The SPM calculates BPA's revenue requirement for each year of the projection period by projecting individual resource cost components and other BPA costs. Interest and amortization on Federal resources are determined through a simplified repayment simulation. These annual payments are combined with the annual costs of fuel, operation and maintenance, and replacements, which are escalated over time, to project total generation costs. Payments on the debt for the net-billed portions of the Washington Public Power Supply System nuclear plants are entered into the SPM directly. In addition, the cost of exchange resources is determined on an annual basis from the average system cost of all the private utilities and participating public utilities. Finally, the budgeted annual expenditures for transmission, conservation, administrative and general expenses, fish and wildlife expenses, and payments of any deferral of interest payments to the Treasury are added to determine the total revenue requirement in each year.

d. *Cost of Service.* The SPM assigns costs to the resources used to meet both BPA and regional loads and then develops rates based on those resource costs. The costs allocated to each of BPA's three rate pools are determined by the costs of the resource pools that serve each rate pool. PF customers are served first with FBS resources. IP and NR customers are served primarily with exchange and new resources. Conservation costs and all other costs that are not specific to any resource pool are allocated as they are in the most current BPA rate filing. The cost of service step of the SPM assumes resource operation under critical water conditions.

e. *Rate Design.* The SPM makes several adjustments to the allocated costs of service to calculate the final BPA rates. The cost of service assumption of critical water is adjusted to average water for the rate design step, resulting in the assumption of availability of nonfirm energy from the Federal hydro system. Nonfirm energy is allocated to specified nonfirm energy markets in the following order of priority: (a) displacement of regional high cost thermal generation; (b) service to the first quartile of the DSI load; (c) export to the Pacific Southwest; and (d) displacement of generation from regional low cost thermal resources. The revenues from the sale of nonfirm energy are based on the average nonfirm rate from the most current BPA rate filing escalated at the same rate as that for the variable costs of a baseload coal plant. The projected revenues are allocated uniformly to loads served by FBS and new resources. The rates are also adjusted to account for the insufficiency of revenues recovered from power sold under contracts employing fixed rates and from the sale of surplus firm power.

After 1984, the IP and NR rate pools are allocated resource costs as a single rate pool. However, the IP rate is not based on these costs, but is set at the higher of: (a) The PF rate plus the "typical margin" included in the public utility retail industrial rate; or (b) the IP rate in effect during the 1985 contract

year. The difference between the costs allocated to the IP rate pool and the revenue recovered from that load is allocated uniformly to all the rate pools. Finally, the rates are adjusted to reflect the value of the reserves provided by BPA restriction rights on DSI loads.

f. *Retail Rates.* Projections of average retail electricity rates or prices are required as inputs to the load forecasting models to develop the forecast of regional electricity sales. Long-term retail rates are calculated in the SPM for public and private utilities for each consuming sector: residential, commercial, and industrial. To develop rates for private utilities, the SPM considers the utilities' own generation costs, transmission costs, costs of power purchases from BPA, and other appropriate costs to calculate the private utility average system cost. The SPM calculates private utility commercial and industrial rates on the basis of this average system cost. However, the private residential rate reflects the benefits of the residential and small farm load exchange. Public utility retail rates are based on the melded cost of their BPA purchase power and their own generation and transmission costs. For both private and public utilities, distribution costs associated with each customer group are added to derive the final retail rates.

For nongenerating public utilities, monthly retail rates are calculated by State for use in forecasting midterm loads. The rate projection is the sum of BPA's PF rate and state-level distribution costs. Monthly retail rates for generating public utilities are calculated on a regional basis. This projection reflects their own generation costs, purchases from BPA, transmission costs, and distribution costs.

The following two subsections describe the assumptions to be incorporated into the SPM in order to calculate the two projections of rates that will be compared in the section 7(b)(2) rate test.

3. *The Program Case.* The program case is the five-year projection of power costs for serving the general requirements of the 7(b)(2) customers conforming with all the provisions of the Northwest Power Act, but without considering the effects of section 7(b)(2). The program case will be developed as a simulation of the BPA rate proposal results for the test year and a projection of the rates for the ensuing four years based on the test year rate proposal methodology and data. All the rate proposal determinations, decisions, and assumptions for the test year regarding revenue requirements, loads, resources, cost allocation, and rate design will be input or modeled as accurately as possible in the SPM. Input data for the ensuing four years will be consistent with or extrapolated from test year data. Ratemaking methodologies, such as those based on the "post-85" rate directives in the Northwest Power Act and those used to allocate costs and revenue adjustments to BPA customer classes, will be unchanged over the five-year rate test period.

A load forecast is developed for every BPA rate proposal independently from any requirements for implementing section 7(b)(2). This forecast is for the test year of the rate proposal and for at least the following four years to accommodate hydrogeneration studies. It will also include estimates of programmatic conservation savings for the forecast period. This forecast will provide the load estimates for the program case.

Regional resource generation studies are also conducted for BPA's rate proposals. These studies determine the capability of BPA's and the region's hydro and thermal resources under critical water conditions. The results of these studies as applied to the test year of the rate proposal will be used in the program case as the basis for the full five-year period. The test year results will be held constant except as modified to reflect the start of commercial operation of generating resources beyond the test year and for the planned effect or expiration of relevant contracts. Nonfirm hydroelectric generation will be based on the same water conditions used for the test year and assumptions about the level of surplus firm power sales for the program case will be the same as those made for the rate proposal.

To the extent possible, BPA revenue requirements data will be taken directly from test year data from the rate proposal. Published projections of these costs will be used where available. When they are unavailable, the costs will be projected over the five-year period using estimates of future inflation and real cost escalation and accounting for planned additions to the region's power system.

Finally, the methodologies for allocating costs and revenue adjustments among BPA's customer classes used in BPA's rate proposal will be modeled in the SPM. These methodologies will be assumed to remain the same for the five-year period.

The methodologies and data from the rate proposal cannot be described in detail in this document. They are properly rate case determinations that are outside the scope of the methodology for implementing section 7(b)(2). The section 7(b)(2) methodology must be flexible enough to incorporate the methodologies and data from the rate proposal for which the section 7(b)(2) rate test is being conducted. These methodologies and data, as part of a BPA rate filing are, in turn, subject to review and comment pursuant to section 7(i) of the Northwest Power Act. The section 7(b)(2) methodology can only require that the rate proposal methodologies and data be modeled or incorporated as accurately as possible, which would be subject to examination during the section 7(i) process for the rate proposal.

In summary, the program case will be BPA's best projection of its rates without considering the effects of section 7(b)(2). The exact methodology for the rate calculation in the program case cannot be determined until BPA has prepared its rate proposal. However, the SPM will be modified to reflect the methodology as completely as possible in producing the program case when the rate test is conducted for the rate proposal.

4. *The 7(b)(2) Case.* The language of section 7(b)(2) not only directs BPA to conduct a rate test for the 7(b)(2) customers, but also provides a considerable amount of direction as to how the rate test is to be conducted. The Notice of Legal Interpretation published by BPA in the **Federal Register** provides BPA's interpretation of the language in section 7(b)(2) and of the direction it provides in developing the 7(b)(2) case rate projection. A major point in this interpretation is the general approach to the 7(b)(2) case. Based on this, the 7(b)(2) case will be modeled in the same way as the program case, except where section 7(b)(2) provides specific assumptions that modify the program case or where those assumptions lead to unavoidable secondary effects. The remainder of this section outlines how the 7(b)(2) case rate projection for the five-year test period will be developed.

a. *Load Forecast.* The initial loads that will be used in the 7(b)(2) case will be the same as those used in the program case, except that they will not include estimates of programmatic conservation savings. However, a major premise behind the inclusion of section 7(b)(2) in the Northwest Power Act is that the future rates projected in the program case and in the 7(b)(2) case would differ. It would be unrealistic and unjustified to assume that these differing rates would not have an effect on the loads for the two cases. Therefore, if the 7(b)(2) case rate projection results differ significantly from the program case results, the 7(b)(2) case rates may be

used to generate a new load forecast using the same demand models that were used to generate the rate proposal load forecast. A new 7(b)(2) case rate projection would then be developed with the new loads.

b. *DSI Loads.* DSI loads will be input on a plant-by-plant basis, even though the SPM treats them in aggregate. The plants will be flagged to indicate whether they are within or adjacent to the service area of any 7(b)(2) customer based on the list contained in Appendix B. If a DSI leaves the region or is no longer served by BPA, its loads will not be assumed to transfer from BPA service to utility service. Any DSI served by a utility other than BPA in the program case will continue to be served by that utility in the 7(b)(2) case. However, if a DSI plant is forecast not to operate due to economic conditions under the program case, but projected electric rates are low enough under the 7(b)(2) case to allow a forecasted level of operation, then the load associated with that level of plant operation may be included in the 7(b)(2) case load forecast.

All "within or adjacent" DSI loads will be included in the general requirements of the 7(b)(2) customers from the start of the five-year period. DSI loads not "within or adjacent" will remain BPA loads until their pre-Northwest Power Act power sales contracts would have expired, at which time they are assumed to be served by private utilities. The forecasted operating levels of the DSI's that are transferred to public and private utilities are assumed to be served as firm loads. Those DSI's being served by BPA receive the same quality of service as in the program case.

c. *Resources.* The residential and small farm power exchange is eliminated in the 7(b)(2) case. The FBS and any additional resources, as defined in section 7(b)(2), are the only resources available to serve the general requirements of the 7(b)(2) customers. However, the amount of FBS resources will be reduced by any contractual obligations on these resources that were in existence prior to passage of the Northwest Power Act. These contractual obligations include the power sales contracts with those DSI's that are not "within or adjacent," and the Washington Public Power Supply System Nuclear Plant (WNP) No. 1 Hanford Exchange contract with the private utilities. As these contracts expire, the amount of the FBS available to serve the general requirements of the 7(b)(2) customers will increase. As a result of this priority to FBS power, with no costs of additional resources included, the projected rates applicable to the pre-Northwest Power Act contracts could be lower than the projected rates for the 7(b)(2) customers. Also, 7(b)(2) case adjustments for reserve benefits that are discussed below would not be allocated to the loads under those contracts.

If FBS resources, after meeting contractual obligations, are insufficient to meet the general requirements of the 7(b)(2) customers, then three types of additional resources can be added to serve those loads. These additional resources are defined in section 7(b)(2) and are: (a) Actual and planned resource acquisitions by BPA from 7(b)(2) customers consistent with the program case; (b) 7(b)(2) customer resources not currently dedicated to their regional load; and (c) generic resource at the average cost of actual and planned resources acquisitions by BPA from non-7(b)(2) customers consistent with the program case. These resources will include any conservation programs undertaken or acquired by BPA. They will be assumed to come on-line to meet the remaining general requirements of the 7(b)(2) customers after FBS service in order of least cost first.

d. *Financing Benefits.* Section 7(b)(2)(E)(i) requires that BPA assume that quantifiable monetary savings to 7(b)(2) customers resulting from reduced public utility financing costs for the three types of non-FBS resources described above were not achieved. Therefore, any additional resources required to serve the general requirements of 7(b)(2) customers will not reflect the financing cost reductions implicit in resource acquisitions in the program case.

In order to quantify these financing reductions, BPA is contracting for the services of Wertheim and Company, BPA's financial advisor. If additional resources are required in the 7(b)(2) case, a list of these resources will be sent to Wertheim, containing cost and sponsor information for each resource. For those resources actually acquired by BPA from the 7(b)(2) customers under the program case, Wertheim will estimate the financing costs for the resource sponsor under current market conditions assuming that BPA had not acquired the resource output. The differential between this cost estimate and the actual financing costs will be included in the cost of the additional resources in the 7(b)(2) case. For those resources actually acquired by BPA from non-7(b)(2) customers, a proxy public utility sponsorship will be assumed for the resources. This public sponsorship will be assumed to be a company formed for resource construction with equal ownership and participation by all the region's public utilities. Wertheim will estimate the financing costs of the resources with and without BPA acquisition of resource output, assuming the proxy public sponsorship described above. Finally, when the detailed financing cost and sponsor information is not available for planned resources, Wertheim will follow the same procedures, assuming the proxy public sponsorship. Any reductions in financing costs determined from this analysis will be added back to the total cost of the resource in the 7(b)(2) case.

e. *Reserve Benefits.* Section 7(b)(2)(E)(ii) requires BPA to assume that "* * * the quantifiable monetary savings, during such five-year period, to the public body, cooperative and Federal Agency customers resulting from reserve benefits as a result of the Administrator's actions under this Act were not achieved." Reserve benefits are a result of BPA's restriction rights on DSI loads provided for in the DSI's power sales contracts. The DSI's currently receive a credit to their rate based on the value of the reserves provided by these restriction rights. In the 7(b)(2) case, these restriction rights are lost as the DSI's transfer to public and private utilities and are assumed to be served as 100 percent firm loads. Public and private utilities would have to incur the costs of providing an equivalent amount of reserves from another source. Therefore, it will be assumed that public utilities will incur a level of costs equal to the value of reserves as determined in BPA's rate proposal from those DSI's that are within or adjacent to public utility areas. The value of reserves determination is currently based, in large part, on the cost of an alternative reserve resource. The cost of the resource used in this determination will be extrapolated for the remaining four years of the rate test for inclusion in the 7(b)(2) customers' costs under the 7(b)(2) case.

f. *Surplus Firm and Nonfirm Sales.* The load and resource situation in the 7(b)(2) case will be considerably different from that in the program case. The increase in the region's firm load due to the 100 percent firm service to non-BPA DSI loads, a potentially different load forecast for the 7(b)(2) case, and a potentially different set of resources all imply that a different level of surplus firm power may be projected for the 7(b)(2) case than for the program case. There is nothing in the language of

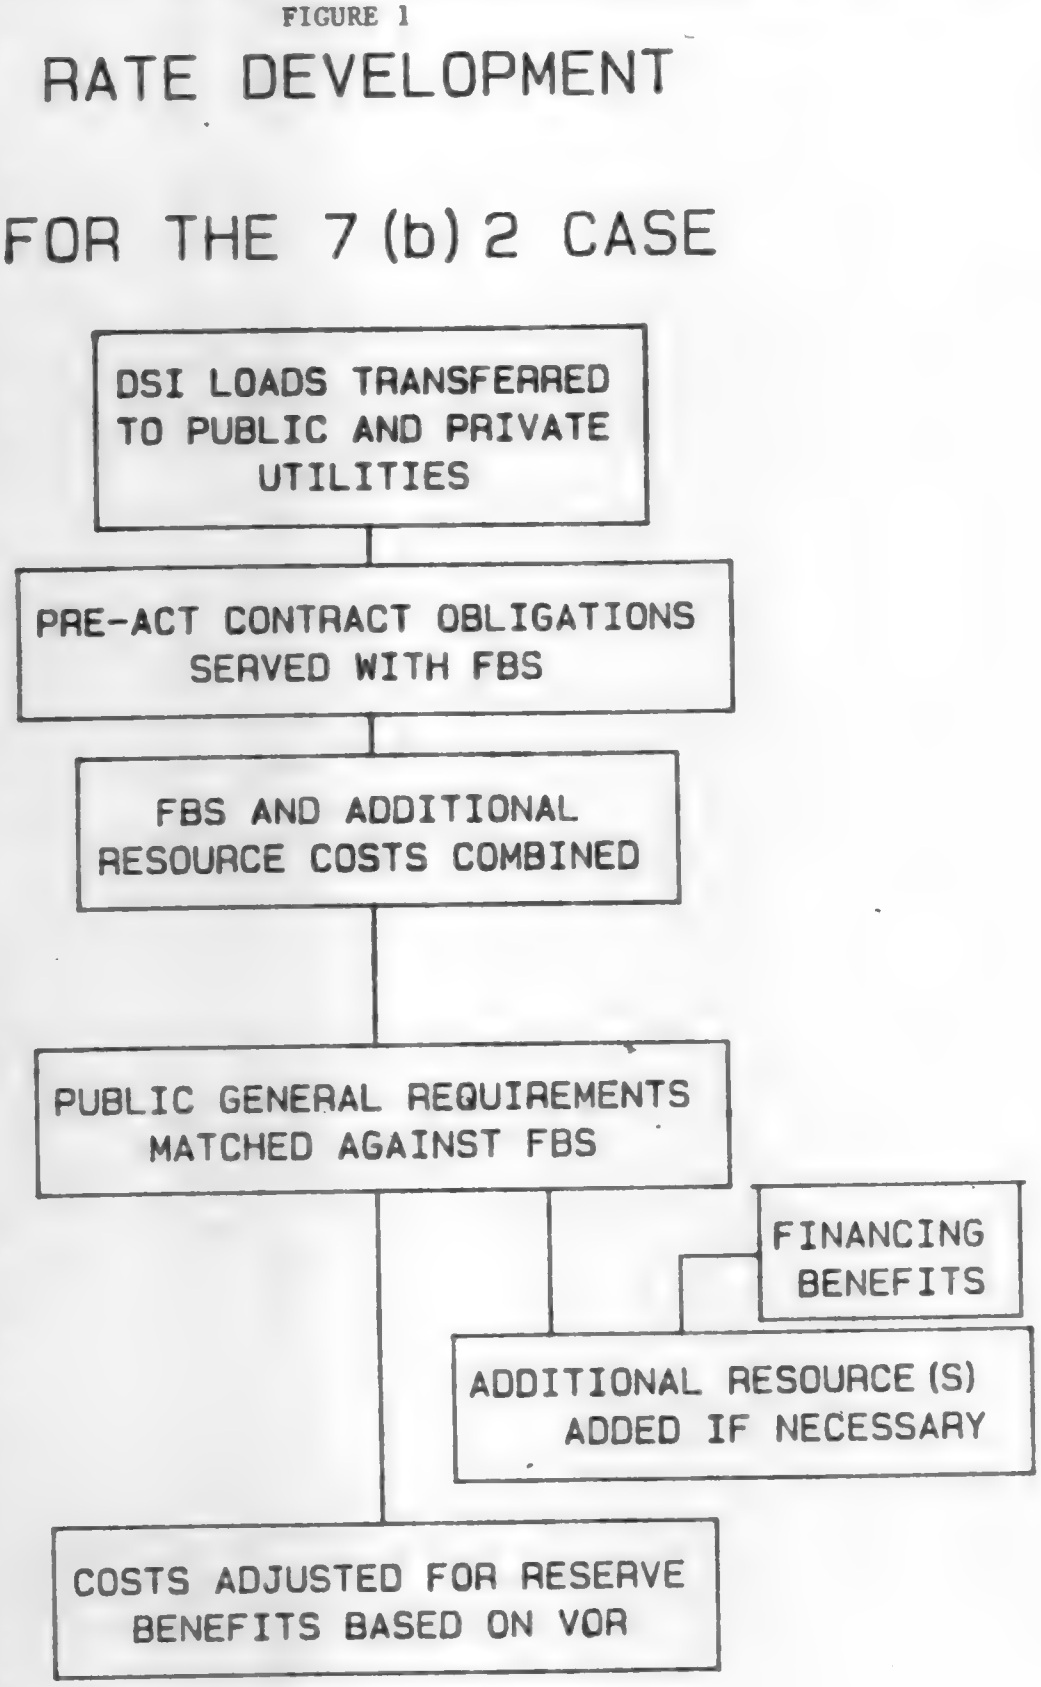
section 7(b)(2) which would indicate that BPA should assume a different level of surplus firm sales at fully allocated cost in the 7(b)(2) case than in the program case. However, due to the potentially different forecasts of surplus firm power for the two cases, the level of assumed surplus firm sales will be limited to the size of the projected surplus. In addition, any sales of surplus firm power projected to be made in the program case to serve the first quartile of DSI loads that are "within or adjacent" will not be made in the 7(b)(2) case. Therefore, the level of surplus firm sales assumed for the 7(b)(2) case will be the same as that assumed for the program case, unless restricted by the surplus size in the 7(b)(2) case or a change in the status of DSI first quartile purchases.

Nonfirm energy generation of the region's hydroelectric system will also be assumed to be the same as in the program case. However, the nonfirm energy markets will be adjusted in the 7(b)(2) case to reflect the reduction in the size of the DSI first quartile and the potential change in the amount of displacable new resource generation.

g. *Summary.* The 7(b)(2) case will differ from the program case only as required by the assumptions listed in section 7(b)(2) and their unavoidable secondary effects. Figure 1 is a simple schematic of how the 7(b)(2) case will be developed. The residential and small farm load exchange is eliminated. "Within or adjacent" DSI loads are served by 7(b)(2) customers as a 100 percent firm load. The general requirements of the 7(b)(2) customers are served with FBS resources after pre-Northwest Power Act contractual obligations are met. Additional resources are brought on-line if required to serve the general requirements. The costs of these additional resources are adjusted to reflect the reduction in financing costs received by 7(b)(2) customers under the Northwest Power Act. Finally, 7(b)(2) customers' power costs are adjusted to reflect the cost of replacing the reserves provided by BPA's DSI restriction rights.

The SPM will produce rate projections in the 7(b)(2) case for three firm power rates. The first is the rate that applies to pre-Regional Act contracts. These contracts, including DSI's still served by BPA, are served with the FBS and the rate is based on FBS costs and additional non-7(b)(2) related cost and revenue adjustment allocations.

FIGURE 1



The second rate (7(b)(2) rate) is that applied to the general requirements of the 7(b)(2) customers. This rate is based on the costs of the FBS and additional resources. It also includes adjustments for financing and reserve benefits, as well as the non-7(b)(2) related cost and revenue adjustment allocations.

The third rate is for sales of surplus firm. It will be based on the costs of surplus resources and the non-7(b)(2) related cost and revenue adjustment allocations. No sales comparable to those made under the New Resource Firm Power rate are assumed to be made.

It should be noted that the SPM projects rates on an average energy basis. Therefore, firm capacity sales are not accounted for and costs that would be allocated to this class of service are allocated to other firm power customer classes. This practice may not unduly bias the rate test, however, since the same procedure is used in both cases.

E. Comparison of Projection Amounts

For each of the two cases, program and 7(b)(2), the SPM will produce a projection of annual average energy rates for the five-year rate test period. These two rate projections will be compared to determine if a reallocation of costs pursuant to section 7(b)(3) is required. The relevant rate projection for the comparison from the program case is BPA's Priority Firm Power rate applicable to the general requirements of the 7(b)(2) customers. The relevant rate projection from the 7(b)(2) case is BPA's rate to the 7(b)(2) customers.

Each projection will consist of five annual rates. This implies that no differences in seasonality will be measured in the rate test. However, there is no obvious reason to indicate that the two rate projections should or would exhibit significantly different seasonality. Therefore, the use of annual projections should not bias the results. The SPM also does not classify costs between capacity and energy. This could obscure certain load factor relationships between the two cases. Where these relationships are demonstrated to be significant, adjustments may be made to correct them.

The PF rate in the program case will be developed in the same manner that it is in BPA's rate proposal. BPA's 7(b)(2) rate in the 7(b)(2) case will include the costs of resources required to serve the 7(b)(2) customers, along with all other costs and revenue adjustments not excluded by assumptions in section 7(b)(2). These costs and revenue adjustments include BPA administrative and general costs, fixed rate contract revenue deficiencies, and surplus firm power revenue deficiencies.

Prior to comparison with 7(b)(2) rates from the 7(b)(2) case, the projected PF rates from the program case will be reduced by the applicable section 7(g) costs listed in section 7(b)(2) that were included in the PF rate projection. All the costs of BPA conservation programs, billing credits, experimental resources, and uncontrollable events that were allocated to the PF rate will be subtracted. This reduced PF rate projection will then be compared to the 7(b)(2) rate projection to determine if the 7(b)(2) rate projection is higher, on average, than the program case projection.

An alternative to comparing the per unit rates in the two cases would be to compare the total allocated costs of serving the general requirements of the 7(b)(2) customers in the two cases. The general requirements in the 7(b)(2) case include the "within or adjacent" DSI loads that are included in the program case. In a situation where the per unit cost was the same between the two cases, the difference in loads alone would lead to different total costs. The intent of section 7(b)(2) was to protect the ratepayers served by 7(b)(2) customers and not to protect the 7(b)(2) customers from the financial impacts of load growth. Therefore, per unit rates are compared, rather than total costs.

The comparison of the two projections is complicated by the requirement of a five-year rate test period. It is possible that the 7(b)(2) rate could be higher than the PF power rate in one year of the period and lower in another. Therefore, the weighting that is applied to each year of both projections is significant in making the comparison.

Two reasonable alternatives exist for this weighting process. The first is to weight all five years equally and to compare a simple average of the rates over the five-year period for each case. The second alternative is to discount the results for each of the five years back to the test year for the rate proposal and to compare an average of the discounted present values of the rate projections for the two cases.

The comparison between the program case and the 7(b)(2) case rate projections should consider the time value of money; i.e., any rate differential is worth less to the 7(b)(2) customers the farther into the future it appears. The alternative of comparing the average of the discounted present values of the five-year rate projection for each case will meet this criterion. If the average of the five years of discounted present valued 7(b)(2) rates is less than that of the PF rates then the determination of an amount of costs to be reallocated in BPA's rate proposal is required.

F. Determination of Test Year Amount

If it is determined that the results of the rate test require a reallocation of costs for BPA's rate proposal, then the amount to be credited to the 7(b)(2) customers and reallocated to BPA's other customers must be calculated. This credit should reflect the fact that it is a one-year adjustment that is based on a five-year determination, and should also reflect the comparison method used to determine the need for the credit. Any number of methods could be used to determine the credit, many of which would result in no test year adjustment, but would defer the adjustment to future periods. However, the two criteria cited above indicate that the appropriate method would be to base the credit on the five-year average of the difference between the net present valued rate projections for the two cases. This difference would then be multiplied by the general requirements of the 7(b)(2) customers for the rate proposal test year to determine the reduction in the 7(b)(2) customers' test year costs.

G. Conclusion

The section 7(b)(2) rate test, up to and including the point where the test year amount is determined, is conducted outside the mainstream of BPA's rate development process. While the rate test reflects the assumptions used in the rate proposal, the rate test has no impact on BPA rates until the test year amount is included in BPA rate design. At this point, any adjustment made to reflect the rate test results in BPA rates must be done within the overall framework of the rate development process and of BPA's ratemaking objectives and statutory requirements. Therefore, the section 7(b)(2) rate test will be conducted and a test year amount determined as outlined in section 7(b)(2). The test year amount will then be included as a step in BPA's rate design process, consistent with other statutory provisions and BPA's ratemaking objectives.

Issued in Portland, Oregon, on March 19, 1984.

Robert E. Ratcliffe,

Acting Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[OPPE-FRL 2550-7]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget for review. The ICR describes the nature of the solicitation and the expected impact, and, where appropriate, includes the actual data collection instrument. The following ICRs are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers; Office of Standards and Regulations; Information Management Section (PM-223); U.S. Environmental Protection Agency; 401 M Street, SW.; Washington, D.C. 20460; telephone (202) 382-2742 or FTS 382-2742.

SUPPLEMENTARY INFORMATION:

Water Programs

Title: Wastewater Solvent Management Plan (EPA 1123).

Abstract: Several industrial categories of the effluent guidelines limit businesses as to the amount of toxic organic compounds they may discharge in wastewater. A discharger may obtain a waiver from toxic organics monitoring by certifying to the control or permit authority (the publicly owned treatment works, State agency or EPA) that the business uses a solvent management plan to control toxic organics.

Respondents: Businesses.

BILLING CODE 6560-50-M

Region 6; Approval of PSD Permits

[A-6-FRL 2552-4]

Notice is hereby given that the Environmental Protection Agency (EPA), Region 6, has issued Prevention of Significant Deterioration (PSD) permits to the following:

1. PSD-TX-74M-1—General Portland, Incorporated; cement manufacturing facility located in New Braunfels, Comal County, Texas; modifies TX-74 to: (1) increase the allowable emission rate for NO_x from 131 lbs/hr to 744 lbs/hr for the Phase I & II kiln stacks, and (2) decrease the SO_2 emission rate from 499 lbs/hr to 250 lbs/hr; issued on August 16, 1983.

2. PSD-TX-102M-2—Phillips Petroleum Company; petroleum refinery located on State Highway 119, approximately 3 miles northeast of Borger, Hutchinson County, Texas; modifies TX-102M-1 to coincide with the existing Texas state construction permits; issued on August 23, 1983.

3. PSD-TX-145M-1—Alamo Cement Company; Portland cement plant located on FM Road 1604, approximately 14 miles northeast of San Antonio, Bexar County, Texas; modifies TX-145 to: (1) incorporate a finish mill, and (2) revise the existing emission limitations to reflect an achievable rate; issued on December 14, 1983.

4. PSD-TX-193M-2—Badische Corporation; neopentyl glycol chemical plant located at 602 Copper Road, Freeport, Brazoria County, Texas; modifies TX-193M-1 to allow for a less stringent fugitive monitoring plan for volatile organic compounds (VOC); issued on November 7, 1983.

5. PSD-TX-214M-2—Gulf Refining and Marketing Company; petroleum refinery located in Port Arthur, Jefferson County Texas; modifies TX-214M-1 to authorize the shut down of heaters B-1A, B-1B, and B-1C, at Ethylene Unit 1542, instead of heater AVU 148; issued on September 30, 1983.

6. PSD-TX-331M-4—Sigmor Refining Company; petroleum refinery located at 301 Leroy Street, Three rivers, Live Oak County, Texas; modifies TX-331M-1 to allow for: (1) an increase in the capacity of the visbreaker, alkylation, and fluid catalytic cracking units, (2) elimination of six other units, and (3) changes in the wording of the Specific Conditions to coincide with state permit; issued on August 29, 1983.

7. PSD-TX-332M-1—Texas Eastman Company; hydrocarbon cracking plant located approximately 5 miles southeast of Longview, Harrison County, Texas; modifies TX-332 to install: (1) a new hydrocarbon cracking unit, and (2) a new organic chemical manufacturing facility; issued on July 14, 1983.

8. PSD-LA-392—Clark Oil—Mt. Airy Refinery; petroleum refinery located on the east bank of the Mississippi River at river mile 144.5, Mt. Airy, St. John the Baptist Parish, Louisiana; permit authorizes: (1) the modification of the existing crude and vacuum units to a visbreaker complex, and (2) the addition of a Claus sulfur recovery unit; issued on December 22, 1983.

9. PSD-TX-410M-1—Airco Carbon; graphite electrode manufacturing facility located approximately 8 miles northwest of Seadrift, Calhoun County, Texas; modifies TX-410 to reflect the current, as built condition of the coker plant; issued on December 7, 1983.

10. PSD-TX-432M-1—Champlin Petroleum Company; cryogenic natural gas expander plant located approximately 4 miles northeast of Carthage, Panola, County, Texas; modifies TX-432 to reflect the design of the plant as built; issued on July 12, 1983.

11. PSD-TX-436M-1—Marathon Oil Company; natural gas plant located approximately 2.5 miles southwest of Iraan, Pecos County, Texas; modifies TX-436 to reflect the final design of the plant; issued on August 25, 1983.

12. PSD-TX-458—BF Goodrich Company; permit issued for the construction of a polyvinyl chloride manufacturing facility to be located on Miller Cut-Off Road in LaPorte, Harris County, Texas; issued on December 13, 1983.

13. PSD-TX-474—Exxon Company, U.S.A.; petroleum refinery located at 2800 Decker Drive, Baytown, Harris County, Texas; permit authorizes the

installation of a Flexicoking Unit and associated facilities for feed preparation and product processing; issued on July 22, 1983.

14. PSD–TX–480—Central Power and Light Company; J. L. Bates Power Station located approximately 3 miles east of Penitas, Hidalgo County, Texas; permit authorizes the construction of two 70 MW natural gas/distillate fuel-fired gas turbines for peaking purposes; issued on September 2, 1983.

15. PSD–TX–481—Central Power and Light Company; Laredo Power Station located approximately 3.3 miles north of Laredo, Webb County, Texas; permit authorizes the construction of two 70 MW natural gas/distillate fuel-fired gas turbines for peaking purposes; issued on October 12, 1983.

16. PSD–TX–483—Goodyear Tire and Rubber Company; synthetic rubber plant located at 2000 Goodyear Drive, Houston, Harris County, Texas; permit authorizes the construction of a steam generation facility; issued on November 14, 1983.

17. PSD–TX–485—Amerada Hess Corporation; injection gas processing plant located approximately 4 miles northwest of Seminole, Gaines County, Texas; permit authorizes the addition of a sulfur recovery unit; issued on October 21, 1983.

18. PSD–TX–487—El Paso Products Company; Benedum Cryogenic Expander Plant located on State Highway 349, approximately 7 miles north of Rankin, Upton County, Texas; permit authorizes the addition of three compressors and expanded use of an additional compressor; issued on October 27, 1983.

19. PSD–TX–491—Temple-Eastex, Incorporated; pulp and paper mill located approximately 2 miles southeast of Evadale, Jasper County, Texas; permit authorizes the construction of a wood and woodwaste-fired steam generating boiler; issued on NOvember 9, 1983.

20. PSD–TX–493—CoGen Lyondell, Incorporated; synthetic organic chemical manufacturing facility located at 8520 Sheldon Road, approximately 2 miles north of Channelview, Harris County, Texas; permit authorizes the construction of a cogeneration facility; issued on November 3, 1983.

21. PSD–TX–494—Mid Plains Pipeline Company, Incorporated; permit authorizes the construction of a natural gas processing plant to be located approximately 10 miles northwest of Post, Garza County, Texas; issued on July 18, 1984.

22. PSD–TX–499—Applied Energy Services, Incorporated; permit authorizes the construction of a petroleum coke-fired cogeneration plant to be located on the south side of the Houston Ship Channel in Pasadena, Harris County, Texas; issued on September 23, 1983.

23. PSD–LA–502—Reynolds Metals Company; coke calcining plant located approximately 5 miles north of Baton Rouge, East Baton Rouge Parish, Louisiana; permit authorizes the construction of a rotary kiln and associated material handling operations to increase the production capacity by 265,000 tons per year; issued on November 2, 1983.

24. PSD–LA–506—Trancontinental Gas Pipe Line Corporation; natural gas compressor Station 45 located approximately 15 miles north of Lake Charles, Beauregard Parish, Louisiana; permit authorizes the addition of a 2,250 H.P. natural gas-fueled reciprocating compressor engine; issued on October 14, 1983.

25. PSD–LA–510—Crystal Oil Company; Missionary Lake gas processing plant located in Hosston, Caddo Parish, Louisiana; permit authorizes the additional flaring of acid gases generated in the amine unit; issued on October 19, 1983.

26. PSD–LA–512—Dow Chemical U.S.A.; chemical complex located on State Highway 1, approximately 10 miles south of Baton Rouge near Plaquemine, Iberville Parish, Louisiana; permit authorizes the addition of a new coal gasification synfuel facility; issued on October 3, 1983.

27. PSD–OK–553—Energy Transportation System, Incorporated; permit authorizes the construction of a coal slurry dewatering plant to be located approximately 7 miles east of Red Rock, Noble County, Oklahoma; issued on July 1, 1983.

28. PSD–OK–559—ARCO Oil and Gas Company; Healdton Area Production Facility (three crude oil producing units) located approximately 2.5 miles west of Healdton, Caster County, Oklahoma; permit authorizes the installation of a 4900 hp dual fuel-fired reciprocating engine; issued on August 19, 1983.

29. PSD–TX–602—Solano Gas Processing, Incorporated; permit authorizes the construction of a gas processing plant to be located approximately 6 miles southeast of Asherton, Dimmit County, Texas; issued on August 3, 1983.

30. PSD–TX–605—Capitol Cogeneration Company; permit issued for the construction of steam-electric cogeneration units A, B, and C to be located within the Clear Lake Plant of the Celanese Chemical Company located approximately 8 miles east of Pasadena, Harris County, Texas; issued on August 23, 1983.

31. PSD–TX–606—GENTEX (formerly Power Resources Systems of Texas, Ltd.); permit authorizes the construction of a steam and electric power cogeneration plant to be located at 400 Davison Road in Pasadena, Harris County, Texas; issued on November 14, 1983.

32. PSD–TX–614—Oasis Pipeline Company; gas compressor station located on FM Road 1927, approximately 3.5 miles south of Pyote, Ward County, Texas; permit authorizes the addition of three 1100 hp gas-fired compressor engines; issued on December 14, 1983.

These permits have been issued under EPA's Prevention of Significant Air Quality Deterioration Regulations at 40 CFR 52.21, as amended August 7, 1980. The time period established by the Consolidated Permit Regulations at 40 CFR 124.19 for petitioning the Administrator to review any condition of the permit decisions has expired. Such a petition to the Administrator is, under 5 U.S.C. 704, a prerequisite to the seeking of judicial review of the final agency action. No petitions for review of these permits have been filed with the Administrator.

Documents pertaining to these permits are available for public inspection upon request at the following location: Environmental Protection Agency, Region 6, Air and Waste Management Division, 1201 Elm Street, InterFirst Two Building, Dallas, Texas 75270.

This notice will have no effect on the National Ambient Air Quality Standards.

FOR FURTHER INFORMATION CONTACT: Jack Divita (214) 767–2746.

Dated: March 13, 1984.

Dick Whittington, P.E.,

Regional Administrator, Region 6.

Premanufacture Notices; Monthly Status Report for February 1984

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substances Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) pending before the Agency and the PMNs for which the review period has expired since publication of the last monthly

summary. This is the report for February 1984.

DATE: Written comments are due no later than 30 days before the applicable notice review period ends on the specific chemical substance. Nonconfidential portions of the PMNs may be seen in Rm. E–107 at the address below between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

ADDRESS: Written comments are to be identified with the document control number "[OPTS–53059]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M Street, SW., Washington, DC 20460, (202–382–3532).

FOR FURTHER INFORMATION CONTACT: Wendy Cleland–Hamnett Chemical Control Division (TS–794), Office of Toxic Substances, Enviromental Protection Agency, Rm. E–229, 401 M Street, SW., Washington, DC 20460, (202–382–3736).

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during February; (b) PMNs received previously and still under review at the end of February; (c) PMNs for which the notice review period has ended during February; (d) chemical substances for which EPA has received a notice of commencement to manufacture during February and (e) PMNs for which the review period has been suspended. Therefore, the February 1984 PMN Status Report is being published.

Dated: March 16, 1984.

Linda A. Travers,

Acting Director, Information Management Division.

PREMANUFACTURE NOTICES MONTHLY STATUS REPORT FEBRUARY 1984

I. 91 Premanufacture Notices Received During the Month

PMN No	Identity/generic name	FR citation	Expiration date
84-[illegible]	Generic name: Polyaromatic urethane poly (unsaturated) ester	49 FR 6991 (2/24/84)	May 13, 1984.
84-[illegible]	Generic name: Polyimide-anhydride-olefin	49 FR 6991 (2/24/84)	May 9, 1984.
84-374	Polymer of: Neopentyl glycol; phthalic anhydride; adipic acid; isophthalic acid benzoic acid; trimethylol propane	49 FR 4981 (2/9/84)	Apr. 30, 1984.
84-375	Generic name: Sodium salt of alkyl dithiocarbamates	49 FR 4981 (2/9/84)	Do.
84-376	Generic name: Aryl esters of alkyl dithiocarbamates	49 FR 4981 (2/9/84)	Do.
84-377	Generic name: Organotungsten compound	49 FR 4981 (2/9/84)	May 1, 1984.
84-378	Generic name: Aromatic sulfonate of substituted heteropolycycle	49 FR 6161 (2/17/84)	May 2, 1984.
84-379	Generic name: Aromatic sulfonate of substituted heteropolycycle	49 FR 6161 (2/17/84)	Do.
84-380	Generic name Aromatic sulfonate of substituted heteropolycycle	49 FR 6161 (2/17/84)	Do.
84-381	Generic name: Polyphenyl ether	49 FR 6161 (2/17/84)	Do.
84-382	2-propenoic acid 3-(2-hydroxyethoxy) 3-oxypropyl ester	49 FR 6161 (2/17/84)	May 5, 1984.
84-383	Generic name: Linseed based alkyd	49 FR 6161 (2/17/84)	May 6, 1984.
84-384	Generic name: Substituted cyclohexane and cyclohexene esters	49 FR 6161 (2/17/84)	Do.
84-385	Generic name: Substituted phenylmagnesium chloride	49 FR 6161 (2/17/84)	Do.
84-386	Generic name: Substituted phenylmagnesium chloride	49 FR 6161 (2/17/84)	Do.
84-387	Generic name: Substituted benzyl alcohol	49 FR 6161 (2/17/84)	Do.
84-388	Generic name: Reaction product of a phenolformaldehyde polymer, a carbocyclic anhydride, and an amine	49 FR 6161 (2/17/84)	Do.
84-389	Generic name: Urethane acrylate	49 FR 6161 (2/17/84)	Do.
84-390	Generic name: Benzoic acid, 2-[(6-[(4-chloro-6-[(4-((substituted)azo)phenyl)amino)-1,3,5-triazin-2-yl)amino)-1-hydroxy-3-sulfo-2-naphthalenyl)azo-, chromium complex.	49 FR 6161 (2/17/84)	Do.
84-391	Generic name: Cuprate(5-), [5-hydroxy-2-[[4-[[5-hydroxy-6-[(2-methoxy-5-(substited)phenyl]azo]-7-sulfo-2-naphthalenyl]amino)-6-[(3-sulfophenyl)amino)]-1,3,5-triazin-2-yl]amino]-6-[(2-hydroxy-5-sulfophenyl)[—azo-1,7-naphthalene-disulfonato(7—)], pentasodium.	49 FR 6162 (2/17/84)	Do.
84-392	Generic name: Alkoxylated cycloaliphatic	49 FR 6162 (2/17/84)	May 7, 1984.
84-393	Generic name: 2-Chloro-N-methyl-N-substituted acetamide	49 FR 6162 (2/17/84)	Do.
84-394	Generic name: Polymer of ethylene oxide, propylene oxide, and aliphatic isocyanate	49 FR 6162 (2/17/84)	Do.
84-395	Generic name: Dimer acids dicarboxylic acid, diamines polyamide resin	49 FR 6162 (2/17/84)	May 8, 1984.
84-396	Dipentaerythritol, adipic acid ester	49 FR 6162 (2/17/84)	Do.
84-397	Polymer of: Hydroxy ethyl acrylate, isophorone diisocyanate, Duracarb 122	49 FR 6991 (2/24/84)	May 9, 1984.
84-398	Generic name: Starch, 2 diethylaminoethylether hydrochloride	49 FR 6991 (2/24/84)	Do.
84-399	Generic name: Blocked amine	49 FR 6991 (2/24/84)	Do.
84-400	Generic name: Titanium (4+) alcohol complex	49 FR 6991 (2/24/84)	May 12, 1984.
84-401	Generic name: Titanium (4+) alcohol complex	49 FR 6992 (2/24/84)	Do.
84-402	Generic name: Titanium (4+) alcohol complex	49 FR 6992 (2/24/84)	Do.
84-403	Generic name: Rosin-modified phenolic resin	49 FR 6992 (2/24/84)	Do.
84-404	Generic name: Modified alkyd resin	49 FR 6992 (2/24/84)	Do.
84-405	Generic name: Ammonium salt of substituted phosphoric acid	49 FR 6992 (2/24/84)	Do.
84-406	Lead cyanamide	49 FR 6992 (2/24/84)	May 13, 1984.
84-407	On the inventory		
84-408	Generic name: 4-(alkylphenylcarbonyloxy)-benzoic acid, alkylphenyl ester	49 FR 6992 (2/24/84)	Do.
84-409	Generic name: 4'-alkylbiphenylcarboxylic acid, (4-alkylphenyl) ester	49 FR 6992 (2/24/84)	Do.
84-410	Generic name: Alkylbenzoic acid, 4-alkylphenyl ester	49 FR 6992 (2/24/84)	Do.
84-411	Generic name: Alkylbenzoic acid, 4-alkylphenyl ester	49 FR 6992 (2/24/84)	Do.
84-412	Generic name: Alkylbenzoic acid, 4-alkylphenyl ester	49 FR 6992 (2/24/84)	Do.
84-413	Generic name: Alkylbenzoic acid, 4-alkylphenyl ester	49 FR 6992 (2/24/84)	Do.
84-414	Generic name: Alkylbenzoic acid, 4-alkylphenyl ester	49 FR 6993 (2/24/84)	Do.
84-415	Chemically exfoliated vermiculite	49 FR 6993 (2/24/84)	Do.
84-416	Dimethylbis(N-ethylacetamido)silane	49 FR 6993 (2/24/84)	Do.
84-417	Generic name: Substituted phenol	49 FR 6993 (2/24/84)	May 15, 1984.
84-418	Generic name: Methyl ester of dicarboxylic acid	49 FR 7654 (3/1/84)	May 16, 1984.
84-419	Generic name: Triazine derivative	49 FR 7654 (3/1/84)	Do.
84-420	4-(4,5-dihydro-4-(5-hydroxy-3-methyl-1-(4-sulfophenyl)-1H-pyrazol-4-yl)methylene)-3-methyl-5-oxo-1H-pyrazol-1-yl-benzenesulfonic acid-dipotassium salt	49 FR 7655 (3/1/84)	Do.
84-421	Generic name: Bis(alkylcarbomonocycle)spiro-heterocycle	49 FR 7655 (3/1/84)	May 20, 1984.
84-422	Generic name: Blocked isocyanate	49 FR 7655 (3/1/84)	May 21, 1984.
84-423	Generic name: Polyamidoamide resin	49 FR 7655 (3/1/84)	Do.
84-424	Generic name: Polyester resin	49 FR 7655 (3/1/84)	Do.
84-425	Generic name: Alkyl arylphosphonium salt	49 FR 7655 (3/1/84)	Do.
84-426	Generic name: Modified rosin, metal salt	49 FR 7655 (3/1/84)	Do.
84-427	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do.
84-428	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do.
84-429	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do.
84-430	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do.

I. 91 Premanufacture Notices Received During the Month—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
84-431	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do
84-432	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do
84-433	Generic name: Saturated aromatic and aliphatic polyester polyols	49 FR 7655 (3/1/84)	Do.
84-434	On the inventory		
84-435	Generic name: Formulation of naphthoquinone, diazidesulphonic acid esters and phenolformaldehyde resins	49 FR 7655 (3/1/84)	June 6, 1984
84-436	Cyano ethyl pullulan	49 FR 7656 (3/1/84)	May 21, 1984
84-437	Generic name: Amine adduct of epoxy resin	49 FR 7656 (3/1/84)	Do
84-438	Generic name: Alkyl butanamide	49 FR 7656 (3/1/84)	May 22, 1984.
84-439	Generic name: Substituted cyclopropane-carboxylic acid	49 FR 7656 (3/1/84)	Do
84-440	Generic name: Styrene acrylic polymer	49 FR 7656 (3/1/84)	Do
84-441	Generic name: Amine adduct of epoxy resin	49 FR 9013 (3/9/84)	May 23, 1984
84-442	Generic name: Epoxy-modified urethane polymer	49 FR 9014 (3/9/84)	May 26, 1984
84-443	On the inventory		
84-444	Generic name: Modified, maleated metal resinate	49 FR 9014 (3/9/84)	Do
84-445	Generic name: Substituted ketone	49 FR 9014 (3/9/84)	Do
84-446	Generic name: Substituted ketone	49 FR 9014 (3/9/84)	Do
84-447	Generic name: Substituted amine	49 FR 9014 (3/9/84)	Do
84-448	Generic name: Substituted aldehyde	49 FR 9014 (3/9/84)	Do
84-449	Generic name: Terpene ester	49 FR 9014 (3/9/84)	Do
84-450	Generic name: Hydrolysis product of terpene	49 FR 9014 (3/9/84)	Do
84-451	Generic name: Phenoxazin imine	49 FR 9014 (3/9/84)	Do
84-452	Generic name: Poly(vinyl-acrylate)	49 FR 9015 (3/9/84)	May 27, 1984
84-453	Generic name: Thiadiazole derivative	49 FR 9015 (3/9/84)	Do
84-454	Generic name: Substituted mercapto triazole	49 FR 9015 (3/9/84)	Do
84-455	Generic name: Substituted tetrazole	49 FR 9015 (3/9/84)	Do
84-456	Generic name: Substituted benzimidazole/benzoxazole	49 FR 9015 (3/9/84)	Do
84-457	Generic name: Alkyd resin	49 FR 9015 (3/9/84)	Do
84-458	Generic name: Carboxylic acid derivatives of polyalkylene glycols	49 FR 9015 (3/9/84)	Do
84-459	Generic name: Modified metal carboxylate	49 FR 9015 (3/9/84)	Do
84-460	Copper ferrocyanide salt of C. I. basic green I and C. I. basic yellow I	49 FR 9015 (3/9/84)	Do
84-461	Copper ferrocyanide salt of C. I. basic blue II	49 FR 9015 (3/9/84)	Do
84-462	Generic name: Substituted urethane ester	49 FR 9015 (3/9/84)	May 28, 1984
84-463	Generic name: Modified alkyd resin from fatty acids, carbomonocyclic acids and alkane diols	49 FR 9015 (3/9/84)	Do.
84-464	Generic name: Halogenated aromatic ether	49 FR 9015 (3/9/84)	Do
84-465	Generic name: Substituted urea	49 FR 9015 (3/9/84)	Do

II. 53 Premanufacture Notices Received Previously and Still Under Review at the End of the Month

PMN No.	Identity/generic name	FR citation	Expiration date
84-313	Generic name: Poly alkylene polyol	49 FR 1768 (1/13/84)	Apr. 2, 1984
84-314	Generic name: Partially oxidized polysaccharide	49 FR 1768 (1/13/84)	Do.
84-315	Generic name: Polymer of alkyl and heteromonocyclic amines and an alkanedioic acid	49 FR 1768 (1/13/84)	Do.
84-316	Generic name: Polyester polyol	49 FR 2526 (1/20/84)	Apr. 4, 1984
84-317	5-Oxa-2-methyl-7-phenyl-2-heptene	49 FR 2526 (1/20/84)	Apr. 7, 1984
84-318	[4-(4-methylphenylthio)phenyl]phenylmethanone	49 FR 2526 (1/20/84)	Apr. 8, 1984
84-319	Crude oat oil	49 FR 2526 (1/20/84)	Do
84-320	Generic name: Saturated polyester	49 FR 2526 (1/20/84)	Do
84-321	Generic name: Polyether ester acid, compound with amine	49 FR 2527 (1/20/84)	Apr. 9, 1984.
84-322	Generic name: Organosiloxane copolymer	49 FR 2527 (1/20/84)	Do
84-323	Generic name: Urea-aldehyde resin	49 FR 2527 (1/20/84)	Apr. 10, 1984.
84-324	Generic name: Isoindolyl derivative of aromatic heterocycle	49 FR 2527 (1/20/84)	Do
84-325	Generic name: Vinylpolymer, aldehyde cross-linked	49 FR 2527 (1/20/84)	Do.
84-326	Generic name: Bis(polyalkylaminetriphenyl)-bis(aminoalkyl)benzene	49 FR 2527 (1/20/84)	Do
84-328	Generic name: Modified linseed alkyd	49 FR 3524 (1/27/84)	Apr. 15, 1984
84-329	Generic name: Substituted heteropolycyclic sulfonic acid	49 FR 3524 (1/27/84)	Do.
84-330	Generic name: Substituted aryl heteropolycycle sulfonic acid, sodium salt	49 FR 3524 (1/27/84)	Do
84-331	Generic name: Terephthalic acid, polymer with polytetramethylene ether glycol and alkanediols	49 FR 3524 (1/27/84)	Do
84-332	Generic name: Acrylic ester copolymer	49 FR 3524 (1/27/84)	Do
84-333	Generic name: Acrylic ester copolymer	49 FR 3524 (1/27/84)	Do
84-335	Generic name: Metal carboxylate	49 FR 3524 (1/27/84)	Apr. 16, 1984
84-336	Polymer of: Melamine formaldehyde, o,p toluenesulfonamide, methyl glucoside, sodium hydroxide, guanidine carbonate, magnesium bromide	49 FR 3524 (1/27/84)	Do
84-337	Polymer of: Phenol, nonyl phenol, formaldehyde, methyl glucoside, sodium carbonate, ammonium sulfamate	49 FR 3524 (1/27/84)	Do.
84-338	Polymer of: Melamine, formaldehyde, methyl glucoside, sodium hydroxide, guanidine carbonate	49 FR 3524 (1/27/84)	Do
84-339	Polymer of: Phenol, nonyl phenol, formaldehyde Reax 27D, methyl glucoside, sodium carbonate	49 FR 3524 (1/27/84)	Do.
84-340	Polymer of: Phenol, nonly phenol, formaldehyde Reax 27D, sodium carbonate	49 FR 3525 (1/27/84)	Do
84-345	Generic name: Unsaturated aliphatic ester	49 FR 4256 (2/3/84)	Apr. 18, 1984
84-346	Generic name: Copolymer of acrylic acid and acrylic acid esters	49 FR 4256 (2/3/84)	Do
84-347	Generic name: Fluorinated polyamide	49 FR 4256 (2/3/84)	Do
84-348	Generic name: Substituted phosphonium chloride, cadmium complex	49 FR 4256 (2/3/84)	Do
84-349	Generic name: Substituted phosphonium borate	49 FR 4256 (2/3/84)	Do
84-350	Generic name: Substituted phosphonium chloride	49 FR 4256 (2/3/84)	Do
84-351	Generic name: Substituted benzophenone	49 FR 4256 (2/3/84)	Do
84-352	Generic name: Cellulose ester	49 FR 4256 (2/3/84)	Apr. 22, 1984
84-353	Generic name: Quinone-imine dye	49 FR 4256 (2/3/84)	Do
84-354	Generic name: Substituted substituted benzsulfonic acid	49 FR 4256 (2/3/84)	Apr. 23, 1984
84-355	Generic name: Substituted substitute benzenesulfonic acid	49 FR 4256 (2/3/84)	Apr. 24, 1984.
84-356	Generic name: Disubstituted dichloro sulfonated heteropolycycle	49 FR 4257 (2/3/84)	Do
84-357	Generic name: Substituted arylamino substituted benzenesulfonic acid	49 FR 4257 (2/3/84)	Do
84-358	2,2-bis(4-(3-di(cocoalkylpolyoxyethyl)amino-2-hydroxy)phenyl)propane, ethoxylated	49 FR 6161 (2/17/84)	Apr. 25, 1984
84-360	Generic name: Substituted nonyl phenol polymer	49 FR 4980 (2/9/84)	Do
84-361	Generic name: Substituted cyclohexane	49 FR 4980 (2/9/84)	Apr. 26, 1984
84-362	Generic name: Poly amido-amine	49 FR 4980 (2/9/84)	Do
84-364	Generic name: Amine adduct of fatty acid glycidyl ester	49 FR 4980 (2/9/84)	Do
84-365	Generic name: Vinyl ether monomer	49 FR 4980 (2/9/84)	Apr. 29, 1984.
84-366	Generic name: Vinyl ether monomer	49 FR 4981 (2/9/84)	Do.
84-367	Generic name: Vinyl ether monomer	49 FR 4981 (2/9/84)	Do
84-368	Generic name: Substituted styrene, substituted acrylate, derivatized copolymer	49 FR 4981 (2/9/84)	Do
84-369	Benzenemethanaminium: 4-ethenyl-N-dodecyl-N,N-dimethyl chloride	49 FR 4981 (2/9/84)	Do.

II. 53 Premanufacture Notices Received Previously and Still Under Review at the End of the Month—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
84-370	Generic name: (Substituted-heterocycle)alkylamine derivative	49 FR 4981 (2/9/84)	Do.
84-371	Generic name: Polymer of acrylate and methacrylate esters	49 FR 4981 (2/9/84)	Do.
84-372	Generic name: 4-(substituted cycloalkyl)-alkoxybenzene	49 FR 4981 (2/9/84)	Do.
84-373	Generic name: 4-(substituted cycloalkyl)-alkoxybenzene	49 FR 4981 (2/9/84)	Do.

III. 56 Premanufacture Notices for Which the Notice Review Period Has Ended During the Month

[Expiration of the notice review period does not signify that the chemical has been added to the inventory]

PMN No.	Identity/generic name	FR citation	Expiration date
[illegible]	Generic name: Trisubstituted aniline	48 FR 29049 (6/24/83)	Feb. 29, 1984.
[illegible]	Generic name: Acridine, 9-phenyl	48 FR 37700 (8/19/83)	Feb. 21, 1984.
[illegible]	Generic name: Polyether polyurethane	48 FR 38890 (8/26/83)	Feb. 16, 1984.
[illegible]	Generic name: Mixed castor amide with diethylene triamine	48 FR 40783 (9/9/83)	Feb. 26, 1984.
[illegible]	Generic name: Mixed castor amide with amino ethyl ethanol amine	48 FR 40783 (9/9/83)	Do.
83-1157	Generic name: Substituted oxirane	48 FR 41642 (9/16/83)	Feb. 3, 1984.
[illegible]	Generic name: Substituted alkyl halide	48 FR 43399 (9/23/83)	Feb. 5, 1984.
83-1227	Generic name: Perhalo alkoxy ether	48 FR 43399 (9/23/83)	Do.
[illegible]	Generic name: Perhalo alkoxy ether	48 FR 43399 (9/23/83)	Do.
[illegible]	Generic name: Perhalo alkoxy ether	48 FR 43399 (9/23/83)	Do.
[illegible]	Generic name: Substituted phenol-formaldehyde condensate	48 FR 50953 (11/4/83)	Feb. 23, 1984.
[illegible]	Generic name: Substituted anthraquinone ammonium salt	48 FR 50953 (11/4/83)	Do.
[illegible]	Generic name: Polyester polycarboxylate salt	48 FR 50954 (11/4/83)	Feb. 5, 1984.
[illegible]	Carboxylic acid, C_8-C_{36} mono and C_8-C_{36} dipolymers with neopentyl glycol and propylene glycol	48 FR 52506 (11/18/83)	Feb. 1, 1984.
[illegible]	Generic name: 2-ethyl-2(hydroxymethyl)-1,3-propanediol; benzoic acid; substituted propanediol; 1,3-bezenedicarboxylic acid; cyclic oxo-benzene carboxylic acid; mixed vegetable oils and polymer.	48 FR 52506 (11/18/83)	Do.
[illegible]	Acriflavine hydrochloride	48 FR 52506 (11/18/83)	Feb. 4, 1984.
[illegible]	4,4'-(1,2-ethanediyldiimino)bis-3-pentene-2-one	48 FR 52506 (11/18/83)	Do.
[illegible]	Generic name: Tetrasubstituted dithiadiphosphetane	48 FR 52506 (11/18/83)	Feb. 5, 1984.
[illegible]	Generic name: Chromophore substituted polyoxyalkylene	48 FR 52506 (11/18/83)	Do.
[illegible]	Generic name: Trisubstituted amino thophene	48 FR 52506 (11/18/83)	Do.
[illegible]	Generic name: A derivitzed olefinic polymer	48 FR 52506 (11/18/83)	Feb. 6, 1984.
[illegible]	Generic name: Thermoplastic polyurethane	48 FR 53162 (11/25/83)	Feb. 7, 1984.
[illegible]	Generic name: Thermoplastic polyurethane	48 FR 53162 (11/25/83)	Do.
[illegible]	Generic name: Thermoplastic polyurethane	48 FR 53162 (11/25/83)	Do.
[illegible]	Generic name: Vegetable oil polyamide resin	48 FR 53162 (11/25/83)	Feb. 11, 1984.
84-210	Generic name: 4-substituted benzoyl chloride	48 FR 53162 (11/25/83)	Do.
84-211	Generic name: 3,7-bis(di-substituted amino)-5-(substituted phenyl) phenazinium salt	48 FR 53162 (11/25/83)	Do.
84-212	Generic name: 3,7-bis(di-substituted amino)-5-(substituted phenyl) phenazinium salt	48 FR 53162 (11/25/83)	Do.
84-213	Generic name: 2,8-phenazinediamine, tetra-substituted-5,10-dihydro-10-(substituted-phenyl)-5-(4-substituted) benzoyl	48 FR 53162 (11/25/83)	Do.
84-214	Generic name: Reaction products of quinone and amine	48 FR 53163 (11/25/83)	Feb. 12, 1984.
84-215	2-Butenedioic (E)-, ditridecyl ester	48 FR 54394 (12/2/83)	Feb. 15, 1984.
84-217	Generic name: Phosphonium catalyst	48 FR 54394 (12/2/83)	Do.
84-218	Generic name: Modified polyester	48 FR 54394 (12/2/83)	Feb. 19, 1984.
[illegible]	Generic name: Modified alkyd polymer	48 FR 54394 (12/2/83)	Do.
[illegible]	Generic name: Benzenesulfonic acid, 4-[[4-substituted]-3-methyl-5-oxo-2-pyrazolin-1-yl]-, salt	48 FR 54395 (12/2/83)	Do.
[illegible]	Generic name: Ethoxylated alkyl quartemary amine	48 FR 54395 (12/2/83)	Feb 20, 1984.
[illegible]	Generic name: Urethane bisoxazolidine	48 FR 54395 (12/2/83)	Do.
[illegible]	Generic name: Aromatic sulfonate of substituted heteropolycycle	48 FR 55332 (12/12/83)	Feb 22, 1984.
[illegible]	Generic name: Polyesteramide resin	48 FR 55332 (12/12/83)	Do.
[illegible]	Generic name: 1,3 benzenedicarboxylic acid polymer with 1,4-benzenedicarboxylic acid adipic acid and polyols	48 FR 55332 (12/12/83)	Feb. 25, 1984.
84-227	Generic name: Fatty acids, esters with polyol	48 FR 55332 (12/12/83)	Do.
[illegible]	Generic name: Modified copolymer of alkenoic esters and substituted alkenoic esters with styrene	48 FR 55333 (12/12/83)	Do.
[illegible]	Zinc ammonium phosphate	48 FR 55333 (12/12/83)	Do.
[illegible]	Zinc magnesium orthophosphate	48 FR 55333 (12/12/83)	Do.
84-231	Generic name: Aliphatic polycarbonate diol	48 FR 55333 (12/12/83)	Do.
[illegible]	Generic name: Alkyd resin	48 FR 55333 (12/12/83)	Feb. 26, 1984.
[illegible]	Silicon aluminum oxynitride	48 FR 55333 (12/12/83)	Do.
[illegible]	Generic name: Diisocyanate polymer with polyether polyols	48 FR 55333 (12/12/83)	Feb. 27, 1984.
[illegible]	Generic name: Diisocyanate polymer with polyether polyols	48 FR 55333 (12/12/83)	Do.
[illegible]	Generic name: Diisocyanate polymer with polyether polyols	48 FR 55333 (12/12/83)	Do.
84-237	Generic name: Hydroxyalkiene-bis-[trialkly ammonium chloride]	48 FR 55333 (12/12/83)	Do.
[illegible]	Generic name: Alkenyltrialkylammonium phosphate	48 FR 55333 (12/12/83)	Do.
[illegible]	Generic name: Amine derivative of a fatty acid condensation polymer	48 FR 55333 (12/12/83)	Do.
[illegible]	Generic name: Trisubstituted benzoxazolium salt	48 FR 55333 (12/12/83)	Feb 28, 1984.
84-241	Generic name: Trisubstituted benzoxazolium salt	48 FR 55333 (12/12/83)	Do.
84-242	Generic name: Copolymer of acrylates and methacrylates	48 FR 55917 (12/16/83)	Feb. 29, 1984.

IV. 43 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture

PMN No.	Chemical identification	FR citation	Date of commencement
[illegible]	Octanamine, N,N-dimethyl-, phosphate salt	45 FR 67758 (10/14/80)	May 19, 1981.
81-455	4-trifluoromethoxyphenylisocyanate	46 FR 47295 (9/25/81)	Jan. 12, 1984.
81-604	2-chlorobenzamide	46 FR 60055 (12/8/81)	Jan. 27, 1984
[illegible]	Generic name: Polymer of a vegetable oil derivative, alkane diols, and a carbomonocyclic anhydride	47 FR 26995 (7/2/82)	Dec. 12, 1983.
[illegible]	Polymer of: isophorone diisocyanate, 2-hydroxy ethyl acrylate, silicone fluid	47 FR 49073 (10/29/82)	Jan. 24, 1984.
83-57	Generic name: Polymer of isophorone diisocyante, polyhdroxyalkane, and an alkyl alkanoate	47 FR 49073 (10/29/82)	Nov. 10, 1983
83-327	Generic name: Blocked isocyanate	48 FR 72 (1/3/83)	Jan. 28, 1984.
[illegible]	Generic name: Benzenesulfonic acid, amnochlorotnazinylamino-carboxychlorophenyl-pyrazolonylazo-	48 FR 5305 (2/4/83)	Feb 6, 1984
83-412	Generic name: Substituted pyridinium, chloride	48 FR 5305 (2/4/83)	Jan. 30, 1984.
83-413	Generic name: Modified epoxy polymethacrylate resin	48 FR 5305 (2/4/83)	2nd week of January 1984
[illegible]	Generic name: Styrene, acrylate methacrylate copolymer	48 FR 8344 (2/28/83)	Jan. 10, 1984
83-512	Generic name: Polymer of amino-alkyl-carbo-monocycle, hexamethylene diisocyanate, propylene oxide, alkane triol, alkan-one, and [illegible] diol	48 FR 10469 (3/11/83)	Jan. 25. 1984

IV. 43 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture—Continued

PMN No.	Chemical identification	FR citation	Date of commencement
83-529	Generic name: Dicarboxylic acid, polyamine polymer.	48 FR 10470 (3/11/83)	Jan. 30, 1984
83-596	Generic name: Modified acrylic polymer.	48 FR 15181 (4/7/83)	Do
83-608	Generic name: Substituted bis substituted benzene aminium, dichloride.	48 FR 16331 (4/15/83)	Do
83-609	Generic name: Substituted benzenesulfonic acid, sodium salt and substituted benzenesulfonic acid.	48 FR 16331 (4/15/83)	Do
83-640	Generic name: Disubstituted benzenamine.	48 FR 17386 (4/22/83)	Jan. 13, 1984
83-658	Generic name: Trisubstituted benzenamine.	48 FR 204899 (5/6/83)	Jan 16, 1984
83-897	Generic name: Polymer of ethylene oxide, maleic anhydride and alkane polyol and polymer of ethylene oxide, maleic anhydride and alkane-poylol, ammonium salt.	48 FR 32382 (7/15/83)	Jan. 30, 1984
83-947	Generic name: 1-hydro-carbyl pyridinium halide.	48 FR 33533 (7/22/83)	Jan 24, 1984
83-1044	Generic name: Hydrogen <2-[a-[2-hydroxy-3,5-substituted phenylazol-arylhydrazino]-5-substituted aryl]cuprate, sodium salt.	48 FR 37700 (8/19/83)	Feb. 13, 1984
83-1091	Generic name: Reaction product of: mixed aliphatic and amino aliphatic alcohols and dimer diisocyanate and 1,1'-methylene bis [4-isocyanatel]-cyclohexane..	48 FR 40782 (9/9/83)	On or about Jan 19, 1984
83-1102	Generic name: Aliphatic acid ester of N-alkyl perfluoro sulfonamido alkanol.	48 FR 41639 (9/16/83)	On or about Feb 22, 1984
83-1106	Generic name: Polyester of phthalic anhydride and lower glycols.	48 FR 41639 (9/16/83)	Jan. 18, 1984
83-1160	Generic name: Substituted heterocycle.	48 FR 41642 (9/16/83)	Feb. 8, 1984
83-1168	Generic name: Monosubstitutedbenzyl chloride.	48 FR 41643 (9/16/83)	Jan. 19, 1984
83-1169	Generic name: Monosubstitutedbenzythiosulfate salt	48 FR 41643 (9/16/83)	Do
83-1170	Generic name: Monosubstitutedbenzysulfonyl-	48 FR 41643 (9/16/83)	Jan 20, 1984
83-1220	Generic name: Monosubstitutedbenzylsulfonamide.	48 FR 43399 (9/23/83)	Jan 26, 1984
83-1310	ymercaptopropyl methyl dimethoxy silane.	48 FR 45843 (10/7/83)	Jan 25, 1984
84-37	Poly[oxy(methyl-1,2-ethanediyl)], alpha-hydro-omega-(2-amino-2-methyl)ethoxy-, ether with 1,2,3-propanetriol (3:1).	48 FR 48866 (10/21/83)	Feb. 21, 1984
84-43	Generic name: Fatty acid mercaptan acrylic copolymer	48 FR 50952 (11/4/83)	Feb. 10, 1984.
84-45	Generic name: Acrylic urethane polymer.	48 FR 50952 (11/4/83)	Feb. 13, 1984
84-52	Generic name: Vinylpyrrolidone copolymer.	48 FR 50952 (11/4/83)	On or about Feb 10, 1984
84-53	Generic name: Vinylpyrrolidone copolymer.	48 FR 50952 (11/4/83)	Do
84-71	Generic name: Substituted pyridinium chloride.	48 FR 50954 (11/4/83)	Feb 7, 1984
84-73	Generic name: Polyester polycarboxylate salt.	48 FR 50954 (11/4/83)	Feb. 7, 1984
84-78	Generic name: Substituted benzaldehyde.	48 FR 50954 (11/4/83)	Jan. 18, 1984
84-100	Generic name: Ester of substituted, unsaturated acid.	48 FR 50945 (11/4/83)	Feb. 8, 1984
84-101	Generic name: Ester of substituted, unsaturated acid.	48 FR 50945 (11/4/83)	Do.
84-177	Generic name: Ester of substituted cyclohexene.	48 FR 50950 (11/4/83)	Do.
84-178	Generic name: Ester of substituted cyclohexene.	48 FR 50950 (11/4/83)	Do.
84-190	Generic name: Chromophore substituted polyoxy-alkylene.	48 FR 52504 (11/18/83)	84 Nov 19, 1984.

V. 65 Premanufacture Notices for Which the Review Period Has Been Suspended

PMN No.	Identity/generic name	FR citation	Date suspended
80-146	Phosphorodithioic acid *O,O*-di(isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters, zinc salt	45 FR 49153 (7/23/80)	Sept. 17, 1980
80-147	Phosphorodithioic acid *O,O*-di(isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters	45 FR 49153 (7/23/80)	Do.
82-60	Generic name: Zinc, *O,O*-bis alkylphosphoro dithioate	47 FR 5932 (2/9/82)	Apr. 15, 1982
82-387	Phosphordithioic acid, *O,O*, secondary butyl and isooctyl mixed esters	47 FR 25401 (6/11/82)	July 30,1982
82-388	Phosphorodithioic acid, *O,O*, secondary butyl and isooctyl mixed esters, zinc salt	47 FR 25401 (6/11/82)	July 30, 1982
83-1	Generic name: Polyhalogenated aromatic alkylated hydrocarbon	47 FR 46371 (10/18/82)	Oct. 22, 1982
83-333	Generic name: Reaction product of polycycle-sulfonic acid salt with phosphorus halide/halogen, subsequent reaction with an amine, subsequent reaction with an aldehyde/sodium bisulfite alkali.	48 FR 73 (1/3/83)	Mar. 14, 1983
83-401	Generic name: Naphthalenetrisulfonic acid, chlorortriazinylamino-methoxymethylphenylazo-	48 FR 5304 (2/4/83)	Aug. 18, 1983
83-418	Generic name: Benzenedisulfonic acid, chlorotriazinylaminodimethylphenylazo-sulfo-naphthaleneazo-	48 FR 5306 (2/4/83)	Do.
83-461	Generic name: Substituted alkoxy silane	48 FR 7300 (2/18/83)	Apr. 25, 1983
83-634	Generic name: Substituted mono azo aromatic	48 FR 17365 (4/22/83)	July 5, 1983.
83-669	Generic name: Chromium complex of substituted phenolazosulfonaphthol with naphtholazosulfonaphthol	48 FR 20490 (5/6/83)	Aug. 5, 1983.
83-677	Generic name: Chromium complex of substituted alkylaminoformimidphenol with sulfonaphtholazo-sulfophenylpyrazolone	48 FR 20491 (5/6/83)	Do
83-755	4-hydroxy-6-phenylaminonaphthalene-2-sulfonic acid	48 FR 24967 (6/3/83)	Aug. 17, 1983.
83-770	Generic name: Cobalt complex of a substituted phenolazonaphthol	48 FR 24968 (6/3/83)	Aug. 15, 1983
83-771	Generic name: Chromium complex of substituted phenolazoalkylarylamino-formimidphenol with sulfonaphthylazosulfonaphthol	48 FR 24968 (6/3/83)	Do
83-831	Generic name: Disazo solvent red dye	48 FR 29055 (6/24/83)	Sept 9, 1983
83-845	Generic name: Tetrasodium salt of μ-(2-(2-hydroxy-3-nitro-5-sulfo-phenylazo)-2 -(2-hydroxy-5-substituted-3-sulfphenylazo)-3,3 disulfo-6,6 -iminodi-1-naphtholate-(0,0 ,O',O') (8⁻))dicopper(II)acid.	48 FR 30434 (7/1/83)	Sept. 16, 1983
83-850	Generic name: Metal complexed substituted aromatic azo compound	48 FR 30435 (7/1/83)	Sept. 21, 1983
83-875	4-(2-cyano-4-nitrophenylazo)-[N-(2-cyanoethyl)-N-(2-phenoxyethyl)amino]benzene	48 FR 31462 (7/8/83)	Do
83-876	4-(2-cyano-4-nitrophenylazo)-[N,N-bis(2-propionyloxyethyl)amino]-3-chlorobenzene	48 FR 31462 (7/8/83)	Do.
83-913	Generic name: Copper sulfonylphenazopolyhydroxy phenazobenzoate	48 FR 32383 (7/15/83)	Oct. 1, 1983
83-1006	Generic name: (Amino)-(hydroxy)-(substituted)-(substituted) naphthalenedisulfonic acid, and (amino)-(hydroxy)-(substituted)-(substituted) naphthalenedisulfonic acid, salts with sodium and potassium.	48 FR 36648 (8/12/83)	Oct. 14, 1983
83-1007	Generic name: (Substituted)-(substituted)-hydroxy-naphthalenesulfonic acid, sodium salts	48 FR 36648 (8/12/83)	Do
83-1012	Generic name: Bis(sulfophenylchlorotriazine-aminosulfophenylazo) hydroxyaminodisulfonaphthalene	48 FR 36648 (8/12/83)	Oct. 24, 1983
83-1018	Generic name: Substituted-naphthalene tetradisulfonic acid, bis[(substituted-hydroxyphenylazo)phenyl]derivative	48 FR 36649 (8/12/83)	Do.
83-1029	Generic name: Substituted heterocycle	48 FR 37699 (8/19/83)	Nov 3, 1983
83-1033	Generic name: C_{6+} carboxylic acid	48 FR 37700 (8/19/83)	Dec. 8, 1983
83-1157	Generic name: Substituted oxirane	48 FR 41642 (9/16/83)	Feb 2, 1984
83-1162	Generic name: Substituted pyridine	48 FR 41643 (9/16/83)	Nov 29, 1983
83-1163	Generic name: Substituted pyridine	48 FR 41643 (9/16/83)	Do.
83-1222	Generic name: Substituted alkyl halide	48 FR 43399 (9/23/83)	Feb. 2, 1984
83-1227	Generic name: Perhalo alkoxy ether	48 FR 43399 (9/23/83)	Do
83-1228	Generic name: Perhalo alkoxy ether	48 FR 43399 (9/23/83)	Do.
83-1229	Generic name: Perhalo alkoxy ether	48 FR 43399 (9/23/83)	Do
83-1248	Generic name: Substituted anthraquinone	48 FR 43400 (9/23/83)	Dec 9, 1983
83-1274	Acetamide, 2-chloro-N-chloromethyl-N-(2-ethyl-6-methylphenyl)	48 FR 44901 (9/30/83)	Do
84-7	N,N,N,N', -tetraglycidyl-1,3-bisaminomethyl cyclohexane	48 FR 48813 (10/14/83)	Dec. 21, 1983
84-15	Generic name: Substituted heterocyclic metal complex	48 FR 48854 (10/21/83)	Jan. 3, 1984
84-18	1(1,1.dimethylethoxy)-propan-2-ol	48 FR 48854 (10/21/83)	Jan. 6, 1984
84-27	Generic name: Polyol carboxylate ester	48 FR 48865 (10/21/83)	Dec 28, 1983
84-64	Generic name: Substituted-phenylamino mono-chloro-triazinylamino sulfophenylazo-substituted disulfonaphthalenylazo-naphthalene-disulfonic acid, hexasodium salt.	48 FR 50953 (11/4/83)	Jan. 5, 1984
84-68	Generic name: Substituted anthraquinone aryl amine	48 FR 50953 (11/4/83)	Dec 28, 1983
84-93	Generic name: Substituted-1H-isoindol-1-one	48 FR 50955 (11/4/83)	Jan 12, 1984

V. 65 PREMANUFACTURE NOTICES FOR WHICH THE REVIEW PERIOD HAS BEEN SUSPENDED—Continued

PMN No.	Identity/generic name	FR citation	Date suspended
84-98	Generic name: Hydroxylalkyl ether	48 FR 50945 (11/4/83)	Jan. 11, 1984.
84-102	Generic name: Substituted aromatic	48 FR 50945 (11/4/83)	Jan. 16, 1984.
84-105	Generic name: Halogenated alkene	48 FR 50945 (11/4/83)	Jan. 12, 1984
84-106	Generic name: Halogenated alkane	48 FR 50945 (11/4/83)	Do.
84-107	Generic name: Halogenated alkane	48 FR 50945 (11/4/83)	Do.
84-111	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Jan. 9, 1984
84-112	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Do.
84-113	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Do.
84-114	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Do.
84-115	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Do
84-116	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Do.
84-117	Generic name: Substituted aromatic polymer	48 FR 50946 (11/4/83)	Do.
84-151	Reaction of: diethylene triamine, Cardura E, Cardura glycidyl ether, urea	48 FR 50949 (11/4/83)	Jan. 13, 1984
84-176	Generic name: Aliphatic tricl ester methacrylate	48 FR 50950 (11/4/83)	Do.
84-180	Generic name: Polyether acrylate ester	48 FR 50951 (11/4/83)	Do.
84-181	Generic name: Aliphatic acrylate ester	48 FR 50951 (11/4/83)	Do.
84-182	Generic name: Polyether acrylate	48 FR 50951 (11/4/83)	Do.
84-183	Generic name: Aliphatic ester methacrylate	48 FR 50951 (11/4/83)	Do.
84-184	Generic name: Aliphatic ester methacrylate	48 FR 50951 (11/4/83)	Do.
84-224	Generic name: Alkoxylated bisphenol A, inorganic ester, monoethanolamine salt	48 FR 55332 (12/12/83)	Jan. 20, 1984.
84-253	Generic name: Blocked isocyanate modified epoxy resin	48 FR 56846 (12/23/83)	Feb. 24, 1984.

AGENCY: U.S. Environmental Protection Agency (U.S. EPA), Region V.

ACTION: Notice.

SUMMARY: U.S. EPA announces approval of a revision to the Prevention of Significant Air Quality Deterioration permit for a 400 megawatt generating unit (Unit 5) at the Wisconsin Power & Light Company Edgewater Station in Sheboyan, Wisconsin.

ADDRESSES: Copies of the Permit are available at the following addresses for inspection. (It is recommended that you telephone Uylaine E. McMahan, at (312) 353-0396 before visiting the Region V Office.)

Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn, Chicago, Illinois 60604

Wisconsin Department of Natural Resources, Bureau of Air Management, 101 South Webster, Madison, Wisconsin 53707

Comment should be addressed to: Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch, U.S. EPA, Region V, 230 South Dearborn, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, (312) 353-0396.

SUPPLEMENTARY INFORMATION: On April 26, 1977, U.S. EPA, Region V, issued a Prevention of Significant Deterioration (PSD) permit for a 400 megawatt generating unit (Unit 5) at the Wisconsin Power & Light Company (WP&L) Edgewater Station in Sheboygan, Wisconsin. This permit contained several conditions, including an allowable Total Suspended Particulates (TSP) emission limitations for Unit 3 (0.002 lb/MMBTU) and Unit 4 (0.02 lb/MMBTU).

On April 22, 1983, WP&L requested U.S. EPA to make the following modifications to the PSD permit for Unit 5:

1. revise the TSP limit for Units 3 and 4 to 0.13 lb/MMBTU,
2. include a sulfur limit of 2.15 percent (annual average) for Units 3 and 4 (as required by the Wisconsin Public Service Commission) and,
3. require Continuous Emission Monitors (CEMs) for opacity and SO_2 (as required by WDNR Order NS-79-60-05 (March 16, 1979)), to be installed no later than 180 days from the effective date of the revised permit.

To support the increased TSP limits for Units 3 and 4, WP&L provided a reference screening analysis demonstrating that the increase in allowable emissions from these two units (coupled with the operation of Unit 5 at its allowable emission limit (0.1 lb/MMBTU) and the required retirement of Units 1 and 2) will attain the TSP National Ambient Air Quality Standards (NAAQS) and PSD increments. In this analysis, Units 3 and 4 (which are serviced by a new common 168m stack) were modeled at the applicable grandfathered Good Engineering Practice (GEP) physical stack height of 110m and the stack exit diameter, velocity, and temperature associated with the new stack. This approach was consistent with U.S. EPA's February 8, 1982, GEP Stack Height Regulations.

U.S. EPA approves the requested modifications, with one clarification. The CEM condition was expanded to say: "Opacity and SO_2 CEMs shall be installed in the common stack connecting Units 3 and 4, no later than 180 days from the date of this permit and WP&L shall have the CEMs certified within 60 days after the installation. Thereafter, quarterly excess emission reports shall be submitted to the Wisconsin DNR."

During the public comment period, only WP&L submitted comments. WP&L noted that two opacity CEMs will be installed, one in each unit's ductwork leading to the common stack. The opacity reading for the common stack will be produced using an electonic combiner that ratios and corrects the individual readings from each duct. WP&L asked that the permit wording be clarified to reflect this monitoring system.

U.S. EPA accepts the proposed opacity monitoring system and has modified the permit to say only that "* * * CEMs shall be installed to monitor emissions from the common stack connecting Units 3 and 4 * * *". Consequently, the full set of conditions in the modified permit are as follows:

1. Each of the existing units 3 and 4 at the Edgewater Generating Station shall not exceed emission limitation of 0.13 pounds of particulate matter and 6.7 pounds of sulfur dioxide (SO_2) per million British thermal unit (MMBTU) of heat input. Sulfur limit in the coal used in Unit 3 and 4 shall be limited to 2.15 percent on an annual average basis. (This limit should not replace the existing 6.7 pounds of SO_2 per MMBTU limit in the permit.)

2. Unit 5 must meet emission limitations of 0.1 pounds of particulate matter per MMBTU heat input and 1.2 pounds of SO_2 per MMBTU heat input. These limitations are equivalent to the New Source Performance Standards (40 CFR Part 60) for fossilfuel fired steam generating units and are defined as best available control technology. This condition is required by 40 CFR § 52.21(d)(2)(ii).

3. WP&L may not alter the design stack parameters identified in its application including, but not limited to, exit gas temperature, exit gas velocity, stack diameter (inside top) and stack height. The air quality analysis relies heavily on the combination of stack parameters, control devices, and emission limitation and any change in those factors could change the results of the air quality analysis. Therefore, design changes in Unit 5 must receive the prior written authorization of U.S. EPA.

4. Units 1 and 2 must be retired from service on or before the start up of Unit 5. WP&L has planned retirement of those units and the air quality analysis was conducted accordingly.

5. Opacity and SO_2 continuous emission monitors (CEMs) shall be installed to monitor emissions from the common stack connecting Units 3 and 4, no later than 180 days from the date of this permit and WP&L shall have CEMs certified within 60 days after the installation. Thereafter, quarterly excess emission reports shall be submitted to WDNR.

Note, on October 11, 1983, the U.S. Court of Appeals for the District of Columbia reversed portions of U.S. EPA's February 3, 1982, Stack Height Regulations and ordered the Agency to reconsider other portions. Among the portions subject to reconsideration are the need for demonstrations for increasing existing stack heights and the definition of dispersion technique (e.g. merged stacks). The previous air quality analysis for the WP&L Units PSD permit is affected by both of these issues.

To address the potential impact of the Court decision, U.S. EPA has taken an alternative conservative approach that does not take credit for the increase in physical stack height and the stack merging for Units 3 and 4. Using this approach, Units 3 and 4 were remodeled with their original stack heights and stack exit parameters. The reanalysis followed the same general procedure used in the original screening analysis. It was found that the increase in TSP concentrations was only slightly above significance levels and was small enough to preserve the original attainment demonstration.

Thus, the revised TSP limits are still approvable despite the Court decision on the GEP regulations. (Please note that U.S. EPA is not acting on the original 6.7 lbs/MMBTU SO_2 limit for Units 3 and 4 in this notice. Nevertheless, these limits are not affected by the Court decision since the modeling performed to set this limit assumed no credit for the increase in physical and effective stack height associated with the new common stack. In addition, the annual average sulfur limit is being required for reasons other than protection of the SO_2 NAAQS. Thus, this limit is not based on any modeling which may have assumed credit for the new common stack for Units 3 and 4.)

Under Section 307(b)(1) of the Clean Air Act, judicial review of the PSD permit is available only by the filing of a petition for review in the Ninth Circuit Court of Appeals within 60 days of today.

Under Section (b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in Civil or Criminal proceedings brought by U.S. EPA to enforce these requirements.

Dated: March 6, 1984.

Alan Levin,

Acting Regional Administrator.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

National Emergency Training Center, Board of Visitors for the National Fire Academy; Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following committee meeting:

Name: Board of Visitors (BOV) for the National Fire Academy (NFA).

Date of meeting: April 10, 1984.

Place: 1984 Metro Chiefs Conference, Marriott Hotel, Orlando, Florida.

Time: 7-10 p.m.

Proposed agenda: April 10: Open meeting—no agenda.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Associate Director's Office, Building N, National Emergency Training Center, Emmitsburg, MD. Copies of the minutes will be available upon request 30 days after the meeting.

Dated: March 12, 1984.

Fred J. Villella,

Associate Director for Training and Fire Programs, National Emergency Training Center.

[FR Doc. 84-8003 Filed 3-23-84; 8:45 am]

BILLING CODE 6718-01-M

[FEMA-696-DR]

Texas; Amendment to Notice of Major Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the Notice of a major disaster for the State of Texas (FEMA-696-DR), dated January 7, 1984, published at 49 FR 1935, January 16, 1984 and related determinations.

DATED: March 20, 1984.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287-0501.

Notice

The notice of a major disaster for the State of Texas dated January 7, 1984, is hereby amended to include the following area among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of January 7, 1984:

The Counties of Dimmit and Zavala for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Samuel W. Speck,

Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

FEDERAL RESERVE SYSTEM

[Docket No. R-0485]

Private Sector Adjustment Factor

AGENCY: Board of Governors.

ACTION: Approval of methodology for calculating the Private Sector Adjustment Factor for 1984.

SUMMARY: The Board has approved the methodology for calculating the Private Sector Adjustment Factor (PSAF) for 1984. The PSAF is a recovery of the imputed costs which takes into account the taxes that would have been paid and the return on capital that would have

been provided had the Federal Reserve's priced services been furnished by a private business firm. The estimated recovery through the PSAF in 1984 will be $5.8 million .

EFFECTIVE DATE: January 1, 1984.

FOR FURTHER INFORMATION CONTACT: David L. Robinson, Associate Director (202/452–3806) or Earl G. Hamilton, Assistant Director (202/452–3974), Division of Federal Reserve Bank Operations; Gilbert T. Schwartz, Associate General Counsel (202/452–3625), Daniel L. Rhoads, Attorney (202/452–3711), or Robert G. Ballen, Attorney (202/452–3265), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION:

Background

The Monetary Control Act of 1980 (Title I of Pub. L. 96–221) provides that over the long run, fees for the Federal Reserve's priced services are to be based upon costs, including the "taxes that would have been paid and the return on capital that would have been provided had the services been furnished by a private business firm." The Private Sector Adjustment Factor ("PSAF") is the vehicle that facilitates the imputation of these taxes and capital costs to the Federal Reserve.

In October 1983 the Board requested comment on a proposal to revise the methodology used to calculate the PSAF for 1984. The proposed revisions included:

—Use of the direct determination method for establishing the asset base used for computing the PSAF.
—Expansion of the sample used to calculate the PSAF from the the 12 to the 25 largest bank holding companies.
—Calculation of the Federal Reserve's asset base to reflect the value of assets expected to be acquired and disposed of in 1984.
—Removal of the financing costs of net adjustment float from the asset base because such float is priced explicitly.
—Recovery of the estimated sales taxes that would have been paid on the purchase of certain goods and services if the Reserve Banks were subject to such taxes.
—Recovery of expenses incurred by Board staff working directly on the development of priced services and inclusion of the portion of the Board assets employed in this specific activity in the PSAF asset base.
—Capitalization of Federal Reserve leases that become effective on or after January 1, 1984, that meet the criteria for capitalization as set forth in PSAF Statement 13.

In addition to these revisions, the Board requested comment on an alternative method of determining the income tax rate used in calculating the PSAF. It was estimated that the net effect of these proposed changes would be to require a recovery of approximately $56.2 million through the PSAF in 1984. The Board also requested comment on a proposed adjustment to the method for calculating earnings credits on clearing balances to take into account reserve requirements the Reserve Banks would be subject to if they were subject to reserve requirements.

Analysis of Comments. A total of 45 commenters responded to the Board's request for comment, including seven Reserve Banks. Of the 38 non-Reserve Banks comments, 32 were received from banks and bank holding companies and four from banking industry trade groups. Responses were also received from one thrift institution and one congressman. A majority of the commenters discussing specific issues agreed that the proposals concerning the use of the direct determination method, calculation of the Federal Reserve's asset base to reflect the value of assets to be acquired and disposed of in 1984, recovery of estimated sales taxes, recovery of estimated expenses incurred by Board staff working directly on the development of priced services, and the inclusion of the capitalized leases in the asset base used to calculate the PSAF were appropriate. The majority of commenters also supported the exclusion of shipping expenses from the PSAF calculation. Commenters were divided on the issues of the bank holding company model and its expansion from the twelve to the 25 largest bank holding companies, the tax rate methodology, the continued use of book values as the basis of asset base calculation, and the exclusion of net adjustment float from the short-term asset base.

Objections to the proposal stemmed mainly from opposition to the Federal Reserve's use of bank holding companies as the model for estimating an imputed cost of capital, tax rate, and the short term assests to be included in the PSAF calculation.

A. *Choice of Model*—Thirty-four commenters discussed the Board's proposal to continue using large bank holding companies as the model upon which to construct the PSAF and to expand the sample size from the twelve largest bank holding companies to the 25 largest bank holding companies. Seventeen commenters supported the use of the bank holding company model on the basis that the model represented those institutions that the Federal Reserve directly competed with in the provision of priced services. Several commenters supported expanding the sample size from the 12 largest bank holding companies to the 25 largest bank holding companies, stating that the expansion would present a more accurate representation of the market.

Seventeen commenters were opposed to the use of bank holding companies as the model and stated that data processing corporations were the most appropriate model. These commenters believe that the priced service business of the Federal Reserve Banks most closely resembles the services offered by data processing corporations. They also believe that using a large bank holding company model is inappropiate because the large majority of a bank holding company's activities are unrelated to the services the Federal Reserve Banks offer. Many of the commenters who opposed the proposal stated that if the Federal Reserve was going to continue the use of bank holding companies as the model, it would have to include more assets like cash and cash items in the process of collection to make the pro forma balance sheet of the Federal Reserve System consistent with consolidated bank holding company balance sheets.

The Board carefully considered alternative models such utilities, bank holding companies, and data processing companies. Determining whether the cost of capital that the Federal Reserve would actually incur in the market would be higher or lower than that associated with bank holding companies, or any other industry model, involves the consideration of a number of factors, particularly in view of the Federal Reserve's unique blend of public and private characteristics. The Board believes that an analysis of all reasonable alternatives strongly reinforces the view that the bank holding company model is the most reasonable and logical choice.

The Board recognizes, as some commenters pointed out, that bank holding companies engage in numerous activities other than correspondent bank services. However, the correspondent services of bank holding companies most closely resemble the priced services activities of the Federal Reserve, and large banking organizations are the major—and for many services virtually the only—direct competitors of the Federal Reserve. Therefore, since the correspondent operations of a bank holding company have the same cost of capital that accrues to the bank holding company as a whole, the Board believes it is appropriate to impute capital costs to the Federal Reserve based on the capital costs an structure of bank holding companies.

Certain aspects of the Federal Reserve's provision of priced services are more analogous to utilities or government-sponsored enterprises, which have a lower cost of capital than that implied by the bank holding company model. The Federal Reserve was directed by the Congress to provide an adequate level of service nationwide and must, therefore, serve all depository institutions regardless of size or location. Moreover, reflecting the Federal Reserve's public role, it should not be an aggressive, high growth, profit maximizing entity. It should, of course, earn an reasonable rate of return—a test that seems more than adequately provided for in the use of the bank holding company model.

The principal alternative to the bank holding company model suggested by a number of commenters is the use of a model based on data processing companies. The argument that nonbank data processors would privide a better model than bank holding companies rests on two major assumptions: First, these firms provide payments services that are similar to those of the Federal Reserve Banks; and, second, a stand-alone Federal Reserve priced service entity would have the financial characteristics of those data processing companies.

Given the disparities between the services of data processing companies and the services provided by the Federal Reserve, data processors are not the appropriate model for the PSAF. A thorough review of the activities of six data processors suggested by some of the commenters clearly indicates that the assertion of similar activities is not supported by the facts. All six of these firms provide a wide variety of computer-related services in many fields unrelated to the financial industry. As a result, the fortunes of these data processors are tied to developments in activities far removed from the Federal Reserve. Moreover, the data processors incur none of the basic costs associated with the business of banking, such as the cost of associated vault space or protection equipment for securities safekeeping operations or the cost of specialized equipment and transportation necessary for processing and delivering checks.

To the very limited extent that the activities of the data processors are at all comparable to those of the Federal Reserve, they generally only perform a portion of the services provided by the Federal Reserve. For example, the data processors perform only one step in the payments process—the recording and transfer of payments information. The Federal Reserve, in contrast, performs many, and in some cases all, of the steps that take place as payments are made. The large banks that are subsidiaries of bank holding companies, either directly or through joint ventures, provide virtually every service offered by the Federal Reserve.

Finally, the six data processors specifically suggested by some commenters apparently do not subscribe to the view that their activities are similar to those of the Federal Reserve. None of these six firms includes the Federal Reserve as a competitor in the discussion of competitors section of its Form 10–K filed with the Securities and Exchange Commission. Further, only one of the six has ever commented on a single occasion on any of the Federal Reserve's pricing proposals, with that comment limited to a narrow point unrelated to the PSAF. Finally, no data processor commented on the proposed 1984 PSAF methodology. The one bank service corporation that commented on the proposal supported the use of large bank holding companies as the appropriate model.

The second argument for the data processing company model is that the capital structure and returns of these companies should constitute the Federal Reserve's financial operating targets. It is clear that these firms are high-growth, technologically oriented operations—a fact suggested by the variability of their stock prices relative to stock prices generally. However, the Board does not believe that it should be the objective of the Federal Reserve to mirror the performance of these specialized firms; to suggest that the Federal Reserve should conduct its priced services with a view toward achieving financial objectives of that nature would seem to be in conflict with the very essence of the Federal Reserve's historical and public interest payments mechanism operations.

With regard to the application of the bank holding company model, twelve commenters supported expanding the model size to include the 25 largest bank holding companies, but some suggested that the sample include those bank holding companies that are most heavily involved in the correspondent banking business. An analysis indicates that the use of a sample comprised of the 25 largest correspondent banks ranked by "due to" balances has virtually no impact on the PSAF.

Another issue raised by some commenters stems from the fact that the market price of the stock of certain bank holding companies used in the model is well below the book value of such stock. As a result, suggestions have been made that the return on equity implied for the Federal Reserve by this model is too low. Specifically, some commenters argued that pre-tax and after-tax income targeted by the Federal Reserve should result from an income stream that would be large enough to equate market and book value of stock.

In response to this comment, the cost of equity component of the PSAF was calculated for several samples of bank holding companies with differing relationships of market value to book value for their stock. The calculations indicate that the holding companies with the highest market-to-book ratios had higher returns on equity than the companies with the lowest ratios. Overall, however, the absolute amount of the differences were relatively small. In order to create a more regionally diverse sample and avoid distortions in the PSAF calculation due to institutions at the extremes, the Board believes it is reasonable to use the sample of the 25 largest bank holding companies. However, to avoid unusual distortions, the bank holding companies with the lowest and the highest returns on equity will be eliminated from the 25 company sample before the actual calculations are made. Should changing market-to-book relationships imply any material affect on PSAF recoveries, the choice of the 25 largest bank holding companies as the basis for the PSAF calculation will be reevaluated.

There are other factors that constrain in the income stream generated by the Federal Reserve's priced service operations. The most significant of these is that the Federal Reserve does not have the same "profit maximization" objectives as a private firm. For example, the Federal Reserve's priced service operations have limited investment opportunity. Specifically, the Federal Reserve's investments are, by assumption, limited to Treasury bills, whereas any profit maximizing firm would hold a substantial portion of its investments in higher yielding instruments.

B. *Book Value of Physical Assets*—Twenty-five commenters discussed the use of book value of physical assets in the calculation of the PSAF. Thirteen commenters supported the use of book value to determine the value of physical assets as being consistent with the practices in the private sector and among bank holding companies.

Twelve commenters opposed the use of book value and supported the use of current market value to determine the value of physical assets, many stating that a book value system used for

accounting or tax purposes is inappropriate for pricing, investment, or production decisions. Several commenters noted that the use of book value causes geographic distortions between Federal Reserve Districts with new buildings and those with old buildings, and suggested that the Federal Reserve follow Financial Accounting Standards Board (FASB) Statement number 33 which requires reporting of assets at current value.

The Board continues to believe that the practice of using book value for physical asset valuation is appropriate. The practice of using book value for property, plant, and equipment is consistent with banking industry practice and with generally accepted accounting principles. Moreover, establishing financial performance standards based upon historical costs is a prevalent practice throughout the private sector. Furthermore, under the provisions of FASB Statement number 33 (the accounting profession's current methodology for supplementary disclosure of inflation-adjusted financial data), if assets were revalued to reflect market value rather than book value, an adjustment would also have to be made in income. Finally, since a market value accounting system does not exist, the Federal Reserve—like all other entities—has no practical choice other than the use of net book values.

The use of market valuation of physical assets has theoretical appeal because the use of net book value by the Federal Reserve or the banking industry could result in distortions and inefficiences if book values were far removed from market values. Such does not appear to be the case with respect to the Federal Reserve.

Approximately one-third of the physical assets used by the Federal Reserve in the provision of priced services is equipment. The great bulk of such assets is computers and related equipment for which the market value does not appear greater than its book value—in fact, the book value appears to be much greater than market value for this equipment. For example, there are two computer models owned by the Federal Reserve that, as a result of technological innovation, have a market value that is $9–10 million less than their book values.[1]

With respect to Reserve Bank buildings, the best proxy for market value available to the Federal Reserve is the alternative use of space; that is, what rent could the Federal Reserve obtain for its space or what would the Federal Reserve have to pay if the priced service operations were moved out of a Federal Reserve Bank's building to other comparable space. The Federal Reserve faces a practical problem, however, when making comparisons of book and market values of its space because, in general, only a portion of a Reserve Bank's facility is used for priced service operations and space costs are charged through the Federal Reserve's Planning and Control System (PACS) at one rate for all activities—priced and nonpriced within a building—regardless of location. Thus, prime space, which is typically not used for priced services, may tend to be undervalued whereas less than prime space for priced service activities may tend to be overvalued.

Analysis of the space costs [2] the Federal Reserve imposes on its internal operations (based on PACS standard rates) and prevailing commercial space rentals in all cities in which the Federal Reserve maintains operations shows that there are Reserve offices with PACS space costs above and below local market rates. However, in an overall weighted average cost basis, the PACS charge (including PSAF) per square foot for Reserve Banks is $16.83, well within the weighted average market range of $13.41 to $20.90. Further, of the nearly one million square feet in the Federal Reserve devoted to check operations, approximately 30 percent is rented—primarily for RCPC's—thus explicitly reflecting the market rate in these locations. It therefore appears that continued use of book value for calculating the PSAF is reasonable. Board staff will continue to monitor this matter closely.

C. *Income Taxes*—The Board requested public comment on whether to use an income tax rate based on taxes actually paid, or a tax rate which takes into account deferred taxes, for the income tax rate used in the PSAFF calculation.[3] Three commenters supported the Board's present methodology. Ten commenters supported inclusion of deferred taxes as being a better representation of the tax liability of a private company, if effective tax rates for bank holding companies were used. Twenty-three commenters stated that marginal tax rates were more appropriate.

Deferred taxes arise principally from accelerated depreciation. Including the effect of deferred taxes would increase the tax rate used for purposes of the PSAF in some years and decrease the tax rate inother years. (The effect of excluding dererred taxes for 1984 is to increase the dollars to be recovered through the PSAF by $1.3 million). Over time, it is likely that the effect of using dererred taxes would balance out. Because it is administratively complex to include deferred taxes in the PSAF calculation, (e.g., separate depreciation schedules would have to be developed), it is reasonable that the PSAF computation not take into account deferred taxes.

With regard to the use of marginal tax rates, the taxes actually paid by the bank holding companies in the model—or by most other firms—are not at the maximum marginal tax rate. Therefore, while the Federal Reserve would use the marginal tax rate for prospective investment analysis purposes, it would not be appropriate to use the marginal tax rate for purposes of calculating the PSAF.

In order to judge the reasonableness of the tax rate developed from the model, the income taxes the Federal Reserve would actually pay in 1984 if the Federal Reserve was subject to income taxes was approximated. This analysis suggests that even without the benefits of (1) investment tax credits from any year other than the year for which taxes are being calculated, (2) tax benefits from accelerated depreciation applicable to the Federal Reserve, and (3) the normal tax minimization efforts that businesses follow, a 38.6 percent tax rate appears appropriate. If any allowance for the three factors cited above were made, the actual tax rate might be considerably lower than 38.6 percent.

Some commenters suggested the Federal Reserve look at domestic tax rates of bank holding companies for purposes of determining its assumed tax liability because the Federal Reserve's priced services are entirely domestic. A study on financial institutions prepared by staff of the Joint Committee on Taxation showed that, for 20 large commercial banks, the average U.S. effective tax rate for the most recent year studied, 1981, was 2.7 percent.[4] The

[1] The Reserve Banks intend to use this equipment for the length of time originally contemplated in the depreciation schedules.

[2] Cost of space to be recovered through pricing includes utilities, depreciation, taxes, housekeeping and building maintenance labor, the supervision of that labor, and the PSAF.

[3] In the past, the tax rate used in the PSAF calculation was based on the rato of current income taxes (Federal, state and local) to total income of the bank holding companies included in the sample. Deferred taxes were excluded from this ratio. An adjustment was made to the tax rate to exclude any benefits that banks derive from holding tax exempt state and local government securities.

[4] Staff of Joint Committee on Taxation, Committee on Finance, Taxation of Banks and Thrift Institutions, 12 (Joint Comm. Print, March 11, 1983).

corresponding foreign and worldwide average effective rates were 38.1 and 24.5 respectively. The 2.7 percent and 24.5 percent effective tax rates are significantly lower than the 38.6 percent effective tax rate in the PSAF calculation.

D. *Direct Determination of Assets*—Seventeen commenters supported the proposal to replace the expense ratio method for asset determination with the direct determination method based on PACS, stating that it would be a more precise measurement of the assets used in the production of priced services. Concern was expressed by six commenters over the data structure of PACS, and the allocations of assets between priced and non-priced services. These commenters urged the Board to make available to the public details of the asset allocation between priced and non-priced services embodied in PACS. One commenter opposed the proposal stating that PACS would underallocate assets to the priced services.

The original PSAF methodology apportioned all long-term assets, and certain short-term assets such as materials and supplies, deferred charges and other receivables on the basis of the ratio of operating expenses for priced services (less shipping) to total priced and non-priced operating expenses (less shipping) to total priced and non-priced operating expenses (less shipping). This approach resulted in apportioning approximately 40 percent of the total book value of assets to the priced service assets base to be financed via the PSAF.

It is important, however, that shared (joint-purpose) assets and single-purpose assest be precisely linked to priced services so that a priced service asset base accurately and fully identifies assets employed in the provision of priced services. The direct determination method relies essentially on PACS cost accounting to link single-purpose assets directly to priced and non-priced services, thus determining more precisely the priced service asset base. In addition, PACS provides the same information for assets, such as buildings and centralized computers, that are used jointly in the provision of priced and non-priced services. For example, depreciation is included in total occupancy costs, which are redistributed to all PACS activities. Because depreciation is linked directly to assets carried on the Federal Reserve's balance sheet, the assets can be linked to the production of priced and non-priced services.

For illustrative purposes, the check processing operation currently occupies approximately 13 percent of total System floor space. Therefore, 13 percent of the net book value of buildings is directly attributable to the check service. In addition, the amount of space occupied by each support activity and each overhead service whose costs are redistributed or allocated to the check service is known. Since the precentage of expenses that each support and each overhead service redistributed or allocated to check as a percentage of total expenses is also known, that percentage rate can be used to determine the additional building values to be attributable to the check service. As a result, a total of 22 percent of the net book value of building assets can be attributed to the check service and included in the priced service asset base. Similar calculations are made for other long-term assets. This process, followed for each of the Federal Reserve's priced services, ultimately produces a priced service asset base that includes all assets directly identified with a priced service and the appropriate portion of shared assets that relate to priced services.

E. *Board of Governors Assets and Expenses*—The Board proposed that expenses incurred by Board staff in the development of prices be subject to recovery. Nineteen commenters supported this proposal. Eight of these commenters stated that the allocation should also include expenses and assets indirectly related to priced services, such as planning, budgeting, review, monitoring, policy making and control. Several commenters noted that the proposal paralleled private sector practices.

The Board believes it is appropriate to include expenses incurred by Board staff working on the development of priced services ($1.9 million) in the expense subject to recovery and the Board assets employed in this activity ($.5 million) in the PSAF asset base, begining in 1984. However, the Board believes it would be inappropriate to impose expenses associated with the Board's supervisory responsibilities over Reserve Banks when the Federal Reserve does not assess charges on member banks and bank holding companies for other types of supervisory activities.

F. *Sales Taxes*—Twenty-seven comments were received on the proposal to include in the PSAF an estimate of sales taxes that would have been paid by the Reserve Banks had they not had a statutory exemption. Twenty-five commenters supported the proposal. Two commenters opposed including sales taxes on the basis that sales tax is not a cost incurred by Reserve Banks.

The Board believes that an allowance for sales taxes the Federal Reserve Banks would have paid were they subject to such taxes should be included as a cost of providing priced services. For 1984, the total Federal Reserve sales tax attributed to priced services is approximately $4.9 million.

G. *Shipping Expenses*—Thirteen commenters discussed the proposal to exclude shipping expenses from the PSAF calculation. Eleven commenters supported the exclusion of shipping expenses, and two commenters stated that shipping expenses should be included.

The assets employed in the production of shipping services are not Federal Reserve assets, but rather are owned by the various carriers with whom the Reserve Banks deal. When priced service assets are determined directly instead of on an expense ratio basis, the removal of shipping expenses from the calculation has no effect on total recoveries. Staff expenses of managing shipping services are recovered through overhead allocations as well as direct allocations to priced service activities. Accordingly, the Board determined not to include shipping expenses in the calculation of the PSAF.

H. *Date for the Asset Base Estimate*—Eighteen respondents discussed the Board's proposal that the asset base for the year in which the PSAF would apply be adjusted to reflect the value of the assets expected to be acquired and disposed of in that year. Seventeen commenters supported the proposal, stating that it would be an improvement over the current method of using the average asset base from the previous year and would be more consistent with private sector practices. Two commenters opposed the proposal; one commenter stated it was inconsistent with cost theory used in the private sector.

The Board has determined that adjusting the asset base used in applying the PSAF for the value of assets expected to be acquired or disposed of in the year for which the PSAF would apply better reflects the actual assets used to provide priced services. Further, it appears that this modification would parallel private sector practices. Accordingly, the Board has adopted the procedure as proposed.

I. *Leased Assets*—Fourteen commenters supported the proposal that all leases becoming effective on or after January 1, 1984, and meeting criteria of FASB Statement number 13 be capitalized for purposes of determining the PSAF. Several commenters stated the proposal was in accord with

industry practice and generally accepted accounting standards. Other commenters discussed leased assets in terms of the impact of leases on capital structure. They stated that leased assets do not appear on the Federal Reserve's books, but, that if a private entity were to issue debt, lenders would regard lease obligations as if they were debt and adjust that entity's capital structure accordingly. In their opinion, high levels of leases preclude high levels of debt.

The Board has determined to include the value of all Federal Reserve leases that become effective on or after January 1, 1984, that meet the criteria for capitalization as set forth in FASB Statement number 13 in the calculation of the PSAF. This amount is expected to be $1.5 million. Of this amount, it is anticipated that $0.9 million is related to priced service activities. Since the financing costs (interest payments) associated with these leases are explicitly reflected in the operating expenses to be recovered through pricing, there would be no effect upon the PSAF or the costs to be recovered if these leases were capitalized. Furthermore, these leases would not affect the Federal Reserve's debt/equity ratio as asserted by some of the commenters in view of the *de minimus* level of capitalized leases. The amount of leases entered into prior to January 1, 1984, that satisfy the requirements of FASB Statement number 13 is small and no adjustments appear necessary.

J. *Short-Term Assets*—1. *Float.* Sixteen commenters discussed the proposal to remove the financing costs of new adjustment float from the asset base used for the PASF calculation. Ten commenters supported the proposal in view of the fact that the value of all Federal Reserve check float will be recovered through service fees in 1984. Six commenters were opposed to the proposal. A few commenters suggested that float be financed at either the short-term rate applicable to the bank holding companies in the model or the rate equivalent to the imputed weighted average cost of capital computed in the PASF calculation.

The Board determined that it is appropriate to remove the financing costs of net adjustment float from the asset base to be financed via the PSAF since the value of Federal Reserve check float will be recovered fully through explicit pricing in 1984. In view of the self-financing characteristics inherent in recovering float value through explicit pricing, inclusion of financing costs for net adjustments float in the Federal Reserve's asset base would result in a double recovery. With regard to the suggestion that float be financed by alternative rates, the MCA requires interest of items credited prior to collection to be charged at the Federal funds rate.

2. *Cash Items.* Several commenters stated that the level of short-term assets was two low and that a large short-term asset, cash items in the process of collection (CIPC), has been omitted from the pro forma balance sheet. These commenters also tied the inclusion of CIPC to the requirement that commercial banks must maintain 5 percent of assets as capital, stating that a bank holding company model, if applied consistently, would require the Federal Reserve to comply with capital guidelines established by the Federal Reserve and the Comptroller of the Currency for large banks and bank holding companies.

The Federal Reserve, by virtue of its check processing operations, has large amounts of cash items in the process of collection each day. The difference between cash items in the process of collection and deferred availability items is float, the value of which must be recovered under the Monetary Control Act. Cash items in the process of collection that are offset by deferred availability items are costless and thus need not be financed by the PSAF or otherwise. Therefore, insofar as the Federal Reserve's overall net income is concerned, the only "cost" associated with cash items in the process of collection arises from the net balances created which, in accordance with the MCA, are effectively priced at the Federal funds rate.

As several commenters stated, the gross amount of cash items typically is included on the balance sheet of a commercial bank, and a commercial bank's gross cash items are subject to regulatory capital guidelines. By extension, it was suggested that a five percent primary capital ratio, if applied to a Federal Reserve balance sheet that included the gross amount of cash items, would require considerably more capital than provided for in the PSAF calculation.

The Federal Reserve does not believe this conclusion is warranted. First, cash items are not a risk asset—a fact that is implicitly recognized in the development of regulatory capital guidelines. Second, cash items represent only 4 percent of the total assets of the banking organizations in the sample. If these items were removed from the total assets of commercial banks, the resulting primary capital ratio guideline would be increased to about 5.2 percent. The comparable ratio of equity to total assets on the Federal Reserve's pro forma balance sheet is about 9 percent. Consequently, when the primary capital ratio is adjusted to take account of cash items in the process of collection, it appears that the Federal Reserve's capital provided for in the PSAF calculation is reasonable.

3. *Clearing Balances.* The Board also had proposed to adjust the method for calculating earnings credits on clearing balances to take into account reserve requirements applicable had similar balances been held at a correspondent bank. Thirteen commenters supported the proposal.

If a respondent's balance is maintained at a correspondent bank, the correspondent would be required to maintain reserves on the balances held. In most cases, the correspondent would be at a marginal reserve requirement ratio of 12 percent. Generally, the correspondent bank takes its marginal reserve requirement into account when it calculates the earnings credit on the respondent's balances. The respondent, however, would receive an additional benefit from being able to deduct balances held at the correspondent from its reservable transaction accounts. Accordingly, it is appropriate to take this into account in calculating earnings credits on clearing balances.

The Board has determined to adjust the method used for calculating earnings credits to reflect the reserve requirements that would apply if the balances had been held with a correspondent bank. Each respondent's balance would be reduced by an imputed net interbank reserve requirement. This would be calculated as the 12 percent requirement that a correspondent would be subject to, less the reserve saving to the respondent if it could deduct the balance from reservable transaction accounts. Preliminary estimates indicate that this would reduce the rate at which depository institutions are paid earnings credits on clearing balances by about 7 percent. At the same time, an imputed reserve burden of 12 percent would be imposed upon the Federal Reserve's revenues from clearing balances.

K. *District vs. National PSAF*—Three commenters advocated that the Federal Reserve use a district rather than a national PSAF. These commenters argued that such a policy would more directly and fully recognize differences in costs among Reserve cities, and thus help to promote a more competitive environment.

The Federal Reserve believes that a national PSAF is appropriate for several reasons. First, the Federal Reserve's

electronic payment services are priced on a national basis to recognize the national nature of such services. This approach has broad support among private banking organizations. Thus, a district PSAF would be incompatible with the underlying nature of these services and the current approach to the pricing of such services.

Second, while check processing and definitive securities operations are priced at the district level, even these services are, in many ways, national in nature. For example, almost 50 percent of the checks and 70 percent of the coupons processed by the Federal Reserve are handled by more than one office.

Third, where district prices are used, such prices already reflect the effect of local costs for wages, utilities, property, taxes, and other factors of production. Moreover, the costs of capital to the Federal Reserve (as, for example, the interest rates it would pay on debt) would be uniform and national. Thus, the use of a district PSAF, would, as a practical matter, mean only that the distribution of the quantity of capital among Federal Reserve Districts would change. Such a change would not have a material impact on actual prices but would introduce a major element of complexity into pricing and price schedules. Indeed, under this approach, the quantity of capital first would have to be divided among national and district services and then, for district services, be determined for each of the Federal Reserve's 48 offices. The result would be a massive matrix of PSAF's, which would be an administrative nightmare.

Fourth, as best can be judged, private organizations—including banks—typically do not vary their prices on the basis of the specific capital resources used to produce a specific service at a specific location. The fees for a checking account, for example, generally do not vary depending on whether the account is held at a very high-rent central city location or a suburban or rural branch. Thus, the local PSAF would imply a standard of performance in the Federal Reserve which appears to be at odds with conventional business practices.

Finally, the characteristics of many capital assets used by Federal Reserve Banks are fixed by national policies and standards. For example, security standards for buildings, automation standards, and standards calling for redundant back-up operating systems influence the capital base at all Federal Reserve offices in ways that result in capital resources that are different than might be the case if each Federal Reserve office were a stand-alone entity. In short, because the Federal Reserve Banks are part of a national system, many of their activities are national in scope and are influenced by national policies. Consequently, reflecting this reality, it is appropriate to have a single, uniform PSAF for all Reserve Banks.

L. *FDIC Insurance*—Several commenters expressed the view that the PSAF should include the Federal deposit insurance assessment that would apply to the Federal Reserve if its deposits were Federally insured. A review of the pro forma balance sheet for Federal Reserve priced service operations shows that approximately $1.7 billion of clearing balances would be subject to the Federal deposit insurance assessment if the Federal Reserve were a member of the FDIC. Because virtually all correspondent banks are members of the FDIC, it is reasonable for the Federal Reserve to add to the PSAF the deposit insurance expense that otherwise would have been incurred by the Federal Reserve.

Applying the formula for calculating the Federal deposit insurance assessment based on the Federal Reserve's pro forma balance sheet results in a Federal deposit insurance assessment of $1.2 million.

Board Action

After analysis of the comments received on the proposed modifications to the methodology for calculating the PSAF for 1984, the Board has determined that the most appropriate model from which to impute taxes and the costs of capital for Reserve Banks consists of a sample of large bank holding companies. The Board has also decided to expand the sample size of the model from the 12 largest bank holding companies to the 25 largest bank holding companies. However, to prevent distortions, the Board has determined that the best performing bank holding company and the worst performing bank holding company of the 25 in the sample should be excluded from the calculations.

The Board has also approved the following adjustments to the methodology for calculating the PSAF:

—Employ the direct determination methodology for establishing the asset base used for computing the PSAF.
—Include in the priced services asset base for 1984 the net effect of those assets expected to be acquired and disposed of during the year.
—Recover the estimated sales taxes that would have been paid on the purchases of certain goods and services were Reserve Banks subject to such taxes.
—Include those portions of expenses and fixed assets of the Board of Governors related to the development of priced services.
—Include an imputation for FDIC insurance assessment.
—Remove the financing costs of net adjustment float from the asset base because such float is now priced explicitly.

As a result of these changes, the estimated dollars to be recovered through the PSAF in 1984 will be $58.8 million. If the current methodology were used for 1984, the PSAF recovery would be $53.6 million.

The Board has also adopted the proposed adjustment to the method for calculating earnings credits on clearing balances to take into account reserve requirements the Reserve Banks would be subject to if they were subject to reserve requirements. This adjustment, however, will require substantial modifications to Reserve Banks' existing software. Therefore, implementation of this action will take place when the necessary modifications have been made later this year.

Factors bearing on the calculation of the PSAF such as capital structure changes in the large bank holding companies or changes in their cost of capital will be closely monitored and changes to the methodology for calculating the PSAF to take such changes into account will be considered where appropriate.

By order of the Board of Governors of the Federal Reserve System, March 20, 1984.

William W. Wiles,

Secretary of the Board.

TABLE 1.—*Summary of Changes From Proposed 1984 PSAF*

Total PSAF recoveries—October public comment	[illegible]
Change due to:	
Reclassification of Board of Governors expenses	+1.9
Inclusion of Federal deposit insurance assessment	+1.2
Updating prospective evaluation of assets for 1984	+0.2
Change in treatment of leasehold improvements	+0.1
Inclusion of prepaid expenses other	+0.4
Change in value of materials and supplies	+0.3
Updating capital structure	−0.8
Updating financing rates through 3rd quarter 1983	−0.7
PSAF recoveries for 1984	58.8

TABLE 2.—*Derivation of the 1984 PSAF*

A. Assets to be financed:[1]	
Short-term	$32.3
Long-term	[2]273.8
Total	306.1
B. Weighted average cost of:	
1. Capital Structure:[3]	
Short-term debt (percent)	10.6
Long-term debt (percent)	[illegible]
Equity (percent)	61.0
2. Financing rates/costs:[3]	
Average rates paid by the bank [illegible] companies included in the sample:	
Short-term debt (percent)	[illegible]
Long-term debt (percent)	10.14

TABLE 2.—*Derivation of the 1984 PSAF*—Continued

Pre-tax equity (percent)[4]	[illegible]
3. Elements of capital costs:	
Short-term debt $32.3 × 9.23%	[illegible]
Long-term debt $87.1 [illegible] × 10.14%	[illegible]
Equity $186.7 [illegible] × 20.90%	[illegible]
Total	[illegible]
C. Other required PSAF recoveries:	
Sales Taxes	4.9
Federal deposit insurance assessment	1.2
Board of Governors expenses	1.9
Total	8.0
D. Total PSAF recoveries	[illegible]
As a percent of capital	19.21
As a percent of expenses [5]	15.25

[1] Priced service asset base is based on direct determination of assets method.
[2] Consists of total long-term assets less capital leases which are self-financing.
[3] All short-term assets are assumed to be financed by short-term debt. Of the total long-term assets, 31.8 percent are assumed to be financed by long-term debt, and 68.2 percent by equity.
[4] The pre-tax rate of return on equity is based on average after-tax rates of return on equity for the bank holding company sample, adjusted by the effective tax rate to yield the pre-tax rate of return on equity.
[5] Systemwide 1984 budgeted priced service expenses less shipping were $365.8 million.

BILLING CODE 6210-01-M

Sevier County Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (49 FR 794) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 16, 1984.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Sevier County Bancshares,* Inc., Sevierville, Tennessee; to become a bank holding company by acquiring 100 percent of the voting shares of Sevier County Bank, Sevierville, Tennessee.

2. *Shamrock Holdings, Inc.,* Evergreen, Alabama; to become a bank holding company by acquiring 80 percent of the voting shares of The Union Bank, Repton, Alabama.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Alliance Bancorp,* Danville, Indiana; to become a bank holding company by acquiring 100 percent of the voting shares of The Danville State Bank, Danville, Indiana.

2. *Valley Banc Services Corp.,* Antioch, Illinois; to become a bank holding company by acquiring 82 percent of the voting shares of Hinckley State Bank, Hinckley, Illinois.

c. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First Newport Bancshares, Inc.,* Newport Arkansas; to acquire at least 90 percent of the voting shares of Planters and Stockman Bank, Pocahontas, Arkansas.

D. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Underwood Holding Company, Inc.,* Underwood, North Dakota; to become a bank holding company by acquiring 100 percent of the voting shares of First Security Bank, Underwood, North Dakota.

2. *Elysian, Inc.,* Elysian, Minnesota; to become a bank holding company by acquiring 81.2 percent of the voting shares of Elysian State Bank, Elysian, Minnesota.

E. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Citizens Ban-Corporation,* Rock Port, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of the following bank holding companies: Ridgeway Bancshares, Inc., Bethany, Missouri, and thereby indirectly acquiring Farmers National Bank, Bethany, Missouri; 100 percent of the voting shares of Security Bancshares, Inc., Gallatin, Missouri, and thereby indirectly acquiring Bank of Gallatin, Gallatin, Missouri, and Albany State Bank, Albany, Missouri; and 100 percent of the voting shares of New Hampton Bancshares, Inc., New Hampton, Missouri, and thereby indirectly acquiring First State Bank of New Hampton, New Hampton, Missouri.

F. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President)

400 South Akard Street, Dallas, Texas 75222:

1. *New Dumas Bancshares, Inc.*, Dumas, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Moore Bancshares Corporation, Dumas, Texas, and thereby indirectly acquiring First State Bank of Dumas, Dumas, Texas.

2. *Weatherford National Bancshares, Inc.*, Weatherford, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of Weatherford National Bank, Weatherford, Texas, a *de novo* bank.

Board of Governors of the Federal Reserve System, March 20, 1984.

James McAfee,

Associate Secretary of the Board.

Independent Bankers Financial Corporation, et al.; Applications To Engage De Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (49 FR 794) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (49 FR 794) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 13, 1984.

A. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Independent Bankers Financial Corporation*, Dallas, Texas; to make, acquire or service for its own account or for the account of others loans, such as would be made, for example, by any commercial, mortgage or consumer finance company.

2. *Independent Bankers Financial Corporation*, Dallas, Texas; to engage through its subsidiary, Independent Bankers Marketing Corporation, in providing management consulting advice, including but not limited to, market development, advertising programs, and public relations to non-affiliated bank and non-bank depository institutions.

Board of Governors of the Federal Reserve System, March 20, 1984.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Control Technology Assessment of Fermentation Processes, Field Study of Hearing in Impulse and Continuous Noise-Exposed Workers; Open Meetings

The following meetings will be convened by the National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control (CDC) and will be open to the public for observation and participation, limited only by the space available:

Control Technology Assessment of Fermentation Processes

Dated: April 11, 1984.
Times: 9:00 a.m. to 2:00 p.m.
Place: Conference Room C, 555 Ridge Avenue, Cincinnati, Ohio 45213.
Purposes: To review a project which will document control techniques currently used in large-scale fermentation processes (specifically enzyme operations) and identify effective controls for fermentation applications.

Additional information may be obtained from: Kenneth F. Martinez, Division of Physical Sciences and Engineering, NIOSH, CDC, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephones: FTS: 684-4295, Commercial: 513/684-4295.

Field Study of Hearing in Impulse and Continuous Noise-Exposed Workers

Date: April 30, 1984.
Time: 9:00 a.m. to 4:00 p.m.
Place: Room B-56, Robert A. Taft Laboratories, 4676 Columbia Parkway, Cincinnati, Ohio 45226.
Purpose: To review a project which is a field study of hearing thresholds in workers exposed to impulse and continuous noise.

Additional information may be obtained from: Ms. Nadine Dickerson, Division of Biomedical and Behavioral Science, NIOSH, CDC, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephones: FTS: 684-3283, Commercial: 513/684-8283.

Viewpoints and suggestions from industry, organized labor, academia, other government agencies, and the public are invited.

Dated: March 16, 1984.

William C. Watson, Jr.,

Acting Director, Centers for Disease Control.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Exclusion of the Bureau of Indian Affairs and the Office of Territorial and International Affairs Programs From Coverage Under E.O. 12372, "Intergovernmental Review of Federal Programs"

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of exclusion.

SUMMARY: The Department indicated in a notice published in the **Federal Register** on June 24, 1983 (48 FR 29235), that a list of the Indian and Territories programs which are not covered by the Executive Order would be published in a separate **Federal Register** notice at a later date. The list of programs is below.

Catalog No.	Program name	Administering bureau
15.103	Indian Social Services—Child Welfare Assistance.	Bureau of Indian Affairs.
15.106	Indian Employment Assistance.	Do.
15.113	Indian Social Service—General Assistance.	Do.
15.114	Indian Education—Higher Education Grant Program.	Do.
15.123	Indian Loans—Claims Assistance.	Do.
15.124	Indian Loans—Economic Development.	Do.

Catalog No.	Program name	Administering Bureau
15.130	Indian Education—Assistance to Schools.	Do.
15.141	Indian Housing Assistance	Do.
15.142	Self Determination Grants—Indian Tribal Governments.	Do.
15.143	Training and Technical Assistance—Indian Tribal Governments.	Do.
15.144	Indian Child Welfare Act—Title II Grants.	Do.
15.875	Economic and Political Development of the Territories and the Trust Territory of the Pacific Islands.	Office of Territorial and International Affairs.

Presidential Commission on Indian Reservation Economies; Public Hearings and Site Visits

AGENCY: Presidential Commission on Indian Reservation Economies, Department of the Interior.

ACTION: Notice of Meetings.

SUMMARY: This notice set forth the dates, time and location of forthcoming hearings and site visits of the Presidential Commission on Indian Reservation Economies for April, 1984:

1. *April 9, 1984 (Monday)—Hearing.* Wahweap Lodge, Page, Arizona; Time: 9:00 a.m.—5:00 p.m.
2. *April 10, 1984 (Tuesday)—Hearing.* Navajo Nation, Window Rock, Arizona; Time: 9:00 a.m.—5:00 p.m.
3. *April 26, 1984 (Thursday)—Hearing.* Cavanaugh's Inn at the Park, West 303 N. River Drive, Spokane, Washington 99201; Time: 9:00 a.m.—5:00 p.m.
4. *April 27, 1984 (Friday)—Site Visits.* Nez Perce—Reservation, Lapwai, Idaho.

Coeur D'Alene—Reservation, Plummer, Idaho.

The purpose of the hearings will be to receive both oral and written testimony from Indian leaders, Indian businessmen and other representatives from the tribal, public and private sectors concerning the development and sustainment of viable economic enterprises within Indian reservation environments. The site visits will enable the Commission to witness first hand both problems and successes associated with economic and business development on Indian reservations.

Parties interested in testifying at a hearing should present their testimony in writing either in advance of the hearing or at the onsite registration for the hearing. An oral summary of the testimony may be given at the hearing. Those desiring to submit written testimony and make an oral presentation should submit in writing a brief statement of the general nature of the testimony to be presented, the names and addresses of proposed participants and an indication of the approximate time required to make their presentation. This information should be sent to Sandra Gjelde, Office of Public Hearings, Presidential Commission on Indian Reservation Economies, Suite 765, 1717 H Street, Northwest, Washington, D.C. 20006. Questions regarding testimony or registration procedures may also be directed to Ms. Gjelde at (202) 653–2436. The agenda for oral testimony will be completed five days in advance of each hearing.

Any person attending a hearing who has not requested an opportunity to speak five days in advance of the meeting, will be allowed to make an oral presentation at the conclusion of the hearing, if time permits and at the discretion of the Co-Chairman.

FOR FURTHER INFORMATION CONTACT: Eric Rudert, Deputy Director, Presidential Commission on Indian Reservation Economies, 1717 H Street, Northwest, Suite 765, Washington, D.C. 20006. Telephone (202) 653–2436.

Eric Rudert,

Deputy Director, Presidential Commission on Indian Reservation Economies.

Wyoming; Proposed Continuation of Withdrawal

Correction

In the issue of Thursday, March 8, 1984, on page 8686 in the third column, a correction to FR Doc. 84–4953 appeared. The land description in the last line was inaccurate. It should read "NW¼SE¼".

BILLING CODE 1505-01-M

Office of Surface Mining Reclamation and Enforcement

Availability of Draft Environmental Impact Statement and Public Hearing for the Proposed John Henry No. 1 Mine, King County, Washington

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of availability of draft environmental impact statement and public hearing.

SUMMARY: The Office of Surface Mining (OSM) is making available for public review and comment a draft environmental impact statement (EIS) on Pacific Coast Coal Company's proposed John Henry No. 1 mine, east of the city of Black Diamond, King County, Washington. The draft EIS analyzes the impacts on the human environment that would result from surface coal mining operations at this proposed mine and evaluates the two alternative actions of approval, with or without conditions, and disapproval that OSM could take on the permit application for this mine in accordance with the Surface Mining Control and Reclamation Act of 1977. The EIS will assist OSM in making its decision on this application. OSM is accepting written comments and will conduct a public hearing to receive oral comments on the draft EIS.

DATES: *Comment period.* Written comments on the draft document must be received by 4:00 p.m., May 21, 1984.

Public hearing. A public hearing will be held starting at 7:00 p.m. on May 2, 1984, and will continue until all who desire to speak have been heard.

ADDRESSES: *Written comments.* Send or hand-deliver to Allen D. Klein, Administrator, Attn: Charles Albrecht, OSM, Brooks Towers, 1020 15th Street, Denver, Colorado 80202.

Public hearing. A public hearing will be held in the Multipurpose Room of Black Diamond Elementary School, Black Diamond, Washington.

Availability of Copies: Copies of the draft EIS may be obtained from Allen D. Klein, Administrator, Attn: Charles Albrecht, Office of Surface Mining, Western Technical Center, Second Floor, Brooks Towers, 1020 15th Street, Denver Colorado 80202.

FOR FURTHER INFORMATION CONTACT: Charles Albrecht, Chief, Environmental Analysis Branch, OSM, Western Technical Center, 1020 15th Street, Denver, Colorado 80202 (telephone: 303–837–5421).

SUPPLEMENTARY INFORMATION:

Written Comments

Written comments should be as specific as possible. OSM appreciates all comments, but those most useful and likely to influence decisions in the preparation of the final EIS are those which will provide facts and analyses to support any recommendations or conclusions. OSM cannot assure that written comments received after the

time indicated under "**DATES**" will be considered or included in the preparation of the final EIS.

Public Hearing

Filing of a written statement by commenters at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions, which could be asked to clarify or to elicit more specific information from the person commenting. A public hearing will continue on the specified date until all persons who are present in the audience and wish to comment have been heard. Commenters will be limited to 10 minutes of oral testimony per person.

Abstract of the Draft EIS

Pacific Coast Coal Company proposes to mine a maximum of 385,000 tons per year of run-of-mine coal at peak production levels or 5.32 million tons over 16.2 years at its John Henry No. 1 mine. The proposed minesite is located partly within the city limits of Black Diamond, Washington. A coal processing facility capable of producing 250,000 tons of clean coal per year is also proposed. Approximately 363 acres would be distrubed during the life of the mine. Reclamation (spoil backfilling and contouring, topsoil replacement, and vegetation planting) would be completed within 19 years of commencement of the mining operation. The applicant has proposed a 32.5-acre, 250-foot-deep lake; OSM has made no decision on whether the new lake, in the current location of Mud Lake, would meet regulations pertaining to restoration of approximate original contour and postmining land use objectives. There is one other small surface coal mine operating in the immediate vicinity of the proposed John Henry No. 1 mine; no plans for other coal mine development in the area are known, although additional coal reserves exist in the area. The John Henry No. 1 mine would have moderately significant social and economic impacts upon the community of Black Diamond, Washington, and the residents of unincorporated King County adjacent to the mine. In addition, impacts to topography, surface and ground water, soils, vegetation, and wildlife resources would be moderately significant. Impacts on other resources would not be significant, in that the capacity of those resources to meet anticipated uses would largely be maintained during mining or would be restored by reclamation.

Dated: March 20, 1984.

Allen O. Perry,

Acting Assistant Director, Technical Services and Research.

BILLING CODE 4310-05-M

[Federal Lease Nos. W-0311810, W-0312311, and W-0313668]

Availability of Draft Environmental Impact Statement and Public Hearing on the Proposed East Gillette Federal Mine, Campbell County, Wyoming

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of availability of the draft environmental impact statement (OSM–EIS–15) and public hearing.

SUMMARY: The Office of Surface Mining (OSM) is making available for public review and comment a draft environmental impact statement (EIS) on the proposed East Gillette Federal mine, Campbell County, Wyoming. This EIS has been prepared to assist the Department in making a decision on Kerr-McGee Coal Corporation's application to surface mine coal east of the city of Gillette, Wyoming. OSM is accepting written comments, and will conduct a public hearing to receive oral comments, on the draft EIS. All interested parties are invited to attend this hearing to give their comments.

DATES: *Comment period.* Written comments on the draft EIS must be received by 4:00 p.m. (Mountain standard time), May 29, 1984, at the location listed below under "**ADDRESSES.**"

Public hearing. A public hearing on the draft EIS will be held on May 8, 1984, at 7:00 p.m. (local time) at the location listed below under "**ADDRESSES.**"

ADDRESS: *Written comments.* Hand deliver or mail to Allen D. Klein, Administrator, Attn: Charles Albrecht, Office of Surface Mining, Western Technical Center, Second Floor, Brooks Towers, 1020 15th Street, Denver, Colorado 80202.

Public hearing. A public hearing on the draft EIS will be held the Campbell County Recreation Center (West Entrance), 1000 Douglas Highway, Gillette, Wyoming.

Availability of Copies: Copies of the draft EIS may be obtained from the Allen D. Klein, Administrator, Attn: Charles Albrecht, Office of Surface Mining, Western Technical Center, Second Floor, Brooks Towers, 1020 15th Street, Denver, Colorado 80202.

FOR FURTHER INFORMATION CONTACT: Charles Albrecht, Chief, Environmental Analysis Branch (Telephone: 303–837–5421) at the location given under "**ADDRESSES.**"

SUPPLEMENTARY INFORMATION:

Written comments

Written comments should be as specific as possible. OSM appreciates all comments, but those most useful and likely to influence decisions in the preparation of the final EIS are those which provide facts and analyses to support any recommendations or conclusions. OSM cannot assure that written comments received after the time indicated under "**DATES**" or at locations other than that listed under "**ADDRESSES**" will be considered or included in the preparation of the final EIS.

Public hearing

Filing of a written statement by commenters at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions, which could be asked to clarify or to elicit more specific information from the person commenting. The public hearing will continue on the specified date until all persons who are present in the audience and wish to comment have been heard. Commenters will be limited to 10 minutes of oral testimony per person.

Background

Kerr-McGee Coal Corporation proposes to mine an average of 11 million tons of coal per year, or 256 million tons of coal over a 25-year period, at its East Gillette Federal mine. The proposed mine would disturb 2,604 acres of land. Six coal mines are currently in operation, and one more is proposed for operation, in the general vicinity of Kerr-McGee's proposed mine. The Secretary of the Interior must make a decision on Kerr-McGee Coal Corporation's permit application package in accordance with the Surface Mining Control and Reclamation Act of 1977. The draft EIS evaluates the two alternative actions that ISM could take on this permit application package. These actions are approval of the mining plan, with or without conditions, and issuance of a Federal permit to mine coal, and disapproval of the mining plan, in which case no Federal permit to mine coal would be issued. The EIS analyzes the impacts on the human environment that would result from approval of the mining plan and issuance of a Federal

permit to mine coal by OSM for Kerr-McGee Coal Corporation's proposed mine. If approved, mining and related activities at the East Gillette Federal mine would have major short-term impacts upon the vegetation and visual resources of the area. Impacts to certain socioeconomic resources of the area would be moderate. If start-up of the operation were delayed for several years, the impacts to the socioeconomic environment could be major owing to a cumulative effect with other mining operations in the area. Mining would have major long-term impacts upon geologic strata and soils. Impacts to air quality, topography, transportation, and ground water would be moderate. Other impacts would be typical of those resulting from surface coal mining operations in northeastern Wyoming and would be minor.

Dated: March 20, 1984.

Allen O. Perry,

Acting Assistant Director, Technical Services and Research.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Public Information Collection Requirements Submitted to OMB for Review

The Agency for International Development submitted the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Comments regarding these information collections should be addressed to the OMB reviewer listed at the end of the entry no later than (ten days after publication). Comments may also be addresseed to, and copies of the submissions obtained from the Reports Management Officer, Ms. Melita E. Yearwook, (202) 632-3378, IRM/MMP, Room 708B, SA-12, WAshington, D.C. 20523.

Date Submitted: March 14, 1984.

Submitting Agency: Agency for International Development.

OMB Number: None.

Form Number: NA.

Type of Submission: New.

Title: Matching Grant Schedule.

Purpose: This collection specifies the selection criteria and proposal format for applications by private voluntary organizations for matching Grants to be awarded in the coming year.

Reviewer: Francine Picoult (202) 395-7231, Office of Management and Budget, Room 3201, New Executive Office Building, Washington, D.C. 20503.

Dated: March 14, 1984.

BILLING CODE 6116-01-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket Nos. 30376 and 30377]

Amherst Industries, Inc., et al., Exemption From 49 U.S.C. 10905(f)(4); the Landisville Railroad, Inc., Exemption From 49 U.S.C. Subtitle IV

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: Under 49 U.S.C. 10505, the Interstate Commerce Commission exempt Landisville Railroad, Inc., from Subtitle IV of 49 U.S.C. for the acquisition and operation of a 3-mile segment of track located in Lancaster County, PA. Because the acquisition is pursuant to an intracorporate transfer, it was unnecessary to grant an exemption from the provision of 49 U.S.C. 10905(f)(4) which would otherwise prohibit the transfer of rail property acquired under 49 U.S.C. 10905 for a period of 5 years.

DATES: This exemption shall become effective on April 25, 1984. Petitions for stay must be filed by April 5, 1984, and petitions for reconsideration must be filed by April 16, 1984.

Send pleading to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's Representative: William Jackson, 3426 North Washington Blvd., Post Office Box 1240, Arlington, VA 22210

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403.

Decided: February 16, 1984.

By the Commission, Chairman Taylor, Vice Chairman Andre, Commissioners Sterrett and Gradison.

James H. Bayne,

Acting Secretary.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

Federal Advisory Council on Occupational Safety and Health; Meeting

Notice is hereby given that the Federal Advisory Council on Occupational Safety and Health, established under Section 1–5 of Executive Order 12196 of February 26, 1980, published in the **Federal Register** February 27, 1980 (45 FR 12769), will meet on April 11, 1984 starting at 10:00 a.m. in Room 104A, of the Department of Agriculture, Administration Building, Independence Avenue, SW. between 12th and 14th Streets, Washington, D.C. 20250. The meeting will be open to the public.

The agenda provides for:

I. Call to Order
II. Approval of Minutes of October 12, 1983
III. Announcements
IV. Proposed Changes to Articles of Organization
V. Level II Statistical Program
VI. Reports:
  A. Medical Records Issue
  B. Interdisciplinary Committee on Hazard Abatement
  C. Proposed Safety Managers' Meeting
  D. Policy Paper on Occupational Health Issues
VII. Adjournment

The Council welcomes written data, views or comments concerning safety and health programs for Federal employees, including comments on the agenda items. All such submissions received by close of business April 6, 1984, will be provided to the members of the Council and included in the record of the meeting.

The Council will consider oral presentations relating to agenda items. Persons wishing to orally address the council at the meeting should submit a written request to be heard by close of business April 6, 1984. The request must include the name and address of the person wishing to appear, the capacity in which appearance will be made, a short summary of the intended presention and an estimate of the amount of time needed.

All communications regarding this Advisory Council should be addressed to John E. Plummer, Director, Office of Federal Agency Programs, Department of Labor, OSHA, Frances Perkins Building, 200 Consitution Avenue, NW., Room N3613, Washington, D.C. 20210. telephone (202) 523–9329.

Signed at Washington, D.C., this 21st day of March 1984.

Thorne G. Auchter,

Assistant Secretary.

NATIONAL SCIENCE FOUNDATION

Committee Management; Determination of Renewal

Pursuant to the Federal Advisory Committee Act, Pub. L. 92–463, I have hereby determined that the 12 advisory committees listed below are necessary and are in the public interest in connection with the performance of duties imposed upon the National Science Foundation by the National Science Foundation Act of 1950, as amended, and other applicable law. This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Advisory Committee for Astronomical Sciences
Advisory Committee for Atmospheric Sciences
Advisory Committee for Chemistry
Advisory Committee for Earth Sciences
Advisory Committee for Engineering
Advisory Committee for International Programs
Advisory Committee for Materials Research
Advisory Committee for Ocean Sciences
Advisory Committee for Physics
Advisory Committee for Polar Programs
Advisory Committee for Policy Research and Analysis and Science Resources Studies
Advisory Committee for Industrial Science and Technological Innovation

Authority for these advisory committees shall expire on March 30, 1986, unless the Director of the National Science Foundation formally determines that continuance is in the public interest.

Dated: March 21, 1984.

Edward A. Knapp,

Director

Committee Management; Advisory Committee for Computer Research; Establishment

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), it is hereby determined that the establishment of the Advisory Committee for Computer Research is necessary, appropriate, and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF), and other applicable law. This determination follows consultation with the Committee Management Secretariat, General Services Administration, pursuant to Section 9(a) of the Federal Advisory Committee Act and other applicable issuances.

Name of Committee: Advisory Committee for Computer Research.

Purpose: To provide advice, recommendations, and oversight concerning the directions for and impacts of the Foundation's support of computer research.

Effective Date of Establishment and Duration: This establishment is effective upon filing the charter with the Director, NSF, and with the standing committees of Congress having legislative jurisdiction of the Foundation.

Membership: The membership of this Committee shall be fairly balanced in terms of the points of view represented and the Committee's function. Members will be chosen so as to be reasonably representative of the scientific and engineering communities supported by the research directorates of the Foundation. Due consideration will be given to achieving representation from women and minority scholars, the handicapped, and different geographical regions of the country.

Operation: The Committee will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92–463), Foundation policy and procedures, GSA Interim Rule on Federal Advisory Committee Management, and other directives and instructions issued in implementation of the Act.

March 20, 1984.

Directorate for Engineering

Advisory Committee for Chemical and Process Engineering (CPE)

Purpose: Provides advice, recommendations, and counsel on major goals and policies pertaining to chemical and process engineering activities and programs. It also provides oversight concerning support for research and research-related activities in the various programs in the CPE Division.

Membership: Consists of not more than 17 persons eminent in their respective fields of endeavor or specification as related to the areas of interest of the Division.

Advisory Committee for Civil and Environmental Engineering (CEE)

Purpose: Provides advice, recommendations, and counsel on major goals and policies pertaining to engineering activities and programs. It also provides oversight concerning support for research and research-related activities in the CEE Division.

Membership: Consists of not more than 15 persons eminent in their respective fields of endeavor or specification as related to the areas of interest of the Division.

Advisory Committee for Earthquake Hazard Mitigation (EHM)

Purpose: Provides advice, recommendations, and counsel on major goals and policies pertaining to engineering activities and programs. It also provides oversight concerning support for research and research-related activities in the Division of Civil and Environmental Engineering.

Membership: Consists of not more than 17 persons eminent in their respective fields of endeavor or specification as related to the areas of interest of the Earthquake Hazard Mitigation Section.

Advisory Committee for Electrical, Computer, and Systems Engineering (ECSE)

Purpose: Provides advice, recommendations, and counsel on major goals and policies pertaining to electrical, computer, and systems engineering activities and programs. It also provides oversight concerning support for research and research-related activities in the ECSE Division.

Membership: Consists of not more than 17 persons eminent in their respective fields of endeavor or specification as related to the areas of interest of the Division.

Advisory Committee for Mechanical Engineering and Applied Mechanics (MEAM)

Purpose: Provides advice, recommendations, and counsel on major goals and policies pertaining to activities and programs within and related to the MEAM Division. It also provides oversight concerning support for research and research-related activities in the Programs of Fluid Mechanics, Heat Transfer, Solid Mechanics, Mechanical Systems, and Production Research as well as any other Programs that are added to the Division in the future.

Membership: Consists of not more than 13 members. Appointees shall be eminent in the respective fields which shall be related to Programs of the Division.

Directorate for Astronomical, Atmospheric, Earth, and Ocean Sciences

Advisory Panel for Ocean Sciences Research

Purpose: To review and evaluate specific proposals requesting NSF support for research and research-related activities in physical and biological oceanography, marine chemistry, and submarine geology and geophysics.

Membership: Consists of approximately 18 persons selected from the scientific community in ocean sciences.

Earth Sciences Proposal Review Panel

Purpose: Provides advice and recommendations concerning the scientific merit of unsolicited research proposals and research-related proposals received by the Foundation in the earth sciences area.

Membership: Consists of approximately 20 persons selected from the scientific community in earth sciences.

Directorate for Biological, Behavioral, and Social Sciences

Division of Behavioral and Neural Sciences

Advisory Panel for Social and Cultural Anthropology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Social and Cultural Anthropology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 5 persons selected from the scientific community in Social and Cultural Anthropology.

Advisory Panel for Archaeology and Physical Anthropology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Archaeology and Physical Anthropology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 8 persons selected from the scientific community in Archaeology and Physical Anthropology.

Advisory Panel for Anthropological Systematic Collections

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in anthropological Systematic Collections. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 5 persons selected from the scientific community in Anthropological Systematic Collections.

Advisory Panel for Linguistics

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Linguistics. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 6 persons selected from the scientific community in Linguistics.

Advisory Panel for Memory and Cognitive Processes

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Memory and Cognitive Processes. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 6 persons selected from the scientific community in Memory and Cognitive Processes.

Advisory Panel for Psychobiology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Psychobiology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 10 persons selected from the scientific community in Psychobiology.

Advisory Panel for Social and Developmental Psychology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Social and Developmental Psychology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 6 persons selected from the scientific community in Social and Developmental Psychology.

Advisory Panel for Sensory Physiology and Perception

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Sensory Physiology and Perception. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 9 persons selected from the scientific community in Sensory Physiology and Perception.

Advisory Panel for Molecular and Cellular Neurobiology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Molecular and Cellular Neurobiology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 8 persons selected from the scientific community in Molecular and Cellular Neurobiology.

Advisory Panel for Integrative Neural Systems

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Integrative Neural Systems. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 6 persons selected from the scientific community in Integrative Neural Systems.

Advisory Panel for Developmental Neurosciences

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Developmental Neurosciences. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 8 persons selected from the scientific community in Developmental Neurosciences.

Division of Biotic Systems and Resources

Advisory Panel for Systematic Biology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Systematic Biology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 10 persons selected from the scientific community in Systematic Biology.

Advisory Panel for Population Biology and Physiological Ecology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Population Biology and Physiological Ecology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 10 persons selected from the scientific community in Population Biology and Physiological Ecology.

Advisory Panel for Ecology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Ecology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 9 persons selected from the scientific community in Ecology.

Advisory Panel for Ecosystem Studies

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Ecosystem Studies. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 9 persons selected from the scientific community in Ecosystem Studies.

Division of Social and Economic Science

Advisory Panel for Political Science

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Political Science. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of 6 persons selected from the scientific community in Political Science.

Advisory Panel for Economics

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Economics. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of 9 persons selected from the scientific community in Economics.

Advisory Panel for Geography and Regional Science

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Geography and Regional Science. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of 5 persons selected from the scientific community in Geography and Regional Science.

Advisory Panel for Law and Social Sciences

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Law and Social Sciences. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 6 persons selected from the scientific community in Law and Social Sciences.

Advisory Panel for Decision and Management Science

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Decision and Management Science. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 6 persons selected from the scientific community in Decision and Management Science.

Advisory Panel for History and Philosophy of Science

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in History and Philosophy of Science. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 8 persons selected from the scientific community in History and Philosophy of Science.

Advisory Panel for Regulation and Policy Analysis

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Regulation and Policy Analysis. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 5 persons selected from the scientific community in Regulation and Policy Analysis.

Advisory Panel for Measurement Methods and Data Resources

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Measurement Methods and Data Resources. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 7 persons selected from the scientific community in Measurement Methods and Data Resources.

Advisory Panel for Sociology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Sociology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 7 persons selected from the scientific community in Sociology.

Division of Physiological, Cellular, and Molecular Biology

Advisory Panel for Instrumentation

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Instrumentation. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 11 persons selected from the scientific community in Instrumentation.

Advisory Panel for Development Biology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Developmental Biology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 22 persons selected from the scientific community in Developmental Biology.

Advisory Panel for Cell Biology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Cell Biology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 18 persons selected from the scientific community in Cell Biology.

Advisory Panel for Regulatory Biology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Regulatory Biology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 15 persons selected from the scientific community in Regulatory Biology.

Advisory Panel for Cellular Physiology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Cellular Physiology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 15 persons selected from the scientific community in Cellular Physiology.

Advisory Panel for Metabolic Biology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Metabolic Biology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 15 persons selected from the scientific community in Metabolic Biology.

Advisory Panel for Biochemistry

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Biochemistry. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 13 persons selected from the scientific community in Biochemistry.

Advisory Panel for Biophysics

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Biophysics. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 13 persons selected from the scientific community in Biophysics.

Advisory Panel for Genetic Biology

Purpose: The primary purpose is to review and evaluate specific proposals requesting NSF support for research and research-related activities in Genetic Biology. Additionally, the Panel provides oversight, general advice, and policy guidance.

Membership: Consists of approximately 26 persons selected from the scientific community in Genetic Biology.

Balanced Membership: The membership on the Advisory Committees will be fairly balanced in the terms of the points of view represented and the committees'

functions. Members will be chosen so as to insure a balance of subspecialty competence, geographical distribution, and representation of women, minorities, and the handicapped.

Establishment and Duration: The Advisory Committees are effective on the date the charters are filed with the Director, NSF, and the standing committees of Congress having legislative jurisdiction of the National Science Foundation. The Advisory Committees will continue for 2 calendar years from the date of this filing.

Advisory Committee Operation: The Advisory Committees will operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92–463); Foundation policy and procedures; General Services Administration Interim Regulation on Advisory Committee Management; and other directives and instructions issued in implementation of the Act.

Waiver

On March 2, 1984, the National Science Foundation published a notice in the **Federal Register** announcing that 17 committees due to expire on March 1, 1984 were being extended until March 30. The General Services Administration concurred in this extension to allow sufficient time for review of the Foundation's proposed committee structure. The restructuring involved separately chartering subcommittees and terminating their parent committees. To prevent disruption of meeting schedules, anticipated meetings of parent committees have been scheduled as meetings, of the appropriate subcommittees. The GSA Committee Management Secretariat's has waived the 15-day waiting period for charter filing, pursuant to the publication of this notice. All etablishments and renewals will be filed on March 30, 1984.

March 21, 1984.

Edward A. Knapp,

Director.

FR Doc. 84–8039 Filed 3–23–84; 8:45 am]

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Proposed Meetings

In order to provide advance information regarding proposed meetings of the ACRS Subcommittees and of the full Committee, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published February 21, 1984 (49 FR 6420). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. Those Subcommittee meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the April 1984 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202/634–3267, ATTN: Barbara Jo White) between 8:15 a.m. and 5:00 p.m., Eastern Time.

ACRS Subcommittee Meetings

**Qualification Program for Safety-Related Equipment,* March 29, 1984, Washington, DC. The Subcommittee will review the status of Generic Issue A–46, "Seismic Qualification of Equipment for Operating Reactors" and review details of the NRC Electrical Equipment Qualification and Plant Aging Research Programs. Notice of this meeting was published February 29, 1984 (49 FR 7480).

**Class 9 Accidents,* March 30, 1984—Postponed.

**Extreme External Phenomena,* April 4, 1984, Washington, DC. The Subcommittee will review the generic methodology for developing design basis severe winds for SEP plants and review the specific application to Ginna.

**Emergency Core Cooling Systems,* April 24, 1984, Washington, DC. The Subcommittee will continue the review of the joint NRC/B&W/EPRI integral test program.

**Emergency Core Cooling Systems,* April 25, 1984, Washington, DC. The Subcommittee will continue the review of the General Electric SAFER ECCS EM Code.

**Qualification Program for Safety-Related Equipment,* April 25, 1984, Washington, DC. The Subcommittee will discuss qualification and maintenance of electrical terminal blocks.

**Air Systems,* April 26, 1984, Washington, DC. The Subcommittee will review general design for compressed air systems, chilled water systems, and the prioritization of Generic Safety Issues related to heating, ventilating, and air conditioning in nuclear power plants.

**Combined Indian Point 1 and 2 and Reliability and Probabilistic Assessment,* April 26, 1984 (tentative), Washington, DC. The Subcommittee will discuss the Indian Point PRA, the issues addressed in the recent ASLB hearing on Indian Point, and severe accident issues associated with Indian Point.

**Class 9 Accidents,* April 27, 1984, Washington, DC. The Subcommittee will discuss the final Severe Accident Policy Statement.

**Reactor Operations,* May 3, 1984, Washington, DC. The Subcommittee will review AEOD's Trends and Patterns Program Plan and have a discussion of methods that will allow ACRS to hear reports of significant plant operating experience.

**Maintenance Practices and Procedures,* May 8, 1984, Washington, DC. The Subcommittee will review the NRC Integrated Maintenance Task Action Plan and continue review of maintenance practices and procedures.

**Safety Research Program,* May 9, 1984, Washington, DC. The Subcommittee will review the proposed NRC Safety Research Program and Budget for FY 1986–1987 and gather information for use by the ACRS in its preparation of the ACRS report to the Commission on the related matter.

**Braidwood Nuclear Power Plant,* May 9, 1984, Washington, DC. The Subcommittee will primarily review the QA/QC aspects of Byron/Braidwood plants.

**Fort St. Vrain,* May 17, 1984, Longmont, CO. The Subcommittee will review plant operating experience.

**Metal Components,* May 17 and 18, 1984, Washington, DC. The Subcommittee will discuss reactor coolant water chemistry and its effects on material behavior, and review the status of pressurized thermal shock and BWR pipe cracking matters.

**River Bend Nuclear Power Plant,* date to be determined, St. Francisville, LA. The Subcommittee will review the application of the Gulf States Utilities for an operating license.

**Regulatory Activities,* June 12, 1984, Washington, D.C. The Subcommittee will review Regulatory Guide 1.35, Rev. 3, "Inservice Inspection of Ungrouted Tendons in Prestressed Concrete Containment Structures;" Regulatory Guide 1.35.1, "Determining Prestressing Forces for Inspection of Prestressed Concrete Containments;" and proposed

general revisions to Appendix J to 10 CFR 50.

Safety Research Program, June 13, 1984, Washington, D.C. The Subcommittee will continue the review of the proposed NRC Safety Research Program and Budget for FY 1986–1987 and also to discuss a draft ACRS report to the Commission on the related matter.

Millstone Unit 3, Date to be determined (late July), Waterford, CT. The Subcommittee will review the application of the Northeast Nuclear Energy Company for an operating license.

Westinghouse Water Reactors, Date to be determined, Washington, D.C. The Subcommittee will continue review of the Westinghouse Advanced Pressurized Water Reactor for Preliminary Design Approval. This meeting will be closed.

ACRS Full Committee Meeting

April 5–7, 1984: Items are *tentatively* scheduled.

*A. *Ginna Nuclear Power Plant*—Full term operating license.

*B. *Maintenance Policy and Practice*—Briefing regarding maintenance policies and practices in the nuclear industry.

*C. *Passive Containment System*—Discuss proposed ACRS activities regarding the request for a preapplication review of the Passive Containment System.

*D. *Meeting with NRC Commissioners*—Meeting with NRC Commissioners to discuss ACRS comments on the proposed NRC Safety Research Program for FY 1985, ACRS participation in quality assurance/quality control activities, establishment of an NTSB type board to evaluate nuclear power plant accidents/incidents and ACRS participation in the risk assessment of the Indian Point Nuclear Station (tentative).

*E. *Activities of NRC Regional Offices*—Briefing by NRC Regional Administrator.

*F. *Appointment of ACRS Members*—Candidates proposed for appointment to the Committee will be discussed.

*G. *Severe Accident Policy Statement*—Briefing regarding status of proposed NRC policy statement regarding consideration of severe accidents in the regulatory program.

*H. *Reports of Designated ACRS Subcommittees*—Subcommittees will report on the status of assigned activities including topics such as decay heat removal from nuclear power plants.

*I. *Performance of Undervoltage Trip Attachments*—Representatives of the NRC Staff will brief the Committee on a proposed NRC Bulletin regarding performance of undervoltage trip attachments on circuit breakers in nuclear plants.

*J. *Regulatory Guide 1.97, Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant and Environs Conditions During and Following an Accident*—Briefing regarding status of implementation.

May 10–12, 1984—Agenda to be announced.

June 14–16, 1984—Agenda to be announced.

Dated: March 21, 1984.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

Issuance of Director's Decision on Integrated Containment Leak Rate Testing at Commercial Nuclear Power Facilities

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a decision pursuant to 10 CFR 2.206 concerning the petitions dated November 29, 1983 and the addendum dated January 6, 1984 filed by Mr. Edward M. Gogol alleging inadequacies in the conduct of integrated leak rate testing at U.S. nuclear power reactors, including specifically La Salle Units 1 and 2 and Byron Unit 1.

The petitions and addendum allege severe errors, defects and loopholes in the integrated leak rate testing method now in use. A variety of relief is requested including placing La Salle Unit 1 in cold shutdown, ceasing further construction and licensing activities with respect to La Salle Unit 2 and Byron Unit 1, shutting down reactors with insufficient evidence of adequate containment leak rate testing and making available to the public all leak rate test data from the La Salle, Byron, and Cook plants. The Director, Office of Nuclear Reactor Regulation, has determined to deny petitioner's requests pursuant to 10 CFR 2.206.

The reasons for this decision are explained in the "Director's Decision under 10 CFR 2.206" (DD–84–6) which is available for public inspection in the Commission's Public Document Room located at 1717 H Street NW., Washington, D.C. 20555, and at the local public document rooms for the La Salle County and Byron Stations, located respectively at the Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348 and the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101.

A copy of the decision will be filed with the Secretary for Commission review in accordance with 10 CFR 2.206(c).

Dated at Bethesda, Maryland, this 16th day of March 1984.

For the Nuclear Regulatory Commission.

Harold R. Denton,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 84-8055 Filed 3-23-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–155]

Consumers Power Co. (Big Rock Point Plant); Exemption

I

The Consumers Power Company (CPC) (the licensee) is the holder of Facility Operating License No. DPR–6 which authorizes operation of the Big Rock Point Plant, located in Charlevoix County, Michigan, at a rated power level of 240 megawatts (thermal). This license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

II

Section III.G.3 of Appendix R to 10 CFR Part 50 requires fire detection and a fixed fire suppression system in areas for which alternate shutdown capability is provided. By letter dated October 20, 1983, Consumers Power Company requested and exemption from Section III.G.3 of Appendix R to 10 CFR Part 50 for the condsensate pump room and the turbine generator room.

For the condensate pump room the licensee requested an exemption from the Section III.G.3 requirement for a fixed fire suppression system. The licensee based the request on the following arguments. The condensate pump room is separated from the rest of the rooms on the same floor (elevation 593') by 2-hour fire barriers. The combustible loading in the area is light. A fire detection system and manual fire suppression equipment are provided in the room.

The staff's review of the licensee's arguments indicates that the factors cited by the licensee provide reasonable assurance that a fire in the condensate pump room would be promptly detected and extinguished, and that a fire in the area would not threaten safety equipment in adjacent fire areas. The alternate shutdown capability to be provided independent of the condensate pump fire area assures that even if this area suffers a major fire, safe shutdown

can still be achieved. The staff concludes that the installation of a fixed fire suppression system would not significantly increase the level of fire protection in this area.

Based on our evaluation, we conclude that the existing fire protection in conjunction with alternate shutdown capability for the condensate pump room provides a level of fire protection equivalent to the technical requirements of Section III.G.3 of Appendix R, and therefore, the exemption should be granted.

For the turbine generator room, the licensee requested an exemption from the Section III.G.3 requirements for a fire detection system and a fixed fire suppression system. The licensee based the request on the following argument. The turbine generator room is separated from the remainder of the plant by 3-hour rated fire barriers. The fire loading throughout the area is light. Where there are concentrations of combustibles, automatic sprinkler systems are provided. These areas include, the reactor feedwater pumps, the hydrogen seal oil unit and control cabinet, the main condenser, pipe tunnel, electric shop, and temporary stock room. Manual fire fighting equipment is available in the area.

The staff agrees that the factors cited by the licensee show that any fires might be expected to occur in this area would be promptly detected and extinguished and would not threaten safety equipment in adjacent fire areas. As with the condsensate pump room, an alternate shutdown system independent of the turbine generator room assures that safe shutdown can be achieved even if a major fire occurred in this room. On this basis the installation of a fixed fire suppression system would not significantly increase fire protection in this area.

Based on our evaluation, we conclude that the existing fire protection in conjunction wit h alternate shutdown capability for the turbine gnerator room provides a level of fire protection equivalent to the technical requirements of Section III.G.3 of Appendix R, and therefore, the exemption should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR Part 50.12, these exemptions are authorized by law and will not endanger life or property or the common defense and security, are otherwise in the public interest. Therefore, the Commission hereby grants the following exemptions:

1. An exemption to Section III.G.3 to exclude the condensate pump room from the requirement for a fixed fire suppression system.

2. An exemption to Section III.G.3 to exclude the turbine generator room from the requirement for a fire detection system and a fixed fire suppression system.

The Commission has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the action.

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland, this 20th day of March 1984.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-354-OL; ASLBP No. 83-492-05 OL]

Public Service Electrical and Gas Company, et al.; Hope Creek Generating Station, Unit 1; Reconstitution of Board

Pursuant to the authority contained in 10 CFR 2.721, the Atomic Safety and Licensing Board for *Public Service Electric and Gas Company, et al.* (Hope Creek Generating Station, Unit 1), Docket No. 50-354-OL, is hereby reconstituted by appointing Administrative Judge David R. Schink in place of Administrative Judge James A. Carpenter.

As reconstituted, the Board is comprised of the following Administrative Judges:

Marshall E. Miller, Chairman
Dr. Peter A. Morris
Dr. David R. Schink

All correspondence, documents and other material shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The address of the new Board member is:

Administrative Judge David R. Schink, Department of Oceanography, Texas A&M University, College Station, Texas 77840

Dated at Bethesda, Maryland, this 20th day of March, 1984.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 8010-01-M

Midwest Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

March 20, 1984.

In the Matter of Applications of the Midwest Stock Exchange, Inc. for unlisted trading privileges in certain securities; Securities Exchange Act of 1934.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted

trading privileges in the following stocks:

URS Corporation
Common Stock, $.25 Par Value (File No. 7–7395)
Guilford Mills, Inc.
Common Stock, $.02 Par Value (File No. 7–7396)
Sea Containers Ltd.
Common Stock, $.01 Par Value (File No. 7–7397)
Fansteel Inc.
Common Stock, $5 Par Value (File No. 7–7398)
Advanced Systems Inc.
Common Stock, $.10 Par Value (File No. 7–7399)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before April 10, 1984 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[File No. 1–7567]

URS Corp.; Application To Withdraw

March 20, 1984.

In the Matter of URS Corporation, Common Stock, $.25 Par Value, 8¾% Convertible Subordinated Debentures (due 2008); notice of application to withdraw from listing and registration.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified securities from listing and registration of the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

1. The common stock and debentures of URS Corporation ("Company") are listed and registered on the Amex. Pursuant to a Registration Statement on Form 8–A which became effective on February 23, 1984, the Company is also listed and registered on the New York Stock Exchange ("NYSE"). The Company has determined that the direct and indirect costs and expenses do not justify maintaining the dual listing of the common stock and debentures on the Amex and the NYSE.

2. This application relates solely to withdrawal of the common stock and debentures from listing and registration on the Amex and shall have no effect upon the continued listing of the stocks on the NYSE. The Amex has posed no objection to this matter.

Any interested person may, on or before April 10, 1984, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 23251; 70–6860 and 70–6698]

American Electric Power Co., Inc. et al.; Hearings

March 19, 1984.

In the Matter of American Electric Power Company, Inc., AEP Generating Company, 1 Riverside Plaza, Columbus, Ohio 43216; Indiana & Michigan Electric Company, One Summit Square, P.O. Box 60, Fort Wayne, Indiana 46801; Proposal To Amend Revolving Credit Agreement, Capital Funds Agreement and Owners' Agreement.

American Electric Power Company, Inc. ("AEP"), a registered holding company, Indiana & Michigan Electric Company, an electric utility subsidiary of AEP, and AEP Generating Company ("AEGCo"), a wholly-owned generating subsidiary of AEP, have filed post-effective amendments to their application-declarations in these proceedings pursuant to Sections 6(a), 7, 9, 10 and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 thereunder. These proceedings are hereby consolidated.

By order dated March 24, 1982 (HCAR No. 22429) AEGCo was authorized to acquire and I&M was authorized to sell a 35% undivided interest in the two units of the Rockport Generating Station ("Rockport Plant"), which is currently under construction in Spencer County, Indiana. By order dated Februry 18, 1982 (HCAR No. 22392) Kentucky Power Company ("KPCo"), also a wholly-owned subsidiary of AEP, was authorized to acquire from I&M a 15% undivided interest in the Rockport Plant. I&M, AEGCo and KPCo are parties to an Owners' Agreement, dated as of March 31, 1982, pursuant to which AEGCo and KPCo are obligated to acquire and pay for their respective ownership interests.

By orders dated March 24, 1982 (HCAR No. 22429), February 16, 1983 (HCAR No. 22857) and February 9, 1984 (HCAR No. 23218) AEGCo was authorized to issue and reissue unsecured promissory notes evidencing borrowings in the aggregate principal amount of up to $450 million at any one time outstanding through December 31, 1989, from a group of ten commercial banks pursuant to a revolving credit agreement ("Revolving Credit Agreement"), as amended. Borrowings by AEGCo under the Revolving Credit Agreement, together with other funds available to AEGCo, including funds made available by AEP pursuant to a capital funds agreement ("Capital Funds Agreement"), as amended, are applied to construction costs for the Rockport Plant and to pay AEGCo's proportionate share of "equalization payments" with respect to previous construction costs by I&M. As of February 21, 1984, AEGCo has outstanding notes evidencing borrowings under the Revolving Credit Agreement in the aggregate principal amount of $150 million.

By order dated June 13, 1983 (HCAR No. 22973), AEGCo was authorized to borrow up to $300 million from one or more commercial banks at any time through March 31, 1984, pursuant to one or more long-term fixed-rate loan agreements ("Term Loan Agreement"), and to enter one or more "interest rate swap" agreements at any time through March 31, 1984, with respect to up to $300 million principal amount of unsecured notes issued or to be issued to a group of commercial banks by AEGCo pursuant to the Revolving Credit Agreement. The June 13, 1983 order, as modified December 30, 1983 (HCAR No.

23192), specifies that aggregate borrowings pursuant to the Term Loan Agreement and the Revolving Credit Agreement (with or without any related "interest rate swap") may not exceed $450 million, and that AEGCo must reduce the aggregate commitments of the banks under the Revolving Credit Agreement by the amount of any borrowings under the Term Loan Agreement maturing after June 30, 1989. It further specifies that AEGCo may enter into "interest rate swap" agreements having a term extending not later than December 31, 1989, the final maturity date of all borrowings under the Revolving Credit Agreement. As of February 21, 1984, AEGCo has issued $225 million principal amount of long-term unsecured fixed-rate promissory notes to several commercial banks pursuant to Term Loan Agreements.

KPCo's performance of its obligations under the Owners' Agreement has been suspended since September 1982 pending the resolution of various legal challenges to the authorization by the Kentucky Public Service Commission allowing KPCo to acquire and own a 15% undivided interest in the Rockport Plant. Since that time, AEGCo, in accordance with the Owners' Agreement, has paid all construction costs associated with the two units of the Rockport Plant. If KPCo is not permitted to acquire its 15% interest, and AEGCo shall acquire its 35% interest, then I&M will be obligated for construction expenditures associated with a 65% undivided ownership interest in the plant, rather than its intended 50% undivided ownership interest. The organization of AEGCo and proposed sale of 35% undivided interest in the two units of the Rockport Plant to AEGCo was part of a plan that was intended to reduce I&M's direct ownership of the two units of the Rockport Plant to an undivided 50% interest, thereby limiting the associated financing burdens on I&M.

Unit No. 1 of the Rockport Plant is scheduled to be placed in commercial operation in late 1984. It is expected that the date when steam is generated in the boiler and fed to the turbine of Unit No. 1 for testing ("Initial Turbine Roll Date") may occur as early as August, 1984. Under the Owners' Agreement, the Initial Turbine Roll Date is the last date upon which AEGCo and KPCo must acquire their respective interests. Accordingly, AEGCo and I&M propose to amend the Owners' Agreement to provide that, in the event that KPCo is ultimately denied authority to acquire and own it 15% undivided interest in the Rockport Plant, or a decision is made that the likelihood of KPCo's performance prior to the Initial Turbine Roll Date is impractical and unlikely in light of the current status of regulatory proceedings and other legal challenges, AEGCo's interest shall be increased from 35% to 50%, and KPCo's interest shall be reduced to and remain at zero. Under these conditions, AEGCo, rather than I&M, would pay the Rockport construction costs associated with the additional 15% interest previously planned for KPCo.

A proposed amendment to the Owners' Agreement provides, among other things, that AEGCo shall reimburse KPCo directly for construction costs previously incurred by KPCo (approximately $50 million) and that KPCo shall acknowledge the reduction of its interest under the Owners' Agreement to zero.

AEP and AEGCo also propose to amend the Capital Funds Agreement, under which AEP must provide AEGCo funds to perform its obligations under the Owners' Agreement. Further, in such event, I&M and AEGCo propose to amend the Unit Power Agreement, under which AEGCo has agreed to make available to I&M and I&M has agreed to pay for the right to receive all power to which AEGCo may be entitled at the Rockport Plant. The amendments are intended to reflect the increased obligations of AEP and I&M, under the Capital Funds and Unit Power Agreements.

The overall limitation of AEGCo's borrowing authority was intended to provide AEGCo with sufficient source of external debt financing, based on the assumption that AEGCo would acquire and own a 35 percent undivided interest in the Rockport Plant. In the event that AEGCo becomes obligated to acquire and own a 50 percent interest in the two units of the Rockport Plant, AEGCo's needs for external funds in 1984 will increase substantially. Specifically, it is projected that AEGCo's need for borrowed funds will exceed $600 million by the end of 1984. Accordingly, AEGCo now requests that the Commission increase the overall limitation on AEGCo's borrowing authority under the Term Loan Agreement and the Revolving Credit Agreement (with or without any "interest rate swap") from $450 million at any one time outstanding to $650 million at any one time outstanding.

It is further proposed that the Commission extend AEGCo's authorization to borrow pursuant to the Term Loan Agreement and to enter into "interest rate swap" agreements through December 31, 1985. As of February 21, 1984, AEGCo has borrowed $225 million pursuant to nine separate Term Loan Agreements; it has not entered into any "interest rate swap" agreements. AEGCo continues to believe that it is in its best interests to "fix" up to $300 million of its debt requirements in the form of long-term borrowings under the Term Loan Agreement if and when interest rates become more favorable, and to enter into one or more "interest rate swap" arrangements with respect to up to $300 million principal amount of borrowings under the Revolving Credit Agreement when terms generally available are more attractive. No other terms or conditions of the Term Loan Agreement or proposed "interest rate swap" agreement are hereby affected.

The amended application-declarations and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by April 9, 1984, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the addresses specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the amended application-declarations, as filed or as they may be amended, may be granted and permitted to become effective.

For the Commission, by the Office of Public Utility Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 23250; 31-799]

Evmar Oil Corp.; Application To Be Declared Not To Be a Holding Company

March 19, 1984

Evmar Oil Corp. ("Evmar"), 450 Park Avenue, New York, New York 10022, has filed with this Commission an application and an amendment thereto pursuant to Section 2(a)(7) of the Public Utility Holding Company Act of 1935 ("Act") requesting that the Commission declare Evmar not to be a holding company.

Evmar, a privately-held Texas corporation, states that it purchased 841,400 shares of the common stock of Midlands Energy Company ("Midlands") between December 21, 1983, and February 3, 1984, an amount equal to approximately 9.6% of Midlands' voting securities. On March 3 it purchased 323,000 shares, under an option acquired February 9, thereby increasing its ownership to approximately 13.3% of the 8,755,031 outstanding shares.

KN Energy, Inc., ("KN") a retail gas utility company in Kansas and Nebraska and a pipeline company, owned through subsidiaries oil and gas properties and related businesses. In December 1983, these subsidiaries were transferred to Midlands and all the stock of Midlands was distributed to the shareholders of KN. On February 22, 1984, Midlands purchased from KN a retail gas distribution business serving about 10,000 customers in and around Fremont, Nebraska. It has also acquired more than 5% of the outstanding voting securities of Tennessee-Virginia Energy Corp., a gas utility company providing retail service in eastern Tennessee and southwestern Virginia.

Section 2(a)(7) of the Act defines a holding company as "any company which directly or indirectly owns, controls, or holds with power to vote [10%] or more of the voting securities of a public-utility company * * * unless the Commission * * * by order declares such company not to be a holding company." That section further provides that the Commission shall by order so declare if it finds the applicant "(i) does not alone or pursuant to [arrangements with others] * * * directly or indirectly control a public-utility [company] * * * by any means or device whatsoever, (ii) is not an intermediary company through which such control is exercised, and (iii) does not, direclty or indirectly, exercise (either alone or pursuant to [arrangements with others] such a controlling influence over the management or policies of any public utility [company] * * * as to make it necessary or appropriate in the public interest or for the protection of investors and consumers that the applicant be subject to the obligations, duties, and liabilities imposed in [the Act] upon holding companies."

Evmar states the order is essential to avoid any impediment under the Act to its acquisition of additional shares. It had suggested to the president of Midlands a leveraged buy out but its proposal was rejected. Midlands has alleged, in a pending action against Evmar (U.S.D.C. Colo., 84–399) that Evmar is seeking control.

The application and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by April 16, 1984, to Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant at the address specified above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing and will receive a copy of any notice or order issued. After said date, the application may be granted, or the Commission may take such other action as may be appropriate.

For the Commission, by the Office of Public Utility Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 20773; SR-BSE-83-10]

Self-Regulatory Organization; Boston Stock Exchange, Inc., Order Approving Proposed Rule Change

March 20, 1984.

The Boston Stock Exchange, Inc. ("BSE") One Boston Place, Boston, MA 02108, submitted on August 15, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, to amend its disciplinary rules as set forth in Chapter XXX of the BSE Constitution. The proposal includes provisions for the following, among other things: (i) Notice requirements for a statement of charges; (ii) the selection of hearing panels; (iii) the disqualification of panelists for conflicts of interest; (iv) the parties' right to counsel; (v) the parties' right to object to panelists for cause; (vi) the parties' right to records; (vii) the conduct of the hearing, including admissibility of evidence, the requirement of testimony under oath, and the examination of witnesses; (viii) stipulation agreements; (ix) the requirement of a decision in writing; and (x) the imposition of penalties.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 20624, February 6, 1984) and by publication in the **Federal Register** (49 FR 5405, February 13, 1984).[1] No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Release No. 20764; File No. SR-CBOE-84-9]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Chicago Board Options Exchange, Inc.

March 19, 1984.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 5, 1984, the Chicago Board Options Exchange, Inc. ("CBOE") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Exchange proposes to establish a fee of $25 in payment for the fingerprints collected and processed and identification photographs taken by the Exchange in connection with its membership application procedures. According to the Exchange, the proposed rule change is consistent with Section 6(b)(4) of the Act in that it provides for a reasonable fee that is equitably allocated among its members.

The foregoing change has become effective pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-CBOE-84-9.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 20766; SR-CSE-84-1]

Self-Regulatory Organization; Cincinnati Stock Exchange; Order Approving Proposed Rule Change

March 20, 1984.

The Cincinnati Stock Exchange ("CSE") 209 Dixie Terminal Building, Cincinnati, Ohio 45202, submitted on January 25, 1984, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to amend CSE Rule 11.9 by changing the minimum net capital requirements for the CSE's contributing and designated dealers to the greater of $50,000 or the amount required under Rule 15c3-1 of the Act. Currently, CSE contributing and designated dealers must maintain a minimum net capital of at least $250,000 and $500,000, respectively, computed pursuant to Rule 15c3-1. According to the CSE, the proposed net capital requirements for CSE market makers would be comparable to the minimum net capital levels required by other regional exchanges for their registered specialists.[1] In addition, the CSE states that the proposed change will further competition by permitting more market makers to become members of the CSE, thereby broadening the market open to investors.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 20618, February 3, 1984) and by publication in the **Federal Register** (49 FR 5407, February 13, 1984). No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and the regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84-8077 Filed 3-23-84; 8:45 am]

BILLING CODE 8010-01-M

[1] The minimum net capitalization required, for example, for specialists of the Midwest Stock Exchange ("MSE") and the Pacific Stock Exchange ("PSE") is the greater of either (i) equity sufficient to carry a specified position in a specialist's assigned stock(s) or (ii) liquid assets of a required minimum dollar amount. The minimum dollar requirement for MSE specialists is $50,000 under MSE Article XI, Rule 3(b) and, for PSE specialists, is $100,000 pursuant to PSE Rule V, Section 2(a). In addition, the minimum liquidating equity required by each dealer-specialist of the Boston Stock Exchange ("BSE") is $80,000 pursuant to BSE Chapter XXII, Section 2(b). The provisions of Rule 703 of the Philadelphia Stock Exchange ("Phlx") are also comparable to the CSE's proposed requirements in that the Phlx rule provides that each member or member organization must comply with net capital requirements prescribed by SEC Rule 15c3-1.

[Release No. 34-20768; File No. SR-NASD-84-7]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc.; Amendments to Code of Procedure

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 12, 1984, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Association proposed to amend Section 12(b) of the Code of Procedure for Handling Trade Practice Complaints by increasing to $2,500 the maximum fine which may be imposed by the summary complaint procedure. The present maximum fine is $1,000.

The Association proposed to amend the Explanation of the Board of Governors following Section 13 of this Code of Procedure to permit the resolution of a disciplinary action prior to the issuance of a complaint by means of a Letter of Acceptance, Waiver and Consent without requiring a respondent to make a formal admission to violations. The present procedure

requires a Letter of Admission, Waiver and Consent including a formal admisstion to violations.

II. Self-Regulatory Organization's Statement Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed amendments to the Code of Procedure for Handling Trade Practice Complaints are designed to fulfill the responsibility of the Association under Section 15A of the Securities Exchange Act of 1934, as amended, to "Provide a fair procedure for the disciplining of members and persons associated with members, the denial of membership to any person seeking membership therein, the barring of any person from becoming associated with a member thereof, and the prohibition or limitation by the Association of any person with respect to access to services offered by the Association or a member thereof.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Changes Received From Members, Participants or others

The Association did not solicit nor did it receive comments on the proposed amendments.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or
B. Institute proceedings to determine whether the proposed rule change should be disapproved

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be aviailable for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 20, 1984.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84-8079 Filed 3-23-84; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 20767; SR-NYSE-83-11]

Self-Regulatory Organization; New York Stock Exchange, Inc.; Filing of Amendment to Proposed Rule Change and Order Approving Proposed Rule Change

March 20, 1984.

The New York Stock Exchange, Inc. ("NYSE" or "Exchange"), 11 Wall Street, New York, NY 10005, submitted on April 23, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to modify portions of NYSE Rules 495C.10 and 499.10 relating to conflicts of interest involving NYSE-listed corporations or corporations applying for listing on the NYSE. The proposal would delete provisions stating that the Exchange should look for and consider possible conflicts of interest involving listees or prospective listees, their management, and principal stockholders.[1] The proposed amendments would leave the review and oversight of such matters primarily to the discretion of the listees and prospective listees. The proposal suggests no particular method of resolution, but states that a corporation's audit committee or a comparable body could be considered as the forum for review and oversight of potential conflict of interest situations.

In Amendment No. 2 to the proposed rule change, filed with Commission on February 21, 1984, the NYSE further amended Rule 495C.10 to state: (i) That the Exchange believes that a publicly owned company of the size and character appropriate for listing on the Exchange should be able to operate on its own merit and credit standing, and it should be free from the suspicion which may arise when business transactions are consummated with insiders; and (ii) that corporations applying for NYSE listing will be asked to confirm that they will appropriately review and oversee related party transactions on an on-going basis, and that the NYSE will continue to review proxy statements and other SEC filings disclosing related party transactions and to send reminder notices to listed companies where these situations seem to persist.[2]

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19759, May 12, 1983) and by publication in the **Federal Register** (48 FR 22667, May 19, 1983). No comments were

---

[1] The possible conflicts could include, for example, the leasing of property to or from a listed company, interests or options in subsidiaries of a listee, or interests in businesses that are competitors, suppliers, or customers of a listee.

[2] These amendments were also included in a letter submitted to the Commission by the NYSE in response to recommendations by the Commission staff that the NYSE continue to monitor compliance by NYSE listed companies with Exchange policy regarding conflicts of interest. *See* letter from Richard A. Grasso, Executive Vice President, NYSE, to Michael Cavalier, Branch Chief, Division of Market Regulation, dated February 8, 1984. In that letter, the Exchange stated further that (i) it will no longer require the elimination of potential conflicts of interest situations in prospective or currently listed companies; (ii) such evaluation would become the responsibility of the particular companies; (iii) in extreme circumstances, where it appears a corporation is disregarding the Exchange's modified policy concerning related party transactions, the corporation's suitability for continued listing under NYSE Rule 499 will be reviewed by the Exchange; and (iv) the Exchange will publicize the policy modification at the time it becomes effective and continue coverage in the NYSE Listed Company Manual (Section 307).

received with respect to the proposed rule filing.

This release also provides notice of Amendment No. 2 to the proposed rule change filed on February 21, 1984. Interested persons are invited to submit written data, views and arguments concerning the proposed rule change within 21 days from the date of publication of the submission in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–NYSE–83–11.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available at the principal office of the above-mentioned self-regulatory organization.

The Commission, in reviewing this proposal, requested further information from the NYSE about the procedures the NYSE currently is using to administer its conflict of interest rules, about any specific actions the NYSE has taken over the last two years (June 1, 1981 through June 3, 1983) to reduce or eliminate specific conflict situations, and about any instance where a corporation was denied listing or was delisted due to a conflict.[3] The NYSE responded that its procedures in administering its conflict rules include: (i) an initial review by the Exchange when a company is first being considered for listing, and (ii) ongoing periodic reviews by the Exchange after a company has been listed.[4] The NYSE stated that its general policy in dealing with conflict situations has been to insist that they be eliminated, either immediately or by agreement within a specific period, usually within two to five years following listing. The Exchange, however, stated that it never had occasion to seek a delisting or suspension over a conflict issue.

In connection with this filing, the NYSE has emphasized that its conflict policy was developed in the late 1950s at which time few companies had non-management directors or audit committees.[5] The NYSE has further stated that its approach to a conflicts problem has not been to determine whether a particular conflict may be beneficial or harmful to a company but simply to insist on its elimination. Accordingly, the NYSE claims that its policy has operated to eliminate conflicts even in cases where conflicts may have been fair and even beneficial to NYSE listees and their shareholders.

The NYSE now believes that the submission of conflict issues to independent audit committees or comparable bodies whose members are familiar with a company's internal arrangements and with the particular matters in question, would mark a more flexible and more appropriate response than a simple prohibition.[6] The Exchange has noted that, under the proposed rule changes, it would continue to consider conflict situations involving prospective listees in light of all pertinent facts and that it would retain its existing authority under NYSE Rule 499.10 to suspend or delist companies for non-compliance with Exchange policy.

The Commission views the proposed rule change, as amended, as continuing to provide sufficient protection to investors with respect to conflicts of interest within current or prospective NYSE listed companies. As originally developed in the 1950s, the NYSE conflicts policy was not designed to necessarily prohibit all conflict relationships. Rather, the policy in its current form provides only that the Exchange review and assess possible conflict situations involving listees or prospective listees and their management. As a practical matter, in administering this policy the NYSE has found it difficult to provide the flexible case-by-case review and evaluation of potential conflict situations perhaps envisioned when the policy was originally adopted. Instead, as noted above, the NYSE has in most cases simply prohibited conflicts or at most provided a period of time for listees to eliminate conflicts.

To provide the flexibility necessary to administer the NYSE's conflict objectives, the Commission believes it is appropriate, in the first instance, to permit conflict of interest situations to be evaluated and monitored by the particular corporation rather than the Exchange. The Commission believes that review by independent corporate bodies such as audit committees should prove adequate to assure that the corporation is operating free from suspicion that related party transactions are injuries to the corporation's integrity or financial condition. The Commission believes, however, that the Exchange must monitor compliance with stated Exchange policy by listed companies. In addition, continued review by the Exchange of corporate proxy statements and other filings with the Commission is essential to permit the Exchange to ensure such compliance. Amendment No. 2 to the proposed rule change adequately addresses these concerns. In particular, the Commission notes that the NYSE, in Amendment No. 2, reaffirms its policy that companies of the size and character appropriate for NYSE listing should be free from the suspicion that may arise from related party transactions. Finally, the Commission notes that NYSE Rule 499 will continue to permit the Exchange to delist a company in the event that a company disregards Exchange policy with respect to conflicts of interest.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder

---

[3] *See* letter from Richard T. Chase, Assistant Director, Division of Market Regulation, to Richard A. Grasso, Executive Vice President, NYSE, dated June 3, 1983.

[4] *See* letter from Richard A. Grasso, Executive Vice President, NYSE, to Richard T. Chase, Assistant Director, Division of Market Regulation, dated August 22, 1983 ("August 22, 1983 letter"). The Exchange noted in this letter that its sources for discovering potential conflicts tend to be the companies' own proxy statements and periodic reports to the Commission, and secondarily certain disclosures required under Section 104.01(8) of the NYSE Company Manual.

For the period extending from June 1, 1981 through June 3, 1983, the NYSE stated that it had reviewed for Exchange eligibility 186 companies of which it found 36 companies to have a total of 48 conflict situations. Of those 36 companies, 25 pursued NYSE listing by agreeing to eliminate their conflicts under specific terms. Of the remaining 11 companies, 6 failed to qualify for listing on other grounds, 4 qualified but did not pursue listing, and one qualified but declined to eliminate its conflicts. With respect to companies already listed on the Exchange during the period in question, 2 companies reportedly were advised by the Exchange to eliminate existing conflicts and are currently in the process of doing so.

[5] NYSE Rule 495H, adopted March 9, 1977, requires that each domestic company with common stock listed on the Exchange must maintain an audit committee "comprised solely of directors independent of management and free from any relationship that, in the option of its Board of Directors, would interfere with the exercise of independent judgment as a committee member."

[6] *See* August 22, 1983 letter, at pages 6–7. The Exchange emphasized that it has not developed a "lack of interest . . . in conflict situations" but that the "frontline responsibility to monitor and control conflict situations" should reside with "independent directors on the boards of listed companies and on the Audit Committees."

applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder. The Commission views the proposed rule change as consistent with Section 6(b)(5) under the Act in that it is designed to protect investors and the public interest.

The Commission finds good cause for approving the proposed rule change, as amended, prior to the thirtieth day after the date of publication of notice of filing of Amendment No. 2 in that the amendment is largely technical in nature and is for the purpose of clarifying provisions already contained in NYSE's rules as they are proposed to be amended. The amendment in part states NYSE policy already expressed in Section 307 of the NYSE Listed Company Manual with respect to conflicts of interest. In addition, it clarifies the NYSE's procedures in connection with monitoring compliance with the proposed Exchange policy.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84-8074 Filed 3-23-84; 8:45 am]

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Kanawha County, West Virginia

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA, in cooperation with the West Virginia Department of Highway (WVDOH), is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Kanawha County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Gale W. Macklay, District Engineer, Federal Highway Administration, 550 Eagan Street, Charleston, West Virginia 25301. Telephone (304) 348-2065, (FTS: 930-5931).

SUPPLEMENTARY INFORMATION: The Federal Highway Administration (FHWA), in cooperation with the West Virginia Department of Highways (WVDOH) will be preparing an Environmental Impact Statement on a proposal to construct a four-lane bridge and approach roadways across the Kanawha River connecting WVA 61 at Chelyan and US 60 at Quincy in Kanawha County, West Virginia. The total bridge length is 1700 feet to 2800 feet (depending on the alternative), in addition to the brige approaches. The proposed project is intended to provide a link between WV Route 61 and US Route 60, to replace the existing structure built in 1928 which is considered structurally deficient, to improve traffic flow and provide a more convenient acccess to and from the West Virginia Turnpike at the Chelyan Interchange.

Probable environmental effects of the proposed project include relocation of businesses and residences, potential for disruption of neighborhoods and possible 4(f) involvement based on existing historic significance of the Chelyan Bridge.

Six possible build alternatives as well as a no-build alternative are under consideration at this time.

FHWA and WVDOH will coordinate the proposed project with the Metropolitan Planning Agency and consult with other government agencies on their areas of responsibility. In addition, the following agencies will be requested to be cooperating agencies: U.S. Coast Guard, U.S. Army Corps of Engineers, U.S. Environmental Protection Agency, U.S. Department of the Interior, Fish and Wildlife Service, Department of Housing and Urban Development and the Advisory Council on Historic Preservation. A scoping meeting is to be held but details have not been determined at this time.

To ensure that the full range of issues related to the proposed action are addressed and the significant issues are identified, comments and suggestions are invited from interested parties.

Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction.)

Issued on March 19, 1984.

Gale W. Macklay,

District Engineer, Charleston, West Virginia.

[FR Doc. 84-7977 Filed 3-23-84; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; New Castle and Kent Counties, Delaware

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared for a proposed highway project in New Castle and Kent Counties, Delaware.

FOR FURTHER INFORMATION CONTACT: Mr. A. George Ostensen, Field Operations Engineer, Federal Highway Administration, Delaware Division, 300 S. New St., Room 2101, Dover, Delaware 19901. Telephone: (302) 734-5323. Mr. Raymond M. Harbeson, Jr., Project Manager, Delaware Department of Transportation, P.O. Box 778, Dover, Delaware 19903. Telephone (302) 736-4642.

SUPPLEMENTARY INFORMATION: The Federal Highway Administration (FHWA), in cooperation with the Delaware Department of Transportation (DelDOT) will prepare an Environmental Impact Statement (EIS) on a proposal to construct approximately 40 miles of four land divided, limited access highway in New Castle and Kent Counties, Delaware. The proposed facility will serve to releive U.S. Route 13, the main north-south route thru Delaware. The proposed facility would extend from south of Dover in Kent County to the vicinity of Delaware Routes 7 and 13 in new Castle County.

Various studies for alternate routes to U.S. Route 13 have been conducted since the mid to late 60's. These studies considered numerous alternatives; but, for various reasons, were never implemented. As part of this study, these previous studies will be reviewed and an updated look at possible alignments will be pursued. Alternatives to be considered will include (1) taking no action (no build), (2) improvements on existing alignment, (3) improvements on new alignment, and (4) a combination of (2) and (3).

A program of public involvement and coordination with Federal, State and Local agencies will be initiated. It is envisioned that involvement with the public and other agencies will continue throughout the development of the project. Scoping meetings will be held later this year.

To insure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, comments or questions concerning this action and the EIS should be addressed top the FHWA or DelDOT at the address provided above.

Catalog of Federal Domestic Assistance Program Number 20.205.

Highway Research Planning and Construction. The state intergovernmental review contacts established under Executive Order 12372 (former A–95 processes) regarding State and local clearinghouse review of Federal and Federally assisted programs and projects apply to this program.

Manuel A. Marks,

Division Administrator, Dover, Delaware.

[FR Doc. 84–7976 Filed 3–23–84; 8:45 am]

BILLING CODE 4910–22–M

Federal Railroad Administration

Petition(s) for Exemption or Waiver of Compliance

In accordance with 49 CFR §§ 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received requests for an exemption from or waiver of compliance with certain requirements of its safety standards. The individual petition(s) are described below, including the party seeking relief, the regulatory provisions involved, and the nature of the relief being requested.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Number RST–84–21) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. Communications received before May 7, 1984, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) in Room 5101, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

The individual petitions seeking an exemption or waiver of compliance are as follows:

Yakima Valley Transportation Company

(Waiver Petition Docket Number SA–84–1)

The Yakima Valley Transportation Company (YVT) seeks a waiver of compliance with certain provisions of the Railroad Safety Appliance Standards (49 CFR Part 231). The YVT seeks a permanent waiver of compliance with § 231.30(g) of the regulation for a Whiting TM4500 "Trackmobile". Section 231.30(g) requires that each locomotive used in switching service must have four (4) horizontal end handholds. The YVT indicates that it seeks this waiver because due to its special limited type operation, the installation of horizontal end handholds required by § 231.30(g) is not necessary for the safe operation of the Trackmobile. The YVT also indicates that the granting of such a waiver of compliance would be in the public interest and will not adversely affect public safety.

Louisville, New Albany and Corydon Railroad Company

(Waiver Petition Docket Number SA–84–3)

The Louisville, New Albany and Corydon Railroad Company (LNAC) seeks a waiver of compliance with certain provisions of the Railroad Safety Appliance Standards (49 CFR Part 231). The LNAC seeks a permanent waiver of compliance with § 231.30 of the regulation for one 1951 General Electric 45-ton diesel locomotive. Section 231.30 requires that locomotives used in switching service be equipped with specified safety appliances. The LNAC indicates that it seeks this waiver because the switching step modifications necessary for § 231.30 compliance are not economically justifiable due to their limited resources and type of operation.

Ferdinand Railroad Company

(Waiver Petition Docket Number SA–84–4)

The Ferdinand Railroad Company (FRDN) seeks a waiver of compliance with certain provisions of the Railroad Safety Appliance Standards (49 CFR Part 231). The FRDN seeks a permanent waiver of compliance with § 231.30 of the regulation for one 1951 General Electric 45-ton diesel locomotive. Section 231.30 requires that locomotives used in switching service be equipped with specified safety appliances. The FRDN indicates that it seeks this waiver because the locomotive modifications necessary for § 231.30 compliance are not economically justifiable due to their limited type operation.

Yakima Valley Transportation Company

(Waiver Petition Docket Number LI–84–1)

The Yakima Valley transportation company (YVT) seeks a waiver of compliance with certain provisions of the Railroad Locomotive Safety Standards (49 CFR Part 229). The YVT seeks a permanent waiver of compliance with 229.93(c) and 229.125(a) of the regulation for one Whiting TM4500 "Trackmobile". Section 229.93(c) requires that locomotives be equipped with a fuel safety cut-off device that can be hand operated from clearly marked locations, one inside the cab and one on each exterior side of the locomotive. Section 229.125(a) establishes minimum standards for front and rear headlights on locomotives. The YVT indicates that it seeks this waiver because due to its slow speed, limited type operation, the granting of such a waiver would be in the public interest and will not adversely affect public or railroad safety.

Louisville, New Albany and Corydon Railroad Company

(Waiver Petition Docket Number LI–84–2)

The Louisville, New Albany and Corydon Railroad Company (LNAC) seeks a waiver of compliance with certain provisions of the Railroad Locomotive Safety Standards (49 CFR Part 229). The LNAC seeks a permanent waiver of compliance with § 229.123 of the regulation for one 1951 General Electric 45-ton diesel locomotive. Section 229.123 requires that each lead locomotive shall be equipped with an end plate that extends across both rails, a pilot, or a snowplow. The LNAC indicates that it seeks this waiver because due to their limited operation, the locomotive modifications necessary for § 229.123 compliance would be a great hardship economically.

Ferdinand Railroad Company

(Waiver Petition Docket Number LI–84–3)

The Ferdinand Railroad Company (FRDN) seeks a waiver of compliance with certain provisions of the Railroad Locomotive Safety Standards (49 CFR Part 229). The FRDN seeks a permanent waiver of compliance with § 229.123 of the regulation for one 1951 General Electric 45-ton diesel locomotive. Section 229.123 requires that each lead locomotive shall be equipped with an end plate that extends across both rails, a pilot, or a snowplow. The FRDN indicates that it seeks this waiver

because due to their limited operation, the locomotive modifications necessary for § 229.123 compliance are not economically justifiable.

Port Bienville Railroad

(Waiver Petition Docket Number LI–84–4)

The Port Bienville Railroad (PBVR) seeks a waiver of compliance with certain provisions of the Railroad Locomotive Safety Standards (49 CFR Part 229). The PBVR seeks a permanent waiver of compliance with § 229.23(a) of the regulation for one General Electric 45-ton diesel locomotive. Section 229.23(a) requires that at each periodic inspection, a locomotive shall be positioned so that a person may safely inspect the entire underneath portion of the locomotive. The PBVR indicates that its seeks this waiver because although no inspection pit is available, the railroad feels the locomotive can be safely inspected.

Burlington Northern Railroad

(Waiver Petition Docket Number RSFC–84–1)

The Burlington Northern Railroad (BN) seeks a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The BN seeks a temporary waiver of compliance with § 215.121(d) of the regulation for 5,304 freight cars. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The BN indicates that it seeks this waiver because, although 12,523 freight cars have already been retrofitted, complete § 215.121(d) compliance is not expected until August 31, 1984.

Chessie System Railroads

(Waiver Petition Docket Number RSFC–84–2)

The Chessie System Railroads seek a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The Chessie System Railroads seek a temporary waiver of compliance with § 215.121(d) of the regulation for 959 freight cars in active service. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The Chessie System Railroads indicate that they seek this waiver because complete § 215.121(d) compliance achieved by practical retrofitting is not expected until June 30, 1985.

Chicago and North Western Transportation Company

(Waiver Petition Docket Number RSFC–84–3)

The Chicago and North Western Transportation Company (CNW) seeks a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The CNW seeks a temporary waiver of compliance with § 215.121(d) of the regulation for 674 freight cars in active service. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The CNW indicates that it seeks this waiver because considering the current practical retrofitting effort, complete § 215.121(d) compliance is not expected until July 1, 1985.

Atchison, Topeka and Santa Fe Railway Company

(Waiver Petition Docket Number RSFC–84–4)

The Atchison, Topeka and Santa Fe Railway Company (ATSF) seeks a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The ATSF seeks temporary waiver of compliance with § 215.121(d) of the regulation for 3,607 freight cars. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The ATSF indicates that it seeks this waiver because considering the current practical effort to retrofit 37 cars per week, complete § 215.121(d) compliance is not expected until December 31, 1985.

Union Pacific Railroad Company

(Waiver Petition Docket Number RSFC–84–5)

The Union Pacific Railroad Company (UP) seeks a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The UP seeks a temporary waiver of compliance with § 215.121(d) of the regulation for 1,561 freight cars in active service. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The UP indicates that it seeks this waiver because considering the current practical effort to retrofit 90 cars per week, complete § 215.121(d) compliance is not expected until September 1, 1984.

Seaboard System Railroad

(Waiver Petition Docket Number RSFC–84–6)

The Seaboard System Railroad (SBD) seeks a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The SBD seeks a temporary waiver of compliance with § 215.121(d) of the regulation for 1,860 freight cars. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The SBD indicates that is seeks this waiver because "the proliferation of cars in storage contributes to the problem of locating all needing modification", thus, complete § 215.121(d) compliance is not expected until December 31, 1984.

Missouri Pacific Railroad Company

(Waiver Petition Docket Number RSFC–84–7)

The Missouri Pacific Railroad Company (MP) seeks a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The MP seeks a temporary waiver of compliance with § 215.121(d) of the regulation for 359 freight cars in active service. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The MP indicates that it seeks this waiver because considering the current practical retrofit effort, complete section 215.121(d) compliance is not expected until December 31, 1984.

Southern Pacific Transportation Company

St. Louis Southwestern Railway Company

(Waiver Petition Docket Number RSFC–84–8)

The Southern Pacific Transportation Company (SP) and the St. Louis Southwestern Railway Company (SSW) seek a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The SP and SSW seek a temporary waiver of compliance with § 215.121(d) of the regulation for 4,932 freight cars in active service. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The SP and SSW indicate that they seek this waiver because considering the current practical retrofit effort of 52 cars per week, complete § 215.121(d) compliance is not expected until December 31, 1985.

Consolidated Rail Corporation

(Waiver Petition Docket Number RSFC–84–10)

The Consolidated Rail Corporation (CR) seek a waiver of compliance with certain provisions of the Railroad Freight Car Safety Standards (49 CFR Part 215). The CR seek a temporary waiver of compliance with § 215.121(d) of the regulation for 2,745 freight cars. Section 215.121(d) requires that a railroad may not place or continue in service a car if, after December 1, 1983, the car is a box car and its side doors are not equipped with operative safety hangers, or the equivalent, to prevent the doors from becoming disengaged. The CR indicates that ninety percent of these cars are in storage and these cars will be retrofitted before being placed in active service. The CR also indicates that it seeks this waiver because it would be "most uneconomical . . . to attempt to sort out the cars needing retrofit from the bulk of the cars which are in storage". The CR requests an extension of compliance until December 31, 1985.

Issued in Washington, D.C., on March 19, 1984.

Joseph W. Walsh,

Associate Administrator

[FR Doc. 84–8072 Filed 3–23–84; 8:45 am]

BILLING CODE 4910–06–M

National Highway Traffic Safety Administration

National Highway Safety Advisory Committee; Public Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App. I), notice is hereby given of a hearing to be held by the Driver Related Issues Subcommittee of the National Highway Safety Advisory Committee. The hearing will address issues related to the elderly driver. The hearing will take place on April 12 and 13, from 8:30 a.m. to 5:00 p.m., in room 8236 of the DOT Headquarters Building, 400 Seventh Street, SW., Washington, D.C.

Individuals or organizations interested in presenting testimony before the Subcommittee should contact Kathy Hasse, Committee Management, NHTSA, on telephone 202–426–2870, in order to arrange for time on the agenda. Presentations will be limited to 15 minutes.

All meetings are open to the interested public, but may be limited to the space available. Members of the public may present a written statement to the Committee at any time. This meeting is subject to the approval of the appropriate DOT officials. Additional information and full agenda may be obtained from the NHTSA Executive Secretariat, 400 Seventh Street, SW., Room 5221, Washington, D.C. 20590, telephone 202–426–2870.

Issued in Washington, D.C. on: March 21, 1984.

Robert E. Doherty,

Executive Secretary.

BILLING CODE 4910–59–M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular, Public Debt Series—No. 8–84]

Treasury Notes of March 31, 1988; Series L–1988

Washington, March 21, 1984.

1. Invitation for Tenders

1. 1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $6,000,000,000 of United States securities, designated Treasury Notes of March 31, 1988, Series L–1988 (CUSIP No. 912827 QQ 8). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2. 1. The securities will be dated April 2, 1984, and will bear interest from that date, payable on a semiannual basis on September 30, 1984, and each subsequent 6 months on March 31 and September 30 until the principal becomes payable. They will mature March 31, 1988, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2. 2. The securities are subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2. 3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2. 4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2. 5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3. 1. Tenders will be received at Federal Reserve Banks and Branches

and at the Bureau of the Public Debt, Washington, D.C. 20239, prior to 1:00 p.m., Eastern Standard time, Tuesday, March 27, 1984. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, March 26, 1984, and received no later than Monday, April 2, 1984.

3. 2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3. 3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3. 4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3. 5. A noncompetitive bidder may not have entered into an agreement, or make an agreement with respect to the purchase or sale or other disposition of any noncompetitive awards of this issue in this auction prior to the designated closing time for receipt of tenders.

3. 6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3. 7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4. 1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5. 1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Monday, April 2, 1984. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Thursday, March 29, 1984. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5. 2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5. 3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt.

Washington, D.C. 20239. The securities must be delivered at the expense and risk of the holder.

5. 4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6. 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6. 2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Gerald Murphy,

Acting Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Department Circular, Public Debt Series—No. 9-84]

Treasury Notes of April 15, 1991; Series E-1991

Washington, March 21, 1984.

1. Invitation for Tenders

1. 1. The Secretary of the Treasury, under the authority of Chapter 31, of Title 31, United States Code, invites tenders for approximately $5,250,000,000 of United States securities, designated Treasury Notes of April 15, 1991, Series E-1991 (CUSIP No. 912827 QR 6). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2. 1. The securities will be dated April 4, 1984, and will bear interest from that date, payable on a semiannual basis on October 15, 1984, and each subsequent 6 months on April 15 and October 15 until the principal becomes payable. They will mature April 15, 1991, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2. 2. The securities are subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2. 3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2. 4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2. 5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3. 1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20239, prior to 1:00 p.m., Eastern Standard time, Wednesday, March 28, 1984. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, March 27, 1984, and received no later than Wednesday, April 4, 1984.

3. 2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3. 3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3. 4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3. 5. A noncompetitive bidder may not have entered into an agreement, or make an agreement with respect to the purchase or sale or other disposition of any noncompetitive awards of this issue in this auction prior to the designated closing time for receipt of tenders.

3. 6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to

the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3. 7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4. 1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5. 1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Wednesday, April 4, 1984. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, April 2, 1984. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as reqired on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5. 2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5. 3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20239. The securities must be delivered at the expense and risk of the holder.

5. 4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6. 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6. 2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Gerald Murphy,

Acting Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Department Circular, Public Debt Series—No. 10-84]

Treasury Bonds of 2004

Washington, March 21, 1984.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $3,750,000,000 of United States securities, designated Treasury Bonds of 2004 (CUSIP No. 912810 DH 8). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated April 5, 1984, and will bear interest from that date, payable on a semiannual basis on November 15, 1984, and each subsequent 6 months on May 15 and November 15 until the principal becomes payable. They will mature May 15, 2004, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The securities are subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts.

Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20239, prior to 1:00 p.m., Eastern Standard time, Thursday, March 29, 1984. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, March 28, 1984, and received no later than Thursday, April 5, 1984.

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalties; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. A noncompetitive bidder may not have entered into an agreement, or make an agreement with respect to the purchase or sale or other disposition of any noncompetitive awards of this issue in this auction prior to the designated closing time for receipt of tenders.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 95.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Goverment accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4. 1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5. 1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Thursday, April 5, 1984. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, April 3, 1984. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5. 2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20239. The securities must be delivered at the expense and risk of the holder.

5. 4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6. 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6. 2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Gerald Murphy,

Acting Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Number 101-30]

Designation of Assistant Secretary (Administration) To Act as "Head of the Agency" for Procurement Matters

Pursuant to the authority vested in me as Secretary of the Treasury by Title III of the Federal Property and Administrative Services Act of 1949 (63 Stat. 377, 393), as amended (41 U.S.C. Chapter 4), particularly 41 U.S.C. 252, and 31 U.S.C. 321(b), and pursuant to the provisions of 41 U.S.C. 259, it is hereby ordered as follows:

1. The Assistant Secretary (Administration) is hereby designated to act as the Head of the Agency with respect to procurement. The Assistant Secretary (Administration) shall:

a. Prescribe and publish the Treasury Acquisition/Procurement Regulation and other directives pertaining to procurement including, but not limited to, those incorporated in 48 CFR Chapter 10.

b. Delegate to appropriate officials within the Office of the Secretary and bureaus of the Department authority to appoint Contracting Officers for the United States of America.

c. Make all determinations and findings required by statute or regulation to be made by the Head of the Agency.

2. The authority delegated herein shall be exercised in accordance with the applicable limitations and requirements of the Federal Property and Administrative Services Act, as amended; the Federal Acquisition Regulation, 48 CFR Chapter 1; the applicable portions of the Federal Property Management Regulations, 41 CFR Chapter 101; as well as other relevant statutes and regulations.

3. This Order becomes effective on April 1, 1984, at which time Treasury Department Order No. 208 (Revision 4), dated June 29, 1977, will be superseded.

Dated: March 7, 1984.

Donald T. Regan,

Secretary.

2

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m., Tuesday, March 27, 1984.

LOCATION: Third Floor Hearing Room, 1111 18th Street, NW., Washington, D.C.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED:

Kerosene Heaters: Voluntary Standard Status

The staff will brief the Commission on the status of activities to upgrade existing voluntary standards for kerosene heaters. Representatives of Underwriters' Laboratories and the National Kerosene Heater Association will also address the Commission.

(For a recorded message containing the latest agenda information call 301-492-5709.)

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Avenue, Bethesda, Maryland 20207, 301-492-6800.

Sheldon D. Butts,

Deputy Secretary.

3

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m., Wednesday, March 28, 1984.

LOCATION: Third Floor Hearing Room, 1111 18th Street, NW., Washington, D.C.

STATUS: Open to the public:

MATTERS TO BE CONSIDERED:

1. Indoor Air Quality: Status Report

The staff will brief the Commission on a status report on the Indoor Air Quality Monitoring Study in 40 homes at Oak Ridge National Laboratory (ORNL).

2. Crib Hardware: 30(d) Rule, Final

The Commission will consider issues related to failures of hardware on cribs and a final rule under Section 30(d) of the Consumer Product Safety Act, which transfers the regulation of risks of injury associated with crib hardware failures from the Federal Hazardous Substances Act to the Consumer Product Safety Act.

Closed to the public:

3. Enforcement Matter OS #4112

The Commission will consider enforcement matter OS #4112.

(For a recorded message containing the latest agenda information call: 301-492-5709.)

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Avenue, Bethesda, Maryland 20207.

FEDERAL ENERGY REGULATORY COMMISSION

March 21, 1984.

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. 94-409), 5, U.S.C. 552b:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

TIME AND DATE: 10:00 a.m., March 28, 1984.

PLACE: 825 North Capitol Street, NE., Room 9306, Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Acting Secretary, Telephone (202) 357-8400.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Division of Public Information.

Consent Power Agenda

788th Meeting—March 28, 1984: Regular Meeting (10:00 a.m.)

Part II

Department of Defense

48 CFR Ch. 2
DoD FAR Supplement; Final Rule

DEPARTMENT OF DEFENSE

48 CFR Ch. 2

DoD FAR Supplement

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: The Federal Acquisition Regulation (FAR) establishes (i) a single regulation for use by all executive agencies in their acquisition of supplies and services with appropriated funds; and (ii) the Federal Acquisition Regulations System consisting of the FAR and agency acquisition regulations that implement or supplement the FAR. The FAR and the DoD FAR Supplement will replace the Defense Acquisition Regulation (DAR) and will be effective for new solicitations issued on or after April 1, 1984. Provisions and clauses in the FAR and the DoD FAR Supplement shall not be included in solicitations issued prior to April 1, 1984. The DAR will remain in effect for those solicitations issued prior to April 1, 1984.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: J. Brannan, Director, Defense Acquisition Regulation Council, OUSDRE(AM)(DARS), OUSDRE(M&RS), Room 3D 139, Pentagon, Washington, D.C. 20301, telephone (202) 697–7266.

SUPPLEMENTARY INFORMATION:

Note.—Copies of the DoD FAR Supplement in the **Federal Register**, looseleaf, and CFR form may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Suggestions or other comments concerning this reformatting of existing DoD acquisition policies and procedures should be addressed to: J. Brannan, Director, Defense Acquisition Regulatory Council, OUSDRE(AM)(DARS), OUSDRE(M&RS), Room 3D139, Pentagon, Washington, D.C. 20301, telephone (202) 697–7266. The DoD FAR Supplement will be effective April 1, 1984.

List of Subjects in 48 CFR Chapter 2

Government procurement.

For the reasons stated in the preamble, there is established in the Code of Federal Regulations Title 48—Federal Acquisition Regulations System, Chapter 2—Department of Defense, to read as furnished in this document.

APRIL 1984 EDITION

Foreword

The Department of Defense Supplement to the Federal Acquisition Regulation (FAR) is issued under statutory authorities of the Secretary of Defense. The FAR and the DoD FAR Supplement will replace the Defense Acquisition Regulation (DAR) and will be effective for new solicitations issued on or after 1 April 1984. Provisions and clauses in the FAR and this Supplement shall not be included in solicitations issued prior to 1 April 1984. Those provisions and clauses shall be included in solicitations issued on or after 1 April 1984, but need not be included in solicitations already in process of preparation when their inclusion would cause an undue delay in the solicitation.

The DAR, FAR, and DoD FAR Supplement contain directions to DoD contracting personnel as to (i) what provisions, clauses and cost principles are authorized for DoD contracts and (ii) what other procedures and actions they must follow in awarding and administering DoD contracts. Contracts will be administered in accordance with the provisions set forth therein, e.g., a contract citing the FAR cost principles will be administered in accordance with applicable paragraphs of the FAR and this DoD FAR Supplement. The noncontractual procedures to be followed by DoD contracting personnel will, for the most part, be as directed by the FAR and this Supplement on 1 April 1984. But many contracts will be affected by both the DAR and the FAR. As an example, a contract resulting from a solicitation issued before 1 April may require administration based on the DAR clauses and cost principles while the actions of the contracting officer relating to contract reporting, contract close-out, and other such matters, are as directed by the FAR (to the extent nothing in the contract requires otherwise). Applicable DAR appendices, manuals, and supplements are referenced in the Table of Contents and continue in use until they are updated, cancelled or superseded.

Certain DAR deviations have been authorized without established terms. Others have been, or may be, approved for terms extending beyond the effective date of the FAR. All such deviations shall, notwithstanding their stated terms, terminate no later than the effective date of the FAR. The foregoing does not affect DAR deviations incorporated in contracts awarded prior to the FAR's effective date.

The DoD FAR Supplement contains material that implements the FAR, as well as supplementary material that is unique to the Department of Defense. This Supplement is not a stand-alone document and must be read in conjunction with the FAR.

Prior to the effective date of this document, a Defense Acquisition Circular (DAC) will be published to update it to reflect current legislation and DoD acquisition policy. The first change to this Supplement will be numbered Defense Acquisition Circular 84–1 and later DACs will be numbered in the same series (e.g., 84–2).

Consistent with the FAR, this document generally represents a restructuring and reformatting of current DAR policy. Due to the compressed nature of the DAR-to-FAR conversion, inadvertent errors may have been made. A form for correcting errors in the FAR and this Supplement such as misspelled words, omitted words or lines, or errors in format, is attached. Please do not use this form for submission of suggested revisions to the content of this Supplement. Proposed revisions to the FAR and this Supplement will be submitted by DoD personnel in accordance with departmental procedures. Other interested parties may submit proposed revisions to this Supplement directly to the DAR Council.

Requests for copies of the Regulation should be made through normal departmental distribution sources or directly to the Government Printing Office, Washington, D.C. 20402.

James T. Brannan,

Director, Defense Acquisition Regulatory Council.

EDITORIAL NOTE

The Department of Defense FAR Supplement is also printed by the DAR Council in looseleaf format. The loose leaf edition formed the basis for this CFR edition. Because the codification structure used in the loose leaf edition does not conform to the structure required to ensure codification in Chapter 2 of Title 48, Code of Federal Regulations, the Office of the Federal Register has redesignated the DoD FAR supplement to meet its codification requirements.

In general, the major redesignations are of two types.

1. The Office of the Federal Register has assigned Chapter 1 (Parts 1–99) of Title 48 CFR to the jointly issued FAR regulations. Supplementing agency regulations are to be issued in Chapters 2 to 99 of Title 48. OFR has assigned Chapter 2 (consisting of Parts 200–299) to the Department of Defense for its DoD FAR Supplement. Since the loose leaf DoD FAR Supplement uses the exact same numbers as the basic FAR regulations, the OFR has found it necessary to renumber all DoD FAR Supplement units by incrementing the Part numbers by 200. Thus, in the loose leaf edition a citation to 4.105 of the DoD FAR Supplement would become 204.105 in the CFR edition; a citation to 45.505.14 (a) (3)

in the loose leaf would become 245.505–14 (a) (3) in the CFR edition.

2. The FAR provides for both implementing and supplementing agency regulations, and adopts an editorial convention known as the "Rule of 70" to distinguish supplementary regulations for which there is no corresponding counterpart. (See 48 CFR 1.303). The FAR only describes supplementation down to the subsection unit level. In some cases, supplemental material in subdivisions below the section or subsection level (i.e., (a), (a)(1), (a)(1)(i), or (a)(1)(i)(A)) may be indicated by use of (70) through (89) in the DoD FAR Supplement.

The CFR has a standardized paragraphing structure as specified in 1 CFR 21.11(h) which sets up a hierarchy of paragraphs using alphabetic characters, arabic numerals and lower case roman numerals. For example, 1.1 (d) (3) (iv) or 3.5 (g) (17) (ii). Because the DoD FAR Supplement's use of (70), (71) etc., does not follow sequentially the specified CFR codification style, OFR has adopted a convention for use with the DoD FAR Supplement. For purposes of the **Federal Register** and the **Code of Federal Regulations** publications, an "S–" is added within the parenthesis to indicate supplemental material. For example, 204.804–1(S–70) or 204.804–5(a)(S–70).

Title 48 of the Code of Federal Regulations is amended by establishing Chapter 2 to read as follows:

CHAPTER 2—DEPARTMENT OF DEFENSE

SUBCHAPTER A—GENERAL

Part 201 Federal Acquisition Regulations System
Part 202 Definitions of words and terms
Part 203 Improper business practices and personal conflicts of interest
Part 204 Administrative matters
Part 205 Publicizing contract actions
Part 206 [Reserved in FAR]

SUBCHAPTER B—ACQUISITION PLANNING

Part 207 Acquisition planning
Part 208 Required sources of supplies and services
Part 209 Contractor qualifications
Part 210 Specifications, standards, and other purchase descriptions
Part 211 Acquisition and distribution of commercial products
Part 212 Contract delivery or performance

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

Part 213 Small purchase and other simplified purchase procedures
Part 214 Formal advertising
Part 215 Contracting by negotiation
Part 216 Types of contracts
Part 217 Special contracting methods
Part 218 [Reserved in FAR]

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

Part 219 Small business and small disadvantaged business concerns
Part 220 Labor surplus area concerns
Part 221 [Reserved in FAR]
Part 222 Application of labor laws to government acquisitions
Part 223 Environmental, conservation; and occupational safety
Part 224 Protection of privacy and freedom of information
Part 225 Foreign acquisition
Part 226 [Reserved in FAR]

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

Part 227 Patents, data, and copyrights
Part 228 Bonds and insurance
Part 229 Taxes
Part 230 Cost accounting standards
Part 231 Contract cost principles and procedures
Part 232 Contract financing
Part 233 Disputes and appeals

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

Part 234 Major system acquisition
Part 235 Research and development contracting
Part 236 Construction and architect-engineer contracts
Part 237 Service contracting
Part 238 Federal supply schedule contracting
Part 239 Management, acquisition, and use of information resources
Part 240 [Reserved in FAR]
Part 241 [Reserved in FAR]

SUBCHAPTER G—CONTRACT MANAGEMENT

Part 242 Contract administration
Part 243 Contract modifications
Part 244 Subcontracting policies and procedures
Part 245 Government property
Part 246 Quality assurance
Part 247 Transportation
Part 248 Value engineering
Part 249 Termination of contracts
Part 250 Extraordinary contractual actions
Part 251 Use of government sources by contractors

SUBCHAPTER H—CLAUSES AND FORMS

Part 252 Solicitation provisions and contract clauses
Part 253 Forms

SUBCHAPTER I—AGENCY SUPPLEMENTARY REGULATIONS

Part 270 Acquisition of computer resources

Table of Subchapters, Parts and Subparts

SUBCHAPTER A—GENERAL

Part 201—Federal Acquisition Regulations System

Subpart
201.1 Purpose, authority, issuance
201.2 Administration
201.3 Agency acquisition regulations
201.4 Deviations from the FAR
201.5 No DoD FAR supplement
201.6 Contracting authority and responsibilities

Part 202—Definitions of Words and Terms

202.1 Definitions
202.2 No DoD FAR supplement

Part 203—Improper Business Practices and Personal Conflicts of Interest

203.1 Safeguards
203.2 Contract gratuities to government personnel
203.3 Reports of identical bids and suspected antitrust violations
203.4 Contingent fees
203.5 Other improper business practices
203.6 No DoD FAR supplement

Part 204—Administrative Matters

204.1 No DoD FAR supplement
204.2 Contract distribution
204.3 [Reserved in FAR]
204.4 No DoD FAR supplement
204.5 [Reserved in FAR]
204.6 Contract reporting
204.7 Contractor records retention
204.8 Contract files
204.70 Uniform procurement instruction identification numbers
204.71 Uniform contract line item numbering system

Part 205—Publicizing Contract Actions

205.1 Dissemination of Information
205.2 Synopses of Proposed Contracts
205.3 Synopses of Contract Awards
205.4 Release of Information
205.5 Paid Advertisements

Part 206—[Reserved in FAR]

SUBCHAPTER B—ACQUISITION PLANNING

Part 207—Acquisition Planning

207.1 Acquisition Plans
207.2 [Reserved in FAR]
207.3 Contractor Versus Government Performance
207.4 Equipment Lease or Purchase

Part 208—Required Sources of Supplies and Services

208.1 No DoD FAR Supplement
208.2 No DoD FAR Supplement
208.3 Acquisition of Utility Services
208.4 Ordering from Federal Supply Schedules
208.5 [Reserved in FAR]
208.6 No DoD FAR Supplement
208.7 No DoD FAR Supplement
208.8 No DoD FAR Supplement
208.9 [Reserved in FAR]
208.10 [Reserved in FAR]
208.11 No DoD FAR Supplement
208.70 Coordinated Procurement
208.71 Commodity Assignments
208.72 Procurement for NASA
208.73 Miniature and Instrument Ball Bearings
208.74 Precision Components for Mechanical Time Devices
208.75 High-Purity Silicon

Part 209—Contractor Qualifications

209.1 Responsible Prospective Contractors
209.2 Qualified Products
209.3 First Article Testing and Approval
209.4 Debarment, Suspension, and Ineligibility
209.5 No DoD FAR Supplement
209.6 No DoD FAR Supplement
209.7 No DoD FAR Supplement

Part 210—Specifications, Standards, and Other Purchase Descriptions

Part 211—Acquisition and Distribution of Commercial Products

No DoD FAR Supplement

Part 212—Contract Delivery or Performance

212.1 Delivery or Performance Schedules
212.2 Liquidated Damages
212.3 Priorities, Allocations, and Allotments
212.4 Variation in Quantity
212.5 No DoD FAR Supplement

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

Part 213—Small Purchase and Other Simplified Purchase Procedures

213.1 General
213.2 Blanket Purchase Agreements
213.3 Fast Payment Procedure
213.4 Imprest Fund
213.5 Purchase Orders

Part 214—Formal Advertising

214.1 No DoD FAR Supplement
214.2 Solicitation of Bids
214.3 No DoD FAR Supplement
214.4 Opening of Bids and Award of Contract
214.5 Two-Step Formal Advertising

Part 215—Contracting by Negotiation

215.1 General Requirements for Negotiation
215.2 Negotiation Authorities
215.3 Determinations and Findings to Justify Negotiation
215.4 Solicitation and Receipt of Proposals and Quotations
215.5 Unsolicited Proposals
215.6 Source Selection
215.7 Make-or-Buy Programs
215.8 Price Negotiation
215.9 Profit
215.10 Preaward and Postaward Notifications, Protests and Mistakes

Part 216—Types of Contracts

216.1 Selecting Contract Types
216.2 Fixed-Price Contracts
216.3 Cost-Reimbursement Contracts
216.4 Incentive Contracts
216.5 Indefinite-Delivery Contracts
216.6 Time-and-Materials, Labor-Hour, and Letter Contracts
216.7 Agreements

Part 217—Special Contracting Methods

217.1 Multi-Year Contracting
217.2 Options
217.3 [Reserved in FAR]
217.4 No DoD FAR Supplement
217.5 Interagency Acquisitions Under the Economy Act
217.6 Management and Operating Contracts
217.70 Exchange of Non-Excess Personal Property in DoD
217.71 Master Agreement for Repair and Alteration of Vessels
217.72 Acquisition of Component Parts
217.73 Special Commodities

Part 218—[Reserved in FAR]

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

Part 219—Small Business and Small Disadvantaged Business Concerns

219.1 Terms and Size Standards
219.2 Policies
219.3 No DoD FAR Supplement
219.4 Cooperation with the Small Business Administration
219.5 Set-Asides for Small Business
219.6 Certificates of Competency and Determinations of Eligibility
219.7 Subcontracting With Small Business and Small Disadvantaged Business Concerns
219.8 Contracting with the Small Business Administration (The 8(a) Program)
219.9 No DoD FAR Supplement

Part 220—Labor Surplus Area Concerns

220.1 No DoD FAR Supplement
220.2 No DoD FAR Supplement
220.3 No DoD FAR Supplement
220.70 Labor Surplus Area, Policy and Procedures

Part 221—[Reserved in FAR]

Part 222—Application of Labor Laws to Government Acquisitions

222.1 Basic Labor Policies
222.2 No DoD FAR Supplement
222.3 No DoD FAR Supplement
222.4 Labor Standards for Contracts Involving Construction
222.5 [Reserved in FAR]
222.6 Walsh-Healey Public Contracts Act
222.7 [Reserved in FAR]
222.8 Equal Employment Opportunity
222.9 No DoD FAR Supplement
222.10 Service Contract Act of 1965
222.11 No DoD FAR Supplement
222.12 [Reserved in FAR]
222.13 Special Disabled and Vietnam Era Veterans
222.14 Employment of the Handicapped
222.70 Safety and Health Regulations for Shipyard and Related Employment
222.71 Fair Labor Standards Act of 1938

Part 223—Environment, Conservation, and Occupational Safety

223.1 No DoD FAR Supplement
223.2 No DoD FAR Supplement
223.3 No DoD FAR Supplement
223.4 No DoD FAR Supplement

Part 224—Protection of Privacy and Freedom of Information

224.1 Protection of Individual Privacy
224.2 Freedom of Information Act

Part 225—Foreign Acquisition

225.1 Buy American Act—Supplies
225.2 Buy American Act—Construction Materials
225.3 Balance of Payments Program
225.4 Purchases Under the Trade Agreements of 1979
225.5 Payment in Local Foreign Currency
225.6 Customs and Duties
225.7 Restrictions on Certain Foreign Purchases
225.8 International Agreements and Coordination
225.9 Omission of the Examination of Records Clause
225.70 Appropriations Act Restrictions
225.71 Canadian Purchases
225.72 Military Assistance Program Acquisitions
225.73 Acquisitions for Foreign Military Sales
225.74 Purchases From NATO Participating Country Sources
225.75 Specific Defense Cooperation Country Agreements
225.76 Use of U.S. Owned Foreign Currency for Payments

Part 226—[Reserved in FAR]

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

Part 227—Patents, Data and Copyrights

227.1 Patents
227.2 Rights in Technical and Other Data and Copyrights
227.3 Foreign License and Technical Assistance Agreements
227.4 Processing Licenses, Assignments, and Infringement Claims

Part 228—Bonds and Insurance

228.1 Bonds
228.2 No DoD FAR Supplement
228.3 Insurance
228.70 Indemnification
228.71 Accident Reporting and Safety

Part 229—Taxes

229.1 General
229.2 Federal Excise Taxes
229.3 State and Local Taxes
229.4 Contract Clauses

Part 230—Cost Accounting Standards

230.1 General
230.2 No DoD FAR Supplement
230.3 No DoD FAR Supplement
230.4 CAS Administration
230.70 Facilities Capital Employed for Facilities in Use
230.71 Facilities Capital Employed for Facilities Under Construction

Part 231—Contract Cost Principles and Procedures

231.1 Applicability
231.2 Contracts with Commercial Organizations
231.3 No DoD FAR Supplement
231.4 [Reserved in FAR]
231.5 [Reserved in FAR]
231.6 No DoD FAR Supplement
231.7 No DoD FAR Supplement

Part 232—Contract Financing

232.1 General
232.2 [Reserved in FAR]
232.3 Loan Guarantees for Defense Production
232.4 Advance Payments
232.5 Progress Payments Based on Costs
232.6 Contract Debts
232.7 No DoD FAR Supplement
232.8 Assignment of Claims

Part 233—Disputes and Appeals

233.70 Certification Under Section 813 of Public Law 95-485

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

Part 234—Major System Acquisition

Part 235—Research and Development Contracting

235.70 Short Form Research Contract
235.71 Recovery of Nonrecurring Costs on Commercial Sales of Defense Products and Technology

Part 236—Construction and Architect-Engineering Contracts

236.1 General
236.2 Special Aspects of Contracting for Construction
236.3 Special Aspects of Formal Advertising in Construction Contracting
236.4 Special Procedures for Negotiation of Construction Contracts
236.5 Contract Clauses
236.6 Architect-Engineer Services
236.7 No DoD FAR Supplement
236.70 Construction in Foreign Countries
236.71 Termination of Contracts
236.72 Patents, Data and Copyrights

Part 237—Service Contracting

237.1 Service Contracts—General
237.2 Consulting Services
237.3 Dismantling, Demolition, or Removal of Improvements
237.70 Engineering and Technical Services
237.71 Mortuary Services
237.72 Laundry and Dry Cleaning Services
237.73 Educational Service Agreements
237.74 Communication Services
237.75 Services of Students at Research and Development Laboratories

Part 238—Federal Supply Schedule Contracting

238.1 No DoD FAR Supplement
238.2 No DoD FAR Supplement

Part 239—Management, Acquisition, and Use of Information Resources

Part 240—[Reserved in FAR]

Part 241—[Reserved in FAR]

SUBCHAPTER G—CONTRACT MANAGEMENT

Part 242—Contract Administration

242.1 Interagency Contract Administration and Audit Services
242.2 Assignment of Contract Administration
242.3 Contract Administration Office Functions
242.4 Correspondence and Visits
242.5 Postaward Orientation
242.6 Corporate Administration Contracting Officer
242.7 Indirect Cost Rates
242.8 Disallowance of Costs
242.9 [Reserved in FAR]
242.10 Negotiation Advance Agreements for Independent Research and Development/Bid and Proposal Costs
242.11 Production Surveillance and Reporting
242.12 Novation and Change-of-Name Agreements
242.13 [Reserved in FAR]
242.14 Traffic and Transportation Management
242.70 Monitoring Contractors' Costs
242.71 Voluntary Refunds

Part 243—Contract Modifications

243.1 General
243.2 Change Order
243.3 Forms

Part 244—Subcontracting Policies and Procedures

244.1 No DoD FAR Supplement
244.2 No DoD FAR Supplement
244.3 Contractors' Purchasing Systems Reviews

Part 245—Government Property

245.1 No DoD FAR Supplement
245.2 No DoD FAR Supplement
245.3 Providing Government Property to Contractors
245.4 Contractor Use and Rental of Government Property
245.5 Management of Government Property in the Possession of Contractors
245.6 Reporting, Redistribution, and Disposal of Contractor Inventory
245.70 Appointment of Property Administrator
245.71 Forms, Instructions, and Reports

Part 246—Quality Assurance

246.1 General
246.2 Contract Quality Requirements
246.3 Contract Clauses
246.4 Government Contract Quality Assurance
246.5 No DoD FAR Supplement
246.6 Material Inspection and Receiving Reports
246.7 Warranties
246.8 No DoD FAR Supplement

Part 247—Transportation

247.1 General
247.2 Contracts for Transportation or for Transportation-Related Services
247.3 Transportation in Supply Contracts
247.4 No DoD FAR Supplement
247.5 Ocean Transportation by U.S.-Flag Vessels

Part 248—Value Engineering

248.1 No DoD FAR Supplement
248.2 No DoD FAR Supplement

Part 249—Termination of Contracts

249.1 General Principles
249.2 No DoD FAR Supplement
249.3 No DoD FAR Supplement
249.4 Termination for Default
249.5 No DoD FAR Supplement
249.6 Contract Termination Forms and Formats
249.70 Special Requirements

Part 250—Extraordinary Contractual Actions

250.1 General
250.2 Delegation of and Limitations on Exercise of Authority
250.3 Contract Adjustments
250.4 Residual Powers
250.70 Act and Executive Order

Part 251—Use of Government Sources by Contractors

251.1 Contactor Use of Government Supply Sources
251.2 Contractor Use of Interagency Motor Pool Vehicles

SUBCHAPTER H—CLAUSES AND FORMS

Part 252—Solicitation Provisions and Contract Clauses

252.1 Instructions for Using Provisions and Clauses
252.2 Texts of Provisions and Clauses
252.3 Provision and Clause Matrixes

Part 253—Forms

253.1 General
253.2 Prescription of Forms
253.3 Illustrations of Forms

SUBCHAPTER I—AGENCY SUPPLEMENTARY REGULATIONS

Part 270—Acquisition of Computer Resources

270.1 General
270.2 Definitions
270.3 Acquisitions Under General Services Administration Authority
270.4 Acquisitions Under 10 USC 2315 Authority
270.5 Acquisitions Under Other Authorities
270.6 Acquisition of Computer Equipment by DoD Contractors
270.7 Telecommunications Resources
270.8 Use of the General Services Administration Teleprocessing Services Program (TSP)
270.9 Privacy for Computer Systems
270.10 Security for Computer Systems
270.11 Standards
270.12 The Federal Computer Performance Evaluation Center
270.13 Sharing of Computer Resources
270.14 Reuse of Computer Equipment

Appendices

Appendix A—Armed Services Board of Contract Appeals
Appendix D—Notice and Hearing Under Gratuities Clause
Appendix H—Military Standard Requisitioning and Issue Procedure
Appendix I—Material Inspection and Receiving Report
Appendix J—Authorization and Negotiation
Appendix K—Preaward Survey Procedures
Appendix L—DoD Freedom of Information Program
Appendix N—Activity Address Numbers
Appendix O—Cost Accounting Standards
Appendix P—DoD Directive 5400.11 (The Privacy Act)
Appendix Q—DoD Foreign Tax Relief Program
Appendix R—Code of Federal Regulations; Title 41—Public Contracts and Property Management; Chapter 50—Public Contracts, Department of Labor
Appendix T—International Agreements
Appendix U—Procurement Forms

Manuals

Manual for Contract Pricing (ASPM No. 1) (15 SEP 75)
Small Purchase Manual (ASPM No. 2) (31 MAR 76)

Supplements

DAR Supplement No. 1—Contractor Purchasing System Review (CPSR) Program (DARS No. 1) (31 MAR 82)
ASPR Supplement No. 2—Contract File Maintenance, Closeout, and Disposition (ASPS No. 2) (1 APR 70)
ASPR Supplement No. 3—Property Administration (ASPS No. 3) (1 OCT 75)
ASPR Supplement No. 4—Procedures for Submission of Applications to be Placed on Research and Development Bidders Mailing Lists (ASPS No. 4) (1 APR 68)
ASPR Supplement No. 5—Procurement of Utility Services (ASPS No. 5) (1 OCT 74)
DAR Supplement No. 6—DoD Replenishment Parts Breakout Program (DARS No. 6) (1 JUN 83)

Note: The text of the Appendices, Manuals, and Supplements to the DoD FAR Supplement are not published in the Federal Register or the Code of Federal Regulations.

Comprehensive Table of Contents of Department of Defense Parts, Subparts and Sections

PART 201—FEDERAL ACQUISITION REGULATIONS SYSTEM

Subpart 201.1—Purpose, Authority, Issuance

Sec.
201.101 Purpose.
201.103 Applicability.
201.104 Issuance.
201.104–1 Publication and Code arrangement.
201.104–2 Arrangement of regulations.
201.104–3 Copies.

Subpart 201.2—Administration

201.201 Maintenance of the FAR.
201.201–1 The two Councils.

Subpart 201.3—Agency Acquisition Regulations

201.301 Policy.
201.304 Agency control and compliance procedures.
201.371 USEUCOM Supplement.

Subpart 201.4—Deviations From the FAR

201.402 Policy.
201.403 Individual deviations.
201.404 Class deviations.
201.405 Deviations pertaining to treaties and executive agreements.

Subpart 201.6—Contracting Authority and Responsibilities

201.601 Responsibility of each contracting activity.
201.602 Authority of contracting officers.
201.670 Ratification of unauthorized commitments.
201.670–1 Authority.
201.670–2 Definitions.
201.670–3 Procedures.
201.670–4 Limitations on Exercise of Authority.
201.670–5 Nonratifiable Commitments.

PART 202—DEFINITIONS OF WORDS AND TERMS

Subpart 202.1—Definitions

Sec.
202.1 Definitions.

PART 203—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Sec.
203.000 Scope of part.

Subpart 203.1—Safeguards

203.101 Standards of conduct.
203.101–3 Agency regulations.
203.103 Independent pricing.
203.103–2 Evaluating the certification.

Subpart 203.2—Contractor Gratuities to Government Personnel

203.203 Reporting suspected violations of the gratuities clause.
203.204 Treatment of violations.

Subpart 203.3—Reports of Identical Bids and Suspected Antitrust Violations

203.301 General.

Subpart 203.4—Contingent Fees

203.409 Misrepresentations or violations of the convenant against contingent fees.
203.410 Records.

Subpart 203.5—Other Improper Business Practices

203.502 Subcontractor kickbacks.
203.570 Implied endorsement by military resale activities.

PART 204—ADMINISTRATIVE MATTERS

Subpart 204.2—Contract Distributon

Sec.
204.201 Procedures.
204.202 DoD distribution requirements.

Subpart 204.6—Contract Reporting

204.670–1 Scope.
204.670–2 Definitions.
204.670–3 DUNS Number.
204.670–4 Distribution of defense subcontracts placed overseas.
204.671 Individual procurement action report (DD Form 350).
204.671–1 Scope.
204.671–2 Purpose.
204.671–3 Applicability and coverage.
204.671–4 Due date and distribution.
204.671–5 Instructions for completion of DD Form 350.
204.672 Monthly procurement summary (DD Form 1057).
204.672–1 Scope.
204.672–2 Applicability and coverage.
204.672–3 Due date and distribution.
204.672–4 Terms used.
204.672–5 Instructions for completion of the DD Form 1057.
204.673 Report of individual contract profit (DD Form 1499)
204.673–1 Scope.
204.673–2 Applicability.
204.673–3 Coverage.
204.673–4 Due Date and Distribution.
204.673–5 Specific entries on DD Form 1499.

Subpart 204.7—Contractor Records Retention

204.706 Microfilming records.
204.706–1 General.

Subpart 204.8—Contract Files

204.801 General.
204.802 Contract files.
204.802–70 Use of standard file folders for drawer and shelf filing.
204.802–71 Filing of documents.
204.802–72 Arrangement of files.
204.802–73 Contract cross reference/locator system.
204.803 Contents of contract files.
204.804–4 Physically completed contracts.
204.804–5 Detailed procedures for closing out contract files.
204.804–70 Review, separation, and retirement of completed contract files.
204.805–70 Disposal of duplicate or working contract or contractor files.
204.805–71 Disposal of contract cross reference/locator files.

Subpart 204.70—Uniform Procurement Instrument Identification Numbers

204.7001 Scope.
204.7002 Policy.
204.7003 Basic procurement instrument identification number.
204.7003–1 Elements of number.
204.7003–2 Illustration of number.
204.7004 Supplementary procurement instrument identification numbers.
204.7004–1 Uses of the number.
204.7004–2 Amendments to solicitation documents.
204.7004–3 Modifications of contracts and agreements.
204.7004–4 Delivery orders under indefinite delivery type contracts, orders under basic ordering agreements, and calls under blanket purchase agreements.

Subpart 204.71—Uniform Contract Line Item Numbering System

204.7101 Scope of subpart.
204.7102 Policy.
204.7103 Contract line items.
204.7103–1 Criteria for establishing.
204.7103–2 Procedures for numbering.
204.7104 Contract subline items.
204.7104–1 General.
204.7104–2 Criteria for establishing.
204.7104–3 Procedures for numbering.
204.7105 Contract exhibits.
204.7105–1 Definition.
204.7105–2 Criteria for establishing.
204.7105–3 Procedures for identifying.
204.7106 Exhibit line and subline items.
204.7106–1 Criteria for establishing.
204.7106–2 Procedures for numbering.
204.7106–3 Sequence of exhibit line item numbers.
204.7107 Contract modifications.
204.7108 Contract Accounting Classification Reference Number (ACRN).
204.7108–1 General.
204.7108–2 Criteria for establishing.
204.7108–3 Procedures for using the Accounting Classification Reference Number (ACRN).

204.7109 Indefinite delivery type contracts.

PART 205—PUBLICIZING CONTRACT ACTIONS

Sec.
205.001 Policy.

Subpart 205.1—Dissemination of Information

205.101 Methods of Disseminating Information.
205.102 Availability of Solicitations.

Subpart 205.2—Synopses of Proposed Contracts

205.201 General.
205.202 Exceptions.
205.203 Time of synopsizing.
205.204 Presolicitation notices.
205.205 Special situations.
205.207 Preparation and transmittal of synopses.

Subpart 205.3—Synopses of Contract Awards

205.301 General.
205.302 Preparation and transmittal of synopses of awards.
205.303 Announcement of contract awards.

Subpart 205.4—Release of Information

205.404–1 Release procedures.
205.404–2 Announcements of long-range acquisition estimates.

Subpart 205.5—Paid Advertisements

205.501 Definitions.
205.502 Authority.
205.504 Use of advertising agencies.

PART 207—ACQUISITION PLANNING

Subpart 207.1—Acquisition Plans

Sec.
207.102 Policy.
207.103 Agency-head responsibilities.
207.104 General procedures.
207.105 Contents of written acquisition plans.

Subpart 207.3—Contractor Versus Government Performance

207.302 General.
207.304 Procedures.
207.307 Appeals.

Subpart 207.4—Equipment Lease or Purchase

207.401 Acquisition considerations.

PART 208—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Sec.
208.002 Use of other government supply sources.
208.002–70 Acquisition from the Department of Energy (DOE).

Subpart 208.3—Acquisition of Utility Services

Subpart 208.4—Ordering From Federal Supply Schedules

208.402 Applicability.
208.404–1 Mandatory use.
208.404–2 Optional use.
208.404–3 Requests for waivers.
208.404–70 Applicability of Listed Federal Supply Schedules.
208.404–71 Establishment or revision of federal supply schedules mandatory upon DOD.
208.405 Ordering office responsibilities.
208.405–1 Ordering from multiple-Award schedules.
208.405–2 Order placement.
208.470 Acquisition from GSA sources.
208.470–1 Applicability.
208.470–2 Procurement from General Services Administration stock.
208.470–3 GSA supply catalog.
208.470–4 General Services Administration regional offices.
208.470–5 Order for supplies.
208.470–6 Mandatory sources for maintenance, repair, rehabilitation and reclamation of personal property.
208.470–7 Personal property covered under mandatory GSA term contracts.
208.470–8 Order for services.

Subpart 208.70—Coordinated Procurement

208.7000 Applicability.
208.7001 Definitions.
208.7002 Responsibilities under coordinated procurement.
208.7003 General principles governing implementation procurement assignments.
208.7003–1 Standard format-development and promulgation of implementing procedures.
208.7003–2 Relationship between research and development and coordinated procurement.
208.7003–3 Small dollar value purchases.
208.7003–4 Emergency.
208.7003–5 Department of defense manufacturing establishment.
208.7003–6 Consolidation of requirements.
208.7004 Items in short supply.
208.7005 Transfer of uncompleted contracts.
208.7005–1 Effect of assignment of procurement responsibility.
208.7005–2 Contracting officers under transferred contracts.
208.7006 Purchase authorization.
208.7006–1 MIPRs or other authorized purchase requests.
208.7006–2 Use of advance MIPRs.
208.7006–3 Determinations and findings.
208.7006–4 Delivery schedules.
208.7006–5 Specifications, drawings, and other purchase data.
208.7006–6 Utilization of existing department of defense assets.
208.7006–7 Options for increased quantities.
208.7007 Funds and payments.
208.7007–1 Citation of appropriation and funds of Requiring Department—Category II method of funding.
208.7007–2 Citation of funds of Procuring Department—Category I method of funding.
208.7007–3 Disbursement.
208.7007–4 Authorization for exceeding MIPR estimates.
208.7008 Preparation and use of DD Form 448 (MIPR).
208.7008–1 Special instructions.
208.7008–2 Cutoff dates for submission of Category II (direct citation) MIPRs.
208.7008–3 Notification of inability to obligate.
208.7008–4 Number of copies of MIPRs with attachments to be submitted.
208.7008–5 Changes to MIPRs.
208.7008–6 Requests for additional funds.
208.7009 Acceptance of MIPR.
208.7009–1 Qualified acceptance.
208.7009–2 Non-Qualified acceptance.
208.7009–3 Preparation and use of DD Form 448–2 (acceptance of MIPR).
208.7009–4 Withdrawal of funds.
208.7010 Components of end items.
208.7010–1 Contractor-furnished components.
208.7010–2 Government-furnished components.
208.7010–3 Purchase of components over and above those initially purchased with the end item.
208.7011 Distribution of contracts and order. (See 204.201(c)(3)).
208.7012 Cancellation of requirements.
208.7013 Administrative costs.
208.7014 Inspection.
208.7015 Execution of contracts.
208.7016 Status reporting.
208.7017 Transportation of supplies.
208.7018 Procurement agreements.

Subpart 208.71—Commodity Assignments

208.7100 Assignment authority.
208.7100–1 Exclusions—Military Department assignments (Except DLA).
208.7100–2 Exclusions—DLA and GSA assignments.
208.7101 Department of the Army.
208.7102 Department of the Navy.
208.7103 Department of the Air Force.
208.7104 Defense Logistics Agency.
208.7105 Defense Nuclear Agency.
208.7106 General Services Administration.

Subpart 208.72—Procurement for NASA

208.7200 Authorization and policy.
208.7201 NASA purchase request and acceptance.
208.7202 Changes in estimated total prices.
208.7203 Inquiries.
208.7204 Payments.

Subpart 208.73—Miniature and Instrument Ball Bearings

208.7301 Definitions.
208.7302 Policy.
208.7303 Procedures.

Subpart 208.74—Precision Components for Mechanical Time Devices

208.7401 Definitions.
208.7402 Policy.
208.7403 Procedures.

Subpart 208.75—High-Purity Silicon

208.7501 Definitions.
208.7502 Policy.
208.7503 Procedures.

PART 209—CONTRACTOR QUALIFICATIONS

Subpart 209.1—Responsible Prospective Contractors

Sec.
209.103 Policy.

209.104 Standards.
209.104–3 Application of standards.
209.105 Procedures.
209.105–70 Current information.
209.106 Pre-award surveys.
209.106–70 Audit responsibilities for pre-award surveys and reviews.

Subpart 209.2—Qualified Products

209.204 Justification for including qualification requirements.

Subpart 209.3—First Article Testing and Approval

209.302 General.
209.303 Use.
209.305 Risk.
209.306 Solicitation requirements.
209.308 Contract clauses.

Subpart 209.4—Debarment, Suspension, and Ineligibility

209.403 Definitions.
209.404 Consolidated list of debarred, suspended, and ineligible contractors.
209.405 Effect of listing.
209.406 Debarment.
209.406–1 General.
209.406–3 Procedures.
209.470 Authorized representatives.
209.471 Interchange of information.
209.472 Reporting.
209.472–1 Situations where reports are required.
209.472–2 Contents of reports.
209.472–3 Addresses and copies of reports.
209.473 Procurement outside United States.
209.473–1 General.
209.473–2 Responsibilities and area coverage.
209.473–3 Information contained on overseas lists.
209.473–4 Maintenance and distribution of lists.
209.473–5 Basis of addition of contractors to lists.
209.473–6 Treatment to be accorded contractors in debarred or ineligible status.
209.473–7 Causes and conditions for which unified commanders may place names on the consolidated list.
209.473–8 Liaison with United States diplomatic missions.
209.474 Use of lists.

PART 210—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

Sec.
210.004 Selecting Specifications or Descriptions for Use.
210.008 Identification and availability of specifications.
210.011 Solicitation provisions and contract clauses.

PART 212—CONTRACT DELIVERY OR PERFORMANCE

Subpart 212.1—Delivery or Performance Schedules

Sec.
212.102 Factors to consider in establishing schedules.
212.103 Supplies or services.
212.104 Contract clauses.

Subpart 212.2—Liquidated Damages

212.204 Contract clauses.

Subpart 212.3—Priorities, Allocations, and Allotments

212.302 General.

Subpart 212.4—Variation in Quantity

212.401 Supply contracts.

PART 213—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Subpart 213.1—General

Sec.
213.104 Procedures.
213.106 Competition and price reasonableness.

Subpart 213.2—Blanket Purchase Agreements

213.203 Establishment of blanket purchase agreements.
213.203–2 Clauses.
213.204 Purchase under blanket purchase agreements.

Subpart 213.3—Fast Payment Procedure

213.302 Conditions for use.

Subpart 213.4—Imprest Fund

213.402 General.
213.404 Conditions for use.
213.405 Procedures.

Subpart 213.5—Purchase Orders

213.502 Unpriced purchase orders.
213.503 Obtaining contractor acceptance and modifying purchase orders.
213.505 Purchase order and related forms.
213.505–2 Agency order forms in lieu of optional Forms 347 and 348.
213.505–70 Instructions for entries on DD Form 1155 and Standard Form 36.
213.505–71 Use of DD Form 1155 as a public voucher.

PART 214—FORMAL ADVERTISING

Subpart 214.2—Solicitation of Bids

Sec.
214.201 Preparation of invitations for bids.
214.202 General rules for solicitation of bids.
214.202–1 Bidding time.
214.202–5 Descriptive literature.
214.205 Solicitation mailing lists.
214.205–1 Establishment of lists.
214.205–5 Release of solicitation mailing lists.
214.207 Pre-bid conference.
214.208 Amendment of invitation for bids.
214.270 Master solicitation.

Subpart 214.4—Opening of Bids and Award of Contract

214.406 Mistakes in bids.
214.406–3 Other mistakes disclosed before award.
214.407 Award.
214.407–1 General.
214.407–3 Prompt payment discounts.
214.407–6 Equal low bids.
214.408 Information to bidders.
214.408–2 Award of classified contracts.

Subpart 214.5—Two-step Formal Advertising

214.503 Procedures.
214.503–1 Step one.
214.503–2 Step two.

PART 215—CONTRACTING BY NEGOTIATION

Subpart 215.1—General Requirements for Negotiation

Sec.
215.104 Authorization and approval.
215.105 Competition.
215.170 Records and reports of negotiated contracts.
215.171 Aid to small business and disadvantaged business concerns in negotiated acquisitions.
215.172 Aid to labor surplus area concerns in negotiated acquisitions.
215.173 Negotiation of initial production contracts for technical or specialized military supplies.
215.174 Abstract of offers.

Subpart 215.2—Negotiation Authorities

215.202 Public exigency.
215.210 Impracticable to secure competition by formal advertising.
215.213 Technical equipment requiring standardization and interchangeability of parts.
215.215 Otherwise authorized by law.
215.270 Records and reports for purchases for experimental, development or research work and purchases in the interest of national defense or industrial mobilization.

Subpart 215.3—Determinations and Findings to Justify Negotiation

215.302 General.
215.304 Content.
215.307 Signatory authority.
215.370 Responsibility for preparing the D&F.

Subpart 215.4—Solicitation and Receipt of Proposals and Quotations

215.402 General.
215.406 Preparing requests for proposals (RFP's) and requests for quotations (RFQ's).
215.410 Amendment of solicitations before closing date.
215.411 Receipt of proposals and quotations.
215.411–70 Maintenance and disposition of proposals and quotations.
215.414 Forms.
215.470 Master solicitation.

Subpart 215.5—Unsolicited Proposals

215.504 Advance guidance.
215.506 Agency procedures.
215.506–1 Receipt and initial review.
215.507 Contracting methods.

Subpart 215.6—Source Selection

215.603 Purpose.
215.607 Disclosure of mistakes before award.

215.613 Alternative source selection procedures.

Subpart 215.7—Make-Or-Buy Programs

215.704 Items and work included.
215.706 Evaluation, negotiation, and agreement.
215.707 Incorporating make-or-buy programs in contracts.

Subpart 215.8—Price Negotiation

215.802 Policy.
215.803 General.
215.804 Cost or pricing data.
215.804–2 Requiring certified cost or pricing data.
215.804–3 Exemption from or waiver of submission of certified cost or pricing data.
215.804–4 Certificate of current cost or pricing data.
215.804–6 Procedural requirements.
215.804–7 Defective cost or pricing data.
215.804–8 Contract clauses.
215.805 Proposal analysis.
215.805–1 General.
215.805–2 Price analysis.
215.805–4 Technical analysis.
215.805–5 Field pricing support.
215.806 Subcontract pricing considerations.
215.807 Prenegotiation objectives.
215.808 Price negotiation memorandum.
215.809 Forward pricing rate agreements.
215.810 Should-cost analysis.
215.811 Estimating systems.
215.870 Procedures for identifying contractors' unallowable costs.
215.871 Estimated data prices (DD Form 1423).
215.872 Capital Investment Incentives.

Subpart 215.9—Profit

215.901 General.
215.902 Policy.
215.903 Contracting officer responsibilities.
215.905 Profit-analysis factors.
215.905–1 Common factors.
215.905–2 Additional factors.

Subpart 215.10—Preaward and Postaward Notifications, Protests and Mistakes

215.1001 Notification to Offerors.
215.1002 Debriefing Of Unsuccessful Offerors.
215.1070 Classified Information.

PART 216—TYPES OF CONTRACTS

Subpart 216.1—Selecting Contract Types

Sec.
216.101 General.
216.104 Factors in selecting contract types.

Subpart 16.2—Fixed-Price Contracts

216.203–4 Contract clauses.
216.203–70 Fixed-price contracts with economic price adjustment.
216.206 Fixed-ceiling price contracts with retroactive price redetermination.
216.206–1 Description.
216.207 Firm-fixed-price, level-of-effort term contracts.
216.207–1 Description.

Subpart 216.3—Cost-Reimbursement Contracts

216.301 General.
216.301–2 Application.
216.303 Cost sharing contracts.
216.306 Cost-plus-fixed-fee contracts.

Subpart 216.4—Incentive Contracts

216.402 Application of predetermined, formula-type incentives.
216.402–2 Technical performance incentives.
216.403 Fixed-price incentive contracts.
216.403–2 Fixed-price incentive (successive targets).
216.404 Cost-reimbursement incentive contracts.
216.404–1 Cost-plus incentive fee contracts.
216.404–2 Cost-plus-award-fee contracts.

Subpart 216.5—Indefinite-Delivery Contracts

216.501 General.
216.502 Definite quantity contracts.
216.503 Requirement contracts.

Subpart 216.6—Time-and-Materials, Labor-Hour, and Letter Contracts

216.603 Letter contracts.
216.603–2 Application.

Subpart 16.7—Agreements

216.702 Basic agreements.
216.703 Basic ordering agreements.

PART 217—SPECIAL CONTRACTING METHODS

Subpart 217.1—Multiyear Contracting

Sec.
217.101 Definitions.
217.102 Policy.
217.102–2 General.
217.102–3 Objectives.
217.103 Procedures.
217.103–1 General.
217.103–2 Solicitations.
217.103–4 Awards.
217.103–70 Funding of multiyear contracts.
217.104 Related areas.
217.104–70 Multiyear contracting of services under Pub. L. 90–378.
217.104–71 Multiyear acquisition of supplies and services under Pub. L. 91–142.

Subpart 217.2—Options

217.203 Solicitations.
217.206 Evaluation.
217.207 Exercise of options.
217.208 Solicitation provisions and contract clauses.

Subpart 217.5—Interagency Acquisitions Under the Economy Act

217.502 General.
217.503 Determination requirements.
217.504 Ordering procedures.

Subpart 217.6—Management and Operating Contracts

Subpart 217.70—Exchange of Personal Property

217.7000 Scope of subpart.
217.7001 Definitions.
217.7002 Policy.
217.7003 Categories of property eligible for exchange and categories of property ineligible for exchange.
217.7003–1 Property eligible for exchange.
217.7003–2 Property ineligible for exchange.
217.7004 Procedures.
217.7004–1 Offering property for exchange.
217.7004–2 Purchase request and certification.
217.7005 Exchange of exchange property.

Subpart 217.71—Master Agreement for Repair and Alteration of Vessels

Subpart 217.72—Acquisition of Component Parts

217.7201 Privately developed items.
217.7201–1 General.
217.7201–2 Specific procurement methods.
217.7201–3 Purchase of patented items when Government is a licensee.
217.7202 Component Breakout.
217.7202–1 Scope of paragraph.
217.7202–2 Policy.
217.7202–3 Responsibility for component breakout selection, review and decision
217.7202–4 Breakout guidelines.
217.7202–5 Records and review procedure.
217.7203 Procurement of parts.

Subpart 217.73—Special Commodities

217.7301 Bakery and dairy products contracts.
217.7301–1 Scope.
217.7301–2 Plant locations.
217.7301–3 Chemical and microbiological requirements (fresh dairy foods).
217.7301–4 Containers and equipment (milk dispensing).
217.7301–5 Contract clauses.

PART 219—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 219.1—Terms and Size Standards

Sec.
219.102–6 Size standards for transportation industries.

Subpart 219.2—Policies

219.201 General policy.
219.202–1 Encouraging small business participation in acquisitions.
219.202–5 Data collection and reporting requirements.

Subpart 219.4—Cooperation With the Small Business Administration

219.401 General.
219.402 Small business administration procurement center representatives.

Subpart 219.5—Set-asides for small business

219.501 General.
219.502 Setting aside acquisitions.
219.502–1 Requirements for setting aside acquisitions.
219.502–2 Total set-asides.
219.502–4 Methods of conducting set-asides.
219.502–70 Combined small business—labor surplus area set-asides.
219.503 Setting aside a class of acquisitions.
219.504 Set-aside program order of precedence.
219.505 Rejecting set-aside recommendations.
219.506 Withdrawing or modifying set-asides.

219.506 Solicitation provisions and contract clauses.

Subpart 219.6—Certificates of Competency and Determinations of Eligibility

219.602 Procedures.
219.602–1 Referral.
219.602–3 Resolving differences between the agency and the Small Business Administration.
219.670 Quarterly reporting.

Subpart 219.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

219.703 Eligibility requirements for participating in the program.
219.706 Responsibilities of the cognizant administrative contracting officer.
219.708 Solicitation provisions and contract clauses.

Subpart 219.8—Contracting With the Small Business Administration (the 8(a) Program)

219.809 Preparing the contracts.
219.809–1 General.

PART 220—LABOR SURPLUS AREA CONCERNS

Subpart 220.70—Labor Surplus Area Policy and Procedures

Sec.
220.7000 Scope.
220.7001 General policy.
220.7002 Application of policy.
220.7003 Partial set-asides for labor surplus area concerns.
220.7004 Subcontracting with labor surplus area concerns.
220.7005 Depressed industries.

PART 222—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Subpart 222.1—Basic Labor Policies

Sec.
222.101 Labor Relations.
222.101–1 General.
222.101–2 Contract pricing and administration.
222.101–3 Reporting labor disputes.
222.101–4 Removal of items from contractors' facilities affected by work stoppages.
222.101–70 Impact of labor disputes on defense programs.
222.101–71 Procurement of stevedoring services during labor disputes.
222.102 Federal and state labor requirements.
222.102–70 Applications by contractors for relaxation of requirements.
222.103 Overtime.
222.103–4 Approvals.

Subpart 222.4—Labor Standards for Contracts Involving Construction

Subpart 222.6—Walsh-Healey Public Contracts Act

222.604 Exemptions.
222.604–4 Regulatory exemptions.
222.609 Regional jurisdictions of the Department of Labor, Wage and Hour Division.

Subpart 222.8—Equal Employment Opportunity

222.804 Affirmative action programs.
222.804–2 Construction.
222.805 Procedures.
222.806 Inquiries.
222.807 Exemptions.

Subpart 222.10—Service Contract Act of 1965

222.1003 Applicability.
222.1006 Clauses for contracts over $2,500.
222.1007 Notice of intent to make a service contract.
222.1008 Wage determinations and collective bargaining agreements.
222.1008–1 Before award.
222.1009 Notice of award.
222.1011 Hearings.
222.1012 Withholding of contract payments.

Subpart 222.13—Special Disabled and Vietnam Era Veterans

222.1303 Waivers.
222.1306 Complaint procedures.

Subpart 222.14—Employment of the Handicapped

222.1403 Waivers.
222.1404 Department of Labor notices.
222.1406 Complaint procedures.

Subpart 222.70—Safety and Health Regulations for Shipyard and Related Employment

222.7001 Safety and health regulations.
222.7002 Applicability.
222.7003 Contract clause.
222.7004 Administration and enforcement.

Subpart 222.71—Fair Labor Standards Act of 1938

222.7101 Basic statute.
222.7102 Suits against government contractors.
222.7103 Rulings on applicability or interpretation.

PART 224—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 224.1—Protection of Individual Privacy

Sec.
224.102 General.
224.103 Procedures.

Subpart 224.2—Freedom of Information Act

224.202 Policy.

PART 25—FOREIGN ACQUISITION

PART 27—PATENTS, DATA, AND COPYRIGHTS

PART 228—BONDS AND INSURANCE

Sec.
228.001 Definitions.

Subpart 228.1—Bonds

228.102 Performance and payment bonds for construction contracts.
228.102–1 General
228.103 Performance and payment bonds for other than construction contracts.
228.103–1 General.
228.103–2 Performance bonds.
228.105 Other types of bonds.
228.105–70 Fidelity and forgery bonds.
228.106 Administration.
228.106–2 Substitution of surety bonds.
228.106–70 Review of bonds and notification of surety.

Subpart 228.3—Insurance

228.304 Risk-pooling arrangements.
228.305 Overseas workers' compensation and war hazard insurance.
228.306 Insurance under fixed-price contracts.
228.307 Insurance under cost-reimbursement contracts.
228.307–1 Group insurance plans.
228.307–2 Liability.
228.309 Contract clauses for workers' compensation insurance.
28.311 Solicitation provision and contract clause on insurance liability under cost reimbursement contracts.

Subpart 228.70—Indemnification

228.7000 General.

Subpart 228.71—Accident Reporting and Safety

228.7101 Accident reporting.
228.7102 Safety precautions for ammunition and explosives.

PART 229—TAXES

Subpart 229.1—General

Sec.
229.101 Resolving tax problems
229.101–70 Resolving foreign tax relief issues.

Subpart 229.2—Federal Excise Taxes

229.202 General exemptions.

Subpart 229.3—State and Local Taxes

229.303 Application of State and local taxes to government contracts and subcontractors.

Subpart 229.4—Contract Clauses

229.402 Foreign contracts.
229.402–1 Foreign fixed-price contracts.
229.402–70 Use of foreign tax clauses

PART 230—COST ACCOUNTING STANDARDS

Subpart 230.1—General

Sec.
230.103 Cost Accounting Standards Board (CASB) publications

Subpart 230.4—CAS Administration

230.401 Responsibility.

Subpart 230.70—Facilities Capital Employed for Facilities In Use

230.7001 Policy.
230.7002 Definitions, measurement and allocation.
30.7003 Estimating business unit facilities capital and cost of money.
230.7004 Contract facilities capital estimates.

230.7005 Pre-award facilities capital applications.
230.7006 Post award facilities capital applications.
230.7007 Administrative procedures.

Subpart 230.71—Facilities Capital Employed for Facilities Under Construction

230.7101 Policy.
230.7102 Definitions.
230.7103 Measurement.
230.7104 Composition and allocation of costs.
230.7105 Limitations.
230.7106 Preaward capital employed application.

PART 231—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 231.1—Applicability

Sec.
231.101 Objectives.
231.103 Contracts with commercial organizations.

Subpart 231.2—Contracts With Commercial Organizations

231.201 General.
231.205–10 Cost of money.
231.205–18 Independent research and development and bid and proposal costs.
231.205–22 Lobbying costs.
231.205–38 Selling costs.

PART 232—CONTRACT FINANCING

Subpart 232.1—General

Sec.
232.102 Description of contract financing methods.
232.106 Financial consultation.
232.111 Contract clauses.
232.170 Responsibilities.
232.170–1 Organization.
232.170–2 Resolution of disagreements.
232.170–3 Responsibility, administration, contract finance committee.
232.171 Deviations.
232.172 Financial responsibility of contractors.
232.173 Financial information and analysis.
232.174 Appropriate information.
232.174–1 Cash flow forecast and estimated financial statements.
232.174–2 Realistic assumptions.
232.174–3 Estimated income statements and balance sheets.
232.175 Interpretations.

Subpart 232.3—Loan Guarantees for Defense Production

232.302 Authority.
232.304 Procedures.
232.304–1 Application for guarantee.
232.304–2 Certificate of eligibility.
232.304–70 Guraranteed loans for an extended period of time.

Subpart 232.4—Advance Payments

232.409 Contracting officer action.
232.409–1 Recommendation for approval.
232.410 Findings, determination, and authorization.
232.412 Contract clause.
232.470 Procedure for advance payments to nonprofit educational and research and development institutions without a special bank account.
232.471 Pooled advance payments.
232.471–1 Distinction between pool contracts and designated pool contracts.
232.471–2 Advance payment pool agreement—special features.
232.471–3 Liquidation—designated pool contracts—administering office.
232.471–4 Advance payment pool—understandings.
232.472 Agreement for advance payments without special bank account.

Subpart 232.5—Progress Payments Based on Costs

232.501 General.
232.501–1 Customary progress payment rates.
232.501–2 Unusual progress payments.
232.501–3 Contract price.
232.502 Preaward matters.
232.502–1 Use of customary progress payments.
232.502–2 Contract finance office clearance.
232.502–4 Contract clauses.
232.503 Postaward matters.
232.503–1 Contractor requests.
232.503–6 Suspension or reduction of payments.

Subpart 232.6—Contract Debts

232.600 Scope.
232.601 Definition.
232.605 Responsibilities and cooperation among government officials.
232.606 Debt determination and collection.
232.610 Demand for payment of contract debt.
232.613 Deferment of collection.
232.614 Interest.
232.614–1 Interest charges.
232.616 Compromise actions.
232.617 Contract clause.
232.670 Transfer of responsibility for debt collection.
232.671 Bankruptcy reporting.

Subpart 232.7—Contract Funding

232.705 Contract Clauses.
232.705–2 Clauses for limitation of cost or funds.

Subpart 232.8—Assignment of Claims

232.800 Scope of subpart.
232.803 Policies.
232.806 Contract clauses.

PART 233—DISPUTES AND APPEALS

Sec.
233.013 Obligation to continue performance.
233.014 Contract clause.
233.070 Claims for interest penalties under the Prompt Payment Act.

Subpart 233.70—Certification Under Section 813 of Public Law 95–485

233.7000 Certification of requests for adjustment or relief exceeding $100,000.

PART 234—MAJOR SYSTEM ACQUISITION

Sec.
234.000 Scope of part.

PART 235—RESEARCH AND DEVELOPMENT CONTRACTING

Sec.
235.001 Definitions.
235.003 Policy.
235.004 Publicizing requirements and expanding research and development sources.
235.005 Work statement.
235.006 Contracting methods and contract type.
235.007 Solicitations.
235.008 Evaluation for award.
235.010 Scientific and technical reports.
235.011 Data.
235.014 Government property and title.
235.015 Contracts for research with educational institutions and nonprofit organizations.
235.070 Indemnification against unusually hazardous risks.
235.071 Contract clauses.

Subpart 235.70—Short Form Research Contract

Subpart 235.71—Recovery of Nonrecurring Costs on Commercial Sales of Defense Products and Technology

235.71 Scope.
235.7101 Policy.
235.7102 Applicability.
235.7103 Procedures.
235.7104 Deviations.

PART 236—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 236.1—General

Sec.
236.102 Definitions.
236.103 Methods of contracting.
236.170 Sources of construction services.

Subpart 236.2—Special Aspects of Contracting for Construction

236.201 Evaluation of contractor performance.
236.203 Government estimate of construction costs.
236.205 Statutory cost limitations.
236.208 Liquidated damages.
236.270 Minimum standards for responsible prospective contractors.
236.271 Expediting construction contracts.
236.272 Cost-plus-fixed fee contracts.
236.273 Prequalification of bidders and offerors.

Subpart 236.3—Special Aspects of Formal Advertising in Construction Contracting

236.303 Invitation for bids.

Subpart 236.4—Special Procedures for Negotiation of Construction Contracts

236.401 Use of negotiated contracts.
236.402 Price Negotiation.

Subpart 236.5—Contract Clauses

236.501 Performance of work by the contractor.
236.570 Additional clauses.
236.571 Clauses.
236.571–1 Composition of contractor.

236.571–2 Modification proposals-price breakdown.
236.571–3 Contract drawings, maps and specifications.
236.571–4 Shop drawings.
236.572 Clauses.
236.572–1 Contract prices—bidding schedule.
236.572–2 Salvage materials and equipment.
236.572–3 Misplaced material.
236.572–4 Identification of employees.
236.572–5 Superintendence of subcontractors.
236.572–6 Payment for mobilization and preparatory work.
236.572–7 [Reserved]
236.572–8 Airfield safety precautions.
236.572–9 Contractor prepared network analysis system.
236.572–10 Government-prepared network analysis system.
236.573 Clauses.
236.573–1 Statement of work.
236.573–2 Estimated cost, performance period.
236.573–3 Direct payments.
236.573–4 Approved construction plant.
236.573–5 Insurance.
236.574 Option for supervision and inspection services.
236.575 Notice and approval of restricted designs.
236.576 Patent indemnity.
236.577 Rights in shop drawings.
236.578 Architectural designs and data-government rights.
236.580 Solicitation provisions.
236.580–1 Cost limitations.
236.580–2 Additive or deductive items.

Subpart 236.6—Architect-Engineer Services

236.602 Selection of forms for architect-engineer contracts.
236.602–1 Selection criteria.
236.602–2 Evaluation boards.
236.602–4 Selection authority.
236.604 Performance evaluation.
236.605 Government cost estimate for architect-engineer work.
236.606 Negotiatons.

Subpart 236.70—Construction in Foreign Countries

236.7001 General.
236.7002 Technical agreements.
236.7003 Labor laws of host country.

Subpart 236.71—Termination of Contracts

236.7100 Scope.
236.7101 Contractor inventory.
236.7101–1 Inventory schedules.
236.7101–2 Allocability of contractor-acquired property on inventory schedules.
236.7101–3 Contractor's certificate-property incorporated in work.
236.7101–4 Inventory at construction site.
236.7101–5 Screening of contractor inventory.

Subpart 236.72—Patents, Data, and Copyright

236.7200 Scope.
236.7201 Authorization and consent.
236.7202 Patent indemnification of Government by contractor.
236.7202–1 General.
236.7202–2 Patent indemnity clauses in supply contracts.
236.7202–3 Patent indemnity clause in construction contracts.
236.7202–4 Waiver of indemnity by the Government.
236.7202–5 Notice and assistance.
236.7202–6 Approval of restricted designs.
236.7203 Patent rights.
236.7204 Patent royalties.
236.7205 Acquisition and use of plans, specifications and drawings.
236.7205–1 Architectural designs and data clauses for architect-engineer or construction contracts.
236.7205–2 Data clauses for construction supplies and research and development.
236.7205–3 Mixed contracts.

PART 237—SERVICE CONTRACTING

Subpart 237.1—Service Contracts-General

Sec.
237.104 Personal services contracts.
237.106 Funding and term of service contracts.

Subpart 237.2—Consulting Services

237.204 Policy.
237.205 Management controls.
237.205–70 Responsibilities of the contracting officer.
237.205–71 Departmental procedures.
237.270 Studies and analyses and professional and management services.

Subpart 237.3—Dismantling, Demolition, or Removal of Improvements

237.302 Bonds or other security.
237.304 Contract clauses.

Subpart 237.70—Engineering and Technical Services

237.7001 Definitions.
237.7002 Contracting for engineering and technical services.

Subpart 237.71—Mortuary Services

237.7100 Scope.
237.7101 Method of acquisition.
237.7102 Schedule formats.
237.7103 Solicitation provisions and contract clauses.

Subpart 237.72—Laundry and Dry Cleaning Services

237.7200 Scope.
237.7201 General policy.
237.7203 Schedule format.
237.7204 Solicitation provisions and contract clauses.

Subpart 237.73—Educational Service Agreements

237.7300 Scope.
237.7301 Educational service agreement.
237.7302 Method of acquisition.
237.7303 Duration.
237.7304 Format and clauses for educational service agreements.

Subpart 237.74—Communication Services

237.7401 Definitions.
237.7402 Applicability.
237.7403 Policy.
237.7404 Regulatory bodies.
237.7405 Sources for communications services.
237.7405–1 Common carriers.
237.7405–2 Noncommon carriers.
237.7405–3 Foreign carriers.
237.7406 Who may acquire communication services.
237.7407 Cost of pricing data.
237.7408 Type of contract.
237.7408–1 General.
237.7408–2 General agreements.
237.7408–3 Communication Service Authorization (CSA).
237.7408–4 Federal Supply Schedule contracts.
237.7409 Funding of Communication Service Authorizations (CSA) under general contracts.
237.7410 Special construction.
237.7410–1 General.
237.7410–2 Applicability of construction labor standards to CSAs for special construction.
237.7411 Special assembly.
237.7412 Cancellation and termination.
237.7413 Contract clauses.

Subpart 237.75—Services of Students at Research and Development Laboratories

237.7500 Scope.
237.7501 Definitions.
237.7502 Policy.
237.7503 General.
237.7504 Contract clauses.

PART 238—FEDERAL SUPPLY SCHEDULE CONTRACTING

PART 239—MANAGEMENT, ACQUISITION, AND USE OF INFORMATION RESOURCES

PART 242—CONTRACT ADMINISTRATION

Subpart 242.1—Interagency Contract Administration and Audit Services

Sec.
242.101 Policy.
242.102 Procedures.

Subpart 242.2—Assignment of Contract Administration

242.203 Retention of contract administration.
242.204 Supporting contract administration.
242.205 Designation of the Paying Office.
242.270 Contracts requiring performance of contract administration services (CAS) on military installations.

Subpart 242.3—Contract Administration Office Functions

242.302 Contract administration functions.

Subpart 242.4—Correspondence and Visits

242.402 Visits to contractors' facilities.

Subpart 242.5—Postaward Orientation

242.501 General.
242.503–1 Postaward conference arrangements.
242.503–2 Postaward conference procedure.
242.503–3 Postaward conference report.

Subpart 242.6—Corporate Administrative Contracting Officer

242.602 Assignment and location.
242.603 Responsibilities.

Subpart 242.7—Indirect Cost Rates

242.705 Final indirect cost rates.
242.705–1 Contracting officer determination procedure.
242.705–2 Auditor determination procedure.
242.705–3 Educational institutions.
242.706 Distribution of documents.

Subpart 242.8—Disallowance of Costs

242.801 Notice of intent to disallow costs.
242.803 Disallowing costs after incurrence.

Subpart 242.10—Negotiating Advance Agreements for Independent Research and Development/Bid and Proposal Costs

242.1005 Lead negotiating agency responsibilities.
242.1006 Conducting negotiations.
242.1007 Content of advance agreements.
242.1008 Administrative appeals.

Subpart 242.11—Production Surveillance and Reporting

242.1101 General.
242.1104 Surveillance requirements.
242.1105 Assignment of criticality designator.
242.1106 Reporting requirements.
242.1107 Contract clause.

Subpart 242.12—Novation and Change-of-Name Agreements

242.1203 Processing agreements.

Subpart 242.14—Traffic and Transportation Management

242.1402 Volume movements within the Continental United States.
242.1403–1 U.S. Government bills of lading (GBLs).
242.1403–2 Contractor-prepaid commercial bills of lading.
242.1404–2 Contract clauses.
242.1405 Discrepancies incident to shipment of supplies.
242.1470 Routing, tracing, and expediting shipments.
242.1471 Demurrage and detention charges.
242.1472 DD Form 1659 (1 Apr 70), Application for U.S. Government Bill(s) of Lading/Domestic Route Order/Export Traffic Release.

Subpart 242.70—Monitoring Contractors' Costs

242.7000 Scope.
242.7001 Purpose.
242.7002 Application.
242.7003 Designation of a Cost Monitoring Coordinator.
242.7004 Responsibilities of the Cost Monitoring Coordinator.
242.7005 DCAA auditor responsibility.
242.7006 Procedure.

Subpart 242.71—Voluntary Refunds

242.7100 General.
242.7101 Solicited refunds.
242.7102 Disposition of voluntary refunds.

PART 243—CONTRACT MODIFICATIONS

Subpart 243.1—General

Sec.
243.104 Notification of contract changes.
243.105 Availability of funds.
243.170 Identification of FMS contract modifications.

Subpart 243.2—Change Orders

243.201 General.
243.202 Authority to issue change orders.
243.204 Administration.
243.205 Contract clauses.

Subpart 243.3—Forms

243.301 Use of forms.

PART 244—SUBCONTRACTING POLICIES AND PROCEDURES

Subpart 244.3—Contractors' Purchasing Systems Reviews

Sec.
244.301 Objective.
244.302 Requirements.
244.303 Extent of review.
244.304 Surveillance.
244.305 Granting, withholding, or withdrawing approval.
244.305–2 Notification.
244.307 Reports.

PART 245—GOVERNMENT PROPERTY

Subpart 245.3—Providing Government Property To Subcontractors

Sec.
245.301 Definitions.
245.302 Providing facilities.
245.302–1 Policy.
245.302–70 Securing approval for facilities projects.
245.302–71 Providing industrial plant equipment (IPE).
245.302–72 Providing ADPE as government property.
245.303 Providing material.
245.303–2 Procedures.
245.306 Providing special tooling.
245.306–2 Acquiring special tooling.

Subpart 245.4—Contractor Use and Rental of Government Property

245.401 Policy.
245.402 Authorizing use of Government production and research property.
245.403 Rental—use and charges clause.
245.405 Contracts with foreign governments or international organizations.
245.407 Non-government use of plant equipment.

Subpart 245.5—Management of Government Property in the Possession of Contractors

245.505–5 Records of plant equipment.
245.505–6 Special reports of plant equipment.
245.505–14 Reports of Government property.

Subpart 245.6—Reporting, Redistribution, and Disposal of Contractor Inventory

245.600 Scope of subpart.
245.601 Definitions.
245.604 Restrictions on purchase or retention of contractor inventory.
245.606–3 Acceptance.
245.606–5 Instructions for preparing and submitting schedules of contractor inventory.
245.607 Scrap.
245.607–70 Pre-inventory scrap determinations.
245.607–71 Segregation.
245.607–72 Contractor's approved scrap procedure.
245.608 Screening of contractor inventory.
245.608–1 General.
245.608–7 Reimbursement of costs for transfer of contractor inventory.
245.608–71 Procedures for industrial plant equipment.
245.609 Donations.
245.610 Sale of surplus contractor inventory.
245.610–1 Responsibility.
245.610–3 Proceeds of sale.
245.613 Property disposal determinations.

Subpart 245.70—Appointment of Property Administrator

245.7001 Appointment of property administrator.
245.7001–1 Selection, appointment and termination.
245.7001–2 Evaluation criteria.
245.7001–3 Assignment of contracts for property adminstration.
245.7001–4 Duties and responsibilities of plant clearance officer.

Subpart 245.71—Forms, Instructions, and Reports

245.7101 Forms.
245.7101–1 Standard Form 97.
245.7101–2 DD Form 1131.
245.7101–3 DD Form 1149.
245.7101–4 DD Form 1342.
245.7101–5 DD Form 1640.
245.7101–6 DD Form 1638.
245.7101–7 DD Form 1641.
245.7101–8 DD Form 1635.
245.7101–9 DD Form 1348–1.
245.7102 Instructions.
245.7102–1 Instructions for performing inventory verification and determination of allowability.
245.7102–2 DD Form 1638.
245.7102–3 Instructions for establishing a plant clearance case.
245.7102–4 Instructions for assigning plant clearance case number.
245.7102–5 Form letter for transmitting DD Form 1342 to DIPEC.
245.7102–6 General sales terms and conditions, and special conditions of sale.

PART 246—QUALITY ASSURANCE

Subpart 246.1—General

Sec.
246.101 Definitions.
246.102 Policy.
246.103 Contracting office responsibilities.
246.104 Contract administration office responsibilities.
246.170 Organization responsible for technical requirements.

Subpart 246.2—Contract Quality Requirements

246.202 Types of contract quality requirements.
246.202–3 Higher-level contract quality requirements.
246.203 Criteria for use of contract quality requirements.
246.204 Application of criteria.

Subpart 246.3—Contract Clauses

246.370 Material inspection and receiving report.
246.371 Inspection records.

Subpart 246.4—Government Contract Quality Assurance

246.405 Subcontracts.
246.406 Foreign governments.
246.470 Quality assurance by other agencies.
246.471 Contract administration of special commodities.
246.471–1 Subsistence.
246.471–2 Petroleum.
246.471–3 Construction projects.
246.472 Inspection stamping.
246.473 Authorizing shipment of supplies.
246.474 Government contract quality assurance actions.

Subpart 246.6—Material Inspection and Receiving Reports

246.670 General.
246.671 Policy.

Subpart 246.7—Warranties

246.701 Definitions.
246.704 Authority for use of warranties.
246.705 Limitations.
246.706 Warranty terms and conditions.
246.708 Warranties of technical data.
246.770 Special contract clauses.

PART 247—TRANSPORTATION

Subpart 247.1—General

Sec.
247.103 Transportation documentation and audit regulation (TDA).
247.104–3 Cost-reimbursement contracts.
247.104–5 Citations of Government rate tenders.
247.105 Transportation assistance.

Subpart 247.2—Contracts for Transportation or for Transportation-Related Services

247.270 Stevedoring contracts.
247.270–1 Scope of section.
247.270–2 Definition.
247.270–3 Method of acquisition.
247.270–4 Type of contract.
247.270–5 Technical provisions.
247.270–6 Evaluation of bids and proposals.
247.270–7 Analysis of man-hour and equipment rental rates.
247.270–8 Award of contract.
247.270–9 Contract clauses.
247.271 Contracts for the preparation of personal property for shipment or storage.
247.271–1 Scope of section.
247.271–2 Policy.
247.271–3 Procedure.
247.271–4 Solicitation provisions, schedule formats, and contract clauses.

Subpart 47.3—Transportation in Supply Contracts

247.301–2 Participation of transportation officers.
247.301–3 Using the Defense Transportation System (DTS).
247.305–10 Packing, marking and consignment.
247.306–2 Lowest overall transportation costs.
247.370 DD Form 1384 (1 Apr 66), Transportation Control and Movement Document.
247.371 The Standard Form 30, Amendment of Solicitation/Modification of Contract.
247.372 DD Form 1653 (1 Mar 68), Transportation Data for IFBs and RFPs.
247.373 DD Form 1654 (1 Mar 68), Evaluation of Transportation Cost Factors.

Subpart 247.5—Ocean Transportation by U.S.-Flag Vessels

247.503 Applicability.
247.506 Procedures.
247.507 Contract clauses.

PART 249—TERMINATION OF CONTRACTS

Subpart 249.1—General Principles

Sec.
249.102 Notice of termination.
249.105 Duties of termination contracting officer after issuance of notice of termination.
249.105–1 Termination status report.
249.106 Settlement of subcontract settlement proposals.
249.106–4 Authorization for subcontract settlements without approval or ratification.
249.109 Settlement agreements.
249.109–7 Settlement by determination.
249.110 Negotiation memorandum.

Subpart 249.4—Termination for Default

249.402 Termination of fixed-price contracts for default.
249.402–3 Procedure for default.

Subpart 249.6—Contract Termination Forms and Formats

249.601 Notice of termination for convenience.

Subpart 249.70—Special Requirements

249.7001 Terminated contracts with Canadian Commercial Corporation.
249.7002 Prior notification of significant contract terminations.
249.7003 Special termination costs.

PART 250—EXTRAORDINARY CONTRACTUAL ACTIONS

Sec.
250.001 Definitions.

Subpart 250.1—General

50.103 Deviations.
250.104 Reports.
250.105 Records.

Subpart 250.2—Delegation of and Limitations on Exercise of Authority

250.201 Delegation of authority.
250.202 Contract Adjustment Boards.

Subpart 250.3—Contract Adjustments

250.303 Contractor requests.
250.305 Processing cases.
250.306 Disposition.
250.403–70 Indemnification under contract involving both research and development and work that cannot be so classified.

Subpart 250.70—Act and Executive Order

250.7000 Scope.
250.7001 Act of August 28, 1958, as amended.
250.7002 Executive Order 10789 of November 14, 1958.

PART 251—USE OF GOVERNMENT SOURCES BY CONTRACTORS

Subpart 251.1—Contractor Use of Government Supply Sources

Sec.
251.100 Scope of subpart.
251.102 Authorization to use Government supply sources.
251.103 Ordering from government supply sources.
251.104 Furnishing assistance to contractors.
251.106 Title.
251.107 Contract clause.

Subpart 251.2—Contractor Use of Interagency Motor Pool Vehicles

251.202 Authorization.
251.205 Contract clause.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 252.1—Instructions for Using Provisions and Clauses

Sec.
252.101 Using Part 252.
252.106 Derivations of FAR provisions and clauses.

Subpart 252.2—Texts of Provisions and Clauses

252.270 Scope of subpart.
252.203–7000 Advertising and coupon redemption for military resale activities.
252.204–7000 Contract schedule subline items not separately priced—withholding of billing and payment.
252.204–7004 Data Universal Numbering System (DUNS) number reporting.
252.204–7005 Overseas distribution of defense subcontracts.
252.208–7000 Required sources for miniature and instrument ball bearings.
252.208–7001 Required sources for precision components and mechanical time devices.
252.208–7002 Required sources for high-purity silicon.
252.210–7000 Brand name or equal.
252.210–7001 Availability of descriptions listed in DoD Directive 5000.19–L, Volume II.
252.210–7002 Availability of specifications and standards not listed in DODISS, data item descriptions not listed in

Department of Defense Directive 5000.19–L, Volume II, and plans, drawings, and other pertinent documents.
252.210–7003 Availability for examination of specifications, standards, plans, drawings, data item descriptions, and other pertinent documents.
252.212–7000 Exclusion of periods in computing completion schedules.
252.213–7000 Inconsistency between English version and translation of contract.
252.213–7001 Returnable gas cylinders.
252.214–7000 Discounts.
252.215–7000 Pricing of adjustments.
252.216–7000 Economic price adjustment—basic steel, aluminum, brass, bronze or copper mill products.
252.216–7001 Economic price adjustment—nonstandard steel items.
252.217–7000 Exercise of option to fulfill foreign military sales commitments.
252.217–7300 Delivery vehicles.
252.217–7301 Time of delivery.
253.217–7302 Change in plant location.
252.217–7303 Sanitary conditions.
252.217–7304 Remedies under delivery orders.
252.217–7305 Examination and testing.
252.217–7306 Deficiency adjustment.
252.217–7307 Warning.
252.217–7308 Suspension.
252.217–7309 Default.
252.217–7310 Reinstatement.
252.217–7311 Code dating.
252.217–7312 Marking.
252.217–7313 Responsibility for containers and equipment.
252.217–7314 Containers and equipment.
252.219–7000 Small business and small disadvantaged business subcontracting plan (master plans).
252.219–7001 Notice of combined small business-labor surplus area set-aside.
252.219–7002 Notice of combined small business—labor surplus area set-aside—alternate.
252.219–7003 Determining the set-aside award price.
252.219–7004 Eligibility for preference as a labor surplus concern.
252.220–7000 Notice of labor surplus area set-aside.
252.220–7001 Notice of labor surplus area set-aside—alternate.
252.222–7000 Potential application of the service contract act, As Amended (Fixed Price).
252.222–7001 Service Contract Act (SCA) minimum wages and fringe benefits.
252.228–7000 Reimbursement for war hazard losses.
252.228–7001 Ground and flight risk.
252.228–7002 Flight risks.
252.228–7003 Capture and detention.
252.228–7004 Bonds or other security.
252.228–7005 Insurance.
252.228–7006 Accident reporting and investigation involving aircraft, missiles, and space launch, vehicles.
252.228–7007 Safety precautions for ammunition and explosives.
252.229–7000 Fixed-price, into-plane, fuel contracts at overseas locations.
252.231–7000 Supplemental cost principles.
252.232–700 Invoices.
252.232–7001 Advance payment pool.
252.232–7002 Disposition of payments.
252.232–7003 Progress payments for foreign military sales acquisitions.
252.232–7004 Flexible progress payments.
252.233–7000 Certification of requests for adjustment or relief exceeding $100,000.
252.235–7000 Indemnification under 10 U.S.C. 2354—fixed price.
252.235–7001 Indemnification under 10 U.S.C. 2354—cost reimbursement.
252.235–7002 Recovery of nonrecurring costs on commercial sales.
252.235–7003 Care of laboratory animals.
252.235–7004 Frequency authorization.
252.236–7000 Composition of contractor.
252.236–7001 Modification of proposals—price breakdown.
252.236–7002 Contract drawings, maps and specifications.
252.236–7003 Shop drawings:
252.236–7004 Contract prices—bidding schedules.
252.236–7005 Salvage materials and equipment.
252.236–7006 Misplaced material.
252.236–7007 Identification of employee.
252.236–7008 Superintendence of subcontractors.
252.236–7009 Payment for mobilization and preparatory work.
252.236–7011 Airfield safety precautions.
252.236–7012 Contractor-prepared network analysis system.
252.236–7013 Government-prepared network analysis system (APR 1988).
252.236–7014 Statement of work.
252.236–7015 Estimated cost, performance period.
252.236–7016 Direct payments.
252.236–7017 Approved construction plant.
252.236–7018 Option for supervision and inspection services.
252.236–7019 Notice of approval of restricted designs.
252.236–7050 Patent indemnity.
252.236–7051 Rights in shop drawings.
252.236–7052 Architectural designs and data—government rights.
252.236–7061 Cost limitation.
252.236–7062 Additive or deductive items.
252.237–7000 Statement of work.
252.237–7100 Award to single bidder.
252.237–7101 Award to single offeror.
252.237–7102 Requirements.
252.237–7103 Area of performance.
252.237–7104 Specifications.
252.237–7105 Using activities.
252.237–7106 Delivery orders and invoices.
252.237–7107 Delivery and performance.
252.237–7108 Subcontracting.
252.237–7109 Additional default provision.
252.237–7110 Group interment.
252.237–7111 Professional requirements.
252.237–7112 Facility requirements.
252.237–7113 Preparation history.
252.237–7200 Instruction to bidders (count of articles).
252.237–7201 Instruction to bidders (bulk weight).
252.237–7202 Count of articles.
252.237–7203 Loss or damage (count of articles).
252.237–7204 Weight of articles (bag type).
252.237–7205 Weight of articles (unsorted).
252.237–7206 Loss or damage (weight of articles).
252.237–7207 Maximum weight loss.
252.237–7208 Individual laundry.
252.237–7209 Special definitions of government property.
252.237–7400 Definitions (communications).
252.237–7401 Patent indemnity (communications).
252.237–7402 Access.
252.237–7403 Amendment of contract.
252.237–7404 Obligation of the Government.
252.237–7405 Authorization and Consent—Common Carriers.
252.237–7406 Continuation of orders.
252.237–7407 Facilities and services to be furnished—common carriers.
252.237–7408 Ordering of facilities and services—common carriers.
252.237–7409 Rates, charges, and services—common carriers.
252.237–7410 Payment—common carrier.
252.237–7411 Tariff information.
252.237–7412 Cancellation or termination of orders—common carriers.
252.237–7413 Reuse arrangements.
252.237–7414 Submission of cost or pricing data—common carriers.
252.237–7415 Audit and records—common carriers.
252.237–7416 Term and termination of contract—common carriers.
252.237–7417 Special construction and equipment charges.
252.237–7418 Title to communication facilities and equipment.
252.242–7000 Submission of commercial freight bill to the General Services Administration for audit.
252.242–7001 Notice of cost/schedule control systems.
252.242–7002 Cost/schedule control systems.
252.243–7000 Engineering change proposals.
252.243–7001 Pricing of adjustments.
252.246–7000 Material inspection and receiving report.
252.246–7001 Warranty of data.
252.247–7000 Scope of contract.
252.247–7001 Schedule of rates.
252.247–7002 Price escalation.
252.247–7003 Revision of prices.
252.247–7004 Changes.
252.247–7005 Termination.
252.247–7006 Indefinite quantities—fixed charges.
252.247–7007 Indefinite quantities—no fixed charges.
252.247–7008 Employees of contractor.
252.247–7009 Removal of contractor's employees.
252.247–7010 Liability and insurance.
252.247–7100 Evaluation of bids.
252.247–7101 Award.
252.247–7102 Estimated quantities.
252.247–7103 Schedule formats.
252.247–7104 Scope of contract.
252.247–7105 Period of contract.
252.247–7106 Ordering limitation.
252.247–7107 Contract areas of performance.
252.247–7108 Requirements.
252.247–7109 Facilities.
252.247–7110 Performance.
252.247–7111 Time requirements.
252.247–7112 Demurrage.
252.247–7113 Vans.
252.247–7114 Drayage.

252.247–7115 Liability.
252.247–7116 Erroneous shipments.
252.247–7117 Additional marking instructions.
252.247–7118 Weight certificates.
252.247–7119 Report of lost/damaged material.
252.247–7120 Subcontracting.
252.247–7121 Additional services.
252.247–7200 Ocean transportation of government-owned supplies.
252.249–7000 Special termination costs.
252.251–7000 Ordering from government supply sources.
252.251–7001 Use of interagency motor pool vehicles and related services.
252.270–7000 Warranty exclusion and limitation of damages.
252.270–7001 Contractor representation.
252.270–7002 Fixed price options.
252.270–7003 Option to extend the term of the contract.
252.270–7004 Option for increased quantities.
252.270–7005 Discontinuance repricing.
252.270–7006 Discontinuance of rental and repricing.
252.270–7007 Rights in privacy safeguards.
252.270–7008 Access to contractor facilities and records—privacy safeguards inspection.
252.270–7009 American standard code for information interchange (ASCII) system requirements.
252.270–7010 Punched paper tape readers and punches.
252.270–7011 Recorded magnetic tape for information interchange (800 CPI, NRZI).
252.270–7012 Rectangular holes in 12-row punched cards.
252.270–7013 Hollerith punched card code.
252.270–7014 Subsets of the standard code for information interchange.
252.270–7015 Flowcharts, symbols, and their usage in information processing.
252.270–7016 Recorded magnetic tape for information interchange (1600 CPI, Phase Code 0).
252.270–7017 One-inch perforated paper tape for information interchange.
252.270–7018 Take-up reels for the one-inch perforated tape for information interchange.
252.270–7019 Software summary for describing computer programs and/or automated data systems.
252.270–7020 Optical character recognition equipment.
252.270–7021 Character set for handprinting.
252.270–7022 Code extension technique in 7 or 8 bits.
252.270–7023 Graphic representation of the control characters of ASCII (FIPS PUB 1–1).
252.270–7024 Data Encryption Standards (DES).
252.270–7025 Recorded magnetic tape for information interchange, 6250 characters per inch (CPI) (246 CPMM), group coded recording.
252.270–7026 Magnetic tape cassettes for information interchange (3.810mm (0.150 inch) tape at 32 BPMM (800 BPI, PE).
252.270–7027 Recorded magnetic tape cartridge for information interchange, 4-track, 6.30mm (0.25 inch), 63 BPMM (1600 BPI) phase encoded.
252.270–7028 Description of computer magnetic tape file properties.
252.270–7029 Computer output microform (COM) formats and reduction ratios, 16mm and 105mm.
252.270–7030 Input/output (I/O) channel interface.
252.270–7031 Channel level power control interface.
252.270–7032 Operational specification for magnetic tape subsystems.
252.270–7033 Operational specifications for rotating mass storage subsystems.
252.270–7034 BASIC language compilers.
252.270–7035 FORTRAN language compilers.
252.270–7036 Magnetic tape labels and file structure information interchange.
252.270–7037 Data Encryption Standard (DES) modes of operation.
252.270–7038 Microform readers.
252.270–7039 Optical character recognition (OCR) inks.
252.270–7040 Optical character recognition (OCR) printers, readers and printed forms.
252.270–7041 Digital magnetic tape cassette equipment and associated programs.
252.270–7042 Acquisition and validation of COBOL compilers.
252.270–7043 Acquisition of COBOL programs and/or programming services.
252.270–7044 Delayed validation of compilers.
252.270–7045 Interchange of machine processable data between and among agencies.
252.270–7046 Synchronous high speed data signaling rates between data terminal equipment and data communication equipment.
252.270–7047 Bit sequencing of the code of information interchange in serial-by-bit data transmission.
252.270–7048 Character structure and character parity sense for serial-by-bit data communication in the code for information interchange.
252.270–7049 Character structure and character parity sense for parallel-by-bit data communications.
252.270–7050 Synchronous signaling rates between data terminal and data communication equipment.
252.270–7051 Data link control-synchronous bit-oriented data.
252.270–7052 Time and frequency reference information in telecommunications systems.
252.270–7053 Coding and modulation requirements for nondiversity 2400 bit/second modems.
252.270–7054 Coding and modulation requirements for 4800 bit/second modems.
252.270–7055 Coding and modulation requirements for duplex 9600 bit/second modems.
252.270–7056 Coding and modulation requirements for duplex 600 and/or 1200 bit/second modems.
252.270–7057 Electrical characteristics of balanced voltage digital interface circuits.
252.270–7058 Electrical characteristics of unbalanced voltage digital interface circuits.
252.270–7059 Group 2 facsimile apparatus for document transmission.
252.270–7060 Protection against compromising emanations.

PART 253—FORMS

Subpart 253.1—General

Sec.
253.170 Forms for use in DoD acquisition.

Subpart 253.2—Use of Forms

253.270 Use of Forms.

PART 270—ACQUISITION OF COMPUTER RESOURCES

Sec.
270.000 Scope.

Subpart 270.1—General

270.101 Procurement authorities.

Subpart 270.2—Definitions

270.200 Scope of subpart.

Subpart 270.3—Acquisitions Under General Services Administration (GSA) Authority

270.300 Scope of Subpart.
270.301 Policy.
270.302 Procurement authority.
270.302–1 Application.
270.303–2 Exceptions.
270.303 Contracting procedures.
270.303–1 Submission(s) of agency procurement requests (APR).
270.303–2 GSA action on APR.
270.303–3 GSA contracting for DoD.
270.304 Small purchases.
270.305 Restrictions on the use of simulation in the ADPE contracting process.
270.306 Publicizing contract actions.
270.307 Evaluation factors.
270.308 Commercially available software contracts.
270.309 Determination of selection factors.
270.310 Contract clauses.
270.311 Use of GSA regional support services contracts.
270.312 Contracting for ADP supplies.
270.313 Use of GSA schedule contracts for certain ADP related equipment.
270.314 GSA nonmandatory schedule contracts.
270.315 Synopsis of GSA schedule actions.
270.316 Use of GSA ADP requirements contracts.
270.317 Compatibility-limited requirements.
270.318 Software conversion studies.
270.319 Use of benchmarks in low-dollar ADPE systems acquisitions.
270.320 Use of remote terminal emulation in ADPE systems acquisitions.
270.321 ADP fund.
270.322 Exchange/"Sale" of ADPE.
270.323 Conflicts between this subpart and the DPA.
270.324 Acquisition assistance.

Subpart 270.4—Acquisitions Under 10 U.S.C. 2315 Authority

270.400 Scope of subpart.
270.401 Determination of applicability.

Subpart 270.5—Acquisition Under Other Authorities [Reserved]

Subpart 270.6—Acquisition of ADPE by DoD Contractors

270.600 Scope of subpart.
270.601 DoD component approvals.
270.602 Providing reused computer equipment to DoD contractors.
270.603 Review and approval of contractor-acquired computer equipment used for commercial and government contracts.
270.604 Contractor documentation.
270.605 Contractor use of computers for non-government purposes.
270.606 Purchase option credits for contractor-acquired computers.
270.607 Reuse of computers, software, and associated spare parts.
270.608 Technical assistance.

Subpart 270.7—Telecommunications Resources

270.701 General.
270.702 Policy.

Subpart 270.8—Use of the GSA Teleprocessing Service Program (TSP)

270.800 Scope.
270.801 Applicability.
270.802 Methods of acquiring GSA TSP services.
270.802–1 Multiple award schedule (MAS).
270.802–2 Basic agreement (BA).
270.802–3 GSA TSP guidance.
270.803 Procedures for acquiring GSA TSP services.
270.804 GSA review of selections under the GSA TSP.

Subpart 270.9—Privacy for Computer Systems

270.901 Applicability.
270.902 Requirements.
270.903 DoD component responsibilities.
270.904 Contract clauses.

Subpart 270.10—Security for Computer Systems

270.1000 Scope of subpart.
270.1001 Policy.
270.1002 Security program for automatic data processing facilities.
270.1003 Security against compromising emanations.

Subpart 270.11—Standards

270.1100 Scope of subpart.
270.1101 Policy.
270.1102 Waivers.
270.1103 Solicitation provisions and contract clauses.

Subpart 270.12—The Federal Computer Performance Evaluation and Simulation Center

270.1201 The Federal Computer Performance Evaluation and Simulation Center.

Subpart 270.13—Sharing of Computer Resources

270.1300 Scope of subpart.
270.1301 Policy.
270.1302 Government-wide sharing procedures.
270.1303 Federal Data Processing Centers (FDPCs).
270.1304 Federal Software Exchange Program.
270.1304–1 Procedures.
270.1304–2 Federal Software Exchange Center.
270.1304–3 DoD Components requirement.
270.1304–5 Federal Software Exchange Catalog availability.

Subpart 270.14—Reuse of Equipment

270.1400 Scope of subpart.
270.1401 Reassignment of computer equipment within DoD.
270.1402 Excess or exchange/"sale" computer equipment.
270.1403 Reutilization of excess and exchange/"sale" computer equipment.
270.1404 Considerations for use of excess Government-owned or leased computer equipment.
270.1405 Use of the ADP fund.

SUBCHAPTER A—GENERAL

PART 201—FEDERAL ACQUISITION REGULATIONS SYSTEM

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 201.1—Purpose, Authority, Issuance

201.101 Purpose.

The Department of Defense FAR Supplement is issued by the Under Secretary of Defense for Research and Engineering by direction of the Secretary of Defense and in coordination with the Secretaries of the Army, Navy and Air Force, and the Director of the Defense Logistics Agency. It establishes for the Department of Defense uniform policies and procedures, implementing and supplementing the Federal Acquisition Regulation.

201.103 Applicability.

(a) This supplement applies to all purchases and contracts made within and outside the United States (but see 201.405) for the procurement of supplies or services which obligate appropriated funds (including available contract authorizations). This supplement and the FAR also apply to purchases and contracts made in support of foreign miltary sales without regard to the nature or sources of funds obligated, unless otherwise specified in this regulation.

(b) Neither the FAR nor this supplement applies to transportation services purchased by transportation requests, transportation warrants, bills of lading, and similar transportation forms. Purchase of these excepted transportation services shall be in accordance with specific regulations and instructions issued by the Military Traffic Management Command, Military Sealift Command, Military Airlift Command, and the Departments.

201.104 Issuance.

201.104–1 Publication and Code arrangement.

This regulation is issued as Chapter 2 of Title 48, CFR. Other chapters are reserved for Departmental acquisition regulations that implement or supplement this regulation. It is also available in a loose-leaf edition.

201.104–2 Arrangement of regulations.

(a) This regulation is numbered according to whether the information implements or supplements the FAR. The differentiation is made by using the numbers 70–89 as new parts, subparts, sections, or subsections when supplementation is required. Implementing coverage uses the same numbers as the FAR material implemented. Numbers 1–69 have been reserved to the FAR. A series of numbers beginning with 7000 is used for provisions and clauses.

(1) A new Part 70 is used in the DoD FAR Supplement for new material which is not coverd by the FAR and is a distinct part only applicable to the Department of Defense.

(2) A new Subpart 225.72 could be used as the third subpart supplementing FAR Part 25, with Subparts 225.70 and 225.71 having preceded it.

(3) A new Section 225.173 could be used as the fourth section supplementing FAR Sections that begin with 25.101. In this case, the FAR can only be numbered through 25.169.

(4) A new Section 225.101–79 could be used as the 10th subsection supplementing FAR Subsections that begin with FAR 25.101–1.

(5) A new Subsection 252.225–7001 could be used as the second clause supplementing the FAR clauses prescribed by Part 25 beginning with 252.225–1. The number 7000 is used because of the potential existence of more than 20 clauses supplementing a given part over the lifetime of the FAR.

(6) Departmental supplementation of the FAR or this regulation will use the same rules, except that numbers 90 and above are reserved for supplementary material, and 9000 and above are reserved for supplementary clauses.

(c) *References and citations.*

(2) This regulation may be referred to as the Department of Defense Federal Acquisition Regulation Supplement or the DoD FAR Supplement. Cross reference to the FAR in this regulation will cite "FAR" followed by the appropriate part, subpart, etc.

References to this regulation will be without a name or acronym prefix. References to FAR citations in this supplement should be read to include the corresponding paragraphs of this supplement and any additional authorizations, restrictions, policies or procedures they may contain. For example, the words "* * * when authorized under FAR Part 25 * * *" include authorities granted under both FAR Part 25 and Part 225 of this supplement.

201.104-3 Copies.

Copies of the DoD FAR Supplement in loose-leaf and CFR form may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Subpart 201.2—Administration

201.201 Maintenance of the FAR.

201.201-1 The two Councils.

(a) The Defense Acquisition Regulatory (DAR) Council shall maintain the FAR and the DoD FAR Supplement.

(c) The composition and operation of the DAR Council shall be as prescribed by DoD Directive 5000.35.

Subpart 201.3—Agency Acquisition Regulations

201.301 Policy.

(S-70) Defense Acquisition Circulars.

(1) In accordance with the authority in FAR 1.301, a Defense Acquisition Circular, supplementary to this regulation, shall be published as often as may be necessary or advisable for distribution to all recipients of this regulation. Material to be published in each Defense Acquisition Circular shall first be approved by the Defense Acquisition Regulatory Council.

(2) The purposes of the Defense Acquisition Circular are:

(i) To promulgate as rapidly as possible selected material revising this regulation.

(ii) To disseminate material applicable to procurement which is not suitable for insertion in this regulation, but which may have the effect of a directive to, or be of importance and interest to its recipients; and

(iii) To supplement this regulation as may be necessary to reduce the size and frequency of issue of subsidiary Departmental procurement instructions.

(3) Unless otherwise indicated in the introductory language preceding an item, each item in Defense Acquisition Circulars will remain in effect until specifically canceled.

(4) Statements in Defense Acquisition Circulars to the effect that the material published therein is "effective upon receipt" or upon a specified date, or that changes set forth in the circular are "to be used upon receipt," mean that any new or revised clauses or forms included in the circular shall be included in invitations for bids and requests for proposal issued thereafter, unless a different meaning is expressed in the circular. However, unless otherwise provided in the circular, the new or revised clauses or forms need not be included in solicitations already in process of preparation where their inclusion would cause an undue delay in the solicitation.

(5) As a convenience to the Departments and to insure early and wide dissemination, selected DoD policy promulgations of general interest to contracting activities are republished as DAC items. Unless otherwise indicated, subsequent cancellation of such DAC items is not to be construed as cancellation of the underlying policy. Cancellation of such policy will normally be accomplished by separate and specific OSD action.

201.304 Agency control and compliance procedures.

(b)(1) The Departments and their subordinate organizations shall not issue instructions (including directives, regulations, policies, or procedures), contract forms or contract clauses implementing or supplementing the FAR or this regulation, unless permitted by one of the following and if consistent with (b)(2) below:

(i) Internal procurement management instructions, such as designations and delegations of authority, assignments of responsibilities; work flow procedures, and internal reporting requirements;

(ii) Any special contract clause of a nonrepetitive nature designed specifically to accomplish the peculiar requirements of an individual procurement, provided a clause relating to the subject matter is not set forth in the FAR or this regulation;

(iii) A variation of any contract clause which is set forth in the FAR or this regulation but not for use verbatim, provided that such variation is not inconsistent with the intent, principle and substance of the FAR or DoD FAR Supplement clause or related coverage of the subject matter;

(iv) Interim instructions, including service test of new techniques or methods of procurement, having an effective duration not exceeding six months (unless approved for a longer period by the DAR Council) which are essential:

(A) To meet current operational needs, provided the instructions are submitted prior to issuance or immediately thereafter for consideration by the DAR Council; or

(B) To effect greater efficiency in procurement management, provided the instructions authorized are submitted for approval of the DAR Council prior to issuance;

(v) Procurement procedures specifically identified as being essential for carrying out the peculiar needs of specialized commodity areas when authorized by: for the Army, Deputy Assistant Secretary (Acquisition), Office of the Assistant Secretary of the Army (Research, Development and Acquisition); for the Navy, Deputy Chief of Naval Material for Contracts and Business Management; for the Air Force, Director of Contracting and Manufacturing, Office of the Deputy Chief of Staff (Research, Development and Acquisition); for the Defense Logistics Agency, Executive Director, Contracting, or the Executive Director for Contract Management; for the National Security Agency, the Director; for the Defense Communications Agency, the Director; for the Defense Nuclear Agency, the Deputy Director, Operations and Administration; for the Defense Mapping Agency, the Staff Director of Logistics; and notification is given to the DAR Council immediately upon such authorization for the purpose of determining whether such procedures should be included in this regulation, or the FAR;

(vi) Procurement instructions specifically identified as being essential for carrying out the peculiar needs of overseas commands when authorized by the cognizant unified commander and notification is given to the DAR Council immediately upon such authorization for the purpose of determining whether such instructions should be included in this regulation or the FAR;

(vii) Material expressly determined by the DAR Council to be inappropriate for FAR or DoD FAR Supplement coverage, but appropriate for inclusion in Departmental publications.

(2) Instructions issued in accordance with (a) above shall not contain material which unnecessarily duplicates, is inconsistent with, or increases or restricts the use of, any authority contained in this regulation or the FAR.

(c) Each Department shall establish procedures to screen all instructions (including directives, regulations, policies or procedures), contract forms, and contract clauses issued pursuant to (a) and (b) above to assure strict compliance with this paragraph, and to

determine if the subject matter is appropriate for inclusion in this regulation or the FAR.

201.371 USEUCOM Supplement.

A supplement, entitled USEUCOM Supplement, is applicable to all purchasing officers of the Department of Defense in the North Atlantic-Mediterranean area, including all of Europe. The USEUCOM Supplement and changes thereto are developed by USEUCOM and concurred in by the Offshore Procurement Policy Coordinating Committee representing the purchasing offices in that area and, after adoption and approval by the Defense Acquisition Regulatory Council, are published and distributed by the Headquarters, United States European Command, as an integral part of this Regulation. In addition, Headquarters USEUCOM publishes Tabs to the USEUCOM Supplement which contain source and informational material (such as government-to-government agreements and tax information) and which do not require approval by the DAR Council.

Subpart 201.4—Deviations From the FAR

201.402 Policy.

(a) The FAR and the DoD FAR Supplement are not intended to stifle the development of new techniques or methods of procurement. Innovation to attain desirable objectives will occasionally necessitate deviations from this regulation and the FAR, and it is the responsibility of contracting officers to request such deviations whenever they are required in the best interest of the Government. For the purpose of this paragraph, a deviation shall be considered to be any of the following:

(1) When a contract clause is set forth in the FAR or DoD FAR Supplement for use verbatim, use of a contract clause covering the same subject matter which varies from the FAR or DoD FAR Supplement coverage, or use of a collateral provision which modifies either the clause or its prescribed application constitutes a deviation; however, in the case of a purchase or contract of an offshore contracting activity with a foreign contractor made outside the United States, its possessions, or Puerto Rico, such contract clauses may (subject to the direction of authority above the level of the contracting officer) be modified if no change in intent, principle, or substance is made (offshore contracting activities shall keep the cognizant unified commander advised of significant deviations effected under this subparagraph (a)(1);

(2) When a contract clause is set forth in the FAR or this regulation but not for use verbatim, use of a contract clause covering the same subject matter which is inconsistent with the intent, principle and substance of the FAR or DoD FAR Supplement clause or related coverage of the subject matter;

(3) Omission of any mandatory contract clause;

(4) When a Standard, DD, or other form is prescribed by the FAR or a Department of Defense Directive, use of any other form for the same purpose;

(5) Alteration of a Standard, DD, or other form (other than Departmental forms), except as authorized by the FAR, this regulation, or a Department of Defense Directive;

(6) When limitations are imposed in FAR, this regulation, or a Department of Defense Directive, upon the use of a contract clause, form, procedure, type of contract, or any other procurement action, including but not limited to the making or amendment of a contract, or actions taken in connection with the solicitation of bids or proposals, award, administration or settlement of contracts, the imposition of lesser or greater limitations;

(7) When a policy, procedure, method or practice of conducting procurement actions of any kind at any stage of the procurement process is covered by the FAR or this regulation, any policy, procedure, method or practice which is inconsistent with that set forth;

(8) Issuance of any instructions described in 201.304 (including an instruction for any additional contract clause, form, or type, or additional procurement policy, procedure, method of practice, not covered in the FAR, this regulation or in Department of Defense Directives) unless permitted under 201.304;

(9) A contract saving clause whereby the parties are committed to a contract modification in the event of changes in controlling statutes or regulations during the term of the contract. Any such saving clause shall require approval pursuant to 201.404.

(b) Requests for approval of any deviation from the FAR or this regulation shall be forwarded to the approving authority through procurement channels. Each submission shall contain as a minimum:

(1) Identification of the FAR or DoD FAR Supplement requirement from which deviation is sought;

(2) A full description of the deviation and the circumstances in which it will be used;

(3) A description of the intended effect of the deviation;

(4) A copy of any pertinent document, including forms or clauses and the proposed contractor's request, if any;

(5) A statement of the period of time for which the deviation is needed; and

(6) Detailed reasons supporting the request.

201.403 Individual deviations.

(a) Except where elsewhere prohibited, deviations from the FAR or this supplement or a Department of Defense Directive which affect only one contract or procurement may be made or authorized in accordance with Departmental procedures, provided such circumstances justify a deviation, and written notice of such deviation, describing its nature and the basis for its justification, is furnished to each of the following:

The Deputy Under Secretary (Acquisition Management), OUSD(R&E) Attention: DAR Council, Washington, DC 20301

The Assistant Secretary of the Army (RDA), Attn: DAR Council Policy Member, The Pentagon, Washington, DC 20310

The Assistant Secretary of the Navy (S&L), Attn: DARS Staff, Crystal Plaza, Bldg. 5, Washington, DC 20360

The Director of Contracting and Manufacturing Policy, Attn: AF/RDC (DAR), The Pentagon, Washington, DC 20330

Executive Directorate, Contract Management, Defense Logistics Agency, Attn: DLA-AA, Cameron Station, Alexandria, VA 22314

Such written notice shall be given in advance of the effective date of such deviations unless exigency of the situation requires immediate action.

(b) Examples of deviations from certain provisions of the FAR or this regulation not permitted under (a) above, although affecting only one contract or procurement, are:

(1) Provisions required by statute or executive order;

(2) Subpart 227.4;

(3) Subpart 231.1;

(4) Subpart 231.2;

(5) Part 232 (except 232.7, 232.8, and the Payment clauses in 232.1).

201.404 Class deviations.

Except as authorized in 201.403, deviations from this supplement or a Department of Defense Directive will not be effected unless approved in advance by the Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management), (DUSD(AM)); provided, however that unanimous approval by the members of the DAR Council will constitute approval of the DUSD(AM) of all matters except those involving major

policy. Written requests for such approval will be submitted to the DUSD(AM) through the DAR Council as far in advance as exigencies of the situation will permit.

201.405 Deviations pertaining to treaties and executive agreements.

(b) and (c) Notwithstanding 201.403 and 201.404, deviations from the FAR or this supplement that are required in order to comply with a treaty or executive agreement to which the United States is a party are authorized in accordance with FAR 1.405 (b) and (c).

(d) A copy of the text of any deviation authorized under FAR 1.405 (b) or (c) shall be submitted to the DAR Council.

(e) If a deviation required to comply with a treaty or an executive agreement is not authorized by FAR 1.405 (b) or (c), the request for deviation shall be submitted to the DAR Council for consideration.

Subpart 201.6—Contracting Authority and Responsibilities

201.601 Responsibility of each contracting activity.

Except as otherwise prescribed by procedures of each respective Department, the Head of a Contracting Activity is responsible for acquisitions under or assigned to his activity.

201.602 Authority of contracting officers.

Contracting officers at contracting offices are authorized to enter into contracts for supplies or services on behalf of the Government, and in the name of The United States of America, by formal advertising, by negotiation, or by coordinated or interdepartmental procurement; and, when authorized under FAR Part 42, to administer such contracts. This authority is subject to the requirements, consistent with this supplement and the FAR, imposed by the appointing authority. Contracting officers at contract administration offices are, except as provided in FAR Part 42, authorized to perform the applicable contract administration functions and to perform additional procurement functions when delegated by the contracting office.

201.670 Ratification of unauthorized commitments.

201.670–1 Authority.

Only contracting officers acting within the scope of their authority (see FAR 1.602) may enter into contracts on behalf of the Government. Subject to the limitations in 201.670–4 below, the Head of the Contracting Activity may ratify an unauthorized commitment, *provided:*

(a) The Government has obtained a benefit resulting from the unauthorized commitment;

(b) The Head of the Contracting Activity could have granted authority to enter into the commitment at the time it was made and still has the power to do so; and

(c) The resulting contract would otherwise have been proper if made by an authorized contracting officer.

201.670–2 Definitions.

"Ratification," as used in this section, means the act of approving an unauthorized commitment, by an official who has the authority to do so, for the purpose of paying for supplies or services provided to the Government as a result of the unauthorized commitment.

"Unauthorized commitment," as used in this section, means an agreement that is not binding solely because the Government representative who made it lacked the authority to enter into a contract on behalf of the Government.

201.670–3 Procedures.

(a) The authority of 201.670–1 above may be delegated in accordance with Departmental procedures, *provided,* that in no case shall this authority be delegated below the Chief of the Contracting Office.

(b) DoD components shall process unauthorized commitments using the ratification authority set forth herein in lieu of referral of such actions to the General Accounting Office for resolution as "quantum meruit/quantum valebat" claims.

201.670–4 Limitations on Exercise of Authority.

The authority in 201.670–1 above may be exercised only where—

(a) Supplies or services have been provided to and accepted by the Government;

(b) The contracting officer determines the price to be fair and reasonable;

(c) The contracting officer recommends payment and legal counsel concurs in the recommendation;

(d) Funds are available and were available at the time the unauthorized commitment was made;

(e) Administrative settlement of the unauthorized commitment would not involve a claim subject to resolution under the Contract Disputes Act of 1978.

201.670–5 Nonratifiable Commitments.

Cases that are not ratifiable under this section may be subject to resolution as recommended by the General Accounting Office under its claim procedure (4 GAO 5.1), or as authorized by FAR Part 50. Legal advice should be obtained in these cases.

PART 202—DEFINITIONS OF WORDS AND TERMS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 202.1—Definitions

202.1 Definitions.

"Department of Defense" means the Office of the Secretary of Defense and the Military Departments.

"Department" or "Military Department" includes the Department of the Army, the Department of the Navy, the Department of the Air Force, the Defense Logistics Agency, the Defense Communications Agency, the Defense Nuclear Agency, the Defense Mapping Agency, and the National Security Agency.

"Head of the agency" means the Under Secretary or any Assistant Secretary of the Army, Navy and Air Force, and the Director and Deputy Director of the Defense agencies, except to the extent that any law or executive order limits the exercise of authority to persons at the Secretarial level. In the latter situation, the Under Secretary of Defense (Research and Engineering) shall exercise the authority for Defense agencies.

(a) *Contracting activities* include:

For the Army:

Office of the Deputy Assistant Secretary (Acquisition), Assistant Secretary of the Army (Research, Development and Acquisition);

Directorate of Procurement & Production, Headquarters, U.S. Army Materiel Development and Readiness Command;

U.S. Army Armament Munitions and Chemical Command;

U.S. Army Missile Command;

U.S. Army Electronics Research and Development Command;

U.S. Army Communications-Electronics Command;

U.S. Army Troop Support Agency;

U.S. Army Troop Support and Aviation Materiel Readiness Command;

U.S. Army Tank-Automotive Command;

U.S. Army Aviation Research and Development Command;

U.S. Army Training and Doctrine Command;

U.S. Army Test and Evaluation Command;

U.S. Army Forces Command;

U.S. Army Health Services Command;

Military District of Washington, U.S. Army;

U.S. Army, Europe;
National Guard Bureau;
Office of the Chief of Engineers;
U.S. Army Communications Command;
Office of The Surgeon General;
U.S. Army Western Command;
Military Traffic Management Command;
U.S. Army Ballistic Missile Defense Systems Command;
Office of the Assistant Deputy Chief of Staff for Operations and Plans (Command, Control, Communications and Computers); and
Eighth U.S. Army.
For the Navy:
Office of Acquisition and Contract Policy, Office of the Assistant Secretary of the Navy, Shipbuilding and Logistics.
Headquarters, Naval Material Command;
Office of the Deputy Chief of Naval Material (Contracts and Business Management);
Naval Air Systems Command;
Naval Data Automation Command;
Naval Electronic Systems Command;
Naval Facilities Engineering Command;
Naval Sea Systems Command;
Naval Supply Systems Command;
Office of Naval Research;
Navy Aviation Supply Office;
Military Sealift Command;
Ships Parts Control Center;
Headquarters, United States Marine Corps; and
Installations and Logistics Department, Headquarters, U.S. Marine Corps.
For the Air Force:
HQ USAF, Director of Contracting and Manufacturing Policy;
Air Force Logistics Command;
Air Force Systems Command;
Strategic Air Command;
Tactical Air Command;
Air Force Communications Command;
Military Airlift Command;
Air Training Command;
Pacific Air Forces;
United States Air Forces in Europe;
Alaskan Air Command; and
Space Command.
For the Defense Logistics Agency:
Office of the Executive Director, Contract Management;
Office of the Executive Director, Contracting;
Defense Supply Centers; and
Defense Personnel Support Center.
For the Defense Communications Agency:
Headquarters, Defense Communications Agency; and
Defense Commercial Communications Office.
For the Defense Nuclear Agency:
Headquarters, Defense Nuclear Agency.
For Defense Mapping Agency:
Headquarters, Defense Mapping Agency, Logistics Office.
For the National Security Agency:
Headquarters, National Security Agency.
For the Defense Supply Service—Washington:
Director, Defense Supply Service—Washington.

(b) "Contracting activity" also includes any other contracting activity hereafter established. The number and designation of particular contracting activities of any Military Department may be changed by directive of the Secretary.

PART 203—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

203.000 Scope of part.

Reports of suspected criminal conduct, noncompetitive practices, kickbacks, and other procurement irregularities shall be made by each Department in accordance with procedures set forth in 209.472 and Departmental procedures. Such reports are specified by 203.103–2, 203.203, 203.301, 203.409, and 203.502 of this Part.

Subpart 203.1—Safeguards

203.101 Standards of conduct.

203.101–3 Agency regulations.

The applicable Department of Defense directive on Standards of Conduct is DODD 5500.7. See AR 600–50 for the Army; SECNAV Instr. 5370.2E of 29 November 1967, for the Navy; AFR 30–30, for the Air Force; DLAR 5500.1, for the Defense Logistics Agency; DCA Inst. 220–50–1, for the Defense Communications Agency; DNA Inst. 5500.7A, for the Defense Nuclear Agency; and DMA Inst. 5500.1, for the Defense Mapping Agency.

203.103 Independent pricing.

203.103–2 Evaluating the certification.

(b)(3) Whenever an offer is rejected under FAR 3.103–2(b) (1) or (2), or the certificate is suspected of being false, the matter shall be reported in accordance with 203.000 as well as being reported to the Attorney General in accordance with FAR 3.303.

Subpart 203.2—Contractor Gratuities to Government Personnel

203.203 Reporting suspected violations of the gratuities clause.

Suspected violations of the Gratuities clause shall be reported in accordance with 203.000 and Departmental procedures.

203.204 Treatment of violations.

Procedural requirements for hearings under the Gratuities clause are set out in Appendix D.

Subpart 203.3—Reports of Identical Bids and Suspected Antitrust Violations

203.301 General.

(b) Suspected antitrust violations shall be reported in accordance with 203.000 and Departmental procedures.

Subpart 203.4—Contingent Fees

203.409 Misrepresentations or violations of the convenant against contingent fees.

(b) When the chief of the contracting office has reviewed the facts and found evidence or basis for suspicion of fraud or other criminal conduct, the matter shall be reported in accordance with 203.000 and Departmental procedures.

203.410 Records.

Where the receipt of new Standard Form 119 makes previously received information obsolete, the obsolete information may be destroyed if its retention is no longer needed for enforcement purposes.

Subpart 203.5—Other Improper Business Practices

203.502 Subcontractor kickbacks.

Suspected violations of the Antitrust Kickback Act shall be reported in accordance with 203.000 and Departmental procedures.

203.570 Implied endorsement by military resale activities.

The contracting officer shall include the clause at 252.203–7000 in all solicitations and contracts for supplies purchased for resale to preclude any implied endorsement by military resale activities of commercially advertised products.

PART 204—ADMINISTRATIVE MATTERS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 204.2—Contract Distributon

204.201 Procedures.

(e) One copy of each of the following type contracts and of each modification thereto shall be distributed to the appropriate Defense Contract Audit Agency (DCAA) field audit office (listed

in the DCAA Directory—Headquarters and Field Offices):

(1) Cost reimbursement

(2) Time-and-materials

(3) Labor-hour

(4) Fixed price contracts with provisions for redetermination, incentives, economic price adjustment, or cost allowability

(5) Any other contract which requires audit service. (If there is a question as to the appropriate DCAA field audit office, contracting officers may request the assistance of the DCAA procurement liaison auditor or the nearest DCAA field audit office.)

(f) Two copies shall be distributed directly to the contract administration office cognizant of each manufacturing location where contract administration services will be required (see DoD Directory of Contract Administration Services Components 4105.59H), when administration of the contract is performed at other than the place of manufacture.

204.202 DoD distribution requirements.

(a) The contracting officer executing a contract or modification is responsible for complete distribution of the document.

(b) Except as provided in this paragraph and FAR 4.201(a), the procuring contracting officer shall maintain the original executed procurement document in the official contract file. The original of each modification executed by the ACO or TCO shall be provided to the PCO. Unless otherwise directed by the department concerned, the original executed provisioning orders shall be maintained by the office issuing the orders.

(c) In addition to the distribution in FAR 4.201, copies of contracts (including agreements) shall be distributed as specified below:

(1) Four copies to the contract administration office (distribution shall be effected simultaneously with the copy furnished under FAR 4.201(b);

(2) one copy to each consignee indicated in the contract (a transshipping terminal is not a consignee);

(3) one copy to the appropriate transportation office when required by FAR 42.1402, and additional copies as required by Departmental regulations;

(4) ten copies to the MIPR initiating activity in the case of coordinated procurement;

(5) one copy to the CAO ADP point, except when the DoDAAD code (see DoD Directory 4105.59H) is the same as that of either the CAO or payment office.

(d) When a payment office is added to, or changed under, an existing contract by modification, a copy of the basic contract and all modifications thereto shall be furnished to the added/new payment office. A copy of the modification affecting such addition or change shall also be furnished to the original or losing payment office. When a contract administration office, an accounting office and finance office (funding office), a consignee or other activity is added by a modification, the contracting officer shall determine the extent to which each activity is concerned with the basic contract and modifications and make distribution accordingly.

(e) Distribution of modifications issued pursuant to 204.7004–3(a)(2)(B) and 204.7004–4(b)(2) may be limited to the following:

(1) Contractor;

(2) Receiving Activity;

(3) Contract Administration Office;

(4) Payment Office;

(5) CAO ADP point in accordance with (c)(5) above.

(f) Distribution of overhead rate agreements may be limited to the contractor and the executing contracting officer.

(g) Distribution of contract modifications generated by mechanical means (computer program) may be limited to the following:

(1) Contractor, one copy;

(2) CAO, one copy;

(3) New Payment Office, one copy

(4) PCO, one copy;

(5) Funding Activities, one copy to each.

Subpart 204.6—Contract Reporting

204.670–1 Scope.

This section prescribes uniform reports which are required to be prepared by purchasing and contract administration offices in order to meet the requirements of the Federal Procurement Data System and provide management with necessary information to help formulate, change or measure the effectiveness of acquisition policy.

204.670–2 Definitions.

As used in 204.671 and 204.672 the following terms have the meanings stated below.

"Contracting Action" means any written action obligating or deobligating funds in connection with the purchasing, renting, leasing, or otherwise obtaining supplies, services, or construction. The term includes: preliminary contractual instruments; letter contracts; definitive contract, including notices of award; purchase orders; BPA calls; imprest fund purchases; SF 44 purchases; job orders; task orders; delivery orders; contingency orders; administrative notices; communciation services authorizations (CSA's); production lists; priced exhibits; other orders against existing contracts; and contract modification such as change orders or agreements, supplemental agreements, funding changes, option exercises, and notices of termination or cancellation.

"Purchasing Office" means any office which awards or executes a contracting action when that action is accomplished by the PCO. Included in the term are activities which place orders under DoD contracts, under another agency contract, or under GSA Federal Supply Schedule, when such action is not taken in conjunction with an assigned contract administration responsibility.

"Contract Administration Office" means the office which awards or executes a contracting action as defined above when such action is accomplished by an ACO on behalf of the PCO who assigned contract administration responsibility to that office, including actions taken by a TCO relating to the settlement of terminated contracts.

204.670–3 DUNS Number.

Contracting Officers shall insert in solicitations exceeding the small purchase limit the provision at 252.204–7004 to request the offeror to supply his Data Universal Numbering System (DUNS) Number.

204.670–4 Distribution of defense subcontracts placed overseas.

To assist DoD monitoring of arms cooperation agreements with friendly governments, the clause at 252.204–7005 shall be inserted in any contract for other then commercial items to be awarded which is expected to exceed $500,000, or when any modification increases the amount of a contract to more than $500,000. In the latter case, the reporting requirement will not be retroactive so as to require the reporting of subcontracts awarded prior to such modification. This clause shall not be inserted in contracts for ores, natural gas, utilities, petroleum products and crudes, timber (logs) and subsistence.

204.671 Individual procurement action report (DD Form 350).

204.671–1 Scope.

This Section prescribes the reporting on DD Form 350 of individual contracting actions in excess of $25,000. This reporting requirement has been assigned Report Control Symbol: DD–DR&E(M) 1014.

204.671-2 Purpose.

The DD Form 350 is used to collect data on contract placement statistics within DoD. The data gathered by means of the DD Form 350 are used for reporting the size and distribution of DoD procurement actions; types of contracts used; methods used in contracting; numbers and amount of contracts placed with categories of contractors such as small, small disadvantaged, and women-owned small business concerns; the negotiation authority used; the extent of competition achieved; and other essential facts about contract actions over $25,000 written by DoD. In many respects, the data summarized from the DD Form 350 are used to measure the efficiency and adequency of the way in which the DoD procurement program is executed. The data serve as the basis for internal DoD reports as well as reports to other departments of the executive branch, Congress, GAO, etc. They frequently provide a basis for new or revised procurement policies. Therefore, it is most important that accurate and complete data be reported in a timely manner through the DD Form 350.

204.671-3 Applicability and coverage.

(a) DD Form 350 consist of 6 parts. Part A identifies the report and the reporting activity. Part B identifies the transaction: contract number, contractor, dollars, product, etc. Part C gathers data concerning contracting procedures and methodology. Part D gathers data relating to the placement of the contract and to several statutory requirements relating to DoD procurements. Part E is set aside for departmental or higher authority use. Part F identifies the cognizant reporting official.

(b) DD Form 350 shall be prepared (typewritten or machine produced equivalent) for each contracting action obligating or deobligating more than $25,000 which is executed by a component of the Department of Defense except as indicated in (d) below. At the option of the headquarters of the Departments, purchasing offices may submit an automated record in lieu of a DD Form 350, *Provided,* that the contract file reflects such information on a separate worksheet or print-out for each individual contracting action in excess of $25,000.

(c) Multiple reports are required for a single action when both the Foreign Military Sales Program and other programs are involved (see 204.671-5(b)(12)). Multiple reports may be required if more than one type of contract is involved (see 204.671-5(c)(6)(ii)).

(d) DD Form 350 shall not be prepared for the following contracting actions:

(1) Transactions which cite nonappropriated funds, such as funds belonging to the Army and Air Force Exchange Service. Funds held in trust accounts for foreign governments shall be treated as appropriated funds.

(2) Transactions for leased communications placed by the Defense Communications Agency, Defense Commercial Communications Office (DECCO).

(3) Transactions for purchase of land, or rental or lease of real property.

(4) Orders from GSA Stock and the GSA Consolidated Purchase Program.

(5) Transactions which involve Government bills of lading or transportation requests.

(6) Grants for basic research with educational institutions and other nonprofit organizations.

(7) Orders placed against indefinite delivery type contracts entered into by the Defense Fuel Supply Center and the Military Sealift Command. The estimated value of the orders to be placed in each fiscal year against each contract shall be reported on a separate DD Form 350 in the appropriate fiscal year by the Defense Fuel Supply Center and Military Sealift Command for their respective contracts.

(8) Orders placed against indefinite delivery type contracts entered into by the Military Traffic Management Command for stevedoring services. Orders under each such contract shall be consolidated quarterly and the cumulative dollar amount reported on a single DD Form 350.

(9) Awards to individuals in support of dependent schools, e.g., principals and teachers. These transactions shall be consolidated monthly and the cumulative dollar amount reported on a single DD Form 350.

(10) Military Airlift Command awards for international airlift services. These actions shall be reported at the end of each operating month by the issuance of one master DD Form 350 for each airlift contract.

(11) Orders placed of resale items in excess of $25,000 against brand name contracts entered into by the Defense Logistics Agency and published in Supply Bulletin Series 10-500. Orders under each such contract shall be consolidated monthly and cumulative dollar amounts reported on a single DD Form 350 in accordance with departmental regulations.

(12) Vouchers processed by the U.S. Army Contracting Agency, Europe (USACAE), for the purchase of utilities from municipalities, such as gas, electricity, water, sewage, steam, snow removal, and garbage collection. These transactions shall be consolidated monthly and the cumulative dollar amount reported on a separate DD Form 350 in accordance with departmental regulations.

204.671-4 Due date and distribution.

(a) The signed original of each DD Form 350 shall be forwarded by the purchasing office within 3 working days after the date on which the dollars were actually obligated or deobligated by the contracting office, with the following exceptions:

(1) For those Defense Fuel Supply Center major petroleum acquisitions which result in multiple awards, the signed original of the DD Form 350 shall be forwarded within 10 working days.

(2) For actions executed in the month of September only, prescribed due dates are extended 10 calendar days for the forwarding of reports in order to assure complete coverage of all contracting actions occurring in the fiscal year.

(b) Corrected reports shall be distributed in exactly the same manner as original reports.

(c) DD Forms 350 shall be submitted as unclassified documents. If necessary, the commodity description (Item B8D) may be omitted and the work "classified" inserted in lieu thereof. In addition, enter 9999 in Block B8A and zeros (000) in Blocks B8D and B8C. Should further modification of coding of items on DD Form 350 be deemed necessary for security classification purposes, the appropriate department offices identified in (d) below shall be contacted for special instructions.

(d) Distribution of DD Form 350 shall be as follows:

(1) Army purchasing offices (except for Engineer Civil Functions purchasing offices) to HQDA(JDHQ-SV-W-P), Washington, D.C. 20310.

(2) Army Engineer Civil Functions purchasing offices to HQDA(DAEN-PRP), Washington, D.C. 20314.

(3) Navy purchasing offices as directed by COMNAVSUP(SUP-024).

(4) Air Force purchasing offices as directed by HQUSAF.

(5) Defense Logistics Agency purchasing offices to Executive Director, Contracting, Defense Logistics Agency, Cameron Station, Attn.: DLA-PA, Alexandria, VA 22314.

(6) All other purchasing offices of the Department of Defense shall forward the signed originals to HQDA(JDHQ-SV-W-P), Washington, D.C. 20310.

(e) Purchasing offices shall prepare DD Form 350 for contracting actions in excess of $25,000 which are reportable in accordance with 204.671-3 and are

accomplished by contract administration offices. To facilitate such reporting, the ACO or TCO, within one working day after the action date, shall transmit to the purchasing office on whose behalf the action was taken a copy of the contractual instrument clearly annotated in the heading in large block letters as the "DD FORM 350 REPORTING COPY". The purchasing office shall prepare and submit the DD Form 350 within 3 working days after the receipt of this "REPORTING COPY".

204.671–5 Instructions for completion of DD Form 350.

(a) *Part A of DD Form 350.*

(1) *Item A1, Type of report.*

(i) If this is an original report, enter Code zero in Item A1 and complete sections A through F as appropriate.

(ii) If it is necessary to cancel a previously submitted report in its entirety, i.e., the report should not have been submitted, then enter Code 1 in Item A1 and complete Items A2, A3, and B1 only.

(iii) To change any data elements on a previously submitted report, enter Code 2 in Item A1, enter in Items A2, A3, and B1 the same codes that were entered on the report being changed, and enter the corrected codes in each other item being corrected. Leave all other items blank. If it is necessary to change Items A2, A3, or B1 on a previously submitted report because a code was incorrect, that report must be cancelled and a new "original" report submitted.

(2) *Items A2, Report number.*

(i) Each purchasing office shall assign to DD Form 350 a unique 4-position number with alpha or numeric characters. It more than one activity within a purchasing office utilizes the same reporting office code, the purchasing office shall assign separate clocks of numbers to each such activity in order to prevent duplication of report numbers.

(ii) If Item A1 is coded 1 or 2 (a cancelling or correcting action), then enter the report number assigned to the report being cancelled or corrected.

(3) *Item A3, Purchasing office code.* Enter in Item A3 the code assigned to the purchasing office in accordance with DoD Procurement Coding Manual, Volume III.

(4) *Item 4A, Name of purchasing office.* Enter in the space provided sufficient detail to establish the identity of the purchasing office submitting the report.

(b) *Part B, DD Form 350.*

(1) *Item B1, Contract number.* Enter either, left justified, the Department of Defense contract number or, for orders under contracts awarded by other Federal agencies, the contract number of that Federal agency.

(i) For DoD contracts, enter the basic (13 alpha-numeric character) procurement instrument identification number (PIIN) that was assigned in accodance with 204.70. Contracts numbered under exceptions permitted by 204.7001 shall include the identification of the purchasing office and the fiscal year in accordance with 204.7003–1 (a) and (b) and Appendix N, plus 5 characters. Do not enter other supplementary procurement instrument numbers as part of the contract number; such numbers shall be entered in Item B2. Also, do not enter dashes, slants, or similar punctuation marks, and do not show spaces between numbers or letters in the PIIN.

(ii) For other agency contracts, enter the contract number of the Federal agency as it appears in the contractual instrument, except that spaces between characters shall not be shown, and dashes, slants, and other punctuation marks shall not be entered (e.g., for GS–OOS–27773, enter GS00S27773; for GP–16251 A, enter GP16251A, etc.).

(2) *Item B2, Modification, order or other supplementary procurement instrument identification number.* If applicable, enter the supplementary procurement instrument identification number (up to 13 characters) that was assigned in accordance with 204.7004 or other identification permitted by 204.7004 or other identification permitted by 204.7001.

(3) *Item B3, Action date.* Enter the year, month and day when a mutually binding agreement was reached. This shall be the effective date for fiscal obligation purposes. As a general rule, this occurs when a notice of award or fully executed document is manually delivered or placed in the mail to the contractor. Enter each segment as a 2-digit number using 01 through 12 for January through December. For example, enter 2 January 1984 as 840102. For contracts awarded in one fiscal year and not effective until a subsequent fiscal year because they are contingent on the availability of funds or for other reasons, the date shall be the date of the fund availability or the date when the contract becomes effective (see 204.671–5(b)(13)(iii) and (viii)).

(4) *Item B4, Contractor identification information.*

(i) *Item B4A, DUNS number.* Enter the 9-position number assigned by Dun and Bradstreet, Inc. (excluding dashes) that identifies the contractor establishment receiving the award. This DUNS Contractors Establishment Number should be for the division or plant identified. For contracts placed with the Canadian Commercial Corporation, enter "208891788" in Item B4A. For contracts placed with the Small Business Administration pursuant to the Small Business Act—Pub. L. 85–536, Section 8(a), enter the DUNS code for the small business firm which will be performing under the contract. The DUNS Contractor Establishment Number is available from one of the following sources:

(A) The offeror's response to the solicitation;

(B) If not provided with the offer, the successful offeror shall be contacted and requested to supply his applicable 9-digit number;

(C) If not provided by the successful offeror, the Federal Procurement Data Center (FPDC) DUNS Contractor Identification File, Alphabetical Listing shall be consulted.

(D) If this listing has no entry for the establishment, the applicable 9-digit number shall be obtained by contacting a Dun and Bradstreet, Inc. representative at the following commercial telephone numbers: 215–776–4388/4389/4390/4391. All requestors should provide the following information:

a. Name of requesting purchasing office;

b. Purchasing location (city/town; state/country) and commercial telephone number (including area code);

c. Name of individual making the request;

d. The total number of requests, if more than one; and

e. Contractor establishment name, street address (and/or P.O. Box), city/town, state/country, and zip code, if applicable, as displayed in Items B4B and B4C.

(ii) *Item B4B, Contractor name.* In the space provided, enter the name (including division name) of the contractor.

(iii) *Item B4C, Contractor address.* In the space provided enter the address of the contractor. Include street address (and/or P.O. Box), city/town, state/country, and zip code, if applicable.

(5) *Item B5, Principal place of performance.*

(i) Principal place of performance, in general, refers to the prime contractor's final assembly point of a manufactured article, construction site, place of mining, or place where a service is preformed for the Government, including military installations. If more than one location is involved, show the location involving the largest dollar amount of procurement. Do not show more than one location in Item B5. Do not leave the "name" portion of Item B5 blank.

(A) For purchase from regular dealers (FAR 22.601), the place of performance shall be the dealer's location if shipment is made from stock, or the subcontractor's location if shipment is made from a subcontractor's plant.

(B) For construction contracts, report the actual site of construction.

(C) For architect-engineering contracts, report the planned site of the construction.

(D) In cases where the places of performance will be varied or unknown, enter the home office location of the contractor.

(E) Where labor surplus area set-aside preference is given, the principal place of performance shall be the city and state of the area which determined the preference.

(ii) *Item B5A.* Enter the city or place code from Federal Information Processing Standard (FIPS) Publication 55, "Names of Populated Places and Related Entities of the States of The United States", of the principal place of preformance. If the city or locality is not listed in FIPS Publication 55, find the nearest county in FIPS Publication 55, and enter the 3-digit numeric county code, preceded by 2 zeros. Leave this item blank for Washington, D.C., foreign countries, and United States possessions or territories other than Puerto Rico.

(iii) *Item B5B.* Enter the state or country code from U.S. Department of Commerce, National Bureau of Standards (NBS) Letter Circular (LC) 1067, "Codes for Names of Countries and Outlying Areas of the United States", of the principal place of performance. For Washington, D.C., enter "11" and leave Item B5A blank.

(iv) *Item B5C.* Enter the name of the principal place of performance. If the location is the same as for Item B4C, enter the work "same".

(6) *Item B6, Type of obligation.* This item is used to identify the nature of the amount to be entered in Item B7. Enter Code 1 to show an obligation; Code 2 to show a deobligation.

(7) *Item B7, Total dollars (obligated/deobligated).* Enter the new amount of funds obligated or deobligated by the contractual instrument being reported. Enter whole dollars only.

(8) *Item B8, Principal product or service.*

(i) *Item B8A, FSC or Service Code.* Enter a Federal Supply Classification Code, a Research, Development, Test and Evaluation (RDT&E) Code, or a Service Code in accordance with Section I, Volume I of the Department of Defense Procurement Coding Manual (DoD 4105.61M). Each DD From 350 must contain a 4-character entry for this item. If more than one classification is applicable to the procurement action, enter the one accounting for the largest dollar volume of procurement.

(A) *Research, Development, test, and evaluation. (RDT&E)* is defined in FAR 35.001. Each DD Form 350 action for RDT&E shall be assigned, a code beginning with the letter "A" in accordance with Section I, Part A of the referenced coding manual. Do not assign RDT&E codes of the procurement (including rental or lease) of equipment, supplies, or services separately purchased in support of RDT&E work. Procurement of services or supplies that is incidental to the fulfillment of RDT&E work, but does not require contractor RDT&E performance, shall be coded in accordance with Parts B and C, Section I of the referenced coding manual, even though such purchases are in support of RDT&E work and RDT&E funds are cited. In no case shall RDT&E codes be assigned for orders under GSA Federal Supply Schedule contracts.

(B) *Services.* All services (except RDT&E actions) and lease or rental of equipment or facilities shall be coded in accordance with Part B, Section I of the referenced coding manual. Each category is assigned a series of 4-character codes for specific types of services and construction.

(C) *Supply.* Procurement of supply items shall be assigned a Federal Supply Classification (all numeric) Code from Part C, Section I of Volume I of the referenced coding manual. The Department of Defense Federal Supply Classification Cataloging Handbooks H2–1, H2–2, and H2–3 aslo may be used as a reference in identifying the correct 4-character code. Lease or rental of equipment/facilities should be coded as a service in accordance with Part B, Section I of the referenced coding manual.

(ii) *Item B8B, DD Claimant program code.* Enter the appropriate DDCP code that identifies the commodity described in Item B8D. Claimant Program Codes are defined in Section III, Volume I of the referenced coding manual. If the description in Item B8D is for research development, the objective of the research and development shall control the DDCP code to be entered; e.g., if the objective of the research and development is a guided missile, enter code A20. If the description in Item B8D is for research that cannot be identified with a particular claimant program, enter Code A10. Contracts for ship repair, inspection, and repair as necessary (IRAN), modification of aircraft, overhaul of engines, and like maintenance, repair or modification services shall be identified with a particular claimant program where possible. Equipment rental (including rental of automated data processing equipment (as defined at Part 70) and utility services shall be coded S10. If a particular claimant program cannot be identified, enter code S10 for services and code C9E for supplies or equipment.

(iii) *Item B8C, system or equipment code.* Enter the appropriate weapons system or equipment code in accordance with Section II, Volume I of the referenced coding manual. If a weapon system or equipment code is not applicable, enter 3 zeros. This reporting requirement is not applicable to the Defense Logistics Agency.

(iv) *Item B8D, name or description.* Enter the name or brief description of commodity or service. When the description of a commodity or service is classified, enter only the word "Classified"; however, do not specify "Classified, if a code name, such as Minuteman, Polaris, Trident, Pershing, etc., or an identifying programs number; e.g., WS–107A, can be used without classifying the report.

(9) *Item B9, Consulting services contract.* Enter Code 1 if the services being acquired are consulting services as defined in FAR 37.201; otherwise enter Code 2.

(10) *Item B10, Multi-year contract.* Enter code 1 if this report concerns multiyear contracting for supplies or services pursuant to FAR 17.1; otherwise enter Code 2.

(11) *Item B11, Total multi-year value.* Enter the estimated multiyear contract value if Item B10 is coded 1 and Item B13 is coded 1 or 3; otherwise, leave blank.

(12) *Item B12, Foreign military sales.* Enter Code 1 if the contracting action is under Foreign Military Sales arrangements, or under any other arrangements whereby a foreign country or international organization undertakes to bear the cost of the procurement. If not, enter code 2. If only part of a contracting action is for foreign military sales, that part (if in excess of $25,000) shall be reported on one DD Form 350, and the other part (if in excess of $25,000) shall be reported on a second DD Form 350. If this item is coded 1, do not complete Parts C and D.

(13) *Item B13, Kind of contracting action.* Enter one of the available codes as appropriate. Do not complete Parts C and D of DD Form 350 if Item B13 is coded 6 or 7.

(i) *Code 1—Initial letter contract.* Enter this code when a new letter contract is executed. (For a letter contract which is designated as a modification of an existing contract, enter Code A.)

(ii) *Code 2—Definitive contract superseding letter contract.* Enter this code when applicable. (For a definitive modification which supersedes a letter contract designated as a modification of an existing contract, enter Code A.)

(iii) *Code 3—Definitive contract (including notice of award).* Enter this code when the first binding document is the instrument containing all the terms and conditions of the agreement. Also enter code 3 for a modification which is the initial citation and obligation of funds for a contract awarded in one fiscal year but not effective until a subsequent fiscal year because it was contingent on the availability of funds or for other reasons. Use this code for definitive contract awards under the Small Business Administration 8(a) Program.

(iv) *Code 4—Order under DoD basic ordering agreement.* Enter this code when reporting orders or modifications to order under basic ordering agreements, priced exhibits and production lists entered into by a DoD Component.

(v) *Code 5—Order under DoD contract.* Enter this code when reporting orders or modifications to orders against indefinite delivery type contracts, DLA schedules, job orders, task orders, and the like where firm obligations are created by the issuance of such documents and where the basic contract was awarded by a DoD Component. Use this code for orders placed under DoD contracts with the Small Business Administration 8(a) Program. Also use this code for procurements from Workshops for the Blind or Other Severely Handicapped.

(vi) *Code 6—Order under GSA Federal Supply Schedule.* Enter this code for all procurements (including modifications) under the GSA Federal Supply Schedule Contracts (see FAR 8.4). Also enter this code for all contracting actions (including modifications) under GSA ADP Schedule Contracts and GSA Area Contracts for Utility Services.

(vii) *Code 7—Action with another Federal agency.* Enter this code for all procurements (including definitive contracts, orders, and contract modifications) from or through other Federal agencies (except General Services Administration), such as the Government Printing Office, Federal Prison Industries, Veterans Administration, Tennessee Valley Authority, and the Department of Treasury, Agriculture and Energy.

(viii) *Code A—Additional work, new agreement.* Enter this code when additional work is acquired by means of a supplemental agreement as follows:

(A) Bilateral modifications which increase the scope of work of existing contracts, including letter contracts.

(B) Modifications which are the initial citation and obligation of funds for a supplemental agreement to increase quantities or extend performance that was awarded in one fiscal year but not effective until a subsequent fiscal year because it was contingent on the availability of funds or for other reasons.

(ix) *Code B—Additional work, other.* Enter this code when additional work is acquired by means of modification to the basic contract as follows:

(A) Exercise of options for increased quantities or extended performance.

(B) Incremental yearly buys under multiyear contracts.

(C) Amendment to letter contracts, supplemental agreements, and other modifying actions which add work and are made pursuant to the terms of existing contracts.

(x) *Code C—Funding action.* Enter this code for amendments to letter contracts and other contract modifications which do not change the scope of work of the existing contract but obligate or deobligate funds. This includes, by way of illustration, incremental funding (other than incremental yearly buys under multiyear contracts), increasing the estimated cost on cost-reimbursement contracts, and repricing actions covering incentive price revision, and economic price adjustment. Do not use this code for a modification which is the initial citation and obligation of funds for a contract/modification awarded in one fiscal year but not effective until a subsequent fiscal year because it was contingent on the availability of funds or for other reasons (see (iii) and (viii) (B) above). For funding actions involving the kind of contracting actions covered in (iv), (v), (vi), and (vii) above, Codes 4, 5, 6, and 7 shall be used as appropriate.

(xi) *Code D—Change order.* Enter this code when reporting changes orders issued pursuant to the "Changes", "Differing Site Conditions", or similar provisions of existing contracts.

(xii) *Code E.* Enter this code of Termination for default.

(xiii) *Code F.* Enter this code for Termination for convenience.

(xiv) *Code G.* Enter this code for cancellation.

(c) *Part C of DD Form 350.* The following rules apply to each of the items listed in Part C of DD Form 350: If Item B12 is coded 1 or if Item B13 is coded 6 or 7, leave all items in this Part C blank. If Item B13 is coded 1 through 4, coding of all items in this Part C shall be accomplished in accordance with the coding instructions for that item. If Item B13 is coded 5, or B through G, enter the same code in each item in Part C that was reported on the DD Form 350 to the original contract governing this transaction. If a DD Form 350 to the original contract was not submitted because a DD Form 350 was not required, enter the code which is applicable to the original contract governing this transaction.

(1) *Item C1, Synopsis in Commerce Business Daily.* Enter code 1 if a synopsis of the proposed action was prepared and transmitted in accordance with FAR 5.2. If not, enter code 2.

(2) *Item C2, Reason not synopsized.* Enter the applicable code as follows (see FAR 5.201):

Code and Reason

0 Original estimate less than $10,000;
1 The procurement for security reasons is of a classified nature;
2 Procurement of perishable subsistence when made by placement of an order under a contract covered by FAR 16.5;
3 Procurement is for utility services and only one source is available;
4 Procurement which is of such unusual and compelling urgency that the Government would be seriously injured by the delay involved in permitting the date set for receipt of bids, proposals, or quotations to be more than the time periods specified at FAR 5.203;
5 Procurement to be made by an order placed under an existing contract covered by FAR 16.5;
6 Procurement to be made from another Government department or agency, including procurements from the SBA using the authority of section 8(a) of the Small Business Act, or a mandatory source of supply such as an agency for the blind under the blind-made products program;
7 Procurement that results from acceptance of a proposal pursuant to the Small Business Innovation Development Act of 1982 or an unsolicited proposal that demonstrates a unique or innovative research concept and publication of such unsolicted proposal would improperly disclose the originality of thought or innovativeness of the proposed research;
8 Procurement for which a foreign government reimburses the Department for the cost of the procurement of the property, supplies, or services for such government and only one source is available, or the terms of an international agreement or treaty between the United States and a foreign government authorize or require that all such international agreement or treaty;
9 When it has been determined in writing by the Secretary with the concurrence of the Administrator of the Small Business Administration, that advance notice is not appropriate or reasonable.

(3) *Item C3, Method of contracting.* Enter code 1 when accomplished by

formal advertising; enter code 2 when accomplished by negotiation, including restricted advertising actions and modifications made pursuant to the provisions of Pub. L. 85–804. When code 1 is entered, no entries shall be made in Items C4 and C5.

(4) *Item C4, Negotiation authority.* This item shall be completed where Item C3 was coded 2. Enter the code below which corresponds to the negotiation exception of 10 U.S.C. 2304(a) (see FAR 1015.201–15.217) cited as the negotiation authority.

Code and Negotiation Authority

0101 Labor Surplus Area Set-aside (FAR 15.201)
0102 Unilateral Small Business Set-aside (FAR 15.201)
0200 Public Exigency (FAR 15.202)
0400 Personal or Professional Services (FAR 15.204)
0500 Services of Educational Institutions (FAR 15.205)
0600 Purchases Outside the United States (FAR 15.206)
0700 Medicines or Medical Supplies (FAR 15.207)
0800 Supplies Purchased for Authorized Resale (FAR 15.208)
0900 Perishable or Nonperishable Subsistence Supplies (FAR 15.209)

1500 Negotiation After Advertising (FAR 15.214)
1600 In the Interest of National Defense (FAR 15.217)
1701 Joint Small Business Set-Aside (FAR 15.217)
1702 Otherwise Authorized by Law (FAR 15.215)
1703 Repurchase Following Default (FAR 15.217)

(5) *Item C5, Extent of competition in Negotiation.*

(i) This item shall be completed where Item C3 was coded 2. Enter the code below which corresponds to the extent of competition in the negotiated action:

Code and Extent of Competition

1 Price competition
2 Design or technical competition
3 Follow-on after price competition
4 Follow-on after design or technical competition
5 Other noncompetition
6 Non-competition based on catalog or market price
7 Competition not applicable

(ii) Definitions of the Extent of Competition Codes:

(A) *Price competition, Code 1.*

(a) A contract shall be reported as "price competition" if offers were solicited and received from at least two responsible offerors capable of satisfying the Government's requirements wholly or partially, and the award or awards were made to the offeror or offerors submitting the lowest evaluated prices (including catalog or market prices). In addition, a contract may also be reported as "price competition" even though only one offer is received, when offers are solicited from at least 2 responsible offerors who normally contend for contracts of the same or similar items. Where only one responsive offer was received and the solicitation was restricted to a prime contractor and his subcontractor for that item, use Code 5. Actions shall not be reported as "price competition" solely on the basis of the number of solicitations made. Contracting officers shall consider in the content of the response of the solicitation, the contract history of the items purchased, and other relevant information, and shall exercise sound judgment in reporting actions as "price competition". In no case shall cost-reimbursement type contracts be coded 1. Even though catalog or market prices were offered, if the criteria for "price competition" as specified here have been met, then enter Code 1.

(b) Multiple awards in such areas as subsistence, clothing, and equipage, and other commodities where several awards normally result from one solicitation may be reported as "price competition", even though the total quantity of the solicitation is not awarded, if in the judgment of the contracting officer there are sufficient facts to support a valid finding of "price competition".

(B) *Design or technical competition, Code 2.* Design or technical competition is present when 2 or more qualified sources of supply are invited to submit design or technical proposals, with the subsequent contract award based primarily on this factor, rather than on a price basis. Many research and development contracts and many initial contracts for new military weapons fall into the category of design or technical competition.

(C) *Follow-on after price competition, Code 3, and follow-on after design/technical competition, Code 4.* A follow-on contract means a new procurement (whether placed by a separate new contract or by a supplemental agreement) placed with a particular contractor to continue or augment a specific military program in instances where such placement was necessitated by prior procurement decisions. An example of a follow-on contract is one which by force of circumstances had to be awarded to a contractor who was just completing a research development contract in the same program. Other examples of follow-on contracts include those for support equipment, maintenance support, technical representatives or spare parts which have been awarded without competition to the contractor because he furnished the original equipment. Follow-on contracts in which the selection of the contractor at the inception of the program was on a competitive basis (i.e., price or design or technical shall be reported as Code 3 or 4, as appropriate). Follow-on contracts in which the selection of the contractor at the inception of the program was on a noncompetitive basis shall be reported as Code 5.

(D) *Other noncompetition, Code 5.* A contracting action shall be reported other noncompetition if there was no competition in the award, the work involved was not a follow-on procurement reportable as Code 3 or 4 above, and the reasonableness of price was not based on established catalog or

market prices reportable as Code 6. Also, use this code to report actions where only one responsive offer was received and the solicitation was restricted to a prime contractor and his subcontractor for that item.

(E) *Noncompetition and based on catalog or market price, Code 6.* A contracting action shall be reported Code 6 if there was no competition in the award and the reasonableness of price was based on established catalog or market prices of commercial item sold in substantial quantities to the general public as defined in (FAR 15.804–3(c). If the award involved catalog or market prices and the criteria for "price competition" as specified in (c)(5)(ii)(A) above have been met, enter Code 1 versus Code 6.

(F) *Not applicable, Code 7.* The following action shall be entered as Code 7:

(a) Awards for brand name items for commissary resale;

(b) Awards to nonprofit institutions;

(c) Awards to regulated monopolies for utilities "where the price negotiated is based on prices set by law or regulation"; and,

(d) Awards made pursuant to Section 8(a), Small Business Act (15 U.S.C. 637(a)).

(c) *Item C6, Type of contract.*

(i) Enter the code below which corresponds to the type of contract provided of in the provisions of the action reported.

Code	Type of Contract
A	Fixed Price Redetermination: Type A
B	Fixed Price Redetermination: Type B
J	Firm Fixed Price
K	Fixed Price economic price adjustment
L	Fixed Price incentive with performance incentive
M	Fixed Price incentive without performance incentive
R	Cost Plus Award Fee
S	Cost Contract
T	Cost Sharing
U	Cost Plus Fixed Fee
V	Cost Plus incentive fee—with performance incentive
W	Cost Plus incentive fee—without performance incentive
Y	Time and materials
Z	Labor Hour

(ii) *Multiple contract types.* Where the action involves more than one type of contract, the predominant type based on dollar shall be entered. However, if any nonpredominant portion of a multi-type contract exceeds $500,000, a separate DD Form 350 shall be used to report each such portion of the action. The total of the DD Forms 350 so reported shall equal the total contract action.

(iii) *Letter contracts.* When reporting original letter contracts and amendments thereto, enter the code of the type of contract that will be used when the letter contract is converted to a definitive contract.

(d) *Part D of DD Form 350.* The following rules apply to each of the items listed in Part D of DD Form 350: If Item B12 is coded 1 or if Item B13 is coded 6 or 7, leave all items in this part blank. If Item B13 is coded 1 through 4, or A, coding of all items in this Part D shall be accomplished in accordance with the coding instructions for that item, and the status of the concern, such as its size or ownership, shall be determined as of the date of the award. If Item B13 is coded 5, or B through G, enter the same code in each item in Part D that was reported on the DD Form 350 to the original contract governing this transaction. If a DD Form 350 to the original contract was not submitted because a DD Form 350 was not required, enter the code which is applicable to the original contract governing this transaction.

(1) *Item D1, Type of business.*

(i) Enter Code 1 if the award was made to a domestic large business concern, and the place of performance (Item B5C) is within the United States, its possessions, Puerto Rico, or the Trust Territory of the Pacific Islands.

(ii) Enter Code 2 if the award was made to a small business concern as defined in FAR 19.101 and the place of performance (Item B5C) is within the United States, its possessions, Puerto Rico, or the Trust Territory of the Pacific Islands.

(iii) Enter Code 3 if the award is made to a foreign concern (FAR 25.101).

(iv) Enter Code 4 if the award is made to a domestic large or small business concern and the place of performance (Item B5C) is outside the United States, its possessions, Puerto Rico or the Trust Territory of the Pacific Islands.

(v) Enter Code A, B, C, D, or E if the award was made to a nonprofit institution and the place of performance (Item B5C) was within the United States, its possessions, Puerto Rico, or the Trust Territory of the Pacific Islands. A nonprofit institution not organized for profit, no part of the net earnings of which inure to the benefit of any private shareholder or individual. Included are educational and scientific institutions of a nonprofit nature, and state, local, and other non-Federal Government agencies. Enter Code A if the contractor is an educational institution, Code B if a hospital, Code C if a workshop of the blind or other severely handicapped and the action is an acquisition from the Procurement List FAR 8.703 Code D if a workshop for the blind or other severely handicapped and the action is not an acquisition from the Procurement List (Optional Placement) FAR 8.173, and Code E for all other nonprofit institutions.

(d)(2) *Item D2, Reason not awarded to small business concern.* If the action was not awarded to a small business concern, enter an appropriate code from the available codes below. Otherwise, leave blank.

(i) Use Code 1 if there was no known small business source.

(ii) Use Code 2 if there was no known small business source but it was not solicited for a bid or proposal.

(iii) Use Code 3 if a small business concern was solicited, but no bid or proposal was received from such concern, or the concern did not offer sufficient quantity to cover the total requirement but received an award of the portion bid on.

(iv) Use Code 4 if a small business concern was solicited but the low or most advantageous offer was not from small business. Enter Code 4 if a small business concern was not willing to accept award of a set-aside portion of an action at the price offered as determined by the price the Government would otherwise have had to pay.

(v) Use Code 5 if not awarded to small business for any other reason.

(3) *Item D3, Small disadvantaged business.*

(i) Enter Code 1 if the contractor is not a small disadvantaged business concern in accordance with the representation required in FAR 19.304(a).

(ii) Enter Code 2 if the contract was awarded to the U.S. Small Business Administration (SBA) pursuant to Section 8(a) of the Small Business Act (FAR 19.8).

(iii) Enter Code 3 if the award is not an SBA 8(a) award but is made to a firm determined to be a small disadvantaged business concern in accordance with the representation required in FAR 19.304(b).

(4) *Item D4, Reason not awarded to small disadvantaged business concern.* If the action was not awarded to a small disadvantaged business concern, enter an appropriate code from the available codes below. Otherwise, leave blank.

(i) Use Code 1 if there was no known small disadvantaged business source.

(ii) Use Code 2 if there was a known small disadvantaged business source but it was not solicited for a bid or proposal.

(iii) Use Code 3 if a small disadvantaged business concern was solicited, but no bid or proposal was received from such concern, or the concern did not offer sufficient quantity to cover the total requirement but received an award for the portion bid on.

(iv) Use Code 4 if a small disadvantaged business concern was solicited but the low or most advantageous offer was not from a small disadvantaged business concern.

(v) Use Code 5 if not awarded to a small disadvantaged business for any other reason.

(d)(5) *Item D5, Women-owned small business.*

(i) Enter Code 1 if the contractor's response to FAR 52.219–3 indicates the firm is not a women-owned small business.

(ii) Enter Code 2 if the response to FAR 52.219–3 indicates in the affirmative that the contractor is a women-owned small business.

(iii) Enter Code 3 if the information is not available because the contractor did not complete the certification under FAR 52.219–3.

(6) *Item D6, Small business set-aside preference.*

(i) Enter Code 1 if the solicitation/award was not totally or partially set aside for small business pursuant to FAR 19.502–2, FAR 19.502–3, and 20.70.

(ii) Enter Code 2 if the solicitation/award was totally set aside for small business pursuant to FAR 19.502–2.

(iii) Enter Code 3 if the solicitation/award was partially set aside for small business pursuant to FAR 19.502–3 and 20.70.

(7) *Item D7, Subcontracting plan for small and small disadvantaged businesses.* Enter the appropriate code as follows:

(i) Enter Code 1 if a subcontracting plan was not included in the contract because subcontracting possibilities do not exist (FAR 19.706).

(ii) Enter Code 2 if the subcontracting plan was not required for other reasons e.g., the action was awarded to a small business firm or the dollar value of the award was less than the cited threshold (FAR 19.708(b)).

(iii) Enter Code 3 if the subcontracting plan was required but the incentive provisions referenced in FAR 19.708(c) were not included.

(iv) Enter Code 4 if the subcontracting plan was required and incentive provisions specifically pertaining to subcontracting with small and small disadvantaged business referenced in FAR 19.708(c) were included.

(8) *Item D8, Small Business Innovation Research (SBIR) Program.* Enter the appropriate code as follows:

(i) Enter Code 1 if the action is *not* in support of the Small Business Innovation Research Program (Pub. L. 97–219).

(ii) Enter Code 2 if the action is related to a Phase I contract in support of the Small Business Innovation Research Program (Pub. L. 97–219).

(iii) Enter Code 3 if the action is related to a Phase II contract in support of the Small Business Innovation Research Program (Pub. L. 97–219).

(9) *Item D9, Labor Surplus Area (LSA) Preference.* The Department of Labor publication "Listing of Eligible Labor Surplus Areas Under Defense Manpower Policy No. 4B and Executive Orders 10582 and 12073" defines all areas classified as labor surplus areas. If Code 2, 3, 4, 5, or 6 is entered, the entry in Item B5C must be a location which on the date of the action is located within a labor surplus area.

(i) Enter Code 1 if no preference was given to labor surplus area concerns.

(ii) Enter Code 2 when reporting the labor surplus portion of a combined set-aside (219.502–70).

(iii) Enter Code 3 if the action was awarded to a concern in a labor surplus area wherein preference was given under partial labor surplus area set-aside procedures 220.7003 except if set-aside preference resulted from a combined small business/labor surplus area set-aside as set forth in (d)(9)(ii) above.

(iv) Enter Code 4 if the action was awarded to a concern in a labor surplus area and tie bid preference (FAR 15.407–6) was given.

(v) Enter Code 5 when reporting an award that it totally set-aside for labor surplus areas, but with no further preference as to whether it is a large or small business firm.

(vi) Enter Code 6 when reporting an award that is totally set aside for labor surplus area concerns which are also small business concerns.

(10) *Item D10, Subject to labor standards statutes.* Enter the appropriate code as follows:

(i) Enter Code 1 if subject to the provisions of the Walsh-Healey Act, Manufacturer (see FAR 22.6).

(ii) Enter Code 2 if subject to the provisions of the Walsh-Healey Act, Regular Dealer (see FAR 22.6).

(iii) Enter Code 3 if subject to the provisions of the Service Contract Act, as amended (see FAR 22.6).

(iv) Enter Code 4 if subject to the Davis-Bacon Act.

(v) Enter Code 5 if not subject to any of the statutory requirements above.

(11) *Item D11, Certificate of current cost of pricing data.* Enter Code 1 if a certificate of current cost or pricing data (see FAR 15.804–4) was obtained, Code 2 if the certificate was not obtained, or Code 3 if the requirement was waived.

(12) *Item D12, Trade data relating to products or components not manufactured in the United States or services performed by foreign concerns.*

(i) *Item D12A, Number of offerors.* Enter the number of offerors of end-products not manufactured in the United States, its possessions, Puerto Rico, or the Trust Territory of the Pacific Islands. If zero, enter 0; if greater than 9, enter 9.

(ii) *Item D12B, Buy American Act percent difference.* If the evaluation factor under the Buy American Act is used and results in an award to a firm offering a domestic product, enter the percent difference between the award price and low firm offering a foreign end product, computed before application of the Buy American Act differential; i.e., the difference divided by the price of the low firm offering a foreign end product. Enter the percentage as a whole number (i.e., for 5%, enter 05; for 11%, enter 1). If the evaluation factor under the Buy American Act is not used, enter 2 zeros (00).

(iii) *Item D12C, Country of origin.* Enter appropriate country code shown as follows:

(A) If the product shown in Item B8D is manufactured in the U.S. and more than 50% of the cost of all its components is not manufactured in the U.S., enter the letter A and the 2-digit code of the country/area providing the greatest part of such components, as shown in NBS LC 1067, "Codes for Names of Countries and Outlying Areas of the United States".

(B) If the product is manufactured, mined, or grown outside the U.S., enter the letter B and the 2-digit code of the country/area of origin, as shown in NBS LC 1067.

(C) If a service shown in Item B8A is performed by a foreign concern (see FAR 25.101) enter the letter B and the country/area code of the concern, as shown in NBS LC 1067.

(D) In all other cases, leave this item blank.

(13) *Item D13, Contract financing (progress payments or advance payments).* Enter the appropriate code as follows if Item C6 is coded A, B, J, K, L, or M.

(i) Enter Code 1 if the action contains the clause at 7–104.35(a) or (b).

(ii) Enter Code 2 if the action contains the clause at 7–104.35(c).

(iii) Enter Code 3 if the action is for either shipbuilding or construction and percentage-of-completion-progress-payment financing is provided (see FAR 32.102(e)).

(iv) Enter Code 4 if the action provides Unusual Progress Payments or Advance Payments (see FAR 32.4, and FAR 32.501–2).

(v) Enter code 5 if none of the above apply.

(e) *Part E, DD Form 350.*

For departmental or higher authority use.

(f) *Part F, DD Form 350.*

(f)(1) *Item F1, Name of contracting officer or representative.* Enter name (Last, First, MI) of the contracting officer or representative.

(f)(2) *Item F2, Signature.* Contracting Officer or Representative.

(f)(3) *Item F3, Telephone number.* Installations serviced by the Automatic Voice Network shall enter the AUTOVON number plus extension.

(f)(4) *Item F4, Date.* Enter date (Yr/Mo/Da) that DD Form 350 Report is submitted.

204.672 Monthly procurement summary (DD Form 1057).

204.672-1 Scope.

This Section prescribes the reporting on DD Form 1057 of contracting actions of $25,000 or less each. This form in conjunction with DD Form 350 is used to prepare recurring and special reports as indicated in 204.671-2. This reporting requirement has been assigned Report Control Symbol: DD-DR&E (M) 1015.

204.672-2 Applicability and coverage.

(a) A DD Form 1057 shall be prepared (typewritten or machine reproduced) by each purchasing officer of the Department of Defense to which a reporting office code has been assigned in the DoD Procurement Coding Manual, Volume III. The DD Form 1057 shall cover all contracting actions of $25,000 or less. Separate codes may be assigned to an installation, base, or activity by Volume III of the DoD Procurement Coding Manual in order to distinguish between various types of procurement, such as base and central procurement, or RDT&E and non-RDT&E procurement. Subject to the approval of the organizations listed in 204.672-3 a machine printout or other machine product containing the information on the DD Form 1057 may be submitted in lieu of the form.

(b) DD Form 1057 shall include all debit or credit contracting actions of $25,000 or less involving:

(1) Appropriated funds;

(2) Contract authorizations;

(3) Stock or other revolving funds which are replenished or reimbursed from appropriated funds;

(4) Appropriated funds transferred to the Departments, such as Military Assistance Program funds; and,

(5) Appropriated funds obligated pursuant to provisions of Pub. L. 85-804.

(c) The report shall exclude actions of $25,000 or less which:

(1) Involve nonappropriated funds;

(2) Are delivery orders against indefinite delivery type contracts entered into by the Defense Fuel Supply Center; Defense Fuel Supply Center shall report the estimated total cost of indefinite delivery type contracts;

(3) Are requisitions transferring supplies within and among the Departments and Agencies of the Department of Defense;

(4) Are placed by the Defense Communications Agency, Defense Commercial Communications Office (DECCO). These actions are covered by other reporting instructions;

(5) Are orders on GSA stores depots;

(6) Involve Government bills of lading or transportation request; and

(7) Are for purchase of land, or rental or lease of real property.

204.672-3 Due date and distribution.

(a) In addition to instructions given in (b) through (f) below for purchasing offices of specified Departments and Agencies, the following instructions are applicable to all purchasing offices.

(1) Reports shall be submitted in time to reach the recipient within three (3) working days after the close of each month. To meet this due date, purchasing offices are authorized to cut off no earlier than the 25th calendar day of the month reported. For the month of September only, the due date is extended by 10 additional calendar days, but the cut-off date must be as of 30 September.

(2) Negative reports shall be submitted if a purchasing office has not transacted a reportable action during the month.

(3) Letter of transmittal is not required.

(b) Army purchasing offices shall distribute DD Form 1057 as follows:

(1) The original (except from Army Engineer Civil Functions purchasing offices) shall be forwarded to HQDA (JDHQ-SV-W-P), Washington, D.C. 20310.

(2) Army Engineer Civil Functions purchasing offices shall forward the original to HQDA (DAEN-PRP), Washington, D.C. 20314. A copy is not required for HQDA.

(c) Navy purchasing offices shall forward the original DD Form 1057 as directed by COMNAVSUP (SUP-024).

(d) Air Force contracting offices shall forward the original DD Form 1057 as directed by HQ USAF/RDC.

(e) Defense Logistics Agency purchasing offices shall forward the original DD Form 1057 to Executive Director, Contract, Defense Logistics Agency, Cameron Station, Alexandria, VA 22314, ATTN: DLA-PA.

(f) All other purchasing offices of the Department of Defense shall forward the original DD Form 1057 to HQHA (JDHQ-SV-W-P), Washington, D.C. 20310.

(g) Contracting actions of $25,000 or less which are reportable in accordance with 204.672-2 and are accomplished by contract administration offices shall be handled as follows:

(1) When the contractual instrument is being distributed, a copy shall be clearly annotated "DD Form 1057 Reporting Copy" and shall be forwarded to the appropriate purchasing office listed in Appendix N.

(2) Purchasing offices shall include data for such instruments in their reports on DD Form 1057.

204.672-4 Terms used.

The Terms used on DD Form 1057 will, in all cases, have the same meaning as they do for the purpose of preparing DD Form 350.

204.672-5 Instructions for completion of the DD Form 1057.

(a) *Heading.*

(1) *Month ending.* Enter the year, month and day indicating the ending date of the month reported. Enter each segment as a 2-digit number using 01 through 12 for January through December. For example, for the month ending 30 April 1984, enter 840430.

(2) *Purchasing office and mailing address.* Enter sufficient detail to establish the identity of the purchasing office submitting the report.

(3) *Reporting office code.* Enter the code assigned to the purchasing office pursuant to Volume III of the DoD Procurement Coding Manual. This is the same code that is used for Item A3 of DD Form 350.

(4) *Number of actions.*

(i) Only transactions that obligate or deobligate funds shall be counted. Except as provided in (a)(4)(ii) below, each call or order under a blanket purchase agreement, imprest fund, requirements type contract, or indefinite delivery indefinite quantity contract shall be counted as an action. A definite quantity indefinite delivery contract shall be counted once at the time of award, and orders under such contracts shall not be counted. If it is not possible to determine the price of an order or call when it is placed, it may be counted when the voucher is paid, but care shall be exercised to avoid double counting of such actions.

(ii) For the following transactions, each voucher paid during the report period shall be counted as one action, and no other count shall be reported. (If the voucher is in excess of $25,000, the

action shall be reported on DD Form 350 rather than DD Form 1057):

(A) Meals and lodging;

(B) Automatic deliveries, such as bread, milk, and ice cream;

(C) Utilities, such as, electricity, gas, and telephone. (Headquarters, Naval Facilities Engineering Command, will submit consolidated reports on utilities contracts for all Naval Shore Establishments).

(5) *Dollar value.* All dollar amounts shall be entered in whole dollars. Do not enter cents. For example, $2,510.10 or $2,510.90 shall be reported as $2,510. Do not enter $2,510.00 or $2,510.—. If the net amount is a decrease, enter the symbol "CR" immediately following the amount to signify a credit entry. Do not enter parentheses or dashes.

(b) *Section A, Contracting actions.*

(1) Enter under Lines 1 through 4, the number and value of actions of $25,000 or less according to type of contractor (i.e., small business, large business, educational and nonprofit institutions), and for work outside the U.S., in accordance with instructions in (b) (2), (3), (4), and (5) below.

(2) Enter on Lines 1.a, 2.a., 3.a., and 4.a., the number and dollar amount of those contracting actions accomplished by formal advertising.

(3) Enter on Lines 1.b., 2.b., and 4.b., the number and dollar amount of those negotiated contracting actions considered for competition where price competition or design or technical competition was present in accordance with the criteria set forth in 204.671–5(c)(5)(ii) (A) and (B).

(4) Enter on Lines 1.c., 2.c., and 4.c., the number and dollar amount of those negotiated contracting actions accomplished where competition was not present as covered in 204.671–5(c)(5)(ii) (C), (D), and (E).

(5) Enter on Lines 1.d., 2.d., and 4.d., the number and dollar amount of those negotiated contracting actions meeting the requirements of 204.671–5(c)(5)(ii)(F) which are excluded from the competition base.

(6) Enter on Line 3.b., the number and dollar amount of contracting actions accomplished by negotiation.

(7) Enter under Line 5, and on Lines 6 and 7, the number and dollar amount of contracting actions as appropriate.

(c) *Section B, Negotiation authority 10 U.S.C.*

(1) Enter the number and dollar amount of negotiated contracting actions of $25,000 or less according to the authority of 10 U.S.C. 2304(a) which was used. The totals of Lines 1 through 17 in Section B shall equal the sums of the entries on Lines 1.b., 1.c., 1.d., 2.b., 2.c., 2.d., 3.b., 4.b., and 4.d. in Section A.

(2) Enter on Line 3.a., the number and dollar value of actions of $10,000 or less which were negotiated under 10 U.S.C. 2304(a)(3) and are not small business-small purchase set-asides in accordance with FAR 13.105.

(4) The following provision is applicable only to U.S. Army Troop Support Agency Activities. In lieu of separately tabulating nonfood/food transactions for commissary resale items that are reportable under negotiation authority 10 U.S.C. 2304(a) (8) and (9), a ratio of the total shall be reported as follows:

(i) Enter 26% of the total actions on Line 8 and 74% on Line 9.

(ii) Enter 37% of the total dollar value on Line 8 and 63% on Line 9.

(d) *Section C, Research development, test and evaluation actions.* (These actions are also reported in Sections A and B). Enter the number and dollar amount of contracting actions of $25,000 or less of research, development, test and evaluation work on Lines 1 through 4. Do not include purchases of supplies or services that are incidental to the fulfillment of RDT&E work but do not require contractor RDT&E performance.

(e) *Section D, Selected other actions.*

(1) Enter on Line 1.a., the number and dollar amount of awards made to small disadvantaged business concerns that were made through the Small Business Administration pursuant to the Small Business Act—Pub. L. 85–536, Section 8(a). Entries on this line shall also be reflected on Line 17.b. of Section B.

(2) Enter on Line 1.b., the number and dollar amount of awards made directly to small disadvantaged business concerns.

(3) Enter on Line 2, the number and dollar amount of awards shown in Section A that were made to women-owned small businesses.

(f) *Adjustments.* Revised DD Form 1057 reports shall not be submitted; but the amounts of corrections or adjustments, if required, shall be included in the report of the following month. If the correction or adjustment results in a net reduction of either action or dollar amounts, enter the symbol "CR" following the amount to signify a credit entry.

204.673 Report of individual contract profit (DD Form 1499)

204.673–1 Scope.

This section prescribes the reporting on DD Form 1499 of cost and profit plans on contract actions of $500,000 or more, negotiated by specified contracting offices. The form provides a basis for analyzing profit patterns and weighted guidelines objectives on defense contracts. As used in this section, the term *cost* includes target cost as well as estimated cost, and the term *profit* includes fee.

204.673–2 Applicability.

DD Form 1499 shall be prepared by each contracting office of the—

(a) Army Materiel Development and Readiness Command, Ballistic Missile Defense Systems Command, Defense Supply Service, Washington, and U.S. Army Corps of Engineers;

(b) Air Force Logistics and Systems Commands; and

(c) Naval Air, Sea, and Electronic Systems Commands, Naval Facilities Engineering Command, Naval Regional Contracting Office, Philadelphia. The form also shall be prepared by the following Navy activities of the Naval Supply Systems Command: Navy Aviation Supply Office, Philadelphia; Navy Ships Parts Control Center, Mechanicsburg; and Naval Regional Contracting Office, Long Beach. Contracting offices located outside the United States, its possessions, and Puerto Rico, under the jurisdiction of the above-mentioned commands, are exempt from this reporting requirement.

204.673–3 Coverage.

(a) A DD Form 1499 shall be prepared by the contracting offices described in 204.673–2 for each negotiation of a contractual agreement involving a separate cost and profit that together total $500,000 or more. This negotiated total may agree, but not necessarily, with the amount obligated by the contractural instrument. The instrument may be a new definitive contract, an indefinite delivery-type contract, the definitization of a letter contract, or order under a basic ordering agreement, a supplemental agreement, or any other action in which the contracting officer and contractor negotiate an estimated cost and profit. If, in connection with a fixed-price-type contract or contract modification, the contracting officer requires the contractor to submit cost or pricing data pursuant to FAR 15.804–2 a DD Form 1499 shall be prepared showing the contracting officer's best estimate of cost and profit.

(b) If more than one profit rate applies to a negotiation and the amount for each rate is $500,000 or more, a separate DD Form 1499 shall be used to report data for each rate. If the dollar amount for any profit rate of a multirate negotiation is less than $500,000, the data for the amount below $500,000 shall not be reported. If the separation of a contract into different rates produces no portion

of $500,000 or more, a report on DD Form 1499 shall not be submitted.

(c) If any reportable negotiation includes a cost or cost-sharing portion or a firm fixed-price portion not reportable pursuant to (a) above, that portion shall not be reported on DD Form 1499. If the application of this provision fragments an action so that an otherwise reportable portion is less than $500,000, that portion shall not be reported on DD Form 1499.

(d) A DD Form 1499 shall be submitted if the above conditions are met, even though price competition was used, weighted guidelines were not used, or a supplemental agreement involving cost and profit was executed without changing the profit rate applicable to the basic contract.

204.673–4 Due Date and Distribution.

(a) Contracting offices shall prepare DD Form 1499 as soon as possible after the date of action, assemble the reports for the month of action, and forward the reports in duplicate within 10 days after the close of the month as follows:

(1) *Army:* HQDA (JDHQ–SV–W–P), Washington, D.C. 20310:

(i) Contracting offices under the jurisdiction of DARCOM and the BMDS Command shall report through U.S. Army Material Development and Readiness Command, Attn: DRCPP–SC, 5001 Eisenhower Avenue, Alexandria, VA 22333;

(ii) Contracting offices under the jurisdiction of the U.S. Army Corps of Engineers shall report through the Office, Chief of Engineers, HQDA (DAEN–PRP), Washington, D.C. 20314.

(2) *Navy:* Headquarters, Naval Material Command, Attn: MATO8C1D, Washington, D.C. 20360.

(3) *Air Force:* AFLC/ACOCD, Wright-Patterson Air Force Base, Ohio 45433.

(b) Prior to submission of DD Form 1499, contracting offices shall review the form and associated contract files sufficiently to insure that all reportable transactions are reported and that reports are complete and accurate.

(c) DD Form 1499 shall be submitted as an unclassified document. If the reporting office considers it necessary to apply a security classification to a DD Form 1499, a communication relating the reasons for the classification shall be submitted to the Office of the Assistant Secretary of Defense (Comptroller), Attn: Directorate for Information Operations and Control, through the appropriate organization in (a) above. In no case shall security classification be considered a reason for not reporting on DD Form 1499.

(d) The reporting requirements of this part are assigned RCS:DD–R&E(M)1215.

204.673–5 Specific entries on DD Form 1499.

(a) *Department.* Enter Army, Navy, or Air Force, as appropriate.

(b) *Item 1, Report No.* Each contracting office identified by a separate number in the item 5 code block shall enter a four-digit number assigned consecutively starting with 0001 at the beginning of each fiscal year. This number shall be followed by the last two digits of the fiscal year. Numbers with less than four significant digits shall be preceded by zeros; e.g., the fourth report in fiscal year 1977 would be numbered 0004–77. This number identifies a specific DD Form and is not related to any DD Form 350 number.

(c) *Item 2, Contract No.* Enter the contract number in items 2.a., b., c., and d., in the manner prescribed for DD Form 350 in 4.671–5(e).

(d) *Item 3, SPIIN.* Enter in item 3 any order, supplemental agreement, or other modification number in the manner prescribed in 4.671–5(b)(2).

(e) *Item 4, Date of action.* Enter in numeric terms the year and month (e.g., 77–03 for 1977 March) when a mutually binding agreement was reached on the estimated cost and profit. For example, this may be the date when—

(1) A new definitive contract was awarded,

(2) A letter contract was definitized,

(3) A supplemental agreement was executed,

(4) A change order was definitized, etc.

(f) *Item 5, Contractor office name.* Enter the name of the contracting office submitting the report, and enter in the item 5 code space, the symbol or number assigned to that contracting office in the DoD Procurement Coding Manual, Volume III.

(g) *Item 6, Type of pricing action.* Enter in the item 6 code space Code A for the first reporting action pertaining to a contract, i.e., the award of a new definitive contract, a definitive contract superseding a letter contract, or an indefinite delivery-type contract. Enter Code B for all other types of actions, including orders under basic ordering agreements.

(h) *Item 7, Contracting identification.* Enter the complete name of the concern and, if applicable, the name of the division to which the award was made. Enter in the item 7 code space the first six digits of the contractor code as shown in the DoD Procurement Coding Manual, Volume II. If the contractor is not listed in the manual, no code shall be entered by the contracting office.

(i) *Item 8, Principal place of performance.* Enter the actual location of the plant or place of business where the items will be produced or the service rendered in accordance with instructions in 204.671–5(b)5. Enter in the item 8 code space the city and state codes shown for the contractor at the specified location in the DoD Procurement Coding Manual, Volume II. If the contractor's name is not listed in the manual, or is listed for a location or locations other than the one reported, no code shall be entered by the contracting office.

(j) *Item 9, Federal supply class or service code.* Enter the appropriate Federal Supply Class or Service Code from the DoD Procurement Coding Manual, Volume I, in accordance with instructions prescribed for item 10A of DD Form 350 in.

(k) *Item 10, DD claimant program No.* Enter in the item 10 code space the code from the DoD Procurement Coding Manual, Volume I, Section III, that describes the commodity or service called for by the contract.

(l) *Item 11, Weighted guidelines category.* Enter in the item 11 code space only one of the Codes A, B, C, or D, to identify the weighted guidelines applicable to the reported action.

(m) *Item 12, Type of contract.* Enter in the item 12 code space only one of the codes A, J, K, L, R, U, or V to show the pricing provisions applicable to the reported action. If more than one type of pricing applies to a single negotiation, the provisions of 204.673–3 (c) and (d) apply. That is, separate DD Forms 1499 shall be prepared for each type of pricing involving a cost and profit totaling $500,000 or more. DD Forms 1499 shall not be prepared for types of pricing with less than aggregate cost and profit of $500,000, cost-no-fee, or firm fixed-price without a negotiated cost and profit.

(n) *Item 13, Netgotiation summary.*

(1) Enter dollar amounts applicable to lines a. through f. as proposed by the contractor, the Government's objective, and the negotiated amounts. These entries shall be to to the nearest whole dollar; do not show cents, or make entries involving cent positions. For example, $568,035.54 shall be entered as $568,036 and not as $568,036.00; $500,400.49 shall be entered as $500,500.

(2) The dollar entries shall reflect the entire reportable amounts negotiated in the contractural agreement, not merely the portion obligated. Thus, awards contemplating incremental funding shall be reported as total negotiated cost and profit at the time of initial award, not as the amounts initially obligated. However, amounts applicable to options for additional quantities shall be

excluded unless the options are exercised. When options are exercised, a report shall be submitted if the amounts meet the dollar threshold of 204.673–3.

(3) For cost-plus-award-fee (CPAF) contracts, only the base fee shall be reported.

(4) For indefinite delivery-type contracts, the amounts reported shall reflect the best estimate of the annual requirement on the first reportable delivery order.

(5) Enter on line g. the cost of money percentage rate proposed by the contractor, obtained from the block 1 of the CASB–CMF form. The objective and negotiated rate will be the cost of money percentage rate used on the DD Form 1861.

(o) *Item 14, Weighted guidelines profit factors (see DD Form 1547).* If weighted guidelines are used, show the measurement base and profit/fee dollars in whole numbers in accordance with (n) above. If the weighted guidelines are not used to develop the prenegotiation profit objective, enter the measurement bases on line a. and complete only lines e., f., and g. The manufacturing guidelines adjustment, line a. (11), shall be completed only for contracts coded A in item 11 and must equal 30 percent of the amount entered on line a. (10). The cost of money adjustment, line e., shall be completed for all contracts coded as B, C, or D in item 11 and must equal the objective amount in item 13.b.

Subpart 204.7—Contractor Records Retention

204.706 Microfilming records.

204.706–1 General.

(d)(2) The ACO, with advice of DCAA, may agree to a lesser retention period where the contractor has established adequate internal controls including continuing surveillance over the microfilm system.

Subpart 204.8—Contract Files

204.801 General.

(c)(3) Purchasing and contract administration offices shall file in the contractor general file those documents accumulated or created by them which pertain in general to a contractor or prospective contractor, and those which relate to two or more contracts and which due to their nature should not or need not be filed with an individual contract file. (As appropriate, however, copies of such documents are filed with or cross-referenced in the related contract files.) This file shall include, as applicable, preaward surveys, reports, correspondence, and other records documenting the contractor's capabilities, past performance, accounting system, pricing method, quality assurance procedures, labor policies, insurance programs, and equal opportunity and comparable policies, programs, and systems that serve as a general source of information on a contractor's current and future capability or responsibility.

(c)(S–70) *Contract Cross Reference/Locator File.* This file consists of Contract Cross Reference Data Forms (DD Forms 1592) maintained as prescribed in 204.802–73.

204.802 Contract files.

(a)(1) Authenticated or conformed copies of contractual instruments and signed or official record copies of correspondence, memoranda, and other documents shall be used in compiling the official files. Authenticated copies are documents shown to be genuine by certification as a true copy by signature of an authorized person or by official seal. Except to the extent that contract clauses or specifications are incorporated by reference, conformed copies are complete and accurate copies of the contractual instrument, including the date of execution and the names and titles of signatories. Documents reproduced by fast-copy process that deteriorates when exposed to excessive heat or light shall not be included in the official file.

(c)(4) When the bulk of the material is unclassified, classified material relating to the same contract shall be maintained in a separate file folder and container, and the unclassified folder marked or cross-referenced to indicate the location of the classified material. The front and back of each folder containing classified material shall be marked with the highest classification assigned to any of the documents in the folder.

204.802–70 Use of standard file folders for drawer and shelf filing.

(a) For all short duration contracts and for small purchase files, standard letter-size folders shall be used. For complex long-duration high-dollar value contracts, heavy individual or 6-part partitioned folders, with front and back flaps, two dividers, expansion gussets between flaps and dividers, and fasteners mounted at the top of the insides of the flaps and on each side of the dividers, may be used.

(b) Loose dividers (file inserts), pre-punched at the top for fastening documents, may be used for subdividing material within the same folder when special folders are not used.

204.802–71 Filing of documents.

(a) Documents relating to a specific contract and described in FAR 4.803(a), (b) and (c) should normally be placed in chronological order in an "OFFICIAL FILE" folder or folders. Each folder shall be marked or labeled with the procurement instrument identification number and, when more than one folder is required for the same contract, with information as to the file segment. Other identifying data, such as the contractor's name, should be added only when needed to facilitate filing and locating.

(1) A separate folder need not be established for each subcontract, mechanized small purchase, or small dollar value contract, on which little or no administration is required; these should be filed in numerical sequence within the same folder.

(2) When a single folder is used, basic procurement documents and all modifications ordinarily should be filed on the left side of the folder and all other material on the right side. As volume warrants, a contract file may be subdivided further, either within the folder or by using additional folders, as appropriate. The following are examples:

(i) For the purchasing office, by pre-contract documents, basic contract, contract modifications, termination documents, general correspondence, and other; and

(ii) For the contract administration office, by basic contract, contract modifications, quality assurance and progressing and production surveillance, property administration and plant clearance, termination documents, and general correspondence. Documents shall be arranged chronologically within each section or folder.

(3) When it is impractical to file certain documents in the official case folder because of their bulk or use, they may be maintained separately in other suitable containers, but they shall be handled as "OFFICIAL FILES" and cross-referenced in the contract case file.

(4) Documents relating to two or more contracts may be filed in one contract file and cross-referenced in the others, or enough copies reproduced to provide for filing one in each related contract file. Other pertinent documents of a more general nature may be filed separately in the contractor general file and cross-referenced in the contract file.

(b) Documents described in 204.801(c)(3) and relating generally to the contractor rather than to a specific contract shall be placed in a folder labeled with the contractor's name. When necessary, additional folders may

be used and the material subdivided by subject, such as general, production, termination, property control, and performance.

204.802-72 Arrangement of files.

(a) Contract file folders normally should be arranged numerically by contract serial number. Under the Department of Defense uniform procurement instrument identification numbering system (see 204.70), the 10th through the 13th digits are the serial number. Large numbers of contract files (10,000 or more) are best arranged by the terminal digit filing method, using the four-digit serial number. When special circumstances warrant, contract folders may be arranged alphabetically by contractor's name, by commodity, or by type of contract, and thereunder numerically.

(b) Contractor general file folders shall be arranged alphabetically by name of the contractor.

204.802-73 Contract cross reference/locator system.

(a) Contract administration offices shall maintain a contract cross reference/locator system, manual or mechanized as appropriate. For a manual system, Contract Cross Reference Data (DD Form 1592), which is a two-part carbon interleaved form, shall be used as follows:

(1) For a prime contract, one set shall be prepared, the original filed alphabetically by contractor's name, and the duplicate filed numerically by contract number, using the terminal digit filing method when contract files are so maintained;

(2) For a subcontract, two sets shall be prepared, one set filed as in (a)(1) above, and the other set filed by subcontractor's name and subcontract number;

(3) Additional information as necessary shall be included under "Remarks," such as dollar value, contract type, brief description of item or service, special or limited administration requirements, secondary inspection office, and security classification.

(b) Offices, other than contract administration offices, which require a contract cross-reference/locator system to meet reference requirements or other special needs also shall use the system prescribed in (a) above.

204.803 Contents of contract files.

(a) *Contracting office contract file.*

(a)(8) Drawings and specifications should be included with the solicitation or referenced therein.

(a)(23) Exceptions or exemptions from the Buy American Act or appropriations act restrictions.

(a)(37) When applicable, a Contract Completion Statement (DD Form 1594) shall be included.

(a)(38) Termination documents include—

(i) Recommendation or request to terminate together with reason for terminating, and, in the case of major contracts, plans therefore.

(ii) Review board actions accomplished by the purchasing office.

(iii) Copy of termination notice.

(iv) Documents supporting termination actions taken when terminated for default, such as notice of possible termination, show cause letter and reply, and record of conferences, if any.

(v) Record of repurchase, including written demand to contractor for excess costs.

(a)(S-70) *Verification of requirements.*

(b) *Contract Administration Office contract file.* The extent to which the following list shall apply depends upon the type of contract, dollar value, and functions assigned to the contract administration office.

(b)(3) This includes the Contract Security Classification Specification (DD Form 254).

(b)(14) Progressing, expediting, and production surveillance records (these are to be maintained separately to facilitate their early disposal as prescribed in FAR 4.805(g)). They include such records as—

(i) Production plans and delivery schedules.

(ii) Progress or status reports.

(iii) Advice of delays or delinquencies, and of corrective and production follow-up actions.

(iv) Documents reflecting deliveries or production completion.

(b)(15) Quality assurance/control (inspection) records used in planning, conducting, and recording product verifications, testing, reviewing quality programs and plans, evaluating procedures and processes or technical performance, and effecting corrective actions, where required (these records are to be maintained separately for earlier disposal); they include:

(i) Quality assurance records, such as:

(A) Reference to Contractor's Quality Program document, and disapproval if any.

(B) Subcontract inspection control records (request for source inspection, and waiver of usual inspection procedure).

(C) Inspection requests, agreements, and assignments.

(D) Requests for waivers and deviations, and copy of approvals or disapprovals, if any (including Material Review Board decisions).

(E) Required inspection and test reports.

(ii) Quality control (inspection) records, such as:

(A) Quality program review reports (procedures and processes evaluation, periodic quality assurance survey).

(B) Government inspection and test reports.

(C) Authority to ship and acceptance documents (e.g., DD Form 1384, Transportation Control and Movement Document; DD Form 250, Material Inspection and Receiving Report; DD Form 1155, Order for Supplies or Services/Request for Quotations); routing requests and orders, and shipment copies of bills of lading (DD Form 250 may be excluded when maintained in paying office file and paying office is located at the contract administration office).

(D) Reports of unsatisfactory material and corrective actions, and reports of damaged or improper shipments.

(E) Other papers necessary to document the quality control or inspection function.

(b)(16) Property administration records used in the administration of Government property provisions of the contract (these are to be maintained separately for disposition). These include—

(i) Contract number, type of contract, and contractor name and address.

(ii) Name and dates of tenure of administrative contracting officer(s) and property administrator(s).

(iii) End item(s) and points of inspection and acceptance.

(iv) Record of contract clauses, amendments and changes pertaining to Government property.

(v) Record of contract clauses pertaining to contractor's liability.

(vi) Record of written approval of contractor's property control system or withdrawal of approval and cause, dates system approval reinstated, and deviations granted.

(vii) Listing and type of subcontracts which involve Government property or reference to location of such information.

(viii) Record of secondary administration assignments.

(ix) Record of system surveys performed, deficiencies found and corrective action taken.

(x) Record of property audits and inspections.

(xi) Record of findings and determination that inventory adjustments are reasonable.

(xii) Records of investigation and recommendations of the property administrator, and written advice of the administrative contracting officer on cases involving contractor's liability for Government property lost, damaged, destroyed, or consumed in unreasonable quantities.

(xiii) Original of final property administration clearance statement executed by the property administrator or other relief from assignment documentation.

(xiv) Reports relating to Government property.

(xv) Correspondence, messages, memoranda of calls and visits, and any additional documents pertinent to Government property.

(b)(17) Documentation regarding termination actions for which the contract administration office is responsible, including, as appropriate—

(i) Termination authority and instructions.

(ii) Copy of termination notice.

(iii) Record of initial meeting with contractor.

(iv) Contractor's request, and approval thereof if other than inventory basis is to be used.

(v) Settlement Proposal.

(vi) Application for Partial Payment and approval thereof, together with record of security required.

(vii) Record of the examination of prime contractor and subcontractor proposals, including engineering analysis, audit report or waiver, and request therefore.

(viii) Request to plant clearance office for action on inventory schedules.

(ix) Request from prime contractor for authority to settle subcontractor proposals without approval or ratification of contracting officer, and actions thereon.

(x) Recommendations by prime contractor covering subcontractor's proposal.

(xi) Approval of subcontractor's proposed settlements.

(xii) Record of plant clearance actions, such as verification of and determination of allocability and allowability of inventory schedules, record of inventory redistribution and disposal actions including diversion, screening, scrap determination, sale, abandonment, donation, and storage, as appropriate.

(xiii) Contracting officer's negotiations memorandum (presentation to Settlement Review Board).

(xiv) Required approvals by Settlement Review Board or others.

(xv) Settlement agreement, including record of any exceptions and, when agreement was not reached, a copy of determination by the contracting officer and written supporting evidence.

(xvi) Documents supporting termination actions taken when termination for default, such as notice of possible termination, copy of show cause letter and reply, and record of conference.

(b)(20) When applicable, this includes the Contract Completion Statement (DD Form 1594).

(c) *Paying Office contract file.*

(c)(2) Supporting documents may include:

(i) Shipment, acceptance, or receiving reports, such as DD Forms 250 and 1155 (Note: file DD Forms 250 and 1155 as a separate file series when it will facilitate compilation of contract status and statistical reports), and

(ii) Authorizations for advance and progress payments.

204.804–1 Closeout by the office administering the contract.

(a)(S–70) *Closed contracts.* Firm Fixed Price Unilateral Purchase Orders are closed when evidence of physical completion is received by the PCO. All other contracts are closed when they are physically complete and when all administrative actions are taken, including the accomplishment of one of the two Contract Completion Statements, DD Form 1594 or MILSCAP Format Identifier PK9.

(a)(S–71) Time standards established in FAR 4.804(a) are based upon the time required for closing the majority of contracts. It is recognized that delays beyond the above standards may occur (such as in the case of terminations). Where delays occur, contracts shall be reported in accordance with 204.804–4.

204.804–4 Physically completed contracts.

Status of Physically Completed Unclosed Contracts. Contract Administration Offices shall advise the appropriate procuring contracting officers within 15 days after the end of the month following the month in which a physically completed contract has not been closed within the time periods specified in FAR 4.804–1. This advice shall include the reasons for the delay, and the target date which has been set for closing. If the contract is not closed by the target date specified, the contract administration office shall, unless information is requested earlier by the PCO, advise the PCO of the reasons for the further delay and the new target date. MILSCAP Format Identifier PKX, Unclosed Contract Status, shall be used to provide this advice to the PCO when MILSCAP procedures apply.

204.804–5 Detailed procedures for closing out contract files.

(a)(S–70) *When Purchasing Office administers the contract.* When the purchasing office administers a contract, that office is responsible for insuring that all required purchase actions and contract administration have been completed, utilizing as necessary DD Form 1597, Contract Closeout Check List, and DD Form 1593, Contract Administration Completion Record. When all required actions have been completed, the purchasing office shall prepare DD Form 1594, or MILSCAP Format Identifier PK9, Contract Completion Statement, for all contracts in excess of $10,000. The Contract Completion Statement shall be made a part of the official contract file. For all contracts not in excess of $10,000, the contracting officer shall include in the contract file a statement that all contract actions have been completed. The completed form or statement is authority for closing out of the contract file. The file shall be closed out as provided in 204.804–70(a)(2).

(a)(S–71) *When Purchasing Office does not administer the contract.* When the purchasing office does not administer a contract, that office, upon receipt of DD Form 1594, or MILSCAP Format Identifier PK9, Contract Completion Statement, from the Contract Administration Office (see 204.804–5(b)(3)) shall insure that all actions required of the Purchasing Office have been completed, shall then complete Item 10 of the DD Form 1594, or where the MILSCAP PK9 is used, prepare a statement that all contract actions have been completed, and shall make the completed form or statement a part of the official contract file. The completed form or statement is authority for closing out the purchasing office contract file. Closeout of the file shall be effected as provided in 204.804–70(a)(2). The date in Item 9d of DD Form 1594, or Columns 59–65 of the MILSCAP Format Identifier PK9, Contract Completion Statement, shall be used as the closeout date for file purposes, except that the date in Item 10e of DD Form 1594 or the date of the closeout statement when the MILSCAP PK9 is received shall be used when completion of any pending significant purchasing office action extends more than three months beyond the date shown in Item 9d of DD Form 1594 or Columns 59–65 or the MILSCAP PK9. In the latter case, the purchasing office shall advise the contract administration office of the revised closeout date by sending a reproduced copy of the completed DD Form 1594, or by preparation of MILSCAP Format

Identifier PKZ, Contract Closeout Extension.

(b) With respect to all contracts which the contract administration office administers, that office is responsible for insuring that all contract administration has been completed and for initiating closeout action. The organizational element to which this responsibility is assigned shall proceed as follows upon determination or advice (such as by final DD Form 250 or other final report) that the contract has been fully performed (including final payment) or has been terminated completely:

(1) Prepare DD Form 1597, Contract Closeout Check List, when necessary to determine that all required actions have been accomplished.

(2) If appropriate, initiate DD Form 1594, Contract Administration Completion Record, to obtain statements from other organizational elements certifying completion of actions required of each (normally a single copy should be routed in turn to offices concerned, but separate forms may be routed when necessary, such as when closeout actions may be complex and extensive or when offices are at different locations).

(3) Upon determination of final completion, process MILSCAP Format Identifier PK9 or complete Items 1 through 9 of DD Form 1594 certifying that all contract administration office actions have been fully and satisfactorily accomplished, and forward the original of the form to the purchasing office (which will utilize it to close out its contract file).

(4) Retain one copy of the completed form, which is authority for closing out the contract administration file.

204.804–70 Review, separation, and retirement of completed contract files.

(a) Upon determination of contract completion under the procedures outlined in FAR Section 4.804 and 4.804 above, each office shall review all files pertaining to the individual contract as described below. For disposal criteria, see FAR 4.805.

(1) *Duplicate or working contract case file*—Remove any original or official file copies of documents and place them in the appropriate "official" file; destroy immediately any remaining material, or segregate and mark it for early disposal.

(2) *Official contract case file*—Remove folder for completed contract from the active file series, mark each folder or folder tab "Completed *(Date)*" and place folder in completed (inactive) contract file series; separate series should be established for contracts of $10,000 or less and for contracts of more than $10,000, to facilitate later disposal.

(3) *Cross reference/locater file*—remove any contract cross reference data forms relating to the completed contract, mark each "Completed *(Date)*" and place them in completed (inactive) cross reference/locator file series for later disposal.

(b) *Review of contractor general files.* Each office shall review contractor general files at least once annually and—

(1) Remove obsolete and superseded documents relating generally to the contractor (e.g., documents no longer pertinent to any aspect of contractor's current or future capability, performance, or programs, and documents relating to a contractor who is no longer a possible source of supplies, services, or technical assistance) and dispose as authorized.

(2) Remove any documents pertaining only to completed contracts, place those not routine in nature in inactive contractor file for later disposal and immediately dispose of routine documents as authorized.

(c) *Retirement of completed files.* Completed files series shall be cut off at least annually, and new series begun to facilitate destruction in blocks—normally annual blocks. The cut-off series shall be held in the office maintaining the records for an additional period not to exceed one year and then stored locally in recordholding or staging areas, if available, until they are eligible for destruction (see FAR 4.805); when such space is not available, the files shall then be transferred to the General Services Administration Federal Records center servicing the area. Completed cross reference/locator files shall be held locally until eligible for destruction.

204.805–70 Disposal of duplicate or working contract or contractor files.

Duplicate copies of official file documents and extraneous materials not required or appropriate for filing in official files shall be destroyed as soon as they have served their purpose, when actions which the file facilitated have been taken, or upon physical completion or final payment under the contract, as appropriate. In no case shall such copies be retained for longer than one year after final payment under the contract. However, pricing review files containing documents related to reviews of contractor price proposals, subject to certification of cost or pricing data (see FAR 15.804–2), shall not be destroyed before the expiration of 6 years from the date of final payment under the contract. If conditions exist, however, which do not permit cross-referencing the pricing review file to the official contract file to determine the date of final payment, the pricing review file will, in that case, be retained for 9 years following completion of the proposal review.

204.805–71 Disposal of contract cross reference/locator files.

Completed contract cross reference/locator files shall be destroyed at the same time as the related contract file, or when they are no longer required as contract cross-reference/locator.

Subpart 204.70—Uniform Procurement Instrument Identification Numbers

204.7001 Scope.

This subpart prescribes procedures for assigning identifying numbers to all contracts and to other instruments related thereto, including solicitation documents and delivery orders, issued pursuant to this supplement. This subpart does not apply to procurement instruments issued by the Defense Commercial Communications Office, Defense Communications Agency. The provisions of this subpart are optional where the procurement instrument will be completely administered by the purchasing office or the consignee, except that as a minimum such instrument numbers shall not exceed 19 characters (excluding hyphens) for the procurement instrument identification number including any supplemental modification or other identification number, and such instrument numbers shall commence with the identification of the purchasing office and the fiscal year, in accordance with 204.7003–2 (a) and (b) and Appendix N.

204.7002 Policy.

(a) The uniform procurement instrument identification (hereafter referred to as PII) numbering system as prescribed in this subpart shall be used for instruments of the types listed in 204.7003–1(c), 204–7004–2, 204–7004–3, and 204–7004–4.

(b) Numbers, including Federal Supply Contract Numbers and any prescribed supplementary numbers, shall be placed in spaces provided on the applicable procurement forms, with major elements separated by dashes; for example, DABE01–66–M–0001. If a space is not otherwise provided, the prescribed numbers shall be placed in the upper right-hand corner of the form.

(c) Alpha-numeric characters, other than those prescribed in this subpart, shall not be used as a part of the PII numbering system. If other identification is required in accordance with

Departmental procedures, it shall be placed on the procurement instrument in such a location as to clearly separate it from the PII number prescribed herein.

204.7003 Basic procurement instrument identification number.

204.7003–1 Elements of number.

The basic PII number should be retained unchanged for the life of the particular instrument and shall consist of 13 alpha-numeric characters positioned as follows:

(a) The first 6 positions shall commence with the capital letters assigned to the Department preparing the instrument as follows:

DA Department of the Army
F Department of the Air Force
DCA Defense Communications Agency
N Department of the Navy (except Marine Corps)
M Marine Corps
DLA Defense Logistics Agency
DNA Defense Nuclear Agency
DMA Defense Mapping Agency
DCPA Defense Civil Preparedness Agency

The remainder of the first 6 positions shall be the alpha-numeric characters which, together with the Departmental identification shown above, identify the activity preparing the instrument. All 6 positions shall be used. If necessary, nonsignificant zeros shall be placed between the Department identifier and the activity identifier. A listing of applicable numbers is contained in Appendix N.

(b) The 7th and 8th positions shall be the last two digits of the fiscal year in which the PII number is assigned.

(c) The 9th position shall be a capital letter assigned to indicate the type of instrument code, as follows:

A Blanket Purchase Agreements
B Invitation for Bid
C Contracts, including Letter Contracts, contracts incorporating basic agreements, and contracts providing subsequent provisioning, but excluding Indefinite Delivery Type Contracts
D Indefinite Delivery Type Contracts
E Facilities Contract
F Delivery orders placed with or through other Government Departments or agencies or against contracts placed by such Departments or agencies (i.e., outside the Department of Defense and including blind-made supplies)
G Basic Ordering Agreements
H Agreements, including Basic Agreements
L Lease Agreement
M Purchase Order—manual (assign W when numbering capability of M becomes exhausted during a fiscal year
N Notice of Intent to Purchase
P Purchase Order—automated (assign V when numbering capability of P becomes exhausted during a fiscal year)
Q Request for Quotation—manual
R Request for Proposal
S Sales Contract
T Request for Quotation—automated (assign U when numbering capability of T becomes exhausted during a fiscal year).

The letters X, Y and Z are reserved for Departmental use.

(d) The 10th through 13th positions shall be the serial number of the instrument. A separate series of serial numbers may be used for any type of instrument listed in (c) above. Each such series of PII numbers for the same activity shall commence with the number 0001 at the start of each fiscal year. Alpha-numeric serial numbers shall be used when more than 9,999 numbers are required. Alpha-numeric numbers shall be serially assigned with an alpha in the first (or first and second) position followed by the three (or two) position numeric serial number. The following alpha-numeric sequence shall be used (the letters I and O shall not be used):

A001 through A999, B001 through B999, and so on to Z001 through Z999;

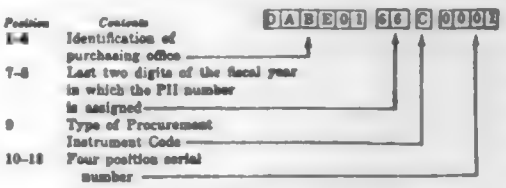
Then AA01 through AA99, AB01 through AB99, and so on to AZ01 through AZ99;

Then BA01 through BA99, BB01 through BB99, and so on to BZ01 through BZ99; and so on to

ZA01 through ZA99, ZB01 through ZB99, and so on to ZZ01 through ZZ99.

204.7003–2 Illustration of number.

The following illustrates the configuration of the PII number as prescribed in 204.7003.



204.7004 Supplementary procurement instrument identification numbers.

204.7004–1 Uses of the number.

Supplementary numbers, used in conjunction with basic PII numbers, shall be employed to identify:

(a) Amendments to solicitation documents;

(b) Modifications of contracts and agreements (Provisioned Item Orders will be treated and numbered as modifications); and

(c) Calls/orders under contracts (except Federal Supply Schedule contracts), under basic ordering agreements and under blanket purchase agreements.

204.7004–2 Amendments to solicitation documents.

Amendments to each solicitation document shall be sequentially numbered by use of a four position numeric serial number supplementary to the basic PII number, commencing with 0001.

204.7004–3 Modifications of contracts and agreements.

(a) Contract modifications, as defined in FAR Subpart 43.1, and modifications to agreements shall be numbered by use of a six-position alpha-numeric number supplementary to the 13-position basic PII number as follows:

(1) The first position shall be a capital letter identifying the issuing office and the type of modification as indicated below:

A Contract Administration Office modifications
P Purchasing Office modifications

(2) The second through sixth positions shall be a serial number. The second and third positions may be alpha or numeric, except that the letters K, L, M, N, P, S, T, U, V, W, X, Y and Z are excluded and reserved for the express purposes as follows:

(i) For a definitized letter contract the second position shall be a Z; in other words, the letter Z will be used only for that modification which represents the definitized contract. The serial numbers of modifications occurring after the definitization will continue the sequence in the manner provided in this paragraph, without the letter Z.

(ii) Only the letters T, U, V, W, X, or Y may be used in the second position when a modification is issued providing initial shipping instructions or amending those shipping instructions previously issued in those cases in which the contract provides delivery FOB origin and no price change is involved. Modifications shall be serially numbered by each issuing activity. The foregoing is not mandatory on purchase offices that issue and control all modifications.

(iii) The letter S only may be used in the second position when a modification is issued providing initial or amended shipping instructions in those cases in which the contract provides delivery FOB destination or the contract provides delivery FOB origin and a price change is involved. Each modification shall be serially numbered.

(iv) The letters K, L, M, N P, and Q are reserved for the exclusive use of the Air Force only in the second position for a Provisioned Items Order. Provisioned Items Orders shall be serially numbered by each issuing activity.

(v) The fourth through sixth positions shall always be numeric. A separate series of serial numbers shall be used for each type modification listed in (a)(1) and (2)(ii), (iii), and (iv) above. The modifications issued by an activity for a

contract shall be numbered as set forth below:

Normal Modification	Provisioned Items Order (Reserved for exclusive use by the Air Force only)	Shipping Instructions
00001–[illegible] then AC001–AZ999 BD001–[illegible] and so on to HX01–H9999 then JX001–JZ999 then R0001–R9999 then AA001–HZ999 then JA001–JZ999 then RA001–RZ999	KI001–KW99 KA0001–KZ999 L0001–L9999 LA001–LZ999 M0001–M9999 MA001–MZ999 N0001–N9999 NA001–NZ999 P0001–PW99 PA001–PZ999 Q0001–Q9999 QA001–QZ999	S0001–S9999 SA001–SZ999 T0001–T9999 TA001–TZ999 U0001–U9999 UA001–UZ999 V0001–V9999 VA001–VZ999 W0001–W9999 WA001–WZ999 X0001–X9999 XA001–XZ999 Y0001–Y9999 YA001–YZ999

(3) ARZ999 is the six-position alpha-numeric number to be utilized the first time the office of administration or disbursement is being changed by use of computer generated modifications initiated by a CAO. The second change will utilize ARZ998, the third change ARZ997, and so forth. This method will only be utilized when mass changes are required.

(b) Supplementary identification numbers for modifications shall be assigned in consecutive chronological sequence by each issuing office authorized to issue modifications. To assure chronological assignment, modification numbers shall be assigned only after it has been determined that a modification is to be issued.

204.7004–4 Delivery orders under indefinite delivery type contracts, orders under basic ordering agreements, and calls under blanket purchase agreements.

(a) Delivery orders under indefinite delivery type contracts (orders), orders under basic ordering agreements (orders), and calls under blanket purchase agreements (calls) shall be identified by a four-position alpha-numeric "call/order serial number" which is supplementary to the 13-position basic PII number.

(1) Calls/orders issued by the purchasing office identified in the basic PII number shall be assigned numeric call/order serial numbers, beginning with 0002 through 9999.

(2) Calls/orders issued by an office other than the purchasing office identified in the basic PII number shall be assigned alpha-numeric call/order serial numbers as follows:

(i) The first and second position shall be the alpha-numeric call/order serial number assigned to Appendix N to the activity issuing the call/order. The letters A, I, O, and P shall not be used in the first position; however, A and P may be used in the second position.

(ii) The third and fourth positions shall be a serial number assigned by the issuing activity. The first call or order issued each contract or agreement shall be numbered 01. After the serial number 99 is used, a uniform series of numeric/alpha, alpha/numeric, and finally alpha serial numbers shall be assigned as follows (the letters I and O shall not be used):

1A, 1B, and so on to 1Z, then 2A, 2B, and so on to 2Z, and so on to
9A, 9B; and so on to 9Z, followed by
A1, A2, and so on to A9, then B1, B2, and so on to B9, and so on to
Z1, Z2, and so on to Z9, followed by
AA, AB, and so on to AZ, then BA, BB, and so on to BZ, and so on to
ZA, ZB, and so on to ZZ.

(b) If it is necessary to modify a call/order, a two-position alpha-numeric suffix (know as the call/order modification indicator) shall be added to the supplementary PII number as follows (the letters I and O shall not be used):

(1) Modification to a call/order—issued by the purchasing office, excluding any modification providing shipping instructions in those cases described in (b) (2) and (3) below—01, 02, and so on through 99, then B1—B9, BA—BZ, C1, and so on through NZ and Z1 through ZZ;

(2) Modification to a call/order issued by a purchasing office providing initial or amended shipping instructions in those cases in which the call/order provides for delivery FOB destination or delivery FOB orgin and a price change is involved— P1, P9, PA—PZ, Q1—Q9, QA—QZ, etc., through TZ;

(3) Modification to a call/order issued by a purchasing office providing initial shipping instructions or amending those shipping instructions previously issued in those cases in which the call/order provides delivery FOB origin and no price change is involved—U1—U9, UA—UZ, V1—V9, VA—VZ, and so on through YZ; and

(4) Modifications to a call/order issued by a Contract Administration Office (CAO) will begin with 1A, 1B, and so on to 1Z; then 1A, 2B, and so on to 2Z; and so on to 9A, 9B, and so on to 9Z, followed by A1, A2, and so on to A9; then AA, AB, and so on through AZ.

AZ will be utilized the first time a modification is generated by mechanical means (computer program) to change the name of the administration office or disbursing office. The second change will utilize AY, the third change AX, and so forth. This method will only be utilized when mass changes are required.

Subpart 204.71—Uniform Contract Line Item Numbering System

204.7101 Scope of subpart.

This subpart prescribes procedures for establishing and numbering all items of supplies or services set forth in contracts and in other documents related thereto issued pursuant to this supplement.

204.7102 Policy.

(a) These procedures provide criteria for establishing and numbering contract line items, contract subline items, exhibits, exhibit line items, and exhibit subline items.

(b) The procedures prescribed in this subpart shall be used in contracts (as defined in FAR 2.1) and in provisioning and other documents which are expected to become parts of contracts.

(c) When practicable, these procedures also shall be used in solicitations and other contractual documents.

(d) These procedures are mandatory for all contracts except as follows:

(1) When no postaward contract administration function on the specific contract is assigned to any office listed in DoD Directory of Contract Administration Services Components;

(2) Indefinite delivery type contracts for petroleum products under which posts, camps, and stations issue delivery orders for such products for their own use; or

(3) Communication Service Authorizations issued by the Defense Commercial Communications Office, Defense Communications Agency.

(e) For cost-reimbursement type contracts, the provisions of this subpart apply except for the requirements in 204.7103–1(a)(1) and 204.7104.2(c)(2) for a single unit price or single total price or amount for each contract line or subline item.

(f) For maintenance and repair service type contracts in which firm prices for elements of the total price of an item are established but the number and quantity of such elements performed in order to determine the final item price to be paid are not known until performance (for example, a labor-hour contract), the provisions of this subpart apply except for the requirements in 204.7103–1(a)(1) and 204.7104–2(c)(2) for separate contract line items or subline items because of unit price differences for individual quantities of a line item or subline item. In lieu of establishing separate contract line items or subline items because of price differences, contractual documents for these types of contracts may be structured to reflect a

firm or estimated total item amount for each such line or subline item only (omitting unit price).

204.7103 Contract line items.

204.7103–1 Criteria for establishing.

(a) Requirements for supplies or services shall be established as contract line items. Each contract line item shall:

(1) Have, or be anticipated to have, a single unit price or, if no unit price is established, a single total price or amount (unless associated subline items of other than an informational nature are separately priced in accordance with 204.7104–2(c)(2), in which case, no price shall be assigned to the contract line item, except for informational purposes unit prices and/or amounts may be entered in parentheses within the item description block); however, the unit price may be entered as "NSP" (not separately priced); *Provided,* the price of this item is included in the unit price of another contract line item;

(2) Be separately identifiable, i.e., no more than one National Stock Number, one item description, one Manufacturer's Part Number, etc., for a supply line item, or no more than one Scope of Work, one Description of Services, etc., for a services line item (unless this identification is provided by associated subline items of other than an informational nature; in which case, a general narrative description shall be assigned to the contract line item number and the subline item shall include the actual detailed identification in accordance with 204.7104–2(c)(3); and

(3) Have a separate delivery schedule, period of performance or completion date expressly stated in the procurement instrument ("as required" is an expressly stated delivery schedule) unless there are associated subline items of other than an informational character that meet this requirement. (When a requirement has multi-delivery dates or multi-destinations or multi-performance dates/points, that factor alone shall not require but does not preclude establishment of more than one contract line item. However, when more than one delivery date and/or more than one destination are identified to a single contract line item, the delivery schedule will specify delivery dates for the item by the destination when established, or individual contract line items may be established for each destination and/or delivery date and/or requisition.)

(b) As an alternative to setting forth in the Schedule an extensive list of contract line items, they may be shown in a contract exhibit as exhibit line items (see 204.7105 and 204.7106). In these cases, a Contract Line Item Number (CLIN) which references the exhibit will be assigned in the schedule and shall specify the exhibit identifier. Contract line items for provisioned spares shown on a contract exhibit and data items shown on DD Form 1423, Contract Data Requirements List, when used as an exhibit, shall specify the exhibit identifiers.

(c) Requirements for test model approval under the development phase or for first article approval under the production phase (whether the requirement is for first article delivery for Government testing or for first article approval test report delivery based on contractor testing) shall require the establishment of a separate contract line or subline item for each item of supply or service (one Scope of Work, one Performance Description, one National Stock Number, one Manufacturer's Part Number, one drawing and piece number) unless the test model or first article consists of a lot composed of a mixture of items, in which case a single contract line or subline item may be established for the lot.

(d) Requirements expressing contractor responsibilities for which a separate price is not established or contained in the price of a supply or service line item but for which the contractor may be entitled to payment, shall not be assigned a contract line or subline item number, but shall be identified in the contract schedule. Examples of such requirements are transportation, packaging and handling, reusable containers, and state and/or local taxes. If it is determined that a separate price is to be established for these requirements, they shall meet the criteria in (a) above or in 204.7104–2(c) and shall be established as a line or subline item.

204.7103–2 Procedures for numbering.

(a) Contract line items within a contract shall consist of 4 numeric digits 0001 through 9999 and shall be numbered sequentially but not necessarily consecutively. Unless there is a valid reason to the contrary, the identical line item number assigned to an item in a solicitation pursuant to 204.7102(c) shall be assigned to that item when an award is made. Any given contract line item number shall not be assigned more then once in a contract, and line item numbers beyond "9999" shall not be used.

(b) When a contract line item contains subline items, each such subline item shall be numbered by adding to the basic line item number, two alphabetic or two numeric characters as specified in 204.7104.

204.7104 Contract subline items.

204.7104–1 General.

Contract subline items provide a further subdivision of the basic contract line item when it is necessary for contract performance or administration purposes to separately identify subordinate requirements. There are only two categories of contract sublines.

(a) The first category comprises those subline items that are included in the procurement instrument for information purposes only and are identified by a numeric suffix. These subline items are an integral part of the associated contract line item but shall not be scheduled separately for delivery, separately identified for shipment or performance, or separately priced for payment purposes.

(b) The second category comprises those subline items that have a separate delivery schedule, require separate identification at the time of shipment or performance and/or are separately priced for payment purposes. These subline items are identified by an alpha suffix.

204.7104–2 Criteria for establishing.

(a) Subline items included in procurement instruments for informational purposes only (numeric suffix) shall be established at the discretion of the contracting officer. This type of subline item identifies information that relates directly to and is an integral part of the contract line item; e.g., parts of an assembly or parts of a kit. Such subline items shall not have a separate delivery schedule, a separate price for payment purposes or require separate identification at the time of shipment or performance. Informational quantities, prices or amounts determined by the contracting officer as necessary to satisfy management requirements may be identified to such subline items provided that such quantities, prices or amounts are set forth in parentheses within the Supplies/Services (item description) column of the contractual document (i.e., not within the quantity and price columns).

(b) Subline items that have a separate delivery schedule, require a separate identification at the time of shipment, and/or are separately priced for payment purposes (alpha suffix) shall be established in lieu of line items at the discretion of the contracting officer. This category subline item shall be established whenever a capability must be provided to accumulate separately identified price and/or quantity data at the contract line item level. For instance,

this category subline may be used to identify:

(1) Identical items that are to be paid from more than one accounting classification (unless separate contract line items have been established for each accounting classification or accounting classifications have been identified to each consignee in the contract line item delivery schedule in accordance with 204.7108);

(2) Items of an identical nature where different sizes have been assigned discrete Federal supply stock numbers and/or different prices;

(3) Individually payable items such as packaging costs that pertain to a contract line item but are not included in the contract line item price (in this case, item description, price and quantity data for the line item also are to be entered as a separate subline item);

(4) Individual delivery dates and/or destinations and/or requisitions when multiple delivery dates, destinations and/or requisitions are designated in the procurement instrument for a contract line item; or

(5) Parts of an assembly or parts of a kit when the parts have a separate delivery schedule, require separate identification at the time of shipment or performance, and are separately priced for payment purposes.

Whenever subline items of this category (alpha suffix) are established, the associated contract line item shall serve only as a common denominator for the accumulation of management data by the procuring activity and all requirements for the associated contract line item will be identified as subline items. (All shipments and payment will be made at the subline item level.)

(c) Subline items in the alpha suffix category ((b) above) shall:

(1) Have a separate (i.e., subline item level) delivery schedule, period of performance or completion date expressly stated in the procurement instrument ("as required" is an expressly stated delivery schedule); and

(2) Have or be anticipated to have a single unit price or, if no unit price is established, a single total price or amount (When all subline items for a particular contract line item are identical services or supply items that have identical unit prices, the unit price and total amount (extended unit price for all subline items) may be shown at the contract line item level, or the unit price may be shown at the contract line item level and the extended amounts shown at subline item level, or the unit price and total amounts may be shown at subline item level, but only one of these methods may be used for a contract line item and its associated subline items. However, if any subline item has a different unit price than the remainder of the subline items, all subline items shall be separately priced and the contract line item shall not be priced. In this latter instance, subline items that are not separately priced but must be separately identified for shipment and management purposes may indicate a unit price of "NSP" (not separately priced); *provided*, the price of this item is included in the unit price of another subline item or different contract line item. The clause set forth in 2052.204–7000 shall be inserted in applicable contracts when in the opinion of the contracting officer because of dollar value or other considerations it is necessary to preclude payment for a subline item until all related subline items identified as not separately priced have been delivered. In no instance will the contract line item/subline item structure be constructed in such a way as to require the identification of contractor products or services (shipment or performance) at the subline item level and contractor payment at the contract line item level); and

(3) Be separately identifiable (i.e., no more than one National Stock Number, one Item Description, one Manufacturer's Part Number, etc., for a supply subline item, or no more than one Scope of Work, one Description of Services, etc.) for a services subline item.

204.7104–3 Procedures for numbering.

(a) When contract subline items are established within a contract line item, the total effort shall be assigned a contract line item number and each subline item shall be assigned a contract subline item number.

(b) Contract subline items established within a contract line item for information purposes only (204.7104–1(a) and 204.7104–2(a)) shall be numbered by adding to the contract line item number two numeric characters commencing with ":01" and continuing through "99." No such designation shall be assigned more than once to the same contract line item number within a procurement instrument. The two supplemental numeric characters shall be placed immediately following the contract line item number without separation by spaces or special characters. Example follows:

Item No.	Supplies/Services	Quantity	Unit	Unit price (dollars)	Amount (dollars)
0002	158/EE Periscope Adapter System. NSN–2040–00–916–2842, including one set of the following for each system.	12	Each	72,831	873,972
000201	Indicator and Control Box (1 ea)				
000202	Well Junction Box (1 ea)				
000203	Remote Indicator Box (ECM RM) (1 ea)				
•	• • • • •				
000210	Set Dip Loop Cables (1 ea)				

NOTE: In the above instance, the delivery schedule will identify the contract line item (not the subline items) and all shipments and payments will be at the contract line item level. Shipment documents and payment vouchers will not identify subline items.

(c) Contract subline items established to identify contractual requirements that have a separate delivery schedule, require identification at the time of shipment or accomplishment and/or are separately priced for payment purposes (see 204.7104–1(b) and 204.7104–2(b)) shall:

(1) Be numbered by adding to the contract line item number two alphabetic characters commencing with "AA" and continuing through "ZZ." (The letters "I" and "O" shall not be used.) Contract sublines shall be numbered sequentially but not necessarily consecutively. No such designation shall be assigned more than once to the same contract line item number within a contract;

(2) Be sequenced within a contract line item as follows: AA, AB, AC through AZ; then BA, BB, BC through BZ; and continuing, if necessary, through ZZ; and

(3) Be constructed by placing the two supplemental alphabetic characters immediately following the contract line item without separation by spaces or special characters. For example, with contract line item number "0001" the first three contract subline items, if consecutive, would be numbered "0001AA," "0001AB," and "0001AC."

Examples of correct line item structures in this category are shown on the following pages.

Example 1: Subline items structured to identify destinations for identical items, identically priced (Delivery schedule shall be established for each subline item, not the contract line item.).

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0001	NSN 1615-00-591-6620 Shim, Aluminum Alloy, . . . Apbl, Rotor, Helicopter.				
	PRON A1-9-63821-M1-M1 ACR: AA				
0001AA	A3168R-9030-4025 A2537M IPD: 2 RDD: 334 PROJ: 501.	10	EA	$100.00	$1,000.00
0001AB	A3168R-9030-4026 A51AXBM IPD: 2 RRD: 325 PROJ: 502.	10	EA	100.00	1,000.00
0001AC	A3168R-9030-4027 A67KBCM IPD: 2 RDD: 349 PROJ: 503.	15	EA	100.00	1,500.00

Example 2: Subline items structured to identify destinations for identical items, not identically priced (Delivery schedule shall be established for each subline item, not the contract line item.).

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0001	NSN 1615-00-591-6620 Shim, Aluminum Alloy, . . . Apbl, Rotor, Helicopter.				
	PRON A1-9-63821-M1-M1 ACR: AA				
0001AA	A3168R-9030-4025 A2537M IPD: 2 RDD: 334 PROJ: 501.	10	EA	$100.00	$1,000.00
0001AB	A3168R-9030-4026 A51AXBM IPD: 2 RRD: 325 PROJ: 502.	20	EA	99.00	1,980.00
0001AC	A3168R-9030-4027 A67KBCM IPD: 2 RDD: 349 PROJ: 503.	30	EA	98.00	2,940.00

Note: Difference in prices for identical items is due to separate destinations for FOB destination delivery.

Example 3: Subline items structured to identify different sizes of an item that are identically priced (Delivery schedule shall be established for each subline item, not the contract line item.).

Item No.	Supplies services	Quantity	Unit	Unit price	Amount
0013	Boots Insulted, Cold Weather White, Type II, Class 1		PR	[illegible]	$13,422.50
0013AA	8430-00-655-5541 Size 5N	50			
0013AB	8430-00-655-5544 Size 8N	70			
0013AC	8430-00-655-5551 Size 9N	30			
0013AD	8430-00-655-5535 Size 9R	200			

Note: Unit price and total amount shown at line item level rather then at subline item level, as authorized by 204.7104-2(c)(2), when all subline items of a line item are identically priced.

Example 4: Subline items structured to identify different sizes of an item that are not identically priced (Delivery schedule shall be established for each subline item, not the contract line item.)

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0002	Body Armor Ground Troops Variable Type Small Arms, Fragmentation Protective Nylon Felt Vest, Front and Back Plates, Ceramic Plate, Type I.				
0002AA	First Article	1	LO	NSP	
0002AB	8470-00-141-0935, Medium Regular	1936	SE	$331.77	$642,306.72
0002AC	8470-00-141-0936, Large Regular	825	SE	355.77	[illegible]
0002AD	8470-00-141-0937, Medium Long	1,237	SE	346.77	[illegible]
0002AE	8470-00-141-0938, Large Long	804	SE	365.77	294,079.08

Note.—First Article entered as "Lot" in accordance with 204.7103-1(c).

Example 5: Subline items structured to provide the capability for relating subordinate separated priced packaging costs to the overall contract line item (Separate delivery schedules shall be established for the subline item identifying the contractor's product and for the subline item identifying packaging. No schedule will be established for the contract line item.)

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0001	6105-00-635-6568 50380 Ref. No. 63504-WZ Armature Motor ACR: AA.				
0001AA	6105-00-635-6568 50380 Ref. No. 63504-WZ Armature Motor.	2	EA	$2,895.87	5,791.74

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0001AB	Packaging	2	EA	289.58	579.16

Example 6: Subline items structured to identify different accounting classifications for identical items (Delivery schedule shall be established for each subline item, not the contract line item.)

Accounting and Appropriation Data

AJ: 17X1505183503150691000000192B000000000000000000
AK: 17X1505183703175691000000192B000000000000000000
AL: 17X1505193503143691000000192B000000000000000000

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0002	Pulse Decoder KY-312/A5Q-19		EA	$3,037.40	
0002AA	Pulse Decoder KY-312/A5Q-19ACR: AJ	2			$6,074.80
0002AB	Pulse Decoder KY-312/A5Q-19ACR: AK	6			18,224.40
0002AB	Pulse Decoder KY-312/A5Q-19ACR: AL	2			6,074.80

Note: Unit price may be shown at line item level and total amounts shown at subline item level, as authorized by 204.7104-2(c)(2), when all subline items of a line item are identically priced.

Example 7: Subline items structured to identify parts of an assembly (Delivery schedule and price shall be established for each identified part at the subline item level, not for the assembly at the contract line item level.).

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0003	Automatic Degaussing System Consisting of: (2 ea @ $52,061; $104,122 total).				
0003AA	Switchboard	2	EA	$52,061.00	$104,122.00
0003AB	Remote Control Panel	2	EA	NSP	
0003AC	Power Supply (M Coil) SSM Type (145 Amps, 220 V DC).	2	EA	NSP	
0003AF	Power supply (A Coil) SSM Type (118 Amps, 220 V DC)	2	EA	NSP	

Note: In the above instance, the price of all other subline items indicated by "NSP" is included in the Switchboard. The clause set forth in 252.204-7000 shall be inserted in applicable contracts when in the opinion of the contracting officer because of dollar value or other considerations, it is necessary to preclude payment for a subline item until all related subline items identified as not separately priced have been delivered.

Example 8: Subline items structured to identify parts of a kit (Delivery schedule and price shall be established for each identified part at the subline item level, not for the kit at the contract line item level.).

Item No.	Supplies/services	Quantity	Unit	Unit price	Amount
0031	Conversion Kit to Convert Torpedo MK 45 Mod 0 to Torpedo MK 45 Mod 1 (50 Kt @ $10,868.52; $543,426 total).				
0031AA	Integrator Assy LD 620106	50	EA	$10,868.52	$543,426.00
0031AB	Pulse Generator Assy LD 587569	50	EA	NSP	
0031AC	Drive Shaft Assy LD 587559	50	EA	NSP	
0031BF	Actuator Panel Assy LD 542924	50	EA	NSP	

Note: In the above instance, the price of all other subline items indicated by "NSP" is included in the Integrator Assembly. The clause set forth in 252.204-7000 shall be inserted in applicable contracts when in the opinion of the contracting officer because of dollar value or other considerations, it is necessary to preclude payment for a subline item until all related subline items identified as not separately priced have been delivered.

204.7105 Contract exhibits.

204.7105-1 Definition.

"Exhibit" means a document attached to a procurement instrument, referenced by its capital letter identifier in a line or subline item in the procurement instrument Schedule, which establishes deliverable requirements in the attached document as an alternative to establishing an extensive list of line or subline items in the procurement instrument Schedule.

204.7105-2 Criteria for establishing.

(a) As an alternative to setting forth in the Schedule an extensive list of contract line or subline items (e.g., spare parts lists), a contract line item may be established referencing a document attached to the contract which shall be designated an exhibit. The exhibit shall set forth as exhibit line items what would otherwise be shown as contract line items. When exhibits are used, the following shall apply:

(1) Each exhibit shall apply to one contract line or subline item only; however, more than one exhibit may apply to a single contract line item.

(2) DD Form 1423 (Contract Data Requirements List) may be used as an exhibit or as an attachment. If used as an exhibit, the exhibit identifier (204.7105-3) shall be entered in the "TO EXHIBIT" line in the upper left corner of the form (the "ATCH NR" line shall be left blank), one contract line or subline item shall be established in the Schedule which reflects the exhibit, and the standard procedures for identifying exhibits prescribed in 204.7105-3 below and for numbering exhibit line and subline items prescribed in 204.7106 shall be followed. If the DD Form 1423 is used as an attachment, a numeric attachment number shall be entered in the "ATCH NR" line in the upper left corner of the form (the "TO EXHIBIT" line shall be left blank) and a separate contract line or subline item shall be established in the Schedule for, and which references, each deliverable sequence number of data on the DD Form 1423.

(3) Contract line or subline items in the Schedule which reference an exhibit shall not contain unit prices or total amounts, except when necessary to reflect the amount of funds for actual or estimated requirements to satisfy the management needs of the individual procuring activity. When unit prices or total amounts are shown to satisfy a management need, such prices or amounts shall be set forth in parentheses within the item description block of the contractual document (i.e., not within the unit price or amount columns).

(b) As an alternative to setting forth in the Schedule an extensive list of contract subline items, a contract subline item may be established which references an exhibit in the same manner as for a contract line item.

(c) The term "Exhibit" shall not be used to identify any other attachment to a procurement instrument. When

contract line items or subline items refer to a document attached to a procurement instrument which establishes a deliverable requirement, such as spare parts or data on a DD Form 1423, this document shall be termed an Exhibit. When other types of documentation are appended to or incorporated by reference in a procurement instrument, such documentation shall be referred to as an "Attachment" or other term identifying it as appended documentation. Such documentation may be attached to a contract exhibit, provided such documentation does not identify a deliverable requirement which is not established by a contract or exhibit line or subline item.

204.7105–3 Procedures for identifying.

Exhibits shall be identified by either a single or double capital letters. The letters "I" and "O" shall not be used. Exhibit identifiers need not be assigned consecutively, nor sequentially, but they shall not be duplicated within a procurement instrument and shall always appear in the first or first and second positions of all applicable "Exhibit Line Item Numbers" (see 204.7106). Each page of the exhibit shall have the procurement instrument identification number, exhibit identifier, and applicable contract line or subline item number cited thereon.

204.7106 Exhibit line and subline items.

204.7106–1 Criteria for establishing.

Criteria for the establishment of exhibit line and subline items shall be the same as for establishing contract line and subline items (see 204.7103–1 and 204.7104–2, respectively).

204.7106–2 Procedures for numbering.

(a) Exhibit line items within an exhibit shall be assigned four-position numbers. The exhibit identifier (see 204.7105–3) is used for the first or first and second positions; the remaining positions are assigned sequentially within each exhibit using alpha and numeric characters. The letters "I" and "O" shall not be used. Exhibit line item numbers shall be sequenced as set forth in 204.7106–3, except that numeric numbering may be employed in those cases where such numbering is adequate to meet the criteria established by 204.7106–1.

(b) Exhibit subline items shall be numbered in the same manner as specified for contract subline items (see 204.7104–3).

204.7106–3 Sequence of exhibit line item numbers.

TWO-POSITION SERIAL NUMBER FOR DOUBLE-LETTER EXHIBIT IDENTIFIER

Cumulative No. of Line Items	Serial Number Sequence
1–33	01 thru 09, then 0A thru 0Z, then
34–67	10 thru 19, then 1A thru 1Z, then
68–101	20 thru 29, then 2A thru 2Z, then
102–135	30 thru 39, then 3A thru 3Z, then
136–169	40 thru 49, then 4A thru 4Z, then
170–203	50 thru 59, then 5A thru 5Z, then
204–237	60 thru 69, then 6A thru 6Z, then
238–271	70 thru 79, then 7A thru 7Z, then
272–305	80 thru 89, then 8A thru 8Z, then
306–339	90 thru 99, then 9A thru 9Z, then
340–373	A0 thru A9, then AA thru AZ, then
374–407	B0 thru B9, then BA thru BZ, then
408–441	C0 thru C9, then CA thru CZ, then
442–475	D0 thru D9, then DA thru DZ, then
476–509	E0 thru E9, then EA thru EZ, then
510–543	F0 thru F9, then FA thru FZ, then
544–577	G0 thru G9, then GA thru GZ, then
578–611	H0 thru H9, then HA thru HZ, then
612–645	J0 thru J9, then JA thru JZ, then
646–679	K0 thru K9, then KA thru KZ, then
680–713	L0 thru L9, then LA thru LZ, then
714–747	M0 thru M9, then MA thru MZ, then
748–781	N0 thru N9, then NA thru NZ, then
782–815	P0 thru P9, then PA thru PZ, then
816–849	Q0 thru Q9, then QA thru QZ, then
850–883	R0 thru R9, then RA thru RZ, then
884–917	S0 thru S9, then SA thru SZ, then
918–951	T0 thru T9, then TA thru TZ, then
952–985	U0 thru U9, then UA thru UZ, then
986–1019	V0 thru V9, then VA thru VZ, then
1020–1053	W0 thru W9, then WA thru WZ, then
1054–1087	X0 thru X9, then XA thru XZ, then
1088–1121	Y0 thru Y9, then YA thru YZ, then
1122–1155	Z0 thru Z9, then ZA thru ZZ.

THREE-POSITION SERIAL NUMBERS FOR DOUBLE-LETTER EXHIBIT IDENTIFIER

Cumulative No. of Line Items	Serial Number Sequence
1–33	001 thru 009, then 00A thru 00Z, then
34–67	010 thru 019, then 01A thru 01Z, then
68–101	020 thru 029, then 02A thru 02Z, then
102–135	030 thru 039, then 03A thru 03Z
136–305	and so on to
306–339	090 thru 099, then 09A thru 09Z, then
340–373	0A0 thru 0A9, then 0AA thru 0AZ, then
374–407	0B0 thru 0B9, then 0BA thru 0BZ, then
408–441	0C0 thru 0C9, then 0CA thru 0BZ
422–1121	and so on to
1122–1155	0Z0 thru 0Z9, then 0ZA thru 0ZZ, then
1156–1189	100 thru 109, then 10A thru 10Z, then
1190–1223	110 thru 119, then 11A thru 11Z, then
1224–1257	120 thru 129, then 12A thru 12Z
1258–1461	and so on to
1462–1495	190 thru 199, then 19A thru 19Z, then
1496–1529	1A0 thru 1A9, then 1AA thru 1AZ, then
1530–1563	1B0 thru 1B9, then 1BA thru 1BZ
1564–2277	and so on to
2278–2311	1Z0 thru 1Z9, then 1ZA thru 1ZZ, then
2312–2345	200 thru 209, then 20A thru 20Z, then
2346–2379	210 thru 219, then 21A thru 21Z, then
2380–2413	220 thru 229, then 22A thru 22Z
2414–2617	and so on to
2618–2651	290 thru 299, then 29A thru 29Z, then
2652–2685	2A0 thru 2Z9, then 2ZA thru 2ZZ, then
2686–2719	2B0 thru 2B9, then 2BA thru 2BZ
2720–3433	and so on to
3434–3467	2Z0 thru 2Z9, then 2ZA thru 2ZZ, then
3468–3501	300 thru 309, then 30A thru 30Z
3502–10,403	and so on to
10,404–10,437	900 thru 909, then 90A thru 90Z, then
10,438–10,471	910 thru 919, then 91A thru 91Z
10,710–10,743	980 thru 999, then 98A thru 98Z, then
10,744–10,777	9A0 thru 9A9, then 9AA thru 9AZ, then
10,778–10,811	9B0 thru 9B9, then 9BA thru 9BZ
10,812–11,525	and so on to
11,526–11,559	9Z0 thru 9Z9, then 9ZA thru 9ZZ

204.7107 Contract modifications.

Items of supplies or services set forth in contract or exhibit modifications shall reflect the applicable line or subline item numbers, if any, appearing in the basic contract, except in those instances when the nature of the modification necessitates re-identification of a partial quantity of an existing contract line item or exhibit line item. Situations described below are intended to furnish guidance as to when a new line or subline item number should or should not be assigned as the result of a contract modification.

(a) Modification applying to definitized items (firm price of item is included in the contract or, if this modification establishes additional quantities of items already included in the contract, the price of the item in the modification is the same as in the contract or, if this is a new item, the modification contains a firm price):

(1) If the modification applies to the total quantity of the existing line or subline item, the original line or subline item number may be retained.

(2) If the modification changes the specification of a partial quantity of the existing contract or exhibit line or subline item, but the specification change is not of sufficient magnitude to make the partial quantity separately identifiable (e.g., new National Stock Number or item description, see 204.7103–1(a)(2) and 204.7104–2(c)(3)). and the unit price change is averaged to provide a revised single unit price for the total quantity on the line or subline item, the original contract or exhibit line or subline item number may be retained.

(3) If the modification adds a new item of supply or services to the contract or exhibit, the new item shall be assigned the next unused contract or exhibit line or subline item number.

(4) If the modification affects only a partial quantity of an existing contract or exhibit line item or subline item and changes other than delivery date and/or, ship to mark for data, the unchanged portion shall retain the original contract or exhibit line or subline item number. The changed portion shall be assigned the next unused contract or exhibit line or subline item number.

(b) Modifications applying to undefinitized items (although a requirement for this item has already been included in the contract or previous exhibit a firm price has not been negotiated or, if this modification establishes additional quantities of an item, the price of the item in the modification is not firm or if this modification adds a new item for which the firm price has not been established):

(1) If the modification applies to the total quantity of the existing line or subline item, the original line or subline item number may be retained.

(2) If the modification changes the specification of a partial quantity of the existing contract or exhibit line or subline item, but the specification change is not of sufficient magnitude to make the partial quantity separately identifiable (e.g., new National Stock Number or item description, see 204.7103–1(a)(2) and 204.7104–2(c)(32)), and the unit price change is averaged to provide a revised single estimated unit price for the total quantity on the line or subline item, the original contract or exhibit line or subline item number may be retained.

(3) If the modification adds a new item of supply or service to the contract or exhibit, the new item shall be assigned the next unused contract or exhibit line or subline item number.

(4) If the modification is undefinitized (price) and increases the quantity of an existing definitized (price) contract or exhibit line or subline item, the next unused contract or exhibit line or subline item number will be assigned to the increased quantity.

(5) If the modification increases the quantity of an existing but undefinitized (price) contract or exhibit line or subline item, the original line item number may be retained if the same unit price applies to the total quantity (existing plus increase) of the line item; if the unit price of the increased quantity differs from that of the existing quantity, the next unused contract or exhibit line item or subline item number will be assigned to the increased quantity.

(6) If the modification affects only a partial quantity of an existing contract or exhibit line or subline item and definitizes price, the definitized portion shall retain the original contract or exhibit line or subline item number. The undefinitized portion shall be assigned the next unused contract or exhibit line or subline item number; however, if the same item on another existing contract or exhibit line or subline item has already been definitized and the newly definitized quantity is definitized at the same unit price as the existing definitized quantity, or an average definitized unit price is established for the new and the existing definitized quantities, then the undefinitized portion may retain its existing line item number and the newly definitized quantity may be added to the contract or exhibit line item for the previously definitized quantity.

(7) If the modification affects only a partial quantity of an existing contract or exhibit line or subline item and does not change the delivery schedule nor definitize price, the unchanged portion shall retain the original contract or exhibit line or subline item number. The changed portion shall be assigned the next unused contract or exhibit line or subline item number.

(c) In any event, all items of supplies or services appearing in modifications and exhibits shall be established and numbered in accordance with the uniform numbering procedures prescribed in this subpart. If subline numbers are assigned, all requirements for the associated contract or exhibit line item will be identified as subline items, and the contract or exhibit line item will serve only as a common denominator for the accumulation of management data.

204.7108 Contract Accounting Classification Reference Number (ACRN).

204.7108–1 General.

As a method of relating the long line accounting classification citation number to detail line item scheduled information, the Accounting Classification Reference Number (ACRN) shall be utilized in all contracts assigned for the contract administration to the Defense Contract Administration Services, DLA, and to Plant Cognizance Repesentatives of the Military Departments and Agencies.

204.7108–2 Criteria for establishing.

This two position alpha/numeric control code is required for Military Standard Contract Administration Procedures (MILSCAP) processing, and may also be used in contracts administered by each Service/Agency. Under MILSCAP, the ACRN is required to associate the Accounting Classification Trailer Record, the Supplies Schedules Data Record and the Services Line Item Data Record with the long line accounting classification. The reference number is also used to associate the various record formats of the Contract Payment Notice as described in Chapter 9 of the MILSCAP Manual, DoD 4105.63–M.

204.7108–3 Procedures for using the Accounting Classification Reference Number (ACRN).

(a) The ACRN will be any combination of a two position alpha/numeric code assigned discretely to each accounting classification within each contract. The letters "I" and "O" shall not be used.

(b) This code will be shown as a detached prefix to the long line accounting classification number in the Accounting and Appropriation Data block and/or Section K (Contract Administration Data) of the contract, except that accounting classification numbers included in the contract only for the information of the Transportation Officer for citation on Government bills of lading for shipment at Government expense of items on an f.o.b. origin contract need not be prefixed with an ACRN. In the case of modifications to contracts/orders which have been previously assigned a long line accounting classification number(s), only the ACRN(s) assigned to that number(s) need be shown in the Accounting and Appropriations Data block and/or Continuation Sheet(s) of the modification.

(c) If more than one ACRN is assigned in the contract, the ACRN shall also be shown in the contract Schedule as follows:

(1) The ACRN shall be shown adjacent to the identity code of each "Ship To/Mark For," unless the procedure in (c) (2) or (3) below is used. Only one ACRN may be assigned to the same "Ship To/Mark For" within the same contract line or subline item number, except in rare cases when multiple accounting classifications apply to a single unit so the quantity cannot be subdivided to relate to a single accounting classification. In such case, the contract shall provide sufficient information under the heading "Payment Instructions for Multiple Fund Accounting Citations" to permit proper payment and fund accounting;

(2) If only one accounting classification applies to a subline item, the ACRN may be shown in the Supplies/Services column near the subline item description;

(3) If only one accounting classification applies to a line item, the ACRN may be shown in the Supplies/Services column near the line item description; and

(4) The ACRN shall be shown in the contract Schedule in the following manner: ACR:1D

(5) For cost-reimbursement type contracts, the provisions of this paragraph (c) do not apply.

(d) The purchasing office executing a contract, basic ordering agreement, or blanket purchase agreement is responsible for control of assignment of ACRNs pertaining thereto. Contract or agreement provisions which provide for the issuance of contract modifications (including provisioned item order modifications), calls, orders, or work requests by organizations other than the purchasing office executing the contract or agreement will contain instructions for ACRN assignment. This may be accomplished by individual assignments

as funds are cited, by assignment of blocks of ACRNs to offices authorized to issue contract modifications, calls, orders or work requests or by some other appropriate method. In no case, however, will an ACRN apply to more than one long line accounting classification in a contract. The authority to control ACRN assignment shall not be delegated to another office by the purchasing office issuing the contract or agreement.

204.7109 Indefinite delivery type contracts.

(a) When an indefinite delivery type contract includes provisions wherein the price of an item is determined at the time a delivery order is issued based on such factors as the quantity to be ordered (e.e., 10–99 at $1.00, 100–249 at $.98, and 250 or more at $.95), the FOB provision, the destination, or the type pack required in the delivery order, it shall not be necessary to assign a separate line item number in the indefinite delivery type contract to each price for the same item. Each line or subline item in the individual delivery order, however, shall cite only one of the unit prices in the indefinite delivery type contract.

(b) Except as noted in (a) above, criteria for contract line item assignment (see 204.7103) shall be applicable to indefinite delivery type contracts.

PART 205—PUBLICIZING CONTRACT ACTIONS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

205.001 Policy.

(c) Small business specialists in each purchasing office are responsible for screening all proposed procurements and for recommending action to be taken with respect to publicizing such procurements in accordance with the requirements of this subpart. In those offices where no small business specialist is assigned, the contracting officer or other designated representative shall accomplish the foregoing.

Subpart 205.1—Dissemination of Information

205.101 Methods of Disseminating Information.

(a)(2) *Displaying in Public Place.* A copy of each solicitation for an unclassified procurement in excess of $5,000 which provides at least 10 calendar days for submission of offers shall be displayed at the contracting office and, if appropriate, at some additional public place from the date issued until 7 days after bids or proposals have been opened. But see Part 13 for small purchases.

205.102 Availability of Solicitations.

(a)(1) In determining the "reasonable number" of copies to be maintained, the contracting officer shall consider, among other things, the extent of initial solicitation, reproduction costs, the nature of the acquisition, whether access to classified matter is involved, the anticipated requests for copies based upon responses to synopses and other means of publication in previous similar situations, and the fact that publishers and others who disseminate information regarding proposed acquisitions normally do not require voluminous specifications or drawings. With regard to classified acquisitions, the foregoing instructions apply to the extent consistent with Departmental security instructions and procedures.

(4)(i) When the purchase activity is not in possession of complete sets of specifications, plans and drawings (as in some procurements of airframes, shipbuilding, or major weapons systems), or the drawings and specifications are classified, or are so voluminous that display and distribution in accordance with prescribed procedures is impracticable, the solicitation shall contain notice of this fact and of the location at which the specifications, plans, or drawings may be examined.

Subpart 205.2—Synopses of Proposed Contracts

205.201 General.

(b) *Commodity assignments.* When an item is assigned or is within a Federal Supply Class assigned for procurement in FAR Subpart 17.5 and is purchased by other than the assigned Department, the synopsis shall cite the applicable purchase exclusion number from 208.7101–1 or 208.7101–2.

(S–70) Publication of Procurement Less Than $10,000. When recommendation by procurement personnel or the small business specialist, and approved by the contracting officer, proposed procurement less than $10,000 may be publicized in the *Commence Business Daily.*

205.202 Exceptions.

The following need not be publicized in the Synopsis:

(i) The procurement for security reasons is of a classified nature;

(ii) Procurement of perishable subsistence when made by placement of an order under a contract by FAR 16.5;

(iii) Procurement is for utility services and only one source is available;

(iv) Procurement which is of such unusual and compelling urgency that the Government would be seriously injured by the delay involved in permitting the date set for receipt of bids, proposals, or quotations to be more than the time periods specified at FAR 5.203;

(v) Procurement to be made by an order placed under an existing contract covered by FAR Subpart 5.2;

(vi) Procurement to be made from another Government Department or agency including procurements from the SBA using the authority of Section 8(a) of the Small Business Act, or a mandatory source of supply, such as an agency for the blind under the blind-made products program;

(vii) Procurement that results from acceptance of a proposal pursuant to the Small Business Innovation Development Act of 1982 or an unsolicited proposal that demonstrates a unique or innovative research concept and pubication of such unsolicited proposal would improperly disclose the originality of thought or innovativeness of the proposed research;

(viii) Procurement for which a foreign government reimburses the Department for the cost of the procurement of the property, supplies, or services for such government and only one source is available, or the terms of an international agreement or treaty between the United States and foreign government authorize or require that all such procurement shall be from sources specified within such international agreement or treaty;

(ix) When it has been determined in writing by the Secretary, with the concurrence of the Administrator of the Small Business Administration, that advances notice is not appropriate or reasonable.

205.203 Time of synopsizing.

When synopsis is required, contracting offices shall not issue a competitive solicitation until at least 15 days after the date of publication of a proper notice of the procurement action in the *Commerce Business Daily*; *Provided;* That, in the case of research and development procurements, the interval shall be 30 days from the date of publication. Contracting officers may presume that notice has been published 5 days (2 days if electronically transmitted) following transmittal of the synopsis to the *Commerce Business Daily.*

205.204 Presolicitation notices.

See FAR 14.205—(c) and 15.404(b).

205.205 Special situations.

(c)(1) Each procurement to be made in the United States, its possessions, or Puerto Rico for which the total fee (including phases and options) is expected to be $10,000 or more shall be synopsized in accordance with 205.207(d)(S–71).

(c)(2) A notice of procurements with fees not expected to be less than $10,000, or to be made outside the United States, its possessions, or Puerto Rico, shall be displayed at the contracting office and need not be publicized in the *Commerce Business Daily*.

(c)(S–70) For procurements with an estimated total fee of $300,000 and which require notification to Congress in accordance with 10 U.S.C. 2807, no public announcement shall be made until two weeks after Congress has been notified.

205.207 Preparation and transmittal of synopses.

(b)(1) The first line of the text will state the number of the synopses being sent. Synopses will be numbered consecutively by the reporting activity during the calendar year, using a new series of numbers for each year.

(d)(2) When referenced, Numbered Note 12 will appear in the *Commerce Business Daily* as follows:

Note 12: One or more of the items under this procurement may be subject to the requirements of the Agreement on Government Procurement approved and implemented in the United States by the Trade Agreements Act of 1979. All offers shall be in the English language and in U.S. dollars. The solicitation procedure is open; that is, all interested suppliers may submit an offer.

(End of Note)

(d)(S–70) If the synopsis is for a sole source contract, the synopsis shall include reference to Numbered Note 22. The Numbered Note will appear in the *Commerce Business Daily* as follows:

Note 22: This procurement is for supplies or services for which the Government intends to solicit and negotiate with only one source. Interested persons are invited to identify their interest and capability to respond to the requirement or to submit proposals in responses to this notice. This notice of intent is not a request for competitive proposals. A determination by the Government not to open the requirement to competition based upon response to this notice is solely within the discretion of the Government. Information received as a result of the notice intent will normally be considerd solely for the purpose of determinng whether to conduct a competitive procurement. Nevertheless, the sole source may not presume that the solicitation will be amended in the event that competitive proposals are received if the solicitation, as issued, is sufficient to support a competitive procurement. In that case, award may be made pursuant to the solicitation's terms. In accordance with Pub. L. 98–72, the contracting officer will not commence negotiations for award of a contract until at least 30 days have elapsed from the date of this notice.

(End of Note)

(d)(S–71) Each notice publicizing procurement or architect-engineer services shall be headed *"R. Architect-Engineer Services"*. The project shall be listed with a brief statement concerning the location, scope of service required, the significant evaluation criteria and the relative order of importance the Government attaches thereto, the estimated construction cost range (see FAR 36.204), the construction cost limitation (see FAR 36.205), the type of contract proposed, the estimated start and completion dates, and the date by which responses to the notice must be received, including submission of Standard Form 255, if required. Appropriate statements shall be made concerning any specialized qualifications, security classifications, and limitations on eligibility for consideration. Qualifications or performance data required from architect-engineer firms shall be described. The foregoing data shall be followed by the statement *"Firms desiring consideration shall submit appropriate data as described in Numbered Note 62. This is not a request for a proposal"*. The name of the responsible procurement office should follow together with the complete address and telephone number. The numbered note will appear in one issue each week of the *Commerce Business Daily* as follows:

Note 62: Architect-engineer firms which meet the requirements described in this announcement are invited to submit: (1) a Standard Form 254, Architect-Engineer and Related Services Questionnaire; (2) a Standard Form 255, Architect-Engineer and Related Services Questionnaire for Specific Project, when requested; and (3) any requested supplemental data to the procurement office shown. Firms having a current Standard Form 254 on file with the procurement office are not required to resubmit this form. Firms responding to this announcement before the closing date will be considered for selection, subject to any limitations indicated with respect to size and geographic location of firm, specialized technical expertise or other requirements as listed. Following an initial evaluation of the qualification and performance data submitted, three or more firms considered to be the most highly qualified to provide the services required will be chosen for interview. The Department of Defense policy for selection of architect-engineer firms is not based upon competitive bidding procedures, but rather upon the professional qualifications necessary for the satisfactory performance of the professional services required, subject to the following additional considerations: (1) specialized experience of the firm in the type of work required; (2) capacity of the firm to accomplish the work in the required time; (3) past experience, if any, of the firm with respect to performance on Department of Defense contracts; (4) location of the firm in the general geographical area of the project, provided that there is an appropriate number of qualified firms therein for consideration; and (5) volume of work previously awarded to the firm by the Department of Defense, with the object of effecting an equitable distribution of contracts among qualified architect-engineer firms including minority-owned firms and firms that have not had prior Department of Defense contracts. Firms desiring to register for consideration for future projects administered by the procurement office (subject to specific requirements for individual projects are encouraged to submit annually a statement of qualifications and performance data, utilizing Standard Form 254, Architect-Engineer and Related Services Questionnaire.

(End of Note)

Note 62 is a *Commerce Business Daily* standard Numbered Note which applies to all DoD notices publicizing procurement of architect-engineer services. When the notice is used in accordance with FAR 2055.205(C), the substance of the Numbered Note shall be included.

Subpart 205.3—Synopses of Contract Awards

205.301 General.

(a) Except for classified awards, all awards of contracts to be performed in whole or in part within the United States, in excess of $25,000, which are likely to result in the award of subcontracts, shall be promptly published in the *Commerce Business Daily*, "Synopsis of U.S. Government Proposed Procurement, Sales and Contract Awards."

205.302 Preparation and transmittal of synopses of awards.

(b) The synopsis of contract awards shall also contain the following information:

(S–70) the classification code (4-digit) applicable to the procurement action;

(S–71) a clear and concise description of the supplies or services being procured, including a national stock number or a service stock number when assigned.

(S–72) the quantity of each item;

(S–73) the name, size status ((S) for small business and (L) for large business), and the full address of the contractor.

205.303 Announcement of contract awards.

(a) *Public announcement.* Information on proposed contractual actions over $3 million shall be submitted in writing in accordance with Departmental/Agency procedures. Report Control Symbol DD–LA–(AR) 1279 applies. Departments will submit reports to the Office of the Assistant Secretary of Defense (Public Affair) by the close of business the day before contract award is proposed.

(S–70) *Congressional notification.* In accordance with Departmental procedures, Departments shall notify the appropriate Members of Congress (Senator and Representatives in whose state and district the proposed contractor is located and, if different, in whose state and district the work is to be performed) of contract awards of over $3 million concurrent with the public announcement described in (a) above.

Subpart 205.4—Release of Information

205.404–1 Release procedures.

(b)(1) Classified Information shall be released through existing security channels in accordance with DoD Industrial Security Regulation (DoD 5220.22R).

205.404–2 Announcements of long-range acquisition estimates.

Activities publishing long-range procurement estimates shall, publicize them in the *Commerce Business Daily* by forwarding to the address listed in FAR 5.207 an announcement reflecting the fact that a long-range procurement estimate has been published and citing the address of the office from which a copy of the estimate can be obtained. Each announcement should be prepared substantially as the following example.

"The Defense Personnel Support Center has published an estimate of equipment and footwear procurement requirements for and Quarters FY . These estimates, *which are subject to revision and are in no way binding on the Government,* may be obtained, by request, from the Defense Personnel Support Center (ATTN: Procurement and Production Directorate), 2800 South 20th Street, Philadelphia, Pennsylvania 19101."

Subpart 205.5—Paid Advertisements

205.501 Definitions.

(a) *Media* means any vehicle used to convey an advertising message; it includes newspapers, magazines, trade and professional journals, special printed media, radio and television;

(b) *Newspaper* means a publication printed and distributed at stated intervals to convey news and includes trade journals which carry news in addition to technical matter.

(c) *Space* means the space purchased for advertising messages in printed media, and the time purchased for advertising messages on radio or television broadcasts;

205.502 Authority.

(a) The authorization shall specify the limitations, if any, of the authority granted. Administrative duties involved in accomplishing the advertising may be delegated in writing, personally signed by the delegate, setting forth the extent of the administrative duties involved. A copy of the instrument delegating authority to advertise and a copy of the instrument assigning administrative duties thereunder will either be attached to the first voucher submitted for payment or shall be forwarded immediately upon issuance to the General Accounting Office address to which records of the Department are submitted for audit purposes. When authority to advertise has been delegated by the Secretary of the Department concerned, a reference to the authorizing directive on the advertisement order is acceptable in lieu of attaching a copy of the authority to the payment voucher. Copies of such instruments also shall be attached to the duplicate voucher submitted to the paying office.

(1) Special or general authority to place advertisements in newspapers must be secured in advance by the use of DD Form 1535, Request/Approval for Authority to Advertise. Special authority permits the publication of a given advertisement a specified number of times in designated newspapers. General authority permits the publication of such advertisements during a designated fiscal year as may be required.

(2) Requests for authority to place advertisements in newspapers shall be submitted through channels to the Secretary or his designee.

(b) Unless the Secretary of the Department concerned determines otherwise, DD Form 1535 is not required as authority to place advertisements in media other than newspapers. Paid advertisements to recruit civilian personnel shall be subject to the limitations in Section 332–1–9 of the Federal Personnel Manual.

205.504 Use of advertising agencies.

(b) The services of the advertising agencies include but are not limited to counseling as to the selection of the media for insertion of the advertisement; contacting the media in the interest of the Government agency concerned; placing of insertion orders; selection and ordering of typography; copywriting; and preparation of rough layouts.

Part 206 [Reserved in FAR]

SUBCHAPTER B—ACQUISITION PLANNING

PART 207—ACQUISITION PLANNING

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 207.1—Acquisition Plans

207.102 Policy.

The Departments shall preform coordinated planning as prescribed by FAR Subpart 7.1 and this supplement for those acquisitions which meet the criteria and thresholds in 207.103(a)(2).

207.103 Agency-head responsibilities.

(a)(1) The acquisition planning provided for herein and in FAR Subpart 207.1 applies to the more complex and costly programs to procure hardware developed and produced to satisfy the need for modern military equipment. These acquisition planning principles may also be adapted to the acquisition of all supplies and services. Although some degree of acquisition planning is necessary to buy shoes, subsistence, or other common items of supply, the detailed planning described herein and in FAR Subpart 207.1 is not applicable to such items.

(a)(2) Acquisition plans shall be prepared for—

(i) Development acquisitions (see FAR 35.001) whose total contractual cost is estimated at $2,000,000 or more, and

(ii) Production and service acquisitions whose contractual cost is estimated at $15,000,000 for all years or $5,000,000 for any fiscal year. These plans shall include the contents described in FAR 207.105, as appropriate.

(a)(3) Acquisition plans for acquisitions described in (a)(2)(i) and (ii) above should be keyed to the Department of Defense Five Year Defense Program, applicable budget submissions, and the Decision Coordinating Paper/Program Memorandum, as appropriate.

(a)(4) The criteria and thresholds in (a)(2) above do not preclude the

preparation of acquisition plans for any acquisition, whether short-range or long-range, when determined necessary by the Departments.

(a)(5) Acquisitions which represent a final buyout, a one-time buy, or small, repetitive buys (see FAR 7.102) are exempt from the requirements of (a)(2) and (4) above.

(b) Acquisition plans meeting the criteria and thresholds of (a)(2) above, shall be prepared on a system basis covering the major items of hardware/equipment to be developed/produced including Government-furnished equipment and system support. Other acquisition plans may be written on either a system or individual contract basis.

(c) The Departments shall ensure that the principles of FAR Subpart 7.1 and this Subpart are used as appropriate.

(d) The program manager, or other official responsible for the program concerned has overall responsibility for the requisite acquisition planning as this official has for all other planning for the program. The contracting officer or the contracting officer's designee shall support this official by preparing and maintaining the acquisition plan. The contracting officer shall enlist the aid of cognizant engineering, production, logistics, quality assurance, maintenance and other functional staff business management personnel at command and subordinate buying activity levels as required. The head of the contracting activity, or the chief contracting official of the buying activity, in coordination with the program manager, must ensure that the objectives of the acquisition plan are realistic and achievable and that solicitations and contracts will be appropriately structured to equitably distribute technical, financial, and economic or business risks, consistent with the program phase of the acquisition, the technical requirements and needs of the specific program, and salient business and legal constraints. All personnel engaged in the management of the acquisition process, including program, technical and financial personnel, are essential to the comprehensive acquisition planning and preparations necessary to achieve the acquisition objectives. These personnel must be made cognizant of their responsibilities and actively participate in the development and preparation of the acquisition plan, if acquisition planning is to be successful.

(e) Acquisition plans shall be reviewed and approved in accordance with Departmental procedures.

(f)(1) *Design-to-cost criteria and thresholds.*

(i) Design-to-cost principles shall be applied—

(A) in all acquisitions for major defense systems (DoD Directive 5000.1) unless exempted by the Secretary of Defense, and

(B) to the acquisition of systems, subsystems, and components below the thresholds for major defense systems to the extent prescribed in DoD Directive 5000.28, and in accordance with Departmental proceduers. (See DoDD 5000.28 for the policies and procedures applicable to design-to-cost.)

(ii) In solicitations and contracts including design-to-cost principles, consideration should be govern to prescribing and tailoring the required cost, technical and schedule parameters to the particular program, and to providing the contractor with flexibility to identify unnecessary or marginally cost effective technical and schedule features susceptible to trade-offs (see DoDD 4105.62). This is to facilitate product development at the lowest life-cycle-cost consistent with mandatory schedule and performance requirements. (For the relationship of design-to-cost to value engineering, see FAR 48.105)

(2) *Life-cycle-cost criteria.*

(i) Since the cost of operating and supporting a system or equipment over its useful life is substantial and, in many cases, greater than the acquisition cost, it is essential that such costs be considered in development and acquisition decisions in order that proper consideration can be given to those systems or equipments that will result in the lowest life-cycle-cost to the Government. Guidelines, including representative detailed procedures for implementing life-cycle-costing are contained in the following documents published by the Under Secretary of Defense for Research and Engineering:

(A) LCC–1, DoD Life-Cycle-Costing Procurement Guide (Interim);

(B) LCC–2, DoD Life-Cycle-Costing Casebook; and

(C) LCC–3, Life-Cycle-Costing Guide for System Acquisitions (Interim).

(g) The following format is illustrative of an acquisition plan and is designed merely to give guidance in the preparation of acquisition plans. It may be modified to suit the acquisition being planned as well as the phase of program formulation. The narrative portion of the acquisition plan should be brief but comprehensive. It should provide not only the background necessary to understand the acquisition but also a plan for contracting for the item or system, including the rationale and assumptions upon which the plan is predicated. It should reference other documents where applicable. The milestone chart introduces discipline into the planning process by identifying in graphic form the points at which critical decisions must be made and time factors that must be observed when action is necessary to produce an item or to make a competitive buy possible. The chart not only forces consideration of all factors involved but it also provides a visual portrayal of the decisions necessary to achieve objectives and indicates the time at which they should be made. The milestone chart portrays the step-by-step planning and normally covers the period from advance development through delivery of the production items. The chart tells the story of time, cost and quantity of required items, illustrating milestones which must be recognized in the decision making process. However, it is important to recognize that the format of the milestone chart is flexible, because the same milestones may not be present in every acquisition program.

(Address each of plan content elements in FAR 7.105(a) and (b) and 207.105, as appropriate.)

ILLUSTRATIVE MILESTONE CHART FORMAT [RESERVED]

207.104 General procedures.

(c) See Appendix J when an acquisition plan is used to support a determination and findings (D&F).

207.105 Contents of written acquisition plans.

In addition to the contents prescribed by the FAR, acquisition plans should include the following, as appropriate:

(a) *Acquisition background and objectives.*

(a)(7) *Risks.* As appropriate, discuss the effect of business base changes of major contractors' workload on program cost.

(a)(S–70) *Applicability of a Decision Coordinating Paper (DCP), program memorandum Defense System*

Acquisition Review Council (DSARC), and/or internal service reviews. Describe the options set forth in the DCP/Program Memorandum and delineate which option the acquisition plan supports. Delineate the DSARC and/or internal service reviews on the milestone chart.

(a)(S–71) *Approval for operational use.* Indicate the date approval for operational use has been or will be obtained. If waivers are requested, describe the need for the waivers.

(a)(S–72) *Milestone chart attachment depicting the objectives of the acquisition.* Provide a chart in general accordance with the sample milestone chart at 207.103(g).

(a)(S–73) *Milestones for updating the acquisition plan.* Indicate when the plan will be updated. Updates should be scheduled to coincide with DSARC reviews and the transition from one phase to another (full-scale development to production).

(b) *Plan of action.*

(b)(5) *Authority for contracting by negotiation.* See Appendix J for the information required to be included in the acquisition plan if the plan is to be used to support a determination and findings (D&F).

(b)(6) *Budgeting and funding.* Include specific references to budget line items and program elements, where applicable, estimated production unit cost, and the total cost for remaining production.

(b)(13) *Logistics considerations.*

(i) Describe the extent of integrated logistic support planning to date, including references to approved plans.

(ii) In discussing the reliability and maintainability (R&M) objective, including warranties, discuss the mission profile, R&M program plan, R&M predictions, redundancy, qualifed parts lists, parts and material qualification, R&M requirements imposed on vendors, failure analysis, corrective action and feedback, and R&M design reviews and trade-off studies.

(b)(S–70) *Acquisition approach for each proposed contract.* If not elsewhere described in the plan, describe the acquisition approach for each proposed contract, including the following, as appropriate.

(i) Item description.

(ii) Estimated cost.

(iii) Proposed sources and basis for selection.

(iv) Source selection procedures. If formal source selection procedures will be used, discuss milestones for development of the plan and provide a general overview of how the selection is to be conducted.

(v) Contract type. Provide rationale for recommendation of contract type.

(vi) Negotiation authority recommended. Discuss basis for recommendation of negotiation exception (see FAR 207.105(b)(5)).

(vii) Repurchase data. Provide a complete discussion of use of repurchase data to increase competition, including funding available for repurchase data and the contractual approach to acquiring such data, including proprietary rights and patent considerations.

(viii) Other considerations, as applicable.

(ix) Alternative acquisition approaches considered. Briefly discuss the merits and shortcomings of other approaches.

(x) Milestones for the contract cycle. Address those steps in FAR 7.105(b)(19) and any others, as appropriate.

Subpart 207.3—Contractor Versus Government Performance

207.302 General.

(d) DoD activities shall not convert a commercial activity to performance by a private contractor without having first conducted a cost comparison which demonstrates that contract performance is more economical.

207.304 Procedures.

(a)(3) In addition to the FAR requirement for the contracting officer to review the Performance-Oriented Work Statement (PWS), the contracting officer shall work in conjunction with the functional activity in the preparation of the PWS.

207.307 Appeals.

(b) The contracting officer shall forward requests for review of any discrepancy in the cost comparison to the preparer of the in-house cost estimate, for consideration in accordance with departmental procedures.

Subpart 207.4—Equipment Lease or Purchase

207.401 Acquisition considerations.

(a) The contracting officer shall obtain rationale, as prescribed by FAR 7.401 and 7.402, supporting the decision to lease or purchase from the requiring activity. This rationale shall be retained in the contract file.

PART 208—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

208.002 Use of other government supply sources.

(f) The GSA has responsibility of the disposition of strategic and critical materials which are in excess of national stockpile requirements. These materials are primarily metals, ores, chemicals and similar raw material items, and are listed and described in a GSA Bulletin which is disseminated to contracting activities through Departmental channels. Prior to initiating acquisitions of materials which are listed as being available for transfer from the GSA, the contracting activity should screen the list to determine whether the requirement may be met through transfer of materials from the GSA. Due consideration should be given to the quantity, quality and location of the material, and to the timeliness of its availability. Detailed information on these excess materials is available from the Property Management and Disposal Service, General Services Administration, Washington, D.C. 20405.

(g) It is the policy of the Department of Defense (see Pub. L. 86–777) to obtain its requirement of helium as follows:

(1) Bulk helium requirements (tank car lots) shall be acquired either directly from the Department of Interior (Bureau of Mines) or from private helium distributors which establish and maintain their eligibility in accordance with Bureau of Mines Regulations. Copies of the current list of eligible private helium distributors may be obtained from the Bureau of Mines, Helium Operations, P.O. Box H4372 Herring Plaza, Amarillo, Texas 79101;

(2) Helium in cylinders or trailers shall be acquired from the Department of Interior (Bureau of Mines) either direct or through General Services Administration Federal Supply Schedule contracts. Department of Defense activities will make a determination annually as to whether or not helium in cylinders and trailers will be obtained directly from the Bureau of Mines or through Federal Supply Schedules. If a determination is made that it is more economical to obtain such helium through Federal Supply Schedules, the estimated requirements will be processed to GSA. Once estimated requirements are processed to GSA, the resultant Federal Supply Schedule (FSG 68, Part III, section G) is mandatory on the requiring activities for the contract period.

208.002–70 Acquisition from the Department of Energy (DOE).

(a) *General.* This subpart covers the acquisition of material and supplies from the DOE.

(b) *Acquisition of radioisotopes and enriched stable isotopes.*

(1) DOE F Form 5400.3, "U.S. DOE Isotope Order Blank", and NRC Form 313, "NRC Application for Byproduct Material License", shall be used for the acquisition of radioisotopes and enriched stable isotopes from any of the DOE laboratories. No other type of order blank, purchase order, or contract shall be used in lieu of these forms.

(2) In the acquisition of radioisotopes, NRC Form 313 shall be filed with the Chief, Materials Licensing Branch Division of Fuel Cycle and Material Safety, Office of Nuclear Material Safety and Safeguards, United States Nuclear Regulatory Commission, Washington, D.C. 20555. If the application meets all regulatory requirement and applicable standards, NRC Form 374, "U.S. Nuclear Regulatory Commission Byproduct Materials License," will be issued to the applicant by the Radioisotopes Licensing Branch, Nuclear Regulatory Commission. After receipt of the NRC Form 374, a complete DOE F Form 5400.3 (in duplicate, if the contracting office desires to receive an accepted copy of the form back from the supplier), the license (NRC Form 374), and a Standard Form 1103, "U.S. Government Bill of Lading", shall be sent to the appropriate DOE laboratory. If a bill of lading is not furnished, shipment shall be made collect on a commercial bill of lading, to be converted at destination.

(3) The "Terms and Conditions" on the reverse side of the DOE F Form 5400.3 shall control all requisitions for radioisotopes and enriched stable isotopes acquired by the Departments from the DOE National Laboratories.

(4) NRC Form 313, "NRC Application for Byproduct Material License", shall be requisitioned directly from: United States Nuclear Regulatory Commission, Attn: Radioisotopes Licensing Branch, Division of Fuel Cycle and Material Safety, Washington, D.C. 20555. DOE F Form 5400.3 shall be acquisitioned directly from: Oakridge, TN 37830 (commercial telephone 615–574–6984) or Mound Facility, Monsanto Research Corporation, P.O. Box 32, Miamisburg, OH 45342 (commercial telephone 513–865–3501).

Subpart 208.3—Acquisition of Utility Services

See Supplement No. 5, Procurement of Utilities Services.

Subpart 208.4—Ordering From Federal Supply Schedules

208.402 Applicability.

(b) The subpart does not apply to items under the cognizance of the Defense Personnel Support Center.

208.404–1 Mandatory use.

(a) *Urgent requirements.* If delivery is offered in a shorter time than the maximum stated in the Schedule, but later than that required by the purchase request, the contracting officer shall ascertain from the activity initiating the purchase request whether the offered delivery is acceptable. This procedure need not be followed when transportation time from the contractor's shipping point or time required for inquiry and reply make conformance impracticable. When multiple award schedules are involved, the purchasing office need query only one contractor after considering the requirements of FAR 208.405–1.

208.404–2 Optional use.

(a)(S–70) DoD activities shall consider optional schedules as another source of supply to assure that purchase of supplies and services of the type contained in such schedules are really to the best advantage of the Government, price, delivery and other factors considered.

208.404–3 Requests for waivers.

(a) If such waiver is not granted, the case shall be referred to the Head of the Contracting Activity or his deputy, or to such higher authority as may be required by the Departments, and in the case of the Air Force, Commanders of AFLC Air Logistics Centers who shall make the final decision as to whether the nonschedule item will be purchased and shall promptly notify the Commissioner, Federal Supply Service, and the Purchasing Office, of the decision reached.

(b) When supplies or services are to be procured from other sources and the situation will not permit the delay incident to following the normal channels of obtaining a waiver from the General Services Administration prior to purchase, such waiver shall not be requested. In emergency situations, the head of the office initiating the purchase request, or his designated representative, shall furnish to the purchasing office a signed statement identifying the supplies or services to be purchased, and explaining why similar items listed in the applicable Federal Supply Schedule will not meet the specific requirements. The purchasing office shall, within 15 days of the date of purchase, furnish such statement to the Commissioner, Federal Supply Service, General Services Administration.

208.404–70 Applicability of Listed Federal Supply Schedules.

Supplies and services covered by the Federal Supply Schedules listed herein are mandatory in whole or in part upon some element of the Department of Defense. Some of the Federal Supply Schedules listed include classes unrelated to the Federal Supply Group which identifies the Schedule. To aid in locating an item in the mandatory Schedules, the classes included in each Schedule have been listed. The Remarks column states exceptions to the mandatory provisions of the Schedule when applicable. (But see 208.470–6 for mandatory use of GSA Term Contracts for maintenance, repair, rehabilitation and reclamation of personal property.) The Schedules should be checked for complete details concerning the exceptions.

(a) MANDATORY NATIONALLY

FSC Group	FSC Class	Title of Schedule	Remarks
25		VEHICULAR EQUIPMENT COMPONENTS, Part I	No Exceptions.
	2520	Clutch Facings (Metallic).	
	2530	Brake Linings (Metallic).	
	2540	Tire Chains.	
26		PNEUMATIC TIRES AND INNER TUBES, Part II	No Exceptions.
	2610	Highway, Off-Highway and Industrial.	
26		PNEUMATIC TIRES, Part V	No Exceptions.
	2610	Motorcycle, Emergency/Pursuit and Agricultural.	
35		SERVICE AND TRADE EQUIPMENT, Part I	No Exceptions.
	3540	Sealing and Packaging Machinery.	
	3590	Heat and Cold Process and Laminating Presses.	
35		SERVICE AND TRADE EQUIPMENT, Part III	No Exceptions.
	3550	Vending Machines.	

(a) MANDATORY NATIONALLY—Continued

FSC Group	FSC Class	Title of Schedule	Remarks
36		SPECIAL INDUSTRY MACHINERY, Part II	Not Mandatory on DoD for the following items: 51-1, 51-1-1, 51-1-2, 51-1-3, 51-2, 51-3, 51-60, 51-61, 51-62, 51-104, 51-105, 51-106, 51-110, 51-110-1, 51-111, 51-112, 51-113, 51-114, 51-115, 51-125, 51-125-1, 51-126, 51-127, 51-146, 51-165, 51-166, 51-167 and 51-2017.
	3610	Lithographic Printing Plates and Solutions; Masters, Spirit Duplication, Thermal Process; Printing Duplicating and Book Binding Equipment.	
	3615	Pulverizing, Pulping and Shredding Machines.	
36		SPECIAL INDUSTRY MACHINERY, Part IV	Not Mandatory on DoD for the following items: 51-4, 51-5, 51-6, 51-10, 51-11, 51-12, 51-28, 51-29, 51-30, 51-32, 51-43, 51-44, 51-45, 51-46, 51-47, 51-48, 51-52, 51-53, 51-54, 51-55, 51-55-1, 51-56 and 51-57.
	3610	Copying Equipment, Supplies and Services.	
37		LAWN AND GARDEN EQUIPMENT, PART II, Section A	No Exceptions.
	3750	Lawnmowers, Mowers, Shredders, Edgers, Trimmers, etc.	
41		AIR CONDITIONING EQUIPMENT, Part I	No Exceptions.
	4120	Window Types and Remote Air-Cooled Condenser Units.	
45		SANITATION EQUIPMENT, Part II	No Exceptions.
	4540	Security Incinerators and Accessories.	
	6665	Replacement Pyrometer.	
51		TOOLS	Mandatory on DoD only for items in FSCs 5120 and 5130.
	5120	Hand tools, Nonpowered.	
	5130	Hand Tools, Powered. Note: This Schedule also includes certain items in FSCs 3220, 3405, 3413, 3415, 3416, 3417 and 3439.	
	5180	Pneumatic, hydraulic, powder actuated, gasoline engines	No Exceptions.
52		MEASURING TOOLS	No Exceptions.
	5210	Measuring Tapes.	
53		ABRASIVES	No Exceptions.
	5345	Belts, Disks and Stones.	
	5350	Cloth, Grain and Paper.	
58		COMMUNICATION EQUIPMENT, Part III, Section A	Mandatory on DoD, except FSC 5830.
	5800	Electronic Megaphones.	
	5835	Semi-Professional Audio Recording Equipment.	
58		COMMUNICATION EQUIPMENT, Part III, Section B	Mandatory on DoD, except FSC 5820.
	5820	Professional Video Recording Equipment.	
	5835	Professional Audio Recording Equipment.	
59		COMMUNICATION SUPPLIES, Part V	No Exceptions.
	5820	Tape, Video.	
	5835	Sound Recording Tape, Magnetic Tape Cartridges.	
	7430	Magnetic Cards.	
	7045	Electronic Data Processing Tape (widths other than ½").	
59		COMMUNICATION SUPPLIES, Part V, Section C	No Exceptions.
	5835	Instrumentation Recording Tape, Standard and High Resolution.	
68		CHEMICALS AND CHEMICAL PRODUCTS, Part III, Section H	No Exceptions.
	6830	Fire Extinguishing Fluorocarbons.	
68		CHEMICALS AND CHEMICAL PRODUCTS, Part III, Section J	No Exceptions.
	6830	Argon, Missile Checkout, NSN 6830-00-882-1793.	
68		CHEMICALS AND CHEMICAL PRODUCTS, Part III, Section K	Mandatory on DoD for Destinations listed in the Schedule.
	6830	Oxygen: Aviator's Breathing.	
70	-	DATA PROCESSING STORAGE AND RELATED EQUIPMENT, Part X	No Exceptions.
	5820	Video Tape Storage, Handling and Transportation Equipment.	
	5835	Audio, Instrumentation, and other Tape Storage, Handling, and Transportation Equipment.	
	7045	ADP Storage and Handling Equipment.	
	7110	Cabinets and Desks, Card Punch and Programmers.	
	7430	MTST Magnetic Tape Cartridge Storage.	
70		DATA PROCESSING SUPPLIES, Part XI. Edp ¼" wide, 800, 1600 and 6250 bpi	No Exceptions.
71		HOUSEHOLD FURNITURE Part I, Section A	No Exceptions.
	7105	Ranch Style. Note: This Schedule also includes FSCs 7195 and 7520.	
71		HOUSEHOLD FURNITURE, Part I, Section B	No Exceptions other than those items obtainable from FPI Schedule of Products.
	7105	Early American and Eighteenth Century English and American Reproductions.	
71		HOUSEHOLD FURNITURE Part II, Section A	Not Mandatory on DoD for index items 331 through 436.
	7105	Upholstered Living Room.	
71		HOUSEHOLD FURNITURE Part II, Section B	No exceptions other than those items obtainable from FPI Schedule of Products.
	7105	Modular Multiple Seating Units, Wood and Metal.	
71		HOUSEHOLD FURNITURE Part III	No Exceptions.
	7105	Danish, Traditional and Modern Styles.	
71		HOUSEHOLD FURNITURE, Part IV	No Exceptions.
	7105	Rattan Style.	
71		OFFICE FURNITURE, Part V, Section C	No Exceptions.
	7110	Steel Vertical blueprint Filing Cabinets, Roll Drawing Files, High Density and movable shelf Filing Systems.	
71		HOUSEHOLD FURNITURE, Part VII, Section A	Not Mandatory on DoD for items covered by Military Specifications or items obtainable from FPI Schedule of Products.
	7105	Metal, Indoor-Outdoor, Hospital and Quarters and Recreation Room.	
	7110	Lobby Use and Reception Room.	
71		HOUSEHOLD FURNITURE, Part VII, Section B	Not Mandatory on DoD for items covered by Military Specifications or items obtainable from FPI Schedule of Products.
	7105	Metal Frame Dormitory Furniture for Quarters Use.	
71		FURNITURE, Part X, Sections A and B	Not Mandatory on DoD for Self-Edged Tables or items obtainable from FPI Schedule of Products.
	7105	Section A—Classroom Furniture, Student Chairs, Desks and Tables; Teachers	
	7125	Chairs and Desks.

	6830	Industrial Gases; Compressed and Liquefied.	
96		RECRUITING AIDS, Part V, Section A	Mandatory for requirements of recruiting commands; not for requirements of other DoD activities.
	9905	Advertising and Promotional Aids.	

208.404-71 Establishment or revision of federal supply schedules mandatory upon DOD.

(a) *Policy.* The Administrator of General Services Administration has agreed that the concurrence of the Office of Secretary of Defense will be obtained prior to establishing a Federal Supply Schedule which is mandatory upon the Department of Defense, or prior to adding or removing any items from Federal Supply Schedules which are mandatory upon the Department of Defense, or making any other changes in such Schedules affecting their use by Department of Defense in meeting its supply requirements. However, deletion of an item from a Federal Supply Schedule will not require Office of the Secretary of Defense concurrence when the reports of sales for that item amount to less than $1,000 per year, except where—

(1) The item is a part or accessory incidental to a basic item;

(2) The item is a component of a unit assembly;

(3) The item has a demonstrated need to fill out a range of colors, sizes or other characteristic; or

(4) The item involves a contract for services.

(b) *Procedures.* Requests for the establishment of or a change in a Federal Supply Schedule mandatory on elements of the Department of Defense shall be forwarded to the Executive Director, Contracting, Defense Logistics Agency, for coordination with the Departments. Such proposals normally shall be forwarded in sufficient time to provide three months for consideration by all interested elements of the Department of Defense and General Services Administration prior to the desired effective date. In the event action on such proposals is desired in a shorter period of time, a minimum of 35 days for consideration should be anticipated. These proposals will be distributed to the representatives of the Departments and General Services Administration engaged in the Federal Supply Schedule review program, as appropriate, for comment or concurrence. Any questions will be jointly considered before final action is taken. If the Departments and General Services Administration representatives cannot reach agreement on a question raised, the question will be forwarded to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) for resolution.

208.405 Ordering office responsibilities.

208.405-1 Ordering from multiple-Award schedules.

(c) When purchase of an item of foreign origin is specifically required, the using activity shall furnish the procuring activity sufficient information to permit the determination required by FAR Part 25 to be made.

208.405-2 Order placement.

(S-70) Oral orders not to exceed $10,000.

(1) *General.* Purchasing offices are authorized to make procurements not in excess of $10,000 by oral orders from Federal Supply Schedule contractors. Ordering activities shall obtain an agreement from the contractor that for each shipment under an oral order he will furnish a delivery ticket, in the number of copies required by each purchasing office, which shall contain the following information:

(i) Contract number;

(ii) Order number under the contract;

(iii) Date of order;

(iv) Name and title of the person placing order;

(v) Itemized listing of supplies or services furnished; and

(vi) Date of delivery or shipment.

(2) *Payment.* Optional methods of invoicing are permissible. An individual invoice accompanied by a receipted copy of the related delivery ticket may be submitted for payment. Alternatively, a summarized monthly invoice covering all oral orders made during the month, accompanied by a receipted copy of each delivery ticket or a statement by the contracting officer that the supplies have been received by the Government, may be submitted for payment. The monthly billing procedure is preferred when numerous oral orders may be placed.

(S-71) Imprest funds (petty cash method). In buying commodities where cash payment is advantageous, the imprest funds method (see FAR 13.5) is authorized; *Provided,* the order does not exceed $150 ($300 under emergency conditions), and the contractor agrees to such a procedure.

208.470 Acquisition from GSA sources.

208.470-1 Applicability.

This subsection applies to the procurement of supplies available from General Services Administration stock for delivery in the contiguous United States, including the satisfaction of overseas requirements when such requirements are routed to facilities in the contiguous states for supply action in accordance with instructions prescribed by the Departments. This subsection may be applied optionally in Alaska and Hawaii. It does not apply in any event to any order which amounts to $25.00 or less, or to:

(a) Any subsistence or medical item which is under the cognizance of the Defense Personnel Support Center;

(b) Any item which is being purchased for resale; or

(c) Any item used by commissaries for operation and maintenance that is available through local purchase at a price lower than from GSA stock.

This subsection also applies to the mandatory use of General Services Administration services and term contracts for the maintenance, repair, rehabilitation, and reclamation of all personal property described in 208.470-6, in the United States, Puerto Rico and the Virgin Islands. Services of this type which are available from Federal Prisons Industries and Agencies for the Blind will be procured under the provisions of FAR Subparts 8.6 and 8.7.

208.470-2 Procurement from General Services Administration stock.

It is the policy of the Department of Defense that for an item which has been decentralized for local purchase and which is available from the General Services Administration stock, such items will be ordered from GSA unless delivery requirements cannot be met. The mandatory provisions of Department of Defense, General Services Administration Interagency Purchase Assignments (208.7106) are not applicable to decentralized items which are within these assignments and which are available from the stock. Such items will be ordered in accordance with the above-stated policy.

208.470-3 GSA supply catalog.

The General Services Administration Supply Catalog sets forth, among other things, information with respect to some of the items of supply carried in stock, prices, and delivery information, and a listing of the General Services Administration regional offices. The catalogs do not list all of the items carried in stock. Items within the classes assigned to GSA in accordance with DoD/GSA agreements and not recorded in the management data lists of the Federal catalog publications as managed by another service or agency and not recorded for decentralized procurement, should be requisitioned from GSA. Copies of the GSA Supply Catalog may be obtained by completing GSA Form 457 (FSS Publications Mailing List Application) and mailing it to the GSA Centralized Mailing Lists Service, Building 41, Denver Federal Center, Denver, Colorado 80225. GSA Form 457 may be obtained from the GSA Centralized Mailing Lists Service by letter or by telephoning 303-234-4195.

208.470-4 General Services Administration regional offices.

The General Services Administration regional offices, located in the cities listed below, serve the areas indicated in the GSA Supply Catalog guide. The addresses shown are the mailing addresses to which all orders and correspondence should be forwarded.

GSA Region and Address

(a) Boston, MA—John W. McCormack, Post Office & Courthouse, Boston, MA 02109.

(b) New York, NY—26 Federal Plaza, New York, NY 10007.

(c) Philadelphia, PA—Ninth & Market Streets, Philadelphia, PA 19107.

(d) Atlanta, GA—75 Spring Street, SW, Atlanta, GA 30303.

(e) Chicago, IL—230 S. Dearborn Street, Chicago, IL 60604.

(f) Kansas City, MO—1500 East Bannister Road, Kansas City, MO 64131.

(g) Fort Worth, TX—819 Taylor Street, Fort Worth, TX 76102.

(h) Denver, CO—Denver Federal Center, Bldg. 41, Denver, CO 80225.

(i) San Francisco, CA—525 Market Street, San Francisco, CA 94105.

(j) Auburn, WA—General Services Administration Center, Auburn, WA 98002.

(k) National Capital—7th & D Streets, S.W., Washington, DC 20407.

208.470-5 Order for supplies.

Orders for supplies from the General Services Administration shall be submitted in accordance with the Military Standard Requisitioning and Issue Procedures (MILSTRIP) (DoD 4140.17-M).

208.470-6 Mandatory sources for maintenance, repair, rehabilitation and reclamation of personal property.

General Services Administration regional offices provide facilities for maintenance, repair, rehabilitation and reclamation of Government-owned personal property and, in addition, have Term Contracts with commercial concerns for similar services. These contracts are published as General Services Term Contracts. When requirements exceed the in-house capabilities of a Departmental activity or installation, or it is otherwise required that outside sources be used, it is mandatory that General Services Administration sources for such services be used except when:

(a) The items involved are military weapons systems, specialized military support equipment, or specialized technical or scientific equipment;

(b) Such services are available from the Federal Prison Industries or

Agencies for the Blind or Other Severely Handicapped;

(c) The required services are covered by warranty or other preexisting contract;

(d) Delivery requirements for repair and refinishing services cannot be met (the provisions of FAR 8.404–1 are applicable when determining whether a General Services Administration source can meet the delivery requirements);

(e) The required services are not within the scope of the existing GSA Term Contract or a waiver is first obtained from the GSA Regional Property Management and Disposal Service office administering the contract (such waivers are not required when the exigency of the procurement will not permit delay; however, telephonic clearances will be given by GSA in appropriate cases); and

(f) The requiring activity is outside the geographic area covered in the GSA Term Contract. (Normally, this area extends no more than a 15-mile radius from the contractor's location. Each contract specifies the area covered which may in some cases extend beyond that distance.)

208.470–7 Personal property covered under mandatory GSA term contracts.

The items of personal property listed below are indicative of those for which General Services Administration sources are mandatory for maintenance, repair, rehabilitation, and reclamation services. They are not all inclusive. For detailed listings, see the latest Federal Supply Catalog entitled "Guide to Sources of Supply and Service." Copies are available from GSA Regional Office and should be obtained by each installation and activity that may have need of such services. Copies of existing GSA Term Contract for these services are routinely forwarded by each GSA Regional Office to all affected Government activities within the respective regions.

Sample List of Items

Adders, calculators, and comptometers
Fire extinguishers (Industrial and Commercial)
Furniture (office, household, quarters, institutional and hospital type)
Household appliances
Mattresses
Motors and generators (Industrial and Commercial)
Tires (except for aircraft)
Typewriters (manual and electric)
Watches and clocks (Industrial and Commercial)

208.470–8 Order for services.

Orders for maintenance, repair, rehabilitation, or reclamation services from General Services Administration sources shall be placed as follows:

(a) *GSA repair facility.* A delivery order on Order for Supplies or Services/Request for Quotations (DD Form 1155) shall be submitted to the General Services Administration regional office which normally serves the procuring activity. Each delivery order which is subject to fiscal year limitations necessitating GSA procurement action to be completed not later than September 30 shall contain a notation to that effect.

(b) *Commercial sources.* Delivery orders on DD Form 1155 will be placed directly with contractors pursuant to GSA Term Contracts.

(1) *Inspection and Acceptance.* Arrangements for inspection and acceptance shall be the responsibility of the ordering agency, except when the GSA Term Contract specifically provides for source inspection by GSA.

(2) *Default Terminations.* The GSA contracting office shall be notified each time an order is terminated for default in accordance with contract provisions.

Subpart 208.70—Coordinated Procurement

208.7000 Applicability.

Although the Department of Defense Coordinated Procurement Program includes items assigned to one or more of the Departments or the General Services Administration for integrated materiel management, the procedures set forth in this Part apply to items assigned for purchase responsibility only, and not to those in the integrated materiel management program. The latter items will be obtained in accordance with current supply procedures.

208.7001 Definitions.

As used in this Part, the following terms have the meanings set forth below.

"Acceptance of MIPR" means DD Form 448–2 (Acceptance of MIPR) executed by a Procuring Department as notice to the Requiring Department that an MIPR has been received and accepted for procurement action.

"Coordinated procurement" means (a) procurement by procurement activities, within the 48 contiguous States and the District of Columbia, of certain supplies to satisfy the requirements (including overseas requirements) of all Departments in compliance with assignment responsibilities set forth in Subpart 208.71; (b) procurement assignments made by the respective Unified Commanders in Alaska, Hawaii, and outside the United States, regardless of funds utilized; and (c) procurement assignments made in accordance with 208.7018. It does not include procurements made in Alaska, Hawaii, or outside the United States which do not fall within (a) or (b) above.

"Direct citation procurement (Category II Method of Funding)" means a procurement having separate identification of the items and citing the funds of the Requiring Department, and may be accomplished by combining the requirements of two or more Departments under one contract with separate schedules showing the quantities, prices, dollar amounts, and citation of funds of each Requiring Department, or by placing separate contracts for each department.

"Integrated materiel management items" means items assigned to one Department of the General Services Administration for entire Department of Defense management. Such management normally includes responsibility for computation of requirements, funding, budgeting, storing, issuing, cataloging, standardizing and procuring functions.

"Military service managed items" means items which are within Federal Supply Classes assigned to the Defense Logistics Agency or the General Services Administration but which are retained for supply management by the Requiring Department.

"Procuring department" means the Department or the General Services Administration whichever is assigned the procurement responsibility for the supplies.

"Purchase request" means the following types of authorized purchase requisitions: (a) Military Interdepartmental Purchase Request (MIPR) (DD Form 448); and (b) Requisition for Coal, Coke, and Briquettes (DD Form 416).

"Reimbursable procurement (Category I Method of Funding)" means the procurement of supplies for a Requiring Department on a contract funded by the Procuring Department, without separate identification of the items or separate citation of funds of the Requiring Department, with subsequent delivery to and reimbursement by the Requiring Department.

"Requiring department" means the Department originating a requisition or purchase request for supplies.

208.7002 Responsibilities under coordinated procurement.

The Procuring Department is generally responsible for the following under coordinated procurement:

(a) Operational phases of procurement planning (phasing the submission of requirements, consolidating or dividing requirements, analyzing the market, and determining patterns for the phased placement of orders in such a manner as to assure meeting the needs of the Requiring Departments at the lowest possible price to the Government, and at the same time avoiding unnecessary peaks and valleys of production);

(b) Purchasing;

(c) Performing or arranging through a contract administration office for contract administration, including followup and expediting of inspection and transportation; and

(d) Acquisition of licenses under patents or other proprietary rights covering the subject matter of the procurement and the settlement of patent infringement claims arising out of the procurement; approval of the Departments whose funds are to be charged for acquisition of licenses or settlement of claims shall be obtained.

208.7003 General principles governing implementation procurement assignments.

208.7003–1 Standard format-development and promulgation of implementing procedures.

Implementation of procurement assignments shall be in accordance with Enclosure 1 of Department of Defense Instruction 4115.1, dated October 14, 1968 (and amendments thereof), Subj: Department of Defense Coordinated Procurement Program—Purchase Assignments (NAVSUPINST 4215.4B).

208.7003–2 Relationship between research and development and coordinated procurement.

Items are not subject to procurement assignment until they have reached the production stage.

208.7003–3 Small dollar value purchases.

Requirement of small dollar value shall be procured in accordance with the provisions of the approved implementing procedures covering the particular assignment. Such implementing procedures shall normally provide a small dollar limitation of $2,500; however, in special situations, the limit may very depending upon the commodity area any may be expressed either in a higher or lower dollar value, by tonnage, less-than-carload lot quantities, or other units, as appropriate. Such implementing procedures shall clearly state that requirements of a value of quantity less than the prescribed limitations shall, wherever feasible, be procured by the Requiring Department. A MIPR for a military type item need not contain such a notation. The Procuring Department shall not return a MIPR submitted in accordance with the foregoing, but shall procure such items.

208.7003–4 Emergency.

In case of emergency, when the exigencies of the situation will not permit the delay incident to following the normal channels of coordinated procurement, purchases may be made without the prior authorization of the Procuring Department. When an emergency purchase is made, one copy of the contractual instrument, bearing or accompanied by a statement of the emergency, shall be transmitted promptly to the purchasing activity of the Procuring Department (the coordinated procurement assignee). The provisions of this paragraph will not normally be used for stock replenishment. These emergency procedures do not apply to the purchase of integrated materiel management items as described by 208.7001. Emergency purchase of such items is covered by 208.7101–2(d).

208.7003–5 Department of defense manufacturing establishment.

When procurement assignments have been made for items required by manufacturing establishments of the Departments, these items shall be obtained through the facilities of the Procuring Department unless such action will unduly hinder or delay production. When procurements are made other than through the Procuring Department, one copy of the contractual instrument bearing or accompanied by a statement of the circumstances necessitating such procurement shall be transmitted prompty to the purchasing activity of Procuring Department. This paragraph is not applicable when purchases are made pursuant to 208.7003–3 above.

208.7003–6 Consolidation of requirements.

The primary objective of coordinated procurement is to obtain for the Government maximum economy through the consolidation of requirements and the elimination thereby of competitive purchases among the Departments. The Procuring Department shall, to the extent consistent with the delivery schedule of the Requiring Department, consolidate in one contract its own requirements for the same or similar, items plus all requirements via MIPRs or other purchase requests.

208.7004 Items in short supply.

When shortages develop in the market for supplies being purchased and requirements have been submitted by more than one Department, the normal procedure shall be to resolve the problem on a Departmental level between or among the Departments based on priorities for the supplies. If agreement cannot be reached, the subject shall be referred to the Deputy Under Secretary of Defense for Acquisition Management for decision.

208.7005 Transfer of uncompleted contracts.

208.7005–1 Effect of assignment of procurement responsibility.

As a general rule, when the procurement responsibility for a commodity or class of commodities is assigned to one Department, or the General Services Administration, uncompleted contracts of any other Department, or the General Services Administration, for any commodity or class of commodities will not be transferred but will continue to be administered by the Procuring Department of Defense Contract Administration Services as appropriate.

208.7005–2 Contracting officers under transferred contracts.

In the case of any contract transferred, or to be transferred, to any Department, the successor to the contracting officer for each such contract shall be the Head of the Procuring Activity (or any contracting officer thereof) to which the administration of any such contract is assigned, and any such successor shall have all of the rights and responsibilities of a contracting officer under such transferred contract.

208.7006 Purchase authorization.

208.7006–1 MIPRs or other authorized purchase requests.

(a) Military Interdepartmental Purchase Requests (MIPRs) or other authorized purchase requests when received by the Procuring Department shall be the authority to procure the supplies or nonpersonal services in accordance with single department procurement assignments or agreements between the Departments concerned as provided in 208.7018. The Procuring Department is authorized to create obligations against the funds cited in a MIPR without further referral to the Requiring Department. The Procuring Department has no responsibility to determine the validity of a stated requirement in an approved MIPR; however, it should bring apparent errors in the requirement to the attention of the Requiring Department.

(b) When purchase requests other than MIPRs (see 208.7001) are used as

the basis for procurement, the general procedures prescribed for processing, amending, accepting and terminating requirements on MIPRs as prescribed in other paragraphs of this subpart shall normally be followed, except as otherwise agreed to by the Departments involved.

208.7006–2 Use of advance MIPRs.

(a) An Advance MIPR is an unfunded MIPR provided to the procuring activity in advance of the formal funded MIPR whereby initial steps in planning procurement action can begin at an earlier date.

(b) Advance MIPRs may be used only when the Procuring Department and the Requiring Department agree that the procedure may be beneficial in placing the procurement and obtaining the requirements in a more timely manner.

(c) Advance MIPRs shall not be released to a procuring activity until proper approval of the requirement is obtained.

(d) When Advance MIPRs are used, the DD 448 shall be prominently marked "Advance MIPR."

(e) For urgent requirements, the Advance MIPR may be in the form of an electrically transmitted message.

(f) On the basis of an Advance MIPR, the Procuring Department may take the initial steps toward establishing a contract, such as obtaining internal coordination, preparing a procurement plan, and making a Determinations and Findings. The extent of such action may be determined by the procuring Departments. However, contracts shall not be awarded on the basis of Advance MIPRs.

208.7006–3 Determinations and findings.

(a) *General.*

(1) When coordinated procurement is by negotiation, the Procuring Department, except as provided in (a)(2) below, shall make the required determinations and findings. The Requiring Department shall furnish with the purchase request the information required by the Procuring Department to develop the determinations and findings.

(2) When coordinated procurement is negotiated pursuant to 10 U.S.C. 2304(a)(13) and FAR 15.213, the Requiring Department shall make the determinations and findings in accordance with FAR 15.213(c)(3). When the Requiring Department is responsible for securing Secretarial approval under 10 U.S.C. 2304(a)(16) and FAR 15.217, the MIPR shall contain a statement that the required determinations and findings has been executed for the specific case in question or program involved. In both instances the Requiring Department shall preserve the original determinations and findings with supporting data as required by 215.3 except that two copies shall be attached to the MIPR or purchase request in the Procuring Department's contract file.

(b) *Foreign End Products.* Where a foreign end product is specified by the Requiring Department, that Department is responsible for determining that a domestic source end product is not available as required by FAR 25.108 and FAR 25.302. Two copies of the determination that a domestic source end product is not available shall be furnished to the Procuring Department with the MIPR.

208.7006–4 Delivery schedules.

(a) In submitting MIPRs the Requiring Department should take into consideration the normal administrative lead time of the particular commodity in order to insure delivery by the date required. The time of delivery or performance is an essential element for inclusion in a contract and must be clearly stated in each MIPR. Delivery and performance schedules on MIPRs shall be designed to meet the requirements of the particular procurement and must be realistic (see FAR 12.1). If the delivery schedule, as set forth in a MIPR, is unrealistic or cannot be accepted by the Procuring Department, the DD Form 448–2 "Acceptance of MIPR" will be so annotated (see 208.7009–3). Changes in the requested delivery schedule shall be accomplished in accordance with 208.7008–5.

(b) When a short delivery schedule is mandatory, the MIPR shall be marked "URGENT" in bold letters. The Requiring Department's justification for the "URGENT" marking shall be stated on the MIPR or attached thereto, in order to enable the Procuring Department to apply any necessary expediting techniques to assure the required delivery.

208.7006–5 Specifications, drawings, and other purchase data.

The Requiring Department shall furnish to the Procuring Department a list (or copies) of specifications, drawings, and other data, as appropriate, required for the procurement. If Federal, Military, Departmental, or other specifications, or drawings or data are available to the Procuring Department and referenced in the MIPR, they need not be furnished by the Requiring Department (but see FAR 46.407). Required changes in such purchase data shall be accomplished as set forth in 208.7006–5.

208.7006–6 Utilization of existing department of defense assets.

The Requiring Department is responsible for insuring compliance with FAR 8.001 prior to submitting military interdepartmental purchase requests for procurement action.

208.7006–7 Options for increased quantities.

If the Requiring Department desires an option to purchase an additional quantity, the MIPR shall so stipulate and shall contain a justification therefore.

208.7007 Funds and payments.

208.7007–1 Citation of appropriation and funds of Requiring Department—Category II method of funding.

Except as provided in 208.7007–2, contracts and orders for other than integrated supply management materiel shall cite the specific fund citation(s) and the MIPR number of the Requiring Department. The Procuring Department shall determine which type of funding (direct citation or reimbursable procurements) shall be used.

208.7007–2 Citation of funds of Procuring Department—Category I method of funding.

Under the conditions listed below, only the funds of the Procuring Department shall be cited in the consolidated contracts; and the contracts and orders thereunder shall provide for payment by the Procuring Department or by the Defense Contract Administration Services as appropriate:

(a) Delivery is from existing inventories of the Procuring Department;

(b) Delivery is by diversion from existing contracts of the Procuring Department which cite the funds of the Procuring Department;

(c) Production or assembly is through government work orders in Government-owned plants;

(d) Allocation of production quantities among users from one or more contracts for which the identity of specific quantities of the end item to individual contracts is not feasible at teh time of MIPR acceptance;

(e) Procurement of the end items involves separate procurement of components to be assembled by the Procuring Department;

(f) Payments will be made without reference to deliveries of end items; e.g., cost-reimbursement type contracts and fixed-price contracts with progress payment clauses; or

(g) It is not feasible and economical to use Category II method of funding.

208.7007–3 Disbursement.

When the contract is funded with DoD funds and is to be administered by the Defense Contract Administration Services, the Procuring Department shall cite as the disbursement office the Defense Contract Administration Services Region Disbursing Office (see 242.102). If the contract is not administered by the Defense Contract Administration Services, the Procuring Department shall cite as the disbursement office the payment office designated by the Requiring Department (see 208.7008–1).

208.7007–4 Authorization for exceeding MIPR estimates.

Each MIPR shall indicate on its face whether or not the total MIPR estimate may be exceeded by the purchasing office, and if affirmative, by what amount. The additional amount shall not be more than $20,000, or 10% of the total estimated MIPR amount, whichever is less.

208.7008 Preparation and use of DD Form 448 (MIPR).

DD Form 448 is substantially self-explanatory. Information provided in MIPRs shall be arranged in Uniform Contract Format to the extent feasible. If desired, each Department may overpricing fixed repetitive information.

208.7008–1 Special instructions.

(a) *MIPR Number.* The MIPR number will consist of:

(1) The requiring agency identification code as prescribed in the DoD Activity Address Directory (DoDAAD), DoD 4000.25D;

(2) The last digit of the fiscal year; and

(3) The number of the particular MIPR (numbered consecutively by the requiring activity). Amendments will be numbered with the MIPR number suffixed with the amendment number assigned in consecutive numbered sequence.

(b) Appropriate checks in Item 9 shall be accomplished in compliance with Department of Defense policy which requires interdepartmental screening of items in accordance with FAR 8.001 to determine stock availability within other Departments prior to preparation of a DD Form 448. Items which are determined to be available from stocks of other Departments shall be requisitioned as follows:

(1) Items within the scope of MILSTRIP (see DoD 4140.17–M (MILSTRIP) of 1 May 1964, as amended) shall be obtained by use of DD Form 1348/1348m, DoD Single Line Item Requisition System Document;

(2) Items not covered by MILSTRIP shall be obtained by use of DD Form 1149, Requisition and Invoice/Shipping Document. If a Procuring Department determines after receipt of a MIPR that the items can be supplied from stock, the MIPR shall be used for effecting supply from such stock.

(c) Normally a MIPR shall be restricted to one major end item, including its required spare parts, ground support equipment, and similar related items: MIPRs for other than major end items normally shall be limited to items within a single Federal Supply Classification.

(d) Attachments to MIPRs (Item 10) must be prepared in sufficient numbers so that each copy of a MIPR submitted to the Procuring Department is complete with a copy of all attachments. "Ship To and Mark For" addresses in shipping instructions shall include the clear text identification and DoDAAD code if assigned.

(e) Item 13 is used to identify the name and address of the office to receive invoices and make payment only if the resulting contract is not to be paid by the Defense Contract Administration Services in accordance with 208.7007–3, and the office to receive invoices and make payment is known at the time of preparation of the MIPR. If payment is to be made by an office designated to receive invoices, also enter the DoDAAD code that office. If payment is to be made by an office other than the office to which the invoice is to be mailed (Item 13), the name, address, and DoDAAD code of the payment office shall be set forth in detail as an attachment to the MIPR. If multiple offices are to receive invoices and make payment, the names and addresses of those offices shall be set forth as an attachment to the MIPR, including the DoDAAD code of each payment office. Whenever the payment office(s) is included in an attachment, an appropriate reference to the attachment will be included in Item 13. If the names and addresses of those offices are to be provided to the Procuring Department after preparation of the MIPR, the DoDAAD code also shall be provided for each payment office.

(f) Allotment data for the procurement of supplies shall be entered in Item 14. Allotment data for the transportation of supplies at Government expense, if cited in the MIPR in accordance with 208.7017 shall be entered in Item 12. Each citation in Item 14 shall be set forth in the appropriate space in the following manner:

(1) *ACRN.* If the Accounting Classification Reference Number procedure of 204.7108 are used in the MIPR to relate allotment data to the MIPR item or delivery, the ACRN for each fund citation in Item 14 shall be entered. (The Procuring Department is not required to use in the resulting contract the ACRN assigned to a fund citation in the MIPR).

(2) Appropriation. Will be shown in the ten positions as follows:

(i) First and second positions shall be the Treasury Department number identifying the Department or Agency to which the appropriation applies or has been transferred.

(ii) Third and fourth positions shall be the Treasury Department number identifying the Department or Agency from which an appropriation has been transferred; shall be blank if no transfer is involved.

(iii) Fifth and sixth positions shall identify the Appropriation Fiscal Year. For multiple-year appropriations, the fifth position shall be the last digit of the first year of availability and the sixth position shall be the last digit of the final year of availability. For annual appropriations the fifth position shall be blank and the sixth position shall be the "X".

(iv) Seventh through tenth positions shall be the Treasury Department appropriation serial number.

(3) *Limit/Subhead.* Up to four characters; if less than four characters, leave empty spaces blank.

(4) *Supplemental Accounting Classification Data.* Shall not exceed 36 characters. Enter in accordance with Departmental or Agency regulations.

(5) *Accounting Station.* Shall show the six character DoDAAD code of the accounting station (not used with Navy and Marine Corps funds).

(6) *Amount.* Enter the amount for each fund citation if more than one allotment is cited.

(7) Additional Citations. If space is required for additional fund citations, they shall be set forth in the same manner as an attachment to the MIPR and a reference to the attachment will be included on the form.

(g) Requiring Activities shall provide MILSTRIP requisition data prescribed in Appendix B of the MILSTRIP Manual, for each line item which is to be delivered to each "ship to" address. Repetitive data applicable to all lines on the MIPR may be overprinted.

(h) The Requiring Activity will furnish estimated weight, cube and dimensions for each line item or a statement that such data are not available and the reasons therefor.

208.7008–2 Cutoff dates for submission of Category II (direct citation) MIPRs.

(a) Unless otherwise agreed between the Departments, a cutoff date of 31 May of each year is established for the receipt of MIPRs citing expiring appropriations which must be obligated by 30 September of that fiscal year. If circumstances arise which require the submission of MIPRs citing expiring appropriations after the cutoff date, the Requiring Department will communicate with the Procuring Department prior to submission to ascertain whether or not it will be possible for the Procuring Department to execute a contract or otherwise obligate the funds by the end of the fiscal year. Procuring Departments will make every effort to obligate funds for all such MIPRs accepted after the cutoff date. However, acceptance of a late MIPR does not constitute assurance by the Procuring Department that all such funds are not to be construed as restrictive in the processing of MIPRs when it is within the capabilities of the Procuring Department to execute contracts or otherwise obligate the funds prior to the end of the fiscal year.

(b) MIPRs citing continuing appropriations are not restricted by law to time limits for obligation; therefore, the cutoff date of 31 May is not applicable to such MIPRs and procurement action should continue regardless of whether obligation will be accomplished before or after the end of the fiscal year. However, as the timely accomplishment of obligations is a factor affecting delivery of material, every effort must be made by the Procuring Department to obligate available funds as soon after receipt of the MIPR as is possible.

208.7008–3 Notification of inability to obligate.

On 1 August of each fiscal year, the Procuring Department will advise the Requiring Department of any Category II (direct citation) MIPRs on hand citing expiring appropriations on which they will be unable to obligate the funds prior to the fund expiration date. If an unforeseen situation develops after 1 August which will prevent execution of a contract, the Procuring Department will notify the Requiring Department of that fact by the most expeditious means and return the MIPR accompanied by a letter of transmittal authorizing purchase by the Requiring Department including the reason that procurement could not be accomplished.

208.7008–4 Number of copies of MIPRs with attachments to be submitted.

Unless otherwise agreed by the Departments, the original and six copies of each MIPR, all complete with attachments, shall be forwarded to the Procuring Department. When copies of specifications, drawings or other data are to be furnished with MIPRs (see 208.7006–5), the number of copies of such data to be furnished shall be as agreed upon by the Requiring and Procuring Departments.

208.7008–5 Changes to MIPRs.

(a) Normally, changes that affect the contents of the MIPR must be processed as a MIPR amendment regardless of the status of the MIPR. However, a MIPR amendment for increased quantities of items specified in the original MIPR may be used when it is known that the original MIPR requirements have not been released for solicitation but then only after coordination and agreement with the Procuring Department. Changes may be initially provided by expeditious means such as telegraphic message but shall be confirmed by a MIPR amendment. Requirements for additional line items of supplies or services not provided for in the original MIPR shall be submitted as a new MIPR.

(b) Only those items of the DD Form 448 that are applicable to the change, revision, etc., being written, which vary or deviate from the data shown on the basic MIPR or prior amendment thereto will be filled out. All other items will have "n/c" inserted to reflect no change. However, basic information in items 1 through 8 must always be shown.

(c) A MIPR amendment is not required for change of a disbursing office set forth on a DoD funded MIPR when the resultant contract is assigned for contract administration to a Defense Contract Administrative Services Region. Such change may be made by the DCASR by issuance of an administrative change order; copies of which will be provided to the PCO for transmittal to the requiring activity.

208.7008–6 Requests for additional funds.

When the Procuring Department requires additional funds to complete procurement actions for the Requiring Department, the request for additional funds must identify the exact items involved and the reason why additional funds are required. The Requiring Department shall take expeditious action to provide such funds by an amendment to the MIPR or to reduce requirements accordingly. In case of any anticipated delay in furnishing required additional funds, the Procuring Department will be advised accordingly.

208.7009 Acceptance of MIPR.

As soon as practicable, but not later than 30 days after receipt of a MIPR, the Procuring Department shall formally accept the MIPR by DD Form 448–2, "Acceptance of MIPR." If this time limit cannot be met, the Requiring Department shall be informed of the reason for the delay and the anticipated date the MIPR will be accepted. In any event, Category I MIPRs must be accepted in writing by the Procuring Department prior to the expiration of funds cited. When accepted for reimbursable procurement, the executed DD Form 448–2 is the authority for the Requiring Department to record the obligation of funds. When accepted for direct citation procurement, the accomplished date and a conformed copy of the contract will be the authority to record the obligation. The accepting activity of the Procuring Department shall remain responsible for the MIPR even though that activity may split the MIPR into segments for actions among other procurement activites.

208.7009–1 Qualified acceptance.

Where contingencies, price revisions or variations in quantities are anticipated by the Procuring Department under reimbursable procurement, the acceptance will be so annotated on DD Form 448–2. When the acceptance is qualified, the Procuring Department will periodically advise the Requiring Department prior to submission of billings, of any changes in the acceptance figure so that an amendment to the MIPR may be issued by the Requiring Department and the appropriate adjustment may be made to the recorded obligation to reflect the current price.

208.7009–2 Non-Qualified acceptance.

If the acceptance of a MIPR is not qualified by the Procuring Department for anticipated contingencies under reimbursable procurement, the price on the acceptance will be final and will be billed at time of delivery.

208.7009–3 Preparation and use of DD Form 448–2 (acceptance of MIPR).

(a) DD Form 448–2 is substantially self-explanatory; however, certain details are defined below. Only pertinent items should be accomplished.

(1) Check the specific terms in Item 6 under which the MIPR is being accepted (see 208.7007–3).

(2) If any one of the MIPR line items is not accepted, Item 7 will be checked and the affected MIPR line item number and reason recorded in Item 13.

(3) Items 8 and 9 will be used only:

(i) When Item 6c acceptance is indicated, (identify the MIPR line item numbers that will be provided under each method of financing in numbers that will be provided under each method of financing in Items 8a and 9a respectively); or

(ii) If quantities or estimated costs cited in a MIPR require adjustment (the affected MIPR line item numbers will be listed together with the adjusted quantities or estimated costs in the columns provided under Items 8 and 9 as may be appropriate).

(4) Whenever a MIPR is accepted in part or in total under Category II (direct citation) method of financing, the Procuring Department will forecast in Item 10 the approximate date that contractual placement is expected to be accomplished.

(5) Enter the total amount of funds in Item 11 required by the Procuring Department to fund the MIPR items, as accepted.

(6) Complete Item 12 only in those cases where the amount recorded in Item 11 is not in agreement with the amount recorded in Item 5. This will serve either as (i) request on the Requiring Department to issue a MIPR amendment to provide the additional funds required, or (ii) authority for the Requiring Department to withdraw the available excess funds. When funds of two or more appropriations are involved, proper breakdown information will be provided in Item 13.

(7) Item 13 will be used to record (i) justification, by MIPR line item, for any additional funds required; (ii) explanation for rejection of MIPR whether in part or in total; (iii) appropriation and subhead data cited on the MIPR; and (iv) such other data as may be pertinent.

(b) DD Form 448–2 shall be executed for all MIPR amendments involving an adjustment of funds or delivery schedule, and in all other cases only when requested by the Requiring Department.

(c) The Requiring Department will be furnished four copies (one signed) of each accomplished DD Form 448–2 unless otherwise agreed between the Departments.

208.7009–4 Withdrawal of funds.

(a) When the Procuring Department accepts a MIPR for reimbursable procurement in a lesser amount than authorized on the MIPR, the DD Form 448–2 is the authorization for the Requiring Department to withdraw such excess funds by MIPR amendment. Upon receipt of the final billing (SF 1080) and a subsequent determination that all items requested on the MIPR have been delivered and billed in an amount less than the MIPR, the Requiring Department may adjust their fiscal records accordingly without authorization from or notice to the Procuring Department.

(b) When the Procuring Department has accepted a MIPR for direct citation procurement, and initial contract placement is completed, any unused funds remaining on the MIPR become excess and are no longer authorized for use of the Procuring Department. Any such excess funds will be immediately reported to the Requiring Department. Although the Procuring Department is prohibited from further use of such excess funds, the Requiring Department will confirm the withdrawal of excess funds by the issuance of a MIPR amendment.

208.7010 Components of end items.

208.7010–1 Contractor-furnished components.

In the procurement of end items where the contractor normally secures all components thereof from his own source (not Government-furnished), the procurement assignment does not apply to the component items required by such contractor.

208.7010–2 Government-furnished components.

In the procurement of end items where the Government furnishes components which are covered by a procurement assignment, such components shall be procured in accordance with the procurement assignment. However, direct purchase may be made by a Requiring Department in exceptional cases where agreement is reached with the Procuring Department or is authorized in accordance with subpart 208.71.

208.7010–3 Purchase of components over and above those initially purchased with the end item.

The procurement of components covered by a procurement assignment, over and above those initially purchased with the end item, shall be effected in accordance with the procurement assignment. However, direct purchase may be made by a Requiring Department in exceptional cases where agreement is reached with the Procuring Department or is authorized in accordance with 208.7100.

208.7011 Distribution of contracts and order. (See 204.201(c)(3)).

208.7012 Cancellation of requirements.

(a) *Direct citation procurement.* When all or any part of the supplies or services requested in the MIPR are to be canceled by the Requiring Department, that Department shall so notify the Procuring Department by telegraphic notice. In the event that the Procuring Department has not entered into a contract for the supplies and services to be canceled, the Requiring Department shall be immediately notified to that effect. Upon receipt of such notification, the Requiring Department shall initiate a MIPR amendment to revoke the estimated amount shown on the original MIPR for the canceled items.

(1) In the event that the items to be canceled have already been placed under contract, the following procedures will apply. As soon as practicable but in any event within 45 days after receipt of the notice of cancellation from the Requiring Department, the Procuring Contracting Officer shall issue a Termination Data Letter to the Requiring Department (original and 4 copies) which will contain as a minimum the information set forth below.

SUBJECT: Termination Data Re:
Contract No. _____
Termination No. _____
Contract _____
TO:

(a) As termination act is now in progress on the above contract, the following information is submitted:

(1) Brief description of items terminated.

(2) You are notified that the sum of $—— is available for release under the subject contract which sum represents the difference between $——, the value of items terminated under subject contract, and $—— estimated to be required for settlement of the terminated contract. The estimated amount available required for settlement of the terminated contract. The estimated amount available for release is allocated by the appropriations cited on the contract as follows:

MIPR NO. —— ACCOUNTING CLASSIFICATION —— AMOUNT

Total available for release at this time $——

(b) You are requested to forward an amendment to MIPR —— on DD Form 448 to reflect the reduced quantity and amount of funds available for release.

(c) Periodic examinations (not less than 60 days) will be made as termination proceedings progress to redetermine the Government's probable obligation.

_____

(Signature of Procuring Contracting Officer)

(2) Periodic examinations of the termination proceedings will be accomplished no less often than every 60 days by the termination contracting officer to reassess the Government's probable obligation. If any additional funds are excess to the probable settlement requirements, or if it appears that previous release of excess funds will result in a shortage of the amount which will be required to consummate settlement, prompt action will be taken

to notify the purchasing office, which will amend the Termination Data Letter accordingly. A MIPR amendment to reflect the reinstatement of funds shall be processed by the Requiring Department within 30 days after the amended Termination Data Letter requesting reinstatement of funds has been received from the purchasing office.

(3) If required, an amendment to the MIPR covering final removal of any remaining excess funds with respect to terminated quantities shall be prepared by the Requiring Department upon receipt of its copy of the Termination Settlement Agreement.

(b) *Reimbursable procurement.* When all or any part of the supplies or services requested in the MIPR are to be canceled by the Requiring Department, that Department shall notify the Procuring Department by telegraphic notice. Within 30 days, the Procuring Department shall notify the Requiring Department as to the quantity of items available for termination and the amount of funds in excess of the estimated settlement costs. Upon receipt of this information, the Requiring Department shall issue a MIPR amendment to reduce the quantities and funds accordingly.

(c) *Termination by default.* When the Procuring Department exercises authority to terminate for default (see FAR Part 49), that Department will query the Requiring Department as to whether the supplies or services to be terminated are still required so that repurchase action can be undertaken.

(1) The Requiring Department will not obligate funds on a contract terminated for default until such time as a contractual supplemental agreement of settlement or other written evidence from the Procuring Department as to release of funds is received.

(2) On the repurchase action, the Procuring Department will not exceed the unliquidated funds on the defaulted contract without the provisions of additional funds by the Requiring Department.

208.7013 Administrative costs.

The Procuring Department shall bear, without reimbursement therefor, the administrative costs incidental to its procurement of supplies for another Department. However, when a procurement responsibility is transferred from one Department to another Department, funds appropriated or to be appropriated for defraying the administrative costs of such procurement responsibility shall be made available to the successor Procuring Department which shall assume budget cognizance at the earliest possible date.

208.7014 Inspection.

Policies and procedures concerning inspection and acceptance for use in conjunction with this subpart are set forth in FAR Part 46 of this Regulation.

208.7015 Execution of contracts.

Generally, the Procuring Department shall execute a single contract where an award embodying the requirements of more than one Department is made to a single contractor.

208.7016 Status reporting.

(a) The Procuring Department shall maintain an appropriate system of MIPR followup so that the Requiring Department may be informed of the current status of their requests. In addition, an appropriate system of followup shall be maintained by the contract administration office so that the Procuring Department may be currently informed as to contractor performance and in turn to insure that the Requiring Department is apprised of the status of contracts resulting from MIPRs.

(b) If requested by the Requiring Department, the Procuring Department will furnish the Requiring Department a copy of the solicitation document for materiel management status information when the request is satisfied through the use of direct citation of funds (Category II Method of Funding).

(c) Any reimbursement billings, shipping documents, contractual documents, project orders or related documentation furnished to the Requiring Department will identify the Requiring Department's MIPR number, quantities of items, and funds covered thereby.

208.7017 Transportation of supplies.

The Requiring Department is responsible for advising the Procuring Department or the Transportation Officer in the Contract Administration Office, as appropriate, the appropriate fund account chargeable for transportation costs in effecting delivery of supplies at Government expense. The Requiring Department shall accomplish this by either citing the fund account on each MIPR or providing the appropriate fund account to the Transportation Officer of the office administering the contract, at the commencement of each fiscal year, for citation on the Government bill of lading. In every instance, the Government bill of lading, which is generally issued by the Transportation Officer in the responsible Contract Administration Office, shall show the Requiring Department as the Department to be billed, and the appropriate fund account designated by that Department.

208.7018 Procurement agreements.

(a) This paragraph establishes policy as authorized in 10 U.S.C. 2308 with regard to agreements between the Departments or other agencies for procurement of commodities or services not assigned in accordance with 208.71.

(b) 10 U.S.C. 2308 provides that Department Heads by agreement may make assignments and delegations of procurement responsibilities from one Department to another or may create joint or combined offices to exercise procurement functions and responsibilities.

(c) Agreements may be made on either a one-time basis or a continuing basis. The submission of a MIPR by a requiring activity and its acceptance by the purchasing activity of another Department, even though based on oral communication, shall establish a one-time agreement. Delegated procurement responsibilities of a continuing nature shall be considered for coordinated procurement assignment. However, all agreements of a continuing nature shall be formalized, implemented, and distributed among the activities concerned even though not considered suitable for coordinated procurement assignment.

Subpart 208.71—Commodity Assignments

208.7100 Assignment authority.

The commodity assignments set forth below have been made by the Deputy Under Secretary of Defense for Acquisition Management to the Military Departments. Also included are assignments to the General Services Administration made by the Deputy Under Secretary of Defense for Acquisition Management in accordance with DoD/GSA Agreements. The letter "P" appearing after an FSC Code indicates a partial FSC assignment. There may be specific items within any of the assignments which have been designated for DoD Integrated Materiel Management to other than the coordinated procurement assignee. Such items will be purchased by the DoD Integrated Materiel Manager.

208.7100–1 Exclusions—Military Department assignments (Except DLA).

General exclusions to applicability of commodity assignments made to a Military Department (except Defense Logistics Agency) are:

(a) Emergency procurements, as determined by the Requiring Department;

(b) Procurements not in excess of $2,500 per line item;

(c) Procurements of items authorized for local purchase; pursuant to mutual agreement between the assignee and the other users;

(d) Items in a research and development stage; and

(e) Item subject to rapid design changes, or to continuous redesign or modification during the production or operational use phases which necessitate continual contact between industry and technical personnel of the requiring service to insure that the item procured is exactly that which is required.

208.7100–2 Exclusions—DLA and GSA assignments.

(a) *Optional Exclusions.* With respect to commodity assignments made to the Defense Logistics Agency or the General Services Administration, the following categories of service-managed items within an assigned class may be purchased by the Departments of the Army, Navy, or Air Force at their option:

(1) Items in a research and development stage—This exception permits the Military Departments to contract for research and development requirements, including quantities for testing purposes and items undergoing in-service evaluation (not yet in actual production, but beyond prototype). The term "research and development" as used herein relates only to procurements described in FAR Part 35. Generally, this exception can be used only when the procurement is covered by research and development funds; and

(2) Items peculiar to Nuclear Ordnance Materiel, because of design characteristics or because of test-inspection requirements which are controlled by the Department of Energy (DOE) or by the DoD to insure reliability of nuclear weapons.

(i) This exception applies to all items designed for and peculiar to nuclear ordnance regardless of Agency control, or to any item which requires test or inspection conducted or controlled by DOE or DoD. The Defense Nuclear Agency will have DoD procurement responsibility for all items assigned for integrated management in accordance with DoD Directive 5105.31.

(ii) This exception does not cover items used for both nuclear ordnance and other purposes if such items are not subject to the special testing procedures.

(3) Items to be procured under the authority of a Determination and Findings issued pursuant to 10 U.S.C. 2304(a)(12) and FAR 15.212, Classified Purchases (i.e., purchases or contracts classified "Confidential" or higher, or where because of other considerations, a contract should not be publicly disclosed);

(4) Items to be procured under the authority of a Determination and Findings issued pursuant to 10 U.S.C. 2304(a)(14) and FAR 15.216, Technical or Specialized Supplies, Requiring Substantial Initial Investment or Extended Period of Preparation For Manufacture; and

(5) Items which are directly related to a weapon/defense/space system and which are design-controlled by, and procured from either the system manufacturer or a manufacturer of a major subsystem thereof;

(i) This exception is intended to cover a specific and relatively small portion of "weapon/defense/space system" related items. An exempted item must meet two conditions. First, it must be directly related to the weapon system. Secondly, it must be both design controlled and procured from the system or major subsystem contractor.

(ii) The exception is intended, for example, to permit a Service to contract for an item which it procures from an airframe manufacturer (as sole source), provided the airframe manufacturer is responsible for the design of the item. It would likewise pertain to a component of a Government-furnished engine to be installed in the airframe, if the Service procures the component from the engine manufacturer and the engine manufacturer has design cognizance of the item.

(iii) The exception is not intended to cover the broad category of weapons related items but only that portion which is both procured from and design controlled by the system or major subsystem contractor.

(6) Items subject to rapid design changes or to continuous redesign or modification during the production and/or operational use phases which necessitate continual contact between industry and technical personnel of the Requiring Department to insure that the item procured is exactly what is required.

(i) This exception permits the Military Departments to contract for items of highly unstable design. Its use must be predicated on a determination that it is clearly impractical, both from a technical and contracting viewpoint, to refer the procurement to DLA or GSA. Thus, the possibility of a number of design changes occurring during the course of the contract is not in itself sufficient evidence for retention of the procurement. Neither is the fact that a procurement would possibly qualify for placement as a negotiated contract. Conversely, a procurement for an item covered by a reasonably firm specification which can be placed under the formal advertised procedure is prima facie evidence that the use of the exception is not valid.

(ii) This exception also applies to items requiring compatibility testing as a contract requirement, provided that such testing requires continual contact between industry and technical personnel of the Requiring Department.

(7) Containers procured only with items for which they are designed; and

(8) Emergency procurements, as determined by the Requiring Department:

(i) This exception permits the Services to make emergency procurements (valued at over $2,500) in the context of 208.7003–4 when the exigencies of the situation will not permit the delay incident to follow the normal channels of coordinated procurement.

(ii) As a general rule, this exception should cover items only when they are readily available from commercial inventories or in current production. It should not be used with extended production leadtime.

(iii) Unless the item is immediately available from a commercial source, emergency procurements should be coordinated with the cognizant DLA Center or GSA Support Region by telephone or other rapid communication prior to proceeding with the local procurement. This will serve the interests of the Requiring Department for the following reasons:

(A) The need may be satisfied immediately by diversion from a current DLA or GSA contract;

(B) The Center or the GSA Support Region may arrange to satisfy the requirement from other Military Department stocks or DLA/GSA stocks recently delivered under a DLA or GSA contract; and

(C) The Center or GSA Support Region may be able to "add on" to an existing DLA or GSA contract and obtain the material faster than the Requiring Department could by a unilateral procurement.

(9) Procurements of military service-managed or noncataloged items not in excess of $2,500 per line item—This exception permits the Military Departments to procure a line item which does not exceed a value of $2,500. It does not apply to a line item valued at $2,500 or under which is included in a Federal Supply Schedule mandatory for use by DoD activities; and

(10) Noncatalog items in the nature of a one-time buy and not contemplated as an item in the supply system:

(i) This exception is intended to permit the Military Departments to contract for a nonrecurring requirement for a noncataloged item. "Not contemplated as an item in the supply system" as a practical matter means that the item is not in the supply system nor is such anticipated. This exception could cover a part or component for a prototype and such part or component may be stock numbered at a later date.

(ii) This exception may not be used to cover purchases of recurring requirements for an item based solely on the fact that the item is not stock numbered nor may it be used to purchase items which have only slightly different characteristics from previously cataloged items.

(b) *Defense Logistics Agency and General Services Administration responsibility to procure excluded items upon request.* Items other than nuclear ordnance materiel which may be purchased by the other Military Departments at their option under (a) above shall be procured by DLA or GSA at the requests of the Military Departments.

(c) *Exclusions to Defense Logistics Agency or General Services Administation assignments by agreement.* The Military Departments shall process to the appropriate DLA center or GSA Support Region for procurement those service-managed items which do not meet the exception criteria set forth in (a) above, unless by mutual agreement between the cognizant Military Service Inventory Manager and the DLA Center concerned, or the GSA Support Region, the item is determined to be most satisfactorily procured on a Military Service basis. The Military Departments shall insure that subsequent procurements of items previously classified as exceptions under (a) above do in fact continue to meet the exception criteria at the time of the subsequent procurement. Otherwise, such procurements shall be forwarded to DLA or GSA for purchase.

(d) *Exclusions for local purchase of integrated materiel managed items.* Requiring Departments may purchase at their option any DLA or GSA centrally managed, commercially available item provided:

(1) In the case of an emergency requirement, such as a work stoppage, the purchase action is limited to immediate-use quantity, or

(2) In the case of routine requirements, the total line item value does not exceed $10.00 and local purchase is determined to be the most economical method of supply.

208.7101 Department of the Army.

Federal Supply Class Code and Commodity

FSC ("P" after the FSC number indicates a partial FSC assignment).

Electronic Equipment.

Each Department is assigned procurement responsibility for those items which the Department either designed or for which it sponsored development. See FSC 5821 under Navy listings for assignment of certain commercially developed radio sets (*i.e.*, developed without the use of government funds).

1005 P* Guns, through 30mm. This partial FSC assignment applies to guns, through 30mm, and parts and equipment therefor, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type guns; MK 11 and MK 12, 20mm gun; and aircraft gun mounts.

1010 P* Guns, over 30mm, up to 75mm. This partial FSC assignment applies to guns, over 30mm and up to 75mm, and parts and equipment therefor, as listed in Department of the Army Supply Manuals/Catalogs. It does not apply to naval ordnance type guns and aircraft gun mounts.

1015 P* Guns, 75mm through 125mm. This partial FSC assignment applies to guns, 75mm through 125mm, and parts and equipment therefor, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type guns.

1020 P* Guns over 125mm through 150mm.

1025 P* Guns over 150mm through 200mm.

1030 P* Guns over 200mm through 300mm.

1035 P* Guns over 300mm. These partial FSC assignments apply to guns, over 125mm, and parts and equipment therefor, as listed in Department of Army Supply Manuals/Catalogs. They do not apply to naval ordnance type guns.

1040 Chemical Weapons and Equipment.

1055 P* Launchers, Rocket and Pyrotechnic. This partial FSC assignment applies to launchers, rocket and pyrotechnic, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type and airborne type, with the exception of 2.75 inch Rocket Launchers which are included in this partial FSC assignment to the Department of the Army.

1090 P Assemblies Interchangeable Between Weapons in Two or More Classes. This partial FSC assignment applies to the following items:

National Stock Number Nomenclature

1090–563–7232 Staff Section, Class.

1090–699–0633 Staff Section.

1090–796–8760 Power Supply.

1090–885–8451 Wrench Corrector.

1090–986–9707 Reticle Assembly.

1095 P* Miscellaneous Weapons. This partial FSC assignment applies to miscellaneous weapons, and parts and equipment therefor, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type; line throwing guns (which are under DoD Coordinated Procurement assignment to the Department of the Navy); and aircraft type miscellaneous weapons.

1210 P* Fire Control Directors.

1220 P* Fire Control Computing Sights and Devices.

1230 P* Fire Control Systems, Complete.

1240 P* Optical Sighting and Ranging Equipment.

1250 P* Fire Control Stabilizing Mechanisms.

1260 P* Fire Control Designating and Indicating Equipment.

1265 P* Fire Control Transmitting and Receiving Equipment, Except Airborne.

1285 P* Fire Control Radar Equipment, Except Airborne.

1290 P* Miscellaneous Fire Control Equipment. The above nine partial FSC assignments apply to fire control equipment, as listed in Department of the Army Supply Maunals/Catalogs. They do not apply to naval ordnance type and aircraft type.

1305 P* Ammunition, through 30mm. This partial FSC assignment applies to ammunition through 30mm as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type and ammunition for the MK 11 and MK 12, 20 mm gun.

1310 P* Ammunition, over 30mm up to 75 mm. This partial FSC assignment applies to ammunition, over 30mm up to 75mm, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type and to 40mm ammunition (which is under DoD procurement assignment to the Navy.) The Army is responsible for the procurement of fillers and the loading, assembling and packing of toxicological, incapacitating riot control, smoke and incendiary munitions.

1315 P* Ammunition 75mm through 125mm. This partial FSC assignment applies to ammunition, 75mm through 125mm, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type. The Army is responsible for the procurement of fillers and the loading, assembling and packing of toxicological, incapacitating riot control, smoke and incendiary munitions.

1320 P* Ammmunition, over 125mm. This partial FSC assignment applies to ammunition over 125mm, as listed in Department of Army Supply Manuals/Catalogs. It does not apply to naval ordnance type. The Army is responsible for the procurement of fillers and the loading, assembling and packing of toxicological, incapacitating riot control, smoke and incendiary munitions.

1325 P* Bombs. This partial FSC assignment applies to Bombs as listed in Department of Army Supply Manuals/Catalogs. It does not apply to Navy assigned Bombs as shown in list of assignments to the Navy; however, the Department of the Army is responsible for the procurement of fillers and the loading, assembling and

packing of toxicological, incapacitating riot control, smoke and incendiary munitions, and for other loading, assembling and packing in excess of Navy owned capacity.

1330 Grenades.

1340P Rockets and Rocket Ammunition. This partial FSC assignment applies to:
66mm Rocket, HEAT, M72.
2.75 Rocket FFAR, Service and Practice.
Heads MK5 and Mods (HEAT).
HE, M151.
HE, XM229 (17 lb Warhead).
HE, XM157 (Spotting Red).
HE, XM158 (Spotting Yellow).
MK61 Practice (5 lb Slug).
XM230 Practice (10 lb).
Motors MK4 and Mods (High Performance Aircraft).
MK40 and Mods (Low Performance Aircraft).
3.5 In. Rocket Heat, M35.
Practice, M36.
Smoke, WP M30.
4.5 In. Motor, Drill, M24.
HE, M32.
Practice, M33. Incendiary and toxicological rockets, as listed in Army Supply Bulletins.
It does not apply to Navy assigned rockets as shown in list of assignments to the Navy. However, the Department of the Army is responsible for procurement of filler and for filling of all smoke and toxicological rockets.

1345 Land Mines.

1365 Military Chemical Agents.

1370 P Pyrotechnics. This partial FSC assignment does not apply to shipboard and aircraft pyrotechnics.

1375 P Demolition Materials. This partial FSC assignment is applicable to Blasting Agents and supplies such as:
Bangalore torpedo.
Blocks, demolition.
Caps, blasting, electric and nonelectric:
Charge, cratering.
Charge, shaped and demolition.
Chests, demolition platoon and squad.
Cord detonating.
Demolition equipment sets, with ancillary items.
Detonators, all types.
Dynamite.
Firing Devices.
Fuze, safety.
Kit, demolition.
Lighter, fuse.
Machine blasting.
Primer, percussion cap.
It does not apply to Navy underwater demolition requirements.

1376 P Bulk Explosives. This partial FSC assignment is applicable to solid propellants and explosives such as:
Ammonium Picrate (Explosive D) JAN–A–166A.
Trinitrotoluene (TNT) MIL–T–248A.
Tetryl JAN–T–339.
Pantacrythrite Tetranitrate (PETN) JAN–P–387.
RDX.
Composition B.
Composition B–3.
Pentolite, 50.
Composition C–3.
Composition A–3.
Composition A–4.
Nitroguanidine (Picrate).
It does not apply to production capacity for any of the above listed explosives at the U.S. Naval Propellant Plant, Indian Head, Maryland.

1377 P Cartridge and Propellant Actuated Devices and Components. This partial FSC assignment is applicable to the following devices;
(Reserved pending Services agreement as to items which shall be included in this assignment.)

1380 Military Biological Agents.

1390 P* Fuzes and Primers. This partial FSC assignment applies to Fuzes and Primers for Army assigned ammunition.
It does not apply to naval ordnance type, which is under DoD procurement assignment to the Department of the Navy; and guided missile fuzes.

2210 Locomotives.

2220 Rail Cars.

2240 Locomotive and Rail Car Accessories and Components.

2250 Track Materials, Railroad.

2310 P Passenger Motor Vehicles.

2320 P Trucks and Truck Tractors. The above two partial Federal Supply Class Assignments apply to tactical vehicles; trucks over 10,000 pounds Gross Vehicle Weight (GVW); and the following types of vehicles:
Bus, convertible to ambulance;
Truck, 4 x 4, convertible to ambulance;
Truck, 4 x 4, dump, 9,000 GVW, with cut-down cab.
These assignments do not apply to tracked landing vehicles which are not under DoD Coordinated Procurement assignment, and airport crash rescue vehicles, which are under DoD Coordinated Procurement assignment to the Department of the Air Force. With the exception of the types enumerated above, these assignments do not apply to commercial passenger carrying vehicles and trucks up to 10,000 pounds GVW, which are assigned for DoD Coordinated Procurement to the General Services Administration.

2330 P Trailers. This partial FSC assignment does not apply to two wheel lubrication trailers, two wheel steam cleaning trailers, and troop transporter semitrailers which are not under DoD Coordinated Procurement assignment, and airport crash rescue trailer units which are under DoD Coordinated Procurement assignment to the Department of the Air Force.

2340 P Motorcycles, Motor Scooters, and Bicycles. This partial FSC assignment does not apply to bicycles and tricycles.

2350 Tanks and Self-propelled Weapons.

2430 Tractors, Track Laying, High Speed.

2510 P** Vehicular Cab, Body, and Frame Structural Components.

2520 P** Vehicular Power Transmission Components.

2530 P** Vehicular Brake, Steering, Axle, Wheel, and Track Components.

2540 P** Vehicular Furniture and Accessories.

2590 P** Miscellaneous Vehicular Components.

2610 Tires and Tubes, Pneumatic, except Aircraft.

2630 Tires, solid and cushion.

2640 Tire Rebuilding and Tire and Tube Repair Materials.

2805 P** Gasoline Reciprocating Engines, except Aircraft; and Components.

2910 P** Engine Fuel System Components, Nonaircraft.

2920 P** Engine Electrical System Components, Nonaircraft.

2930 P** Engine Cooling System Components, Nonaircraft.

2940 P** Engine Air and Oil Filters, Strainers and Cleaners, Nonaircraft.

2990 P** Miscellaneous Engine Accessories, Nonaircraft.

4210 P Fire Fighting Equipment. This partial FSC assignment applies only to equipment developed by or under the sponsorship of the Department of the Army.

4230 P Decontaminating and Impregnating Equipment. This partial FSC assignment applies only to items peculiar to chemical warfare.

4240 P Safety and Rescue Equipment. This partial FSC assignment applies only to military respiratory protective equipment for chemical warfare.

5805 P Telephone and Telegraph Equipment. This partial FSC assignment applies only to military (wire) equipment, field type.

5815 P Teletype and Facsimile Equipment. This partial FSC assignment applies only to military (wire) equipment, field type.

5820 P Radio and Television Communication Equipment, except Airborne. This partial FSC assignment applies to non-tactical, off-the-shelf, commercially available radio and television equipment and supplies used by the Armed Forces Radio and Television Stations including equipment and supplies used by the Armed Forces for closed TV circuit educational and training programs.

5830 P Intercommunication and Public Address Systems: Except Airborne. This partial FSC assignment applies only to military (wire) equipment, field type.

6135 P Batteries, Primary. This partial FSC assignment applies to MIL type, dry cell batteries, only.

6625 P Electrical and Electronic Properties Measuring and Testing Instruments. This partial FSC assignment applies only to instruments for testing military (wire) equipment, field type.

6645 P Time Measuring Instruments. This partial FSC assignment applies to the following watches; aircraft instrument panel clocks; cases and spare parts therefore: Master navigation watches; pocket watches; stop watches; second setting wrist watches; wrist watches; athletic timers; aircraft clocks; aircraft panel clocks; mechanical aircraft clocks; navigation watch cases; pocket watch cases; watch holders; watch case assemblies and watch movements.

6660 P Meteorological Instruments and Apparatus. Each Department is assigned procurement responsibility for those systems, instruments and end items in

FSC 6660 for which the Department either designed or for which it sponsored development. For purposes of this assignment, the developing Department is the department which awarded the developmental contract, notwithstanding that other Departments may have provided funds for the development.

6665 P Hazard-Detecting Instruments and Apparatus. This partial FSC assignment applies only to items peculiar to chemical warfare.

6695 P Combination and Miscellaneous Instruments. This partial FSC assignment applies to jewel bearings only.

6820 P Dyes. This partial FSC assignment applies only to items peculiar to chemical warfare.

6910 P Training Aids. This partial FSC assignment applies only to items peculiar to Army assignments under weapons, fire control equipment, ammunition and explosives and chemical and biological warfare.

6920 P Armament Training Devices. This partial FSC assignment applies to armament training devices as listed in DA Catalogs SC 6910, ML/IL and SC 6920 ML/IL. It does not apply to clay pigeons in DA Catalogs SC 6910, ML/IL and SC 6920 ML/IL. It not apply to clay pigeons.

6940 P Communication Training Devices. This partial FSC assignment applies only to code training sets, code practice equipment, and other telephone and telegraph training devices.

8130 P Reels and Spools. This partial FSC assignment applies only to reels and spools for military (wire) equipment, field type.

8140 P Ammunition Boxes, Packages, and Special Containers. This partial FSC assignment applies only to boxes, packages and containers peculiar to Army assignments under ammunitions, explosives, and chemical and biological warfare as listed in DA Catalog SC 8140 IL and SC 8140 ML.

* For purposes of procurement. Naval Ordnance comprises all arms, armor, and armament for the Department of the Navy and includes all offensive and defensive weapons, together with their components, controlling devices and ammunition used in executing the Navy's mission in National Defense (except small arms and those items of aviation ordnance procured from the Army).

** This partial FSC assignment apply only to repair parts peculiar to combat and tactical vehicles. In addition, the assignment in FSC–2805 applies to military standard engines 1.5 HP through 20 HP and parts peculiar therefor. Balance of these Federal Supply Classes are assigned to the Defense Supply Agency (Defense Construction Supply Center).

206.7102 Department of the Navy.

Federal Supply Class Code and Commodity

FSC ("P" after the FSC number indicates a partial FSC assignment.).

Electronic Equipment.

Each Department is assigned procurement responsibility for those items which the Department either designed or for which it sponsored development. See FSC 5821 for assignment of certain commercially developed radio sets to the Department of the Navy (i.e., developed without the use of government funds.).

1095 P Miscellaneous Weapons. This partial FSC assignment applies to line throwing guns only.

1310 P Ammunition, over 30mm up to 75mm. This partial FSC assignment applies only to reels and spools for military.

1325 P Bombs. This partial FSC assignment applies to armor-piercing; depth bombs; externally suspended low drag bombs; and components and practice bombs therefor, as listed in Ord Pamphlets, and the MK 43, Target Detecting Device. With respect to this assignment the Department of the Army is responsible for the procurement of fillers and the loading, assembling and packing of toxicological, incapacitating riot control-smoke and incendiary munitions and for other loading, assembling and packing in excess of Navy-owned capacity.

1340 P Rockets and Rocket Ammunition. This partial FSC assignment applies to:

Fuze, Rocket, V.T., MK93–0.

2.25 In. Rocket SCAR, Practice.
Heads MK3 and Mods.
Motors MK15 and Mods.
MK16 and Mods.

5 In. Rocket HVAR, service and practice.
Heads MK2 and Mods (common) MK6 and Mods (GP).
MK4 and Mods (smoke) MK25 and Mods (ATAR).
Motors MK10 and Mods.

5 In. Rocket FFAR service and practice.
Heads MK24 and Mods (General Purposes).
MK32 and Mods (Shaped Charged).
MK26 and Mods (Illum).
Motor MK16 and Mods.

With respect to this assignment the Department of the Army is responsible for procurement of filler and for filling of all smoke and toxicological rockets.

1390 P Fuzes and Primers. This partial FSC assignment applies to fuzes and primers for Navy assigned ammunition.

1550 P Drones. This partial FSC assignment applies only to Drone, Model BQM34E.

1905 P Combat Ships and Landing Vessels. This partial FSC assignment applies to landing vessels only.

1910 P Transport Vessels, Passenger and Troop. This partial FSC assignment applies to ferryboats only.

1920 Fishing Vessels.

1925 Special Service Vessels.

1930 Barges and Lighters, Cargo.

1935 P Barges and Lighters, Special Purpose. This partial FSC assignment does not apply to Derricks, Pile Drivers, Rock Cutters, Concrete Mixing Plants, Mechanical Bank Grader Barges, Other Bank Revetment Barges, and Barge Power Plans.

1940 Small Craft.

1945 P Pontoons and Floating Docks. This partial FSC assignment applies only to Naval Facilities Engineering Command Type Pontoons.

1950 Floating Drydocks.

1990 P Miscellaneous Vessels. This partial FSC assignment applies to commercial sailing vessels only.

2010 Ship and Boat Propulsion Components.

2020 Rigging and Rigging Gear.

2030 Deck Machinery.

2040 Marine Hardware and Hull Items.

2060 Commercial Fishing Equipment.

2090 Miscellaneous Ship and Marine Equipment.

2820 P Steam Engines, Reciprocating, and Components. This partial FSC assignment applies to Marine Main Propulsion Steam Engines only.

2825 P Steam Turbines and Components. This partial FSC assignment applies to Marine Steam Turbines only.

4210 P Fire Fighting Equipment. This partial FSC assignment applies only to fire fighting equipment developed by or under the sponsorship of the Department of Navy.

4410 P Industrial Boilers. This partial FSC assignment applies only to Boilers for use aboard those ships assigned to the Navy for coordinated procurement.

4420 P Heat Exchangers and Steam Condensers. This partial FSC assignment applies only to Heat Exchangers for use aboard those ships assigned to the Navy for coordinated procurements.

4925 P Ammunition Maintenance and Repair Shop Specialized Equipment. This partial FSC assignment applies to sets, kits and outfits of tools and equipment for explosive ordnance as defined in pertinent Military Service regulations and documents.

5821 P Radio and Television Communication Equipment, Airborne. This partial FSC assignment applies only to the following commercially developed radio sets. (The term "commercially developed" means that no government funds were provided for development purposes.) HF–101, 102, 103, 104, 105, 106, 107, 108, 109, 111, 113; ARC–94, 102, 105, 110, 112, 119, 120; MRC–95, 108; VC–102, 104, 105, 108, 109, 110, and components of the foregoing including the 490T antenna coupler.

6125 P Converters, Electrical, Rotating. This partial FSC assignment applies only to Motor-Generator Sets for use aboard ships assigned to the Navy for coordinated procurement.

6320 P Shipboard Alarm and Signal System. This partial FSC assignment applies only to Alarm Systems; Fire Alarm Systems; Indicating Systems; Telegraph Systems (Signal and Signaling) (Less Electronic Type) for use aboard ships assigned to the Navy coordinated procurement.

6605 P Navigational Instruments. This partial FSC assignment applies only to lifeboat and raft compasses; aircraft sextants; Hand Leads (Soundings); Lead Reels; Sounding Machines and Pelorus Stands for use aboard ships assigned to the Navy for coordinated procurement.

6645 P Time Measuring Instruments. This partial FSC assignment applies to the following instruments, cases and spare parts therefor:

Chronometers including gimbal, padded and make break circuit.
Clocks, Alarm; boat; deck; direct reading; electrical; floor; interval timer; marine; mechanical; master control; master program; master regulating; mechanical message center; nurses; program; shelf; stop; wall; watchman's.
Counters, time period.
Meters; engine running time; hour recording; and electrical time totalizing.
Timers; bombing; engine hours; sequential; stop; and program.
Program control instrument.
Cases; chronometer, including gimbal and padded; chronometer carrying; makebreak circuit chronometer.
Cans; chronometer shipping and storage.
Clock keys; clock movements; clock motors.

6650 P Optical Instruments. This partial FSC assignment applies only to Stands, telescope, for use aboard ships assigned to the Navy for coordinated procurement.

6660 P Meterological Instruments and Apparatus. Each Department is assigned procurement responsibility for those systems, instruments and end items in FSC 6660 for which the Department either designed or for which it sponsored development. For purposes of this assignment, the developing Department is the department which awarded the developmental contract, notwithstanding that other Departments may have provided funds for the develoment.

6665 P Hazard-Detecting Instruments and Apparatus. This partial FSC assignment applies only to Hazard Determining Safety Devices, for use aboard ships assigned to the Navy for coordinated procurement.

8140 P Ammunition Boxes, Packages, and Special Containers. This partial FSC assignment applies only to boxes, packages and containers for 40mm ammunition.

208.7103 Department of the Air Force.

Federal Supply Class Code and Commodity

FCS ("P" after the FSC number indicates a partial FSC assignment).
Electronic Equipment.
Each Department is assigned procurement responsibility for those items which the Department either designed or for which it sponsored development. See FSC 5821 under Navy listing for assignment of certain commercially developed radio sets (*i.e.*, developed without the use of government funds).

1550 P Drones. This partial assignment applies only to the following model drones: Model 147; Model 154; BQM 34A and MQM 34D.

2320 P Trucks and Truck Tractors. This partial FSC assignment applies only to Airport Crash Rescue Vehicles.

2330 P Trailers. This partial FSC assignment applies only to Airport Crash Rescue Trailer Units.

4210 P Fire Fighting Equipment. This partial FSC assignment applies only to fire fighting equipment developed by or under the sponsorship of the Department of the Air Force.

6660 P Meteorological Instruments and Apparatus. Each Department is assigned procurement responsibility for those systems, instruments and end items in FSC 6660 for which the Department either designed or for which it sponsored development. For purposes of this assignment the developing Department is the Department which awarded the developmental contract, notwithstanding that other Departments may have provided funds for the development.

6710 P * Cameras, Motion Picture. This partial FSC assignment does not apply to Submarine Periscope and Underwater Cameras.

6720 P * Cameras, Still Picture. This partial FSC assignment does not apply to Submarine Periscope and Underwater Cameras.

6730 P * Photographic Projection Equipment. This partial FSC assignment does not apply to 35 mm Theater Projectors.

6740 * Photographic Developing and Finishing Equipment.

6760 * Photographic Equipment and Accessories.

6780 * Photographic Sets, Kits, and Outfits.

8820 P Live Animals Not Raised For Food. This partial FSC assignment applies only to the following types of working dogs: scout, sentry, patrol, mine/tunnel, tracker, detector-narcotic/contraband, sledge, bloodhound, water dog and patrol/detector.

* This partial FSC assignment does not apply to Photographic Equipment controlled by the Congressional Joint Committee on Printing, and Micro-Film Equipment and Supplies.

9999	Miscellaneous Items	DGSC

[1] These assignments do not apply to items decentralized by the DLA Center Commander, i.e., designated for purchase by each Military Department, and to those items in DLA assigned Federal Supply Classes, which may be assigned to GSA for supply management. In addition, see 8.7100-2 which describes conditions under which a Military Service may purchase (contract for) Military Service supply managed items in DLA assigned Federal Supply Classes. See notes 2 and 3 below for further exceptions pertaining to certain DLA assignments.

[2] DLA assignments in FSC 2510, 2520, 2530, 2540, 2590, 2805, 2910, 2920, 2930, 2940 and 2990 do not apply to repair parts peculiar to combat and tactical vehicles, which are assigned for coordinated procurement to the Department of the Army. In addition, the assignment in FSC-2805 does not apply to military standard engines 1.5 HP through 20 HP and parts peculiar thereto, which are assigned for coordinated procurement to the Department of the Army.

[3] This partial FSC assignment in FSC 4210 does not apply to Fire Fighting Equipment developed by or under the sponsorship of a Military Department. The procurement responsibility for such equipment is assigned to the Department which developed or sponsored its development.

[4] The Defense Logistics Agency has procurement responsibility for all the items in the Classes of FS Group 65. In addition, DLA has procurement responsibility for all equipment and supplies related to the medical, dental, veterinary professions in Non-Group 65 Classes where the Military medical services have the sole or prime interest in such items. The specific item coverage of these Non-Group 65 items is published in the DoD Section of the Federal Supply Catalog for Medical Material C3-1 through C3-12, inclusive.

[5] This assignment includes Health and Comfort items listed in AR 700-23. It also includes resale items for commissary stores (including brand name items).

[6] DLA Centers are identified as follows:
DCSC—Defense Construction Supply Center.
DESC—Defense Electronics Supply Center.
DFSC—Defense Fuel Supply Center.
DGSC—Defense General Supply Center.
DISC—Defense Industrial Supply Center.
DPSC—Defense Personnel Support Center.

[7] DFSC is responsible for procurement of only petroleum base items in FSC 6810 and FSC 6850.

[8] This partial assignment applies only to secondary items not identified as IPE. Such secondary items are listed in the applicable Federal Supply Catalog Management Data Lists of each respective Service.

[9] This partial FSC assignment in FSC 6115 does not apply to Mobile Electric Power Generating Sources (MPECS). The procurement direction responsibility for MEPCS is assigned to the DoD Project Manager, Mobile Electric Power by DoD Directive 4120.11. DoD components desiring to use other than the DoD Standard Family of Generator Sets, contained in MIL-STD 633, shall process a Request for Deviation in accordance with Joint Operating Procedures, AR 700-101, AFR 400-50, NAVMATINST 4120.100A, MCO 11310.8c and DLAR 4120.7, Subject: Management and Standardization of Mobile Electric Power Generating Sources, prior to initiating procurement.

208.7105 Defense Nuclear Agency.

Federal Supply Class Code and Commodity

1105 Nuclear Bombs.
1110 Nuclear Projectiles.
1115 Nuclear Warheads and Warhead Sections.
1125 Nuclear Demolition Charges.
1127 Nuclear Rockets.
1130 Conversion Kits, Nuclear Ordnance.
1135 Fuzing and Firing Devices, Nuclear Ordnance.
1140 Nuclear Components.
1145 High Explosive Charges, Propellants, and Detonators: Nuclear Ordnance.
1190 Specialized Test and Handling Equipment, Nuclear Ordnance.
1195 Miscellaneous Nuclear Ordnance.

* In addition to the above, assignments to DNA include all items for which DNA has integrated management responsibility in accordance with DoD Directive 5105.31.

208.7106 General Services Administration.

Federal Supply Class Code and Commodity

FSC ("P" after FSC number indicates partial FSC assignment.)
2310 P Passenger Motor Vehicles.
2320 P Trucks and Truck Tractors. The above two partial Federal Supply Class Assignments apply to all commercial passenger carrying vehicles and trucks up to 10,000 pounds Gross Vehicle Weight (GVW) except the following types which are assigned for DoD Coordinated Procurement to the Department of the Army.
Bus, convertible to ambulance.
Truck, 4 x 4, convertible to ambulance.
Truck, 4 x 4, dump, 9,000 pounds GVW, with cut-down cab.
(See Army Coordinated Procurement assignments in FSC 2310 and FSC 2320.)
3540 Wrapping and Packaging Machinery.
3550 Vending and Coin Operated Machines.
3590 Miscellaneous Service and Trade Equipment.
3750 Gardening Implements and Tools.
5110 Hand Tools, Edged, Nonpowered.
5120 Hand Tools, Nonedged, Nonpowered.
5130 Hand Tools, Power Driven.
5133 Drill Bits, Counterbores, and Countersinks: Hand and Machine.
5136 Taps, Dies and Collects: Hand and Machine.
5140 Tool and Hardware Boxes.
5180 Sets, Kits and Outfits of Hand Tools.
5210 Measuring Tools, Craftmen's.
5345 Disks and Stones, Abrasive.
5350 Abrasive Materials.
5610 Mineral Construction Materials, Bulk.
5620 Building Glass, Tile, Brick and Block.
5630 Pipe and Conduit, Nonmetallic.
5640 Wallboard, Building Paper, and Thermal Insulation Materials.
5650 Roofing and Siding Materials.
5670 Architectural and Related Metal Products.
5680 P** Miscellaneous Construction Materials.
7105 Household Furniture.
7110 Office Furniture.
7125 Cabinets, Lockers, Bins and Shelving.
7195 Miscellaneous Furniture and Fixtures.
7220 Floor Coverings.
7230 Draperies, Awnings, and Shades.
7240 Household and Commercial Utility Containers.
7290 Miscellaneous Household and Commercial Furnishings and Appliances.
7330 Kitchen Hand Tools and Utensils.
7340 Cutlery and Flatware.
7350 Tableware.
7410 Punched Card System Machines.
7420 Accounting and Calculating Machines.
7430 Typewriters and Office-type Composing Machines.
This FSC assignment does not apply to machines controlled by the Congressional Joint Committee on Printing.
7450 Office-type Sound Recording and Reproducing Machines.
7460 Visible Record Equipment.
7490 Miscellaneous Office Machines.
This FSC assignment does not apply to equipment controlled by the Congressional Joint Committee on Printing.
7510 Office Supplies.
This FSC assignment does not apply to Office Supplies, including special inks, when DoD requirements of such items are procured through Government Printing Office channels.
7520 Office Devices and Accessories.
This FSC assignment does not apply to office devices and accessories when DoD requirements of such items are procured through Government Printing Office channels.
7530 Stationery and Record Forms.
This FSC assignment does not apply to Stationery and Record Forms when DoD requirements of such items are procured through Government Printing Office channels including those items covered by term contracts issued by GPO for tabulating cards and marginally punched continuous forms.
7710 Musical Instruments.
7720 Musical Instrument Parts and Accessories.
7730 Phonographs, Radios, and Television Sets: Home Type.
7740 Phonograph Records.
7810 Athletic and Sporting Equipment.
7820 Games, Toys, and Wheeled Goods.
7830 Recreational and Gymnastic Equipment.
7910 Floor Polishers and Vacuum Cleaning Equipment.
7920 Brooms, Brushes, Mops and Sponges.

7930 Cleaning and Polishing Compounds and Preparations.
8010 Paints, Dopes, Varnishes, and Related Products.
8020 Paint and Artists Brushes.
8030 Preservative and Sealing Compounds.
8040 Adhesives.
8105 Bags and Sacks.
8115 Boxes, Cartons and Crates.
8135 Packaging and Packing Bulk Materials.
8510 Perfumes, Toilet Preparations and Powders.
8520 Toilet Soap, Shaving Preparations and Dentifrices.
8530 Personal Toiletry Articles.
8540 Toiletry Paper Products.
8710 Forage and Feed.
8720 Fertilizers.
8730 Seeds and Nursery Stock.
9310 Paper and Paperboard.
9905 Signs, Advertising Displays, and Identification Plates.
9910 Jewelry.
9915 Collectors' Items.
9920 Smokers' Articles and Matches.

*These GSA assignments do not apply to items as described under FSC 7430, 7490, 7510, 7520, and 7530, and those items in the GSA assigned Federal Supply Classes which have been retained for DLA supply management as listed in the applicable Federal Supply Catalog Management Data Lists. In addition, see 208.7100–2 which describes conditions under which a Military Service may purchase (contract for) Military Service Supply managed items in GSA assigned Federal Supply Classes.

**This partial FSC assignment does not include landing mats which are assigned to the Defense Logistics Agency.

Subpart 208.72—Procurement for NASA

208.7200 Authorization and policy.

(a) NASA is authorized by Public Law 85–568 to use the procurement services, personnel, equipment and facilities of the Departments with their consent, with or without reimbursement, and on a similar basis to cooperate with the Departments in the use of procurement services, equipment and facilities.

(b) The Department will cooperate fully with NASA in making their procurement services, equipment, personnel and facilities available on the basis of mutual agreement.

(c) The Departments will not claim reimbursement for administrative costs incident to procurements for NASA, except as may be otherwise agreed prior to the time the services are performed.

(d) When procuring supplies or services for NASA or performing field service functions in support of NASA contracts, the Department concerned will use its own methods, except when required by the terms of the agreement involved.

(e) The Departments normally will use their own funds when procuring supplies or services for NASA, or performing services, and will not cite NASA funds on any Defense obligation or payment document.

208.7201 NASA purchase request and acceptance.

(a) The NASA-Defense Purchase Request (NASA Form Number 523) will be used by NASA for requesting procurement of supplies or services, from all activities of the Departments.

(b) Except as provided in (d) below, within 30 days after receipt of a NASA-Defense Purchase Request, the Department concerned will forward to the initiator of the request a DD Acceptance of MIPR Form, DD Form 448–2, in quadruplicate in accordance with instructions contained in 208.7009. Each DD Form 448–2 will show the action being taken or to be taken to fill the requirement and the name and complete address of the Department of Defense procurement activity for future direct contact by the initiator.

(c) To the extent feasible, all documents including acceptances, contracts, correspondence, shipping documents, work or project orders, and Standard Form 1080 (Voucher for Transfer Between Appropriations and/or Funds) billings will reference the NASA-Defense Purchase Request Number and the item number when appropriate.

(d) Acceptance by the Department is not required for NASA-Defense Purchase Request covering deliveries of common-use standard stock items which the supplying department has on hand or on order for prompt delivery at published prices.

208.7202 Changes in estimated total prices.

When a Department determines that the estimated total price (Block 9, NASA Form 523) of the items to be procured for NASA is not sufficient to cover the required reimbursement, or is in excess of the amount required, a request for an amendment will be forwarded to the NASA originating office. The request will indicate a specific dollar amount, rather than a percentage, and will include justification for any upward adjustment requested. Upon approval of the request, an amendment to the NASA-Defense Purchase Request will be forwarded to the procuring activity.

208.7203 Inquiries.

Inquiries and correspondence will be directed to the NASA originating office.

208.7204 Payments.

Payments to the Departments for supplies and services furnished or procured for NASA will be effected on the basis of Standard Form 1080 billings submitted to the NASA office designated in Block 11 of the NASA-Defense Purchase Request, except where agreements provide that reimbursement is not required. Billings will be supported in the same manner as billings between Departments.

Subpart 208.73—Miniature and Instrument Ball Bearings

208.7301 Definitions.

"Domestic manufacture" means miniature and instrument ball bearings manufactured in the United States or Canada. When a ball bearing assembly is involved, all components of the bearing must also have been manufactured in the United States or Canada.

"Miniature and instrument ball bearings" are all rolling contact ball bearings with a basic outside diameter (exclusive of flange diameters) of 30 millimeters or less, irrespective of material, tolerance, performance, or quality characteristics.

208.7302 Policy.

It has been determined that defense requirements for miniature and instrument ball bearings must be procured from domestic manufacturing sources to the maximum extent practicable. Accordingly, all procurements of miniature and instrument ball bearings and all procurements of items containing miniature and instrument ball bearings shall include, except as provided in 208.7303 below, a requirement that such ball bearings delivered under the contract be of domestic manufacture only.

208.7303 Procedures.

(a) The clause set forth at 252.208–7000, Required Sources for Miniature and Instrument Ball Bearings, shall be inserted in all contracts except:

(1) When the contracting officer knows that the item being procured does not contain miniature or instrument ball bearings;

(2) When the urgency of the military requirement necessitates delivery of an end item containing other than domestically manufactured miniature or instrument ball bearings;

(3) In small purchases using small purchase procedures, other than in purchase of bearings as the end item;

(4) Purchases of standard commercial items, other than—

(i) Those which are intended for use as components or subassemblies of defense equipments or systems (e.g., repair parts) or

(ii) Purchases of bearings as the end item; or

(5) Purchases made overseas for overseas use.

(b) Subsequent to the award of a contract which includes the clause required by (a) above, the contracting officer may waive the "use" but not the acquisition requirements of the clause. Such waiver may be granted upon submission of a written request by the contractor if the contractor or subcontractor has on hand subassemblies or end items containing nondomestic ball bearings, and either:

(1) The production of such subassemblies or end items in the performance of all or a part of the contract using ball bearings of domestic manufacture would interfere with economical or normal production scheduling of the military product under contract or with production of another item (military or commercial); or

(2) The delivery schedule under the contract or subcontract is such that use of other than domestic ball bearings or subassemblies or parts is necessary.

The contracting officer should grant waivers only to the extent and for the period of time necessary to permit the contractor to acquire and use domestic bearings.

Subpart 208.74—Precision Components for Mechanical Time Devices

208.7401 Definitions.

"Domestic manufacture" means precision components for mechanical time devices manufactured in the United States or Canada. When a mechanical timing assembly is involved, all components of the assembly must also have been manufactured in the United States or Canada.

"Precision components for mechanical time devices" are parts which closely relate so that precise control and selection of working production tolerances can be maintained to accomplish the desired function and reliability. In terms of accuracy, such precision components have total tolerances under 0.003 inches, eccentricities less than 0.0015 inches, and surface finishes better than 64 rms. Examples of such precision components include: gears, pinions, posts, and plates. Precision components subject to the provisions of this subpart are those which are included in fuzes, boosters, and aircraft clocks in the following Federal Supply Classes:

FS class and description	
1306	Ammunition through 30mm
1310	Ammunition, over 30mm up to 75mm
1315	Ammunition, 75mm through 125mm
1320	Ammunition over 125mm
1325	Bombs
1330	Grenades
1340	Rockets and Rocket Ammunition
1345	Land Mines
1390	Fuzes and Primers
6645	Time Measuring Instruments (aircraft clocks only)

208.7402 Policy.

It has been determined that defense requirements for precision components for mechanical time devices must be procured from domestic manufacturing sources to the maximum extent practicable. Accordingly, all procurements of precision components for mechanical time devices and all procurements of items containing precision components for mechanical time devices shall include, except as provided in 7403 below, a requirement that such components delivered under the contract be of domestic manufacture only.

208.7403 Procedures.

(a) All procurements of items in the Federal Supply Classes listed above or any subassembly, component, or part thereof shall provide that precision components for mechanical time devices, in the quantities and of the type and sizes (including tolerances) required to produce the end item being supplied, be of domestic manufacture and incorporated into the items delivered by the contractor and subcontractor at every tier. To accomplish this, the clause set forth at 252.208–7001, Required Sources for Precision Components for Mechanical Time Devices, shall be inserted in all contracts except:

(1) When the contracting officer knows that the item being procured does not contain precision components for mechanical time devices;

(2) When the urgency of the military requirement necessitates delivery of an end item containing other than domestically manufactured precision components for mechanical time devices;

(3) In small purchases using small purchase procedures, other than in purchase of precision components for mechanical time devices as the end item;

(4) Purchases of standard commercial items, other than—

(i) Those which are intended for use as components or subassemblies of defense equipment or systems (e.g., repair parts); or

(ii) Purchases of precision components for mechanical time devices as the end item; or

(5) Purchases made overseas for overseas use.

(b) Subsequent to the award of a contract which includes the clause required by (a) above, the contracting officer may waive the "use" but not the acquisition requirements of the clause. Such waiver may be granted upon submission of a written request by the contractor if the contractor or subcontractor has on hand subassemblies or end items containing nondomestic precision components for mechanical time devices and either:

(1) The production of such subassemblies or end items in performance of all or a part of the contract using precision components for mechanical time devices of domestic manufacture would interfere with economical or normal production scheduling of the military product under contract or with production of another item (military or commercial); or

(2) The delivery schedule under the contract or subcontract is such that use of other than domestic precision components for mechanical time devices or subassemblies or parts is necessary.

The contracting officer should grant waivers only to the extent and for the period of time necessary to permit the contractor to acquire and use domestic components.

Subpart 208.75—High-Purity Silicon

208.7501 Definitions.

"Domestic manufacture" means high-purity silicon manufactured in the United States or Canada. When an item or subassembly containing high-purity silicon is involved, all such silicon (polycrystal and single crystal) incorporated in the item or subassembly must also have been manufactured in the United States or Canada.

"High-purity silicon" is N or P type and has a resistivity greater than 3000 ohm—centimeter.

208.7502 Policy.

It has been determined that defense requirements for High-Purity Silicon must be acquired from qualified domestic manufacturing sources to the maximum extent practicable. Accordingly, all acquisitions of high-purity silicon and all acquisitions of items containing high-purity silicon shall include, except as provided in 208.7503 below, a requirement that such high-purity silicon and high-purity silicon incorporated in items containing high-purity silicon delivered under the contract be of domestic manufacture only.

208.7503 Procedures.

(a) The clause set forth at 252.208–7002, Required Sources for High Purity

Silicon, shall be inserted in all contracts except:

(1) When the contracting officer knows that the item being acquired does not contain high-purity silicon;

(2) In small purchases using small purchase procedures, other than in purchase of high-purity silicon as the end item;

(3) Purchase of standard commercial items, other than purchases of high-purity silicon as the end item; or

(4) Purchases made overseas for overseas use.

(b) Subsequent to the award of a contract, the contracting officer may waive the requirements set forth at 252.208–7002, Required Sources for High Purity Silicon. Such waiver may be granted upon submission of a written request by the contractor if the contractor or subcontractor has on hand subassemblies or end items containing nondomestic high-purity silicon, and either:

(1) The production of such subassemblies or end items in the performance of all or a part of the contract using high-purity silicon of domestic manufacture would interfere with the normal production scheduling of the military product under contract or with production of another item (military or commercial); or

(2) The delivery schedule under the contract or subcontract is such that use of other than domestic high-purity silicon is necessary. The contracting officer should grant waivers only to the extent and for the period of time necessary to permit the contractor to acquire and use domestic high-purity silicon.

PART 209—CONTRACTOR QUALIFICATIONS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 209.1—Responsible Prospective Contractors

209.103 Policy.

(S–70) *Acquisition from concerns in qualifying countries.*

(1) Awards to concerns in qualifying countries are subject to this subpart and other sections of this Supplement concerning NATO participating country sources.

(2) A Canadian firm proposed by the Canadian Commercial Corporation (CCC) as its subcontractor generally shall be accepted by the contracting officer under the provisions of FAR 9.104–4 as the basis for his determination under FAR 9.103.

209.104 Standards.

209.104–3 Application of standards.

(c) *Satisfactory performance record.*

(c)(2) Quality is a significant consideration in determining satisfactory performance. Quality defects of a critical or repetitive nature without adequate and timely corrective action, including repair or replacement of items, shall also be presumptive of inability to meet this requirement. DoD components shall assure that contracts are not awarded to contractors with a history of providing supplies or services of an unsatisfactory quality.

(S–70) In cases where the firm proposed by CCC is so accepted, pre-award survey forms need not be completed. When the CCC proposal is not consistent with other information which may be available to the contracting officer, he shall request from CCC and any other sources whatever additional information or plant surveys he may deem necessary to make the determination of responsibility of sources proposed by CCC. Such additional data may be requested on the pre-award survey forms or on any other forms. Upon request, CCC shall be furnished an explanation of the reasons for rejection of its proposed firm.

209.105 Procedures.

209.105–70 Current information.

(a) Maximum practicable use shall be made of currently valid information on file or within the knowledge of personnel in the Department of Defense. Each Deaprtment, shall at such level and manner as it deems appropriate, maintain useful records and experience data for the guidance of contracting officers in the placement of new procurement, and shall inform its contracting officers and the other Departments of the means of access thereto. Notwithstanding this direction contract administration offices shall maintain files of information reflecting upon the ability of contractors to perform Government contracts successfully.

(b) Any purchasing office becoming aware of circumstances which, for any reason, casts doubt upon the ability of a contractor to perform contracts successfully, shall immediately advise the cognizant contract administration office. A contract administration office, upon being notified by a purchasing office of unfavorable information affecting a contractor under its cognizance, or upon developing unfavorable information during the course of contract administration activities, shall advise the purchasing offices of the other Departments. When a contract administration office is requested to perform a pre-award survey and it has been notified of the existence of unfavorable information relative to the contractor, it shall obtain the details including full supporting information. Careful and full consideration shall be given such information.

(c) In addition to the requirements of FAR 9.105–1, pre-award surveys shall be requested and conducted in accordance with Appendix K, Pre-Award Survey Procedures. For preaward survey assistance for contracts requiring performance of Contract Administration Services (CAS) on military installations, see 242.270.

209.106 Pre-award surveys.

209.106–70 Audit responsibilities for pre-award surveys and reviews.

Pre-award surveys of potential contractors' competence to perform proposed contracts shall be managed and conducted by the contract administration office. When information is required on the adequacy of the contractor's accounting system or its suitability for administration of the proposed type of contract, such information shall always be obtained by the ACO from the auditor. The contract administration office shall be responsible for advising the PCO on matters concerning the contractor's financial competence or credit needs.

Subpart 209.2—Qualified Products

209.204 Justification for including qualification requirements.

The specification preparing activity's (SPA) parent agency authorized to make the approval required by FAR 9.204 is as follows:

In the Army, Headquarters, U.S. Army Materiel Development and Readiness Command, (DRCMT–S);

In the Navy, the Chief of Naval Material;

In the Air Force, Departmental Standardization Office (SAF/ALG);

In the Defense Logistics Agency, the Executive Director, Contracting;

In the National Security Agency, the Director of Procurement;

In the Defense Communication Agency, the Director;

In the Defense Nuclear Agency, the Deputy Director, Operations and Administration; and

In the Defense Mapping Agency, the Staff Director of Logistics.

Subpart 209.3—First Article Testing and Approval

209.302 General.

The Government may require that first articles be manufactured using the same facilities and the same production processes, methods and materials, with which the item is to be produced for the contract (see 209.308 below).

209.303 Use.

(b)(1) The term "processes" as used in FAR 9.303(b)(1) includes materials or production facilities.

209.305 Risk.

This authorization may be given to a contractor only after approval at a level higher than the contracting officer (See FAR 9.308).

209.306 Solicitation requirements.

(i) The Government's estimate shall be documented in the contract file.

209.308 Contract clauses.

Alternate I of the clauses at FAR 52.209–3 or 52.209–4, as appropriate, may be included by the Contracting Officer whenever:

(i) The form, fit, or function of the product would be adversely affected by contractor changes in the production facilities, processes, methods, or materials subsequent to first article approval; and

(ii) The Government has relied upon first article testing in the absence of complete design specifications to supplement a performance specification; or

(iii) It is essential to have an approved first article to serve as a manufacturing standard.

Subpart 209.4—Debarment, Suspension, and Ineligibility

209.403 Definitions.

"Authorized Representative" means an official who has been designated by and authorized to act on behalf of the Secretary concerned for the purposes of this subpart (see 209.470) including, but not limited to, acting as a debarring or suspending official.

209.404 Consolidated list of debarred, suspended, and ineligible contractors.

(c)(4) At a minimum, each Department shall maintain records relating to each contractor it has debarred or suspended that contain the following information:

(i) The contractor's name and address;

(ii) The cause of the action (see FAR 9.406–2 and FAR 9.407–2);

(iii) The effective date of the action and, in the case of debarments, the termination date for each listing; and

(iv) The name and telephone number of the Department's point of contact for the action.

209.405 Effect of listing.

(a)(1) Prior to initiating a pre-award survey or any of the procurement actions set forth in FAR 9.405, the consolidated list shall be reviewed. Bids received from any listed contractor in response to an Invitation for Bids shall be opened, entered on the Abstract of Bids, and rejected unless the Secretary concerned or his authorized representative determines in writing that there is a compelling reason to make an exception. Proposals, quotations or offers received from any listed contractor shall not be evaluated for award or included in the competitive range, and discussions shall not be conducted with such offeror, unless the Secretary concerned or his authorized representative determines in writing that there is a compelling reason to make an exception.

(2) When a Department makes an exception, a notice describing the exception shall be forwarded to the GSA Office of Acquisition Policy. Some examples of circumstances that may constitute a compelling reason include: (i) the property or services to be acquired are available only from the listed contractor; (ii) the urgency of the requirement dictates that the Department deal with the contractor; (iii) the contractor and the Department have entered an agreement covering the same events which resulted in the listing and the agreement includes a decision by the Department not to debar or suspend the contractor; and (iv) for such other reasons related to the national defense which required continued business dealings with the listed contractor.

209.406 Debarment.

209.406–1 General.

(S–70) If no suspension is in effect under FAR 209.407 at the time dabarment is proposed by a Department, bids or proposals shall not be solicited from, contracts shall not be awarded to, existing contracts shall not be renewed or otherwise extended with, and subcontracts shall not be consented to or approved for the contractor by any DoD component pending a debarment decision unless the Secretary concerned or his authorized representative states in writing the compelling reason to do so.

209.406–3 Procedures.

(c)(7) For purposes of this FAR subsection, "agency" includes all DoD components. The Secretary concerned or his authorized representative may, however, make an exception in accordance with 209.406–1(S–70).

209.470 Authorized representatives.

For the purpose of FAR Subpart 9.4 the authorized representatives of the Secretaries are:

(a) In the Army, an Assistant Judge Advocate General;

(b) In the Navy, the Chief of Naval Material;

(c) In the Air Force, the Deputy Chief of Staff, Research, Development and Acquisition;

(d) In the Defense Logistics Agency, the General Counsel;

(e) In the National Security Agency, The Director;

(f) In the Defense Communications Agency, the General Counsel;

(g) In the Defense Nuclear Agency, the Director; and

(h) In the Defense Mapping Agency, the General Counsel.

209.471 Interchange of information.

Debarment or suspension of a contractor by one Department can have an adverse impact on the missions of other Departments with which the contractor does business. Accordingly, if it appears that there is the potential for such an adverse impact, the cognizant debarring or suspending official should solicit the comments of those Departments that he believes could be affected before taking action. A Department that believes it could be affected by the proposed action should comment directly to the cognizant debarring or suspending official. If several Departments independently are contemplating a debarment or suspension action against the same contractor, consideration should be given to designating one Department as the lead agency for making the decision.

209.472 Reporting.

209.472–1 Situations where reports are required.

A report incorporating the information required by 209.472–2 shall be prepared by the contracting officer when:

(a) A contractor has committed, or is suspected of having committed, any of the acts described in FAR 9.406–2 and 9.407–2;

(b) A report is required by 203.000;

(c) A report is required by 203.409 (contingent fees);

(d) A report is required by FAR 49.106 (termination settlements);

(e) Buy American Act violations are suspected (see FAR 25.204); or,

(f) A contractor is suspected of attempting to evade the prohibitions or

debarments or suspensions imposed under this Regulation by changes of address, multiple addresses, formation of new companies, or by other devices.

209.472-2 Contents of reports.

Each report prepared pursuant to this subsection shall contain the name and telephone number of the individual assigned to the case as the point of contact for the activity making the report, and shall include substantially the following information, where available:

(a) Name and address of the contractor;

(b) Names of the principals, officers, partners, owners, or managers;

(c) All known affiliates, subsidiaries, or parent firms, and the nature of the affiliation;

(d) Description of the contract or contracts concerned, including the contract number, and all office identifying numbers or symbols, the amount of each contract, the degree of completion, the amount paid the contractor and the amount still due, and the percentage of work to be completed;

(e) The status of vouchers;

(f) Whether the contract has been assigned pursuant to the Assignment of Claims Act, and if so assigned, the name and address of the assignee and a copy of the assignment;

(g) Whether any other contracts are outstanding with the contractor or any of his affiliates, and if so, the amount of such contracts, whether they are assigned pursuant to the Assignment of Claims Act, and the amounts paid or due on such contracts;

(h) A complete summary of all pertinent evidence;

(i) A recommendation as to the continuation of all current contracts with a full explanation of the reason for such recommendation, or if no recommendation is made, the reason therefor;

(j) An estimate of damages, if any, sustained by the Government as a result of the action of the contractor, including an explanation of the method used in making the estimate;

(k) The comments and recommendations of the contracting officer and of each successive echelon as to (1) whether the contractor should be suspended or debarred, (2) whether any limitations should be applied to such action, and (3) the period of any debarment; and,

(l) As an enclosure, a copy of the contract (or contracts) or pertinent excerpts therefrom, appropriate exhibits, testimony or statements of witnesses, copies of assignments, and other relevant documentation, such as affidavits, copies of investigative reports and certified copies of indictments and judgments.

209.472-3 Addressees and copies of reports.

Reports shall be submitted in three complete copies, including inclosures, to the authorized representatives of the Secretaries concerned, unless otherwise provided by Departmental procedures. Additional copies without enclosures may be required by Departmental procedures for other addresses.

209.473 Procurement outside United States.

209.473-1 General.

The foregoing provisions of this subpart shall be applied by overseas commanders to procurement outside the United States and its possessions, whenever possible, and as modified by the following provisions, with due consideration to laws or customs of the foreign countries concerned.

209.473-2 Responsibilities and area coverage.

The Commander in Chief, United States European Command (CINCEUR), the Commander in Chief, Pacific (CINCPAC) and the Commander in Chief, Southern Command (CINCSOUTH), or the Commanders of a component command which each of these unified commanders may designate, shall establish and maintain a consolidated list of offshore suppliers to whom contracts will not be awarded and from whom bids or proposals will not be solicited. The CINCEUR consolidated list will include names in the North Atlantic and Mediterranean areas, including all of Europe, North Africa, and the Middle East. The CINCPAC consolidated list will include names in the Far East and Pacific Ocean areas, excluding the United States and its possessions. The CINCSOUTH consolidated list will include names in Central and South America, excluding possessions. All other overseas commanders shall utilize and contribute to such lists as appropriate to their geographical location or areas in which they award contracts. Lists shall not be established or maintained except as provided above.

209.473-3 Information contained on overseas lists.

The list shall show as a minimum the following information:

(a) Names and addresses of those contractors to whom contracts shall not be awarded and from whom bids or proposals shall not be solicited (Names will be set forth alphabetically with appropriate cross reference where more than one name is involved in a single action or where a parent contractor in one country is known to control subsidiaries, branches, or agencies in the same or other countries.);

(b) Basis or authority for each action;

(c) Extent of restrictions imposed;

(d) Termination date for each debarred listing; and

(e) Originating activity, component, or agency.

209.473-4 Maintenance and distribution of lists.

The lists shall be kept current by issuance of notices of additions or deletions and by periodic reprinting. Copies of the lists shall be distributed to contracting officers as the unified commanders and their component commanders direct. CINCEUR, CINCPAC, and CINCSOUTH shall exchange lists directly. Copies shall also be furnished the Deputy Under Secretary of Defense (Acquisition Management), OUSDRE, the Assistant Secretary of Defense (International Security Affairs), and the authorized representative of the Secretaries.

209.473-5 Basis of addition of contractors to lists.

In addition to the names of offshore contractors which may be included on the lists as falling into the categories outlined in FAR 9.405, the names of contractors abroad shall be included on the list in the following additional categories:

(a) Those who are "designated nationals" under the Foreign Assets Control Regulations;

(b) Those found by the Assistant Secretary of Defense (International Security Affairs) or his authorized representative to have engaged in improper East-West trade activity;

(c) Those found by the Assistant Secretary of Defense (International Security Affairs) or his authorized representative to be ineligible because they do not meet the political or security criteria;

(d) Those found by the United States Diplomatic Mission or a Country Team (consisting of members of the United States Diplomatic Mission in the country or countries in which the contractors are located) to be ineligible because they do not meet the labor-political criteria; and,

(e) Those who for other causes of a serious and compelling nature are so designated by the unified commander.

209.473-6 Treatment to be accorded contractors in debarred or ineligible status.

The provisions of FAR 9.405 shall be complied with, if applicable. In addition,

contracts shall not be awarded to, nor shall bids or proposals be solicited from or furnished to contractors abroad which come within the categories in 209.473–5. With respect to 209.473–5(a), and exception may be made only by the Secretary of the Treasury. With respect to 209.473–5(b), (c), and (d), an exception may be made by the Assistant Secretary of Defense (International Security Affairs) or his authorized representative.

209.473–7 Causes and conditions for which unified commanders may place names on the consolidated list.

CINCEUR, CINCPAC, and CINCSOUTH, or their designated component commanders are authorized to place on the list names of contractors doing business within the areas for which they are responsible, for any of the causes and under the conditions set forth in 209.473–5 and 209.473–6. Overseas commanders or unified commanders overseas other than CINCEUR, CINCPAC, and CINCSOUTH are similarly authorized to place on the list the names of contractors in their command areas and shall promptly notify CINCEUR, CINCPAC, or CINCSOUTH as appropriate, of such action, furnishing the information required by 209.473–3. CINCEUR, CINCPAC, or CINCSOUTH shall add the names to his consolidated list. The listing shall operate to deny contracts and subcontracts (when Government approval is required) to such contractors throughout the Department of Defense. Unified commanders shall be notified of the action based on causes and under conditions set forth in 209.473–5 and 209.473–6 through the "Economic Defense List", transmitted by the Department of Commerce through State Department channels, which contains the names of contractors affected or by direct communication from the Office of the Assistant Secretary of Defense (International Security Affairs).

209.473–8 Liaison with United States diplomatic missions.

The Chief of the United States Diplomatic Mission, or such attache or other officer as he directs, in the country where the contractor concerned is located, shall be notified of actions contemplated under the foregoing paragraphs which may have important political significance. In cases of contemplated action against a branch or subsidiary in one or more countries, the Chief of the United States Diplomatic Mission in each country, including that in which the parent or principal is located, will be notified.

209.474 Use of lists.

(a) Due to the length of the lists, the numerous revisions, and the distances involved, as well as the infrequent contracting by offices with suppliers outside their respective areas, the United States, CINCEUR, CINCPAC, and CINCSOUTH consolidated lists shall not be distributed to contracting officers outside the area covered by the respective lists. However, no contracts shall be awarded by contracting officers to suppliers without ascertaining that the names of the contractors involved do not appear on the consolidated list for the geographical area in which the contractor is located. All lists shall be held for reference in each of the Departments, and in offices designated by CINCEUR, CINCPAC, and CINCSOUTH, and shall be utilized in accordance with procedures established by them.

(b) When a contracting officer becomes aware that a prospective contractor proposes to furnish products of a concern that has been placed on an overseas list in accordance with 209.473–5 (a), (c), or (e), the matter shall be referred to the authorized representatives of the Secretaries concerned.

PART 210—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

210.004 Selecting Specifications or Descriptions for Use.

(b)(3)(i) *General.*

(A) Purchase descriptions which contain references to one or more brand name products followed by the words "or equal" may be used only when authorized by FAR 10.004(b) and 210.006(a) and in accordance with 210.004(b)(3) (ii) and (iii). The term "brand name product" means a commercial product described by brand name and make or model number or other appropriate nomenclature by which such product is offered for sale to the public by the particular manufacturer, producer, or distributor. When feasible, all known acceptable brand name products should be referenced. Where a "brand name or equal" purchase description is used, prospective contractors must be given the opportunity to offer products other than those specifically referenced by brand name if such other products will meet the needs of the Government in essentially the same manner as those referenced. If modifications to manufactures' standard products to meet the purchase description requirements are anticipated, a minimum of 30 calendar days shall be allowed between issuance of the solicitation and opening of bids or receipts of proposals, *provided* that periods of less than 30 days may be set in cases of urgency.

(B) "Brand name or equal" purchase descriptions should set forth those salient physical, functional, or other characteristics of the referenced products which are essential to the needs of the Government. For example, when interchangeability of parts is required, such requirement should be specified. Purchase descriptions shall contain the following information to the extent available, and include such other information as is necessary to describe the item required:

(a) Complete common generic identification of the item required;

(b) Applicable model, make, or catalog number for each brand name product referenced, and identity of the commercial catalog in which it appears; and

(c) Name of manufacturer, producer, or distributor of each brand name product referenced (and address if not well known).

(C) When necessary to describe adequately the item required, an applicable commercial catalog description, or pertinent extracts therefrom, may be used if such description is identified in the invitation for bids or request for proposals as being that of the particular named manufacturer, producer, or distributor. The contracting officer will insure that a copy of any catalogs referenced (except parts catalogs) is available on request for review by bidders at the purchasing office.

(ii) *Invitations for bids.*

(A) Except as provided in (b)(3)(ii)(C) below, when a "brand name or equal" purchase description is included in an invitation for bids, the following shall be inserted after each item so described in the invitation, for completion by the bidder:

Bidding on:
Manufacturer's Name _____
Brand _____
No. _____

(B) In addition, the clause at 52.210–7000, Brand Name or Equal, shall be included.

(C) When component parts of an end item are described in the invitation for bids by a "brand name or equal" purchase description and the contracting officer determines that application of the clause in (b)(3)(ii)(B) above to such component parts would be impracticable, the requirements of (b)(3)(ii)(A) above shall not apply with respect to such component parts. In such

cases, if the clause is included in the Invitation for Bids for other reasons, a statement substantially as follows also shall be included:

The clause entitled "Brand Name or Equal" does not apply to the following component parts. (List the component parts as to which the clause does not apply.)

In the alternative, if the contracting officer determines that the clause in (b)(3)(ii)(B) above should apply to only certain such component parts, the requirements of (b)(3)(ii)(A) above shall apply to such component parts and a statement substantially as follows also shall be included:

The clause entitled "Brand Name or Equal" applies to the following component parts: (List the component parts to which the clause applies.)

(D) When an invitation for bids contains "brand name or equal" purchase descriptions, bidders who offer brand name products referenced in such descriptions shall not be required to furnish bid samples of the referenced brand name products; however, invitations for bids may require the submission of bid samples in the case of bidders offering "or equal" products.

(iii) *Bid evaluation and award.*

(A) Bids offering products which differ from brand name products referenced in a "brand name or equal" purchase description shall be considered for award when the contracting officer determines in accordance with the terms of the clause at 252.210–7000 that the offered products are equal in all material respects to the products referenced. Bids shall not be rejected because of minor differences in design, construction, or features which do not affect the suitability of the products for their intended use.

(B) Award documents shall identify, or incorporate by reference an identification of, the specific products which the contractor is to furnish. Such identification shall include any brand name and make or model number, descriptive material, and any modifications of brand name products specified in the bid. Included in this requirement are those instances when the description of the end item contains "brand name or equal" purchase descriptions of component parts or of accessories related to the end item, and the clause at 252.210–7000 was applicable to such component parts or accessories (see 210.004(b)(3)(ii)(C)).

(iv) *Procedure for negotiated procurements.*

(A) The policies and procedures prescribed in 210.004(b)(3) (i) and (iii) for formally advertised procurements shall be generally applicable to negotiated procurements.

(B) The clause at 252.210–7000 may be adapted for use in negotiated procurements. If use of the clause is not practicable (as may be the case in exigency purchases), suppliers shall be suitably informed that proposals offering products different from the products referenced by brand name will be considered if the contracting officer determines that such offered products are equal in all significant and material respects to the products referenced.

210.008 Identification and availability of specifications.

(g)(1) A Department of Defense Single Stock Point (DODSSP) has been established at the Naval Publications and Forms Center in Philadelphia for unclassified Federal, Military and other specifications and standards (including commercial) listed in the Department of Defense Index of Specifications and Standards (DODISS) and data item descriptions listed in the Department of Defense Acquisition Management Systems and Data Requirements Control List (AMSDL) DODD 5000.19–L, Volume II.

(2) Purchasing activities may obtain copies of the DODISS and the AMSDL, as well as all unclassified specifications and standards (including commercial) listed in the DODISS, and data item descriptions listed in the AMSDL by sending DD Form 1425 to the DODSSP.

210.011 Solicitation provisions and contract clauses.

(S–70) The contracting officer shall insert the provision at 252.210–7001 in addition to the provision at FAR 52.210–2, Availability of Specifications Listed in the DoD Index of Specifications and Standards (DODISS), in all solicitations containing data item descriptions.

(S–71) Specifications and standards not listed in the DODISS, and plans, drawings, and other pertinent documents (including new or revised Federal or Military specifications and standards not yet listed in DODISS) and data item descriptions not listed in DoD Directive 5000.19–L, Volume II, normally shall be furnished with the solicitation. When this is not feasible because of the bulk of the documents, the limited number of copies available, or for some other good reason, the contracting officer shall insert a provision substantially similar to the provision at 252.210–7002, Availability of Specifications and Standards Not Listed in DODISS, Data Item Descriptions Not Listed in DoD Directive 5000.19–L, Volume II, and Plans, Drawings, and Other Pertinent Documents or the provision at 252.210–7003, Availability for Examination of Specifications, Standards, Plans, Drawings, Data Item Descriptions, and Other Pertinent Documents, as appropriate.

Part 211—Acquisition and Distribution of Commercial Products [No DoD FAR Supplement]

PART 212—CONTRACT DELIVERY OR PERFORMANCE

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 212.1—Delivery or Performance Schedules

212.102 Factors to consider in establishing schedules.

(b)(S–70) *Construction.* When economies to the Government would result by excluding certain specified periods of time from contractor performance in computing the completion date, the solicitation shall contain the clause in 252.212–7000, Exclusion of Periods in Computing Completion Schedules.

212.103 Supplies or services.

(S–70) Solicitations shall generally indicate either a desired term of performance or a completion date. In cases where development of a tangible item by a given date is urgent, solicitation shall indicate such urgency. Generally, solicitations to conduct research exploratory development work will specify a level of effort for a term of performance. However, solicitations calling for a specific item in the category of such exploratory or advanced development will specify a completion date. A contractor may propose an alternate term of performance or completion date without disqualification of his proposal.

212.104 Contract clauses.

(a)(2) The clauses at FAR 52.212–1 and FAR 52.212–2 can also be used in contracts for research, development facilities, time and material and labor hours.

(a)(3) The clauses at FAR 52.212–1 and FAR 52.212–2 can also be used in contracts for research, development facilities, time and material, and labor hours.

Subpart 212.2—Liquidated Damages

212.204 Contract clauses.

(b) The contracting officer shall insert the clause at FAR 52.212–5 in all construction contracts in excess of $25,000 except cost-plus-fixed-fee

contracts, or those where the contractor cannot control the pace of the work. Use of the liquidated damages clause is optional for contracts of $25,000 or less.

Subpart 212.3—Priorities, Allocations, and Allotments

212.302 General.

(S–70) *DoD Priorities and Allocations Manual.*

Department of Defense implementation of all rules and regulations published by the Bureau of Domestic Commerce (BDC), of the Department of Commerce for which the Department of Defense is delegated administrative responsibility is published in the Priorities and Allocations Manual promulgated by Department of Defense Instruction 4400.1. Authorized deviations to the priorities and allocations rules and regulations is likewise published in the Manual.

Subpart 212.4—Variation in Quantity

212.401 Supply contracts.

(a) The permissible variation in the procurement of small quantities of subsistence may be stated in the Schedule as follows:

(1) Standard pack items purchased on a package, carton, can or other than pound basis: maximum variation for 250 units or less—nearest full shipping container.

(2) Nonstandard pack items other than carcass meats not purchased on a package, carton, or can basis: maximum variation for 250 pounds or less—nearest piece or shipping container.

(3) Carcass meats: maximum variation for 500 pounds or less—nearest piece, quarter, side or carcass.

Subchapter C—Contracting Methods and Contract Types

PART 213—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Subpart 213.1—General

213.104 Procedures.

(a) Installation or activity transportation facilities may be used for delivery from local suppliers to the purchasing installation only after consideration of the following methods:

(1) Supplier delivery.

(2) Common carrier.

(3) Parcel post.

(4) Other mail classes.

(b) In other acquisitions using small purchase procedures, solicitation of foreign firms located in qualifying countries (see 225.001) is not required unless determined to be in the best interests of the Government.

213.106 Competition and price reasonableness.

(b) *Purchases over $1,000.* Display in a public place of written requests for quotation which provide at least 10 calendar days for submission of quotes and which have an estimated value in excess of $5,000 is encouraged. Display of such requests below that value is permitted.

(c) *Data to support small purchases over $1,000.* If a separate form is used for documentation of price reasonableness, DD Form 1784, Small Purchase Pricing Memorandum, shall be used.

Subpart 213.2—Blanket Purchase Agreements

213.203 Establishment of blanket purchase agreements.

213.203–2 Clauses.

(a) *Form.*

(1) Except as provided in (a)(2) below, blanket purchase agreements shall be prepared and issued on DD Form 1155 (Order for Supplies or Services/Request for Quotations). Either the "General Provisions", DD Form 1155r, or the "Reverse of Order for Supplies or Services/Request for Quotations-Foreign", DD Form 1155r–1, as applicable, shall be used. Other applicable provisions of the blanket purchase agreement shall be set forth on the Standard Form 36 (Continuation Sheet) or on a blank sheet of paper. Clauses authorized in 213.505–2(S–73)(1) which are mandatory for use in purchases over $10,000 shall be included in blanket purchase agreements that permit the placement of individual calls valued at more than $10,000. Additionally, the following provisions may be applicable:

(i) The Contract Work Hours and Safety Standards Act—Overtime Compensation clause at FAR 52.222–4 shall be added unless it is reasonably anticipated that the aggregate of the total dollar amounts of orders to be placed thereunder will be $2,500 or less;

(ii) When the agreement is for the intended purchase of services covered by the Service Contract Act of 1965, as amended, the clause at FAR 52.222–40 shall be substituted for Clause 15 of the General Provisions and the procedures in FAR 22.1005 complied with, unless it is reasonably anticipated that the aggregate of the total dollar amounts of orders to be placed thereunder will be $2,500 or less;

(iii) When the agreement is for the intended purchase of supplies, the Walsh-Healey Public Contracts Act clause at FAR 52.222–20 shall be added, unless the agreement limits the aggregate total dollar amounts of orders to be placed thereunder to $10,000; and

(iv) When the agreement is for the intended purchase of supplies, the applicable Equal Opportunity Clause at FAR 52.222–26 shall be added.

(2) Blanket purchase agreements issued by the Defense Personnel Support Center may be prepared on its form "Order for Subsistence."

(b) *Numbering.* Enter the Procurement Instrument Identification (PII) number as prescribed in Subpart 204.70.

(c) *Negotiation authority.* The Schedule of each agreement shall be annotated as follows:

(1) The issuance of individual calls under this blanket purchase agreement will be made under the authority of 10 U.S.C. 2304(a)(1), 10 U.S.C. 2304(a)(3), 10 U.S.C. 2304(a)(6), or 10 U.S.C. 2304(a)(17).

(2) If for the purchase of subsistence: The issuance of individual calls under this blanket purchase agreement will be made under the authority of 10 U.S.C. 2304(a)(1), 10 U.S.C. 2304(a)(3), 10 U.S.C. 2304(a)(6), 10 U.S.C. 2304(a)(9) or 10 U.S.C. 2304(a)(17).

(3) This annotation shall not be duplicated on forms used to document individual calls, although the specific authority for the call may be cited therein.

213.204 Purchase under blanket purchase agreements.

(b) A blanket purchase agreement may not be used when a call exceeds $10,000, except that BPA calls up to $25.000 may be placed by Inventory Control Points and calls for subsistence are unlimited as to dollar value. When synopsis is required by Subpart 205.2, purchases of $10,000 and above shall not be issued until 30 days after either publication of the synopsis or issuance of a solicitation, as appropriate.

Subpart 213.3—Fast Payment Procedure

213.302 Conditions for use.

(a) Individual orders do not exceed $25,000, except that for purchases of brand name commissary resale subsistence and commercial type medical supplies for direct shipment overseas, the procedure may be used without dollar limitation.

Subpart 213.4—Imprest Fund

213.402 General.

(a) *Authority.* Commanders of installations and of activities with

purchasing authority are authorized to approve the establishment of imprest funds. The number of imprest funds at an installation shall be kept to a minimum, and one imprest fund should be sufficient in most instances. Exceptions to this general rule may be justified for isolated activities when the location of the established fund is not readily accessible.

(b) *Amount of imprest funds.* The amount of each fund shall be established on the basis of the estimated monthly payments therefrom and the need for replenishment without undue administrative burden, but shall not exceed $5,000. A review shall be made at least quarterly to ensure that the fund is not in excess of actual needs, and necessary adjustments shall be made.

(c) *Imprest fund cashiers.*

(1) Imprest fund cashiers must be appointed by the head of an installation or activity to make authorized cash payments for materials and nonpersonal services, maintain custody of funds, and file periodic vouchers to account for and replenish the imprest fund. An imprest fund cashier should be established at a convenient location on the installation or activity for the purpose of making payments to vendors or carriers, e.g., in "Central Receiving." Disbursing officers and individuals responsible for originating, approving and processing requirements are not eligible for appointment as imprest fund cashiers. Exceptions to this rule may be granted by the major headquarters exercising control over the installation or activity. In no event shall an imprest fund cashier have access or control of more than one imprest fund.

(2) Each appointment and termination of appointment shall be approved by the head of the installation or activity. After approval, administrative orders signed by the appropriate authority shall be issued. Appointment orders shall contain the following:

(i) Name of individual and duty station;

(ii) Identification of disbursing station for which the cashier will act, including the accounting number assigned thereto;

(iii) Specific duties to be performed;

(iv) Effective date; and

(v) Amount and location of fund.

An alternate cashier may be appointed (see (c)(3) below) on the same order as the principal. Two copies of the orders shall be furnished to cashiers, and one copy each to the disbursing office and the installation or activity purchasing office.

(3) An alternate imprest fund cashier may be appointed to provide service during the absence of the principal cashier. Appointment requirements for principal cashiers shall apply to alternate cashiers. In planned absences of the principal cashier, cash may be advanced by the principal to the alternate in any amount up to the limit of the fund. The principal shall obtain a signed cash receipt from the alternate. Upon resumption of his duties, the principal cashier shall return the cash receipt to the alternate after obtaining paid receipts, subvouchers and residual cash. In the unforeseen absence of the principal cashier, funds may be advanced to the alternate in the normal manner by the disbursing officer. These funds shall be in addition to the amount currently advanced to the principal cashier under the established fund, but shall not exceed the amount of the fund. Upon return of the principal cashier, the alternate shall return paid receipts, subvouchers, and residual cash, to the disbursing officer.

213.404 Conditions for use.

(a) Imprest funds may also be used for small purchase when:

(1) The supplies or services are available for delivery within 60 days, whether at the supplier's place of business or at destination.

(2) The purchase does not require detailed technical specifications or technical inspection.

(b) Imprest funds may also be used for payment of:

(1) Charges for local delivery, parcel post (including c.o.d. postal charges) and line haul or inter-city transportation charges of $75.00 or less for supplies ordered for payment from imprest funds when the vendor is requested to arrange for delivery.

(2) C.O.D. charges for supplies ordered for payment from imprest funds.

(3) Civilian volunteers for participation in approved medical research projects.

(c) The conditions for use specified in (a) and (b) above do not preclude the use of imprest funds for other expenditures not related to small purchases (e.g., travel advances, travel expenses, transportation charges, and purchases of postage stamps and transportation tokens or passes), when such expenditures are authorized by other regulations governing the use of imprest funds.

(d) Imprest funds shall not be used for:

(1) Payments of salaries and wages.

(2) Advances, other than those authorized in 213.402.

(3) Cashing of checks or other negotiable instruments.

213.405 Procedures.

(a) *Receipt of material.*

(1) All material purchased through the imprest fund shall be delivered to a designated receiving activity. The receiver shall examine the material to ascertain that the quantities and items described on the purchase request document and the supplier's sales document are present and in satisfactory condition. If the material is acceptable, the receiver shall stamp the supplier's sales document "Received and Accepted," date and sign the document, and pass it to the imprest fund cashier for payment. A supplier's sales document, a receipted Standard Form 1165 (Receipt for Cash—Subvoucher), DD Form 1155 (Order for Supplies or Services/Request for Quotations), or DD Form 1348–1 (DoD Single Line Item Release/Receipt Document) may be used to record the receipt of purchases made from the imprest fund and shall be processed in the same manner. The minimum information specified in 213.404(b) above shall be included in the document used to record the receipt of purchases.

(2) When it is not practicable to obtain delivery of material at destination on a c.o.d. basis, advance arrangement may be made for the material to be picked up. The imprest fund cashier may then advance cash to an authorized individual to pick up and pay for the material. Necessary certification of receipt and acceptance of material shall be obtained on one of the documents as indicated in (a)(1) above. Receipt for cash payment (see (e) below) shall be made on the same document, which will serve as the imprest fund receipt.

(3) When prior arrangement for pick up of material is not practicable, the imprest fund cashier may advance cash to an authorized individual to make a proposed purchase.

(b) *Advance of funds.* Individuals receiving a cash advance from the imprest fund cashier shall be required to sign the "Interim Receipt for Cash" portion of Standard Form 1165, or an equivalent receipt form. After purchase has been made, the individual will return any unused cash to the imprest fund cashier with the necessary certifications of receipt, acceptance, and cash payment, at which time the imprest fund cashier shall "void" the interim receipt for cash. Cash so advanced should be accounted for daily, but under unusual circumstances, cash may be advanced for longer periods.

(c) *Certification of cash payment.* The original receipt document (or a copy tendered as the original) presented to the imprest fund cashier for payment

shall be stamped with a certification containing the following information:

(1) Statement that cash payment was received in full.

(2) Amount paid.

(3) Date of payment.

(4) Signature and title of supplier or his agent receiving the cash payment.

Alterations or corrections to documents tendered for payment shall be initialed by the person making the change. Changes in the amount paid shall be initialed by the individual receiving payment.

(d) *Responsibilities of imprest fund cashier.*

(1) Pending receipt of material, the imprest fund cashier shall keep a file of purchase request documents covering imprest fund purchases. Prior to payment, or acceptance of the document tendered for settlement of an advance, the cashier shall verify the necessary certification of receipt and the supplier's billed price or the price paid. If the supplier's receipt for cash payment is not obtained for purchases of $15 or less, the imprest fund cashier shall complete the cash receipt document and have the person receiving the fund sign this document. Receipt for U.S. parcel post c.o.d. charges should be obtained on Standrd Form 1165. When receipt cannot be obtained for c.o.d. purchases, imprest fund cashiers located in foreign countries are authorized to certify on the receipt document, "Delivered by (name of post office or carrier) no receipt given." The c.o.d. label shall be removed from the parcel and affixed to the receipt document in support of the reimbursement voucher. Imprest fund cashiers at any location may accept a signed c.o.d. receipt to support the subvoucher if the carrier refuses to sign a Government form.

(2) After completion of settlement transaction, each subvoucher shall be numbered consecutively and this number placed on the original of the paid receipt documents. These subvouchers will support the cashier's claim for reimbursement of the imprest fund. The imprest fund cashier will not request duplicate receipt documents nor retain such documents if provided.

(3) When total charges stated on the sales document are paid, without deduction of discounts offered and earned, or without correction of minor billing errors, action will be taken to obtain a refund from the supplier. Collection action may be waived for refunds of one dollar or less.

(e) *Payments.*

(1) *C.O.D.* Upon presentation of an authorized document with the necessary certification of receipt for supplies or services, the imprest fund cashier or other authorized individual shall pay the supplier or his agent and obtain the certification of cash payment as set forth in 213.405(d)(1).

(2) *Receipt from common carrier or post office.* When c.o.d. shipments are received or picked up from a common carrier or post office, the certification of cash payment may be accomplished on a list of the packages provided by the post office of common carrier. Such receipt will be supported by copies of the applicable sales documents, if available.

(3) *Periodic payments.* When a blanket purchase agreement is not suitable and it is administratively convenient and agreeable to the supplier, periodic payments from the imprest fund may be made for supplies delivered on a repetitive basis, provided that the accumulated amount of the deliveries for the specified period does not exceed the dollar limitation imposed on the imprest fund method by FAR 13.404.

(4) *Failure to Ship C.O.D.* When material is ordered c.o.d. but is shipped by the supplier subject to payment by check, Standard Form 1034 (Public Voucher for Purchases and Services Other than Personal), may be used to make payment. Under these circumstances, the receiver shall prepare the necessary certification of receipt and forward the receipted document through the imprest fund cashier, for attachment of the supporting documents which authorized the shipment and submission to the disbursing officer for payment.

(f) *Reimbursement of imprest funds.*

(1) The imprest fund shall be reimbursed by use of Standard Form 1129 (Reimbursement Voucher) supported by cashier's subvouchers. The imprest fund cashier shall prepare and submit Standard Form 1129 in triplicate to the disbursing officer as freqently as necessary, but not less often than monthly. At the close of the fiscal year, a reimbursement voucher covering all remaining subvouchers through 30 September shall be submitted before the closing of the allotment accounts for the month. When required, subvouchers shall be summarized by account to complete the accounting classification block of Standard Form 1129 and submitted to the disbursing officer for reimbursement of the imprest fund. One copy of Standard Form 1129 shall be retained by the imprest fund cashier pending the return of the "paid" copy of the form with the reimbursement checks or currency in the amounts requested by the cashier. When the imprest fund is reimbursed by mail, or when long delays in the reimbursement are encountered, the imprest fund cashier may retain copies of subvouchers until reimbursement is accomplished. When copies are retained, they shall be placed in a sealed envelope identified to the reimbursement voucher involved. When reimbursement is received, the sealed envelope will be presented to the official who signed the Administrative certificate on the Standard Form 1129 for destruction.

(2) When a supplier refunds cash prior to the submission of Standard Form 1129 covering such payment, the imprest fund cashier shall accept the refund, return the money to the imprest fund, and enter the amount of the refund on the original of the supplier's receipt. When the refund is made subsequent to the submission of the applicable Standard Form 1129, the imprest fund cashier shall enter the amount of the refund on the retained copy of the reimbursement voucher, promptly submit the refund to the disbursing officer, and obtain a receipt.

(g) *Accounting.* Recordkeeping for the imprest fund shall be as simple as possible consistent with the maintenance of adequate controls. A file of supplier's receipts for amounts paid and not yet vouchered for reimbursement, and copies of paid reimbursement vouchers ordinarily will suffice for the record of the imprest fund cashier.

(h) *Review.* The imprest fund cashier shall be required to account for the established fund at any time, by cash on hand, paid supplier's receipts, unpaid reimbursement vouchers, and interim receipts for cash. Unannounced inspections, including cash counts are required to be made of each imprest fund at least quarterly by qualified individuals who are under the jurisdiction of the Comptroller or Chief Accounting Officer of the installation, where such positions exist, but in any case by individuals, excluding the disbursing officer advancing the funds and subordinates of the imprest fund cashier.

Subpart 213.5—Purchase Orders

213.502 Unpriced purchase orders.

(c) Unpriced purchase orders may be issued by using DD Form 1155.

213.503 Obtaining contractor acceptance and modifying purchase orders.

(b) Standard Form 30 shall be used to modify the purchase order for administrative or other changes.

(1) Modifications making administrative changes such as the

correction of typographical errors, changes in paying office, and changes in accounting and appropriation data do not require contractor acceptance. In addition, the issuance of no cost Amended Shipping Instructions (ASIs) which modify unilateral purchase orders and which have been concurred in by the contractor by telephone or letter do not require contractor acceptance by signature on the Standard Form 30.

(2) To otherwise modify a purchase order prior to commencement of performance and within the scope of the original order, a unilateral modification may be issued on a Standard Form 30. The modification may not be unilaterally issued unless:

(i) The modification reflects the contractor's written or oral confirmation of the proposed revision(s). Unilateral modifications may include withdrawal of all or part of the original purchase order.

(ii) Block 11a of the Standard Form 30 is annotated to reflect the issuance of an authorized unilateral modification.

(3) To otherwise modify the purchase order, and if not previously included in the purchase order, the Additional General Provisions (Clauses 16–19 of DD Form 1155r) shall be incorporated by reference in the Standard Form 30, Amendment of Solicitation/Modification of Contract, and the contractor's acceptance obtained by signature on the Standard Form 30. Subsequent changes pursuant to the Changes clause shall not require contractor acceptance. However, other modifications outside the scope of the Changes clause, such as the addition of the Government Property clause, shall require contractor acceptance by signature on the Standard Form 30.

213.505 Purchase order and related forms.

213.505–2 Agency order forms in lieu of optional Forms 347 and 348.

(S–70) Negotiated purchases of supplies, nonpersonal services and construction not in excess of $25,000 may be effected by using DD Form 1155, Order for Supplies or Services/Request for Quotations, and its ancillary forms. Standard Form 44, Purchase Order-Invoice-Voucher, may also be used for material and non personal services purchases not in excess of $2,500.

(S–71) The DD Form 1155 provides for the arrangement of information in fixed locations, including sequential numbering of all blocks, and within certain of these blocks, a code box for inserting alpha-numeric codes. The uniform arrangement of data and the provision for codes facilitates manual and automated processing of contractual documents and interchange of information between purchasing offices and contract administration activities.

(S–72) *Forms.*

The following forms may be used to issue purchase orders:

(1) DD Form 1155, Order for Supplies or Services/Request for Quotations, which, when used with DD Form 1155r in accordance with 213.505–2(S–73)(1), or with DD Form 1115r–1 in accordance with 213.505–2(S–73)(2), as appropriate, provides in one document—

(i) A purchase order, a blanket purchase agreement, a delivery order under a contract or delivery order on Government agencies outside the Department of Defense;

(ii) A receiving and inspection report;

(iii) A property voucher;

(iv) A public voucher; and

(v) A document for acceptance by the supplier.

(2) Standard Form 36, Continuation Sheet, provides additional space, or a blank sheet of paper may be used.

(3) DD Form 1155c–1, Commissary Continuation Sheet, (for use on an optional basis), provides columns suited for commissary procurements.

(4) Standard Form 30, Amendment of Solicitation/Modification of Contract, shall be used in all modifications to DD Form 1155 (see 213.503).

(5) The foregoing forms may be used as snap-out manifold forms, as cut sheets, as reproducible masters, or automatically printed. In addition, DD Form 1155r or DD Form 1155r–1 may be printed on the reverse of DD Form 1155.

(S–73) *Conditions for use.*

(1) *Use as a Purchase Order of Not More Than $25,000 in the United States, its Possessions, and Puerto Rico.* The *United States,* when used in a geographical sense, means the States and the District of Columbia. Possessions, in a geographical sense, include the Virgin Islands, the Swan Islands, Guantanamo Bay, Johnston Island, American Samoa, Guam, Wake Island, Midway Island, and the Guano Islands, but do not include Puerto Rico, leased bases, or trust territories. Definitions of the *United States,* in a contractual sense, vary according to individual laws, orders or regulations. DD Form 1155 is authorized for negotiated purchases of not more than $25,000 within the United States, its possessions, and Puerto Rico, *provided,*

(i) The procurement is unclassified, except that DD Form 1155 may be used for classified procurement if:

(A) The Security Requirements clause in FAR 52.204–2 is inserted in the schedule.

(B) DD Form 254, Contract Security Classification Specification, (see FAR 4.403(c) and FAR 53.204–1) is incorporated in the purchase order.

(C) The contractor's acceptance of the purchase order is obtained by use of DD Form 1155r at the time of issuance of the order.

(ii) No clause covering the subject matter of any clause set forth in this supplement, other than clauses on DD Form 1155r and clauses referred to in this paragraph (213.505–2(S–73)(a)(1)) and in FAR 13.502, Unpriced Purchase Order, FAR 13.503, Obtaining Contractor Acceptance and Modifying the Purchase Order, FAR 46.301, Contractor Inspection Requirements, FAR 46.302, Standard Inspection Requirements, and FAR 46.504, Certificate of Conformance, is to be used.

(iii) When the order specifies the delivery of data, one of the clauses in 52.227, Rights in Technical Data and Computer Software, shall be used as appropriate in accordance with the instructions contained in 227.4.

(iv) When required by FAR 25.7, the clause, Certain Communist Areas, in FAR 52.225–11 shall be used.

(v) When required by FAR 12.4, the clause in FAR 52.212–9, Variation in Quantity, shall be used.

(vi) When required by FAR 32.111 the clause in 52.232.7000, Invoices, shall be used.

(vii) When the order is assigned to other than the purchasing office for adminstration, or if otherwise desired by the purchasing office, the clause, Material Inspection and Receiving Report in 52.246–7000, shall be used.

(viii) When Government property having an acquisition cost in excess of $50,000 is to be furnished (for use in performance of an order or for repair), the appropriate Government Property clause or clauses in FAR 52.245–1, 2, 3, or 19 shall be inserted in the Schedule. When Government property having an acquisition cost not in excess of $50,000 is to be furnished for use in performance of the order or for repair, the Government-Furnished Property (Short Form) clause in FAR 52.245–4 shall be inserted in the Schedule, *provided* that use of the clause shall be optional when the acquisition cost of property furnished for repair is not in excess of $10,000. When a Government Property clause is inserted in the Schedule, the contractor's signature shall be obtained on the DD Form 1155r.

(ix) When the order is for Military Assistance Program items, the United States Products Certificate (Military Assistance Program), at 252.225–7008, and the clause, United States Products (Military Assistance Program), in 252.225–7009, shall be inserted in the

Schedule, and Clause 6, Foreign Supplies, of the General Provisions shall be deleted. In addition, the contractor's signature shall be obtained on DD Form 1155r.

(x) [Reserved]

(xi) The clauses, New Material, (FAR 52.210–5) and Used, Reconditioned, Residual Inventory and Former Government Surplus Property (FAR 52.210–6 and 7), may be used in accordance with the provisions of FAR 10.010 and FAR 10.011.

(xii) When the order is for mortuary services;

(A) The following clauses shall be inserted in the Schedule:

a. The Specifications clause in 252.237–7104;

b. The Delivery and Performance clause in 252.237–7107;

c. The Subcontracting clause in 252.237–7108;

d. The Professional Requirements clause in 252.237–7111;

e. The Facility Requirements clause in 252.237–7112;

f. The Preparation History clause in 252.237–7113;

g. The Inspection of Services clause in FAR 52.246–4.

(B) The Additional Default Provision clause in 252.237–7109 shall be inserted in the Schedule, with the following substitutions for paragraph (a) and the first sentence of paragraph (b) of that clause:

"(*1*) This clause supplements the "Termination for Default" clause of this contract.

(*2*) This contract may be terminated for default by written notice if during the performance of this contract:"

(C) The Changes clause in FAR 52.243–1 shall be substituted for paragraph 16 of the Additional General Provisions on DD Form 1155r.

(xiii) [Reserved]

(xiv) When required by 225.70, the clauses 252.225–7005, Preference for Certain Domestic Commodities, 252.225.7004(a), Preference for Domestic Specialty Metals (Major Programs), and 252–225–7004(b), Preference for Domestic Specialty Metals, shall be added.

(xv) When required by FAR Subpart 22.10, the clause, Service Contract Act of 1965, at FAR 52.222–41 for service contracts in excess of $2,500, or FAR 52.222–40 for service contracts not in excess of $2,500, shall be added.

(xvi) When required by FAR 47.305–6, the clause, Clearance and Documentation Requirements-Shipments to DoD Air or Water Terminal Transportation Points at FAR 52.247–52 shall be added.

(xvii) In accordance with FAR 46.805, the clause in FAR 52.246–23, Limitation of Liability, or FAR 52.246–25, Limitation of Liability—Services, may be inserted.

(xviii) When the order requires the use of a Government bill of lading or mailing indicia, the clause, FOB Origin-Government Bills of Lading or Prepaid Postage, at FAR 52.242–10 or FOB Origin-Government Bills of Lading or Indicia Mail, at FAR 52.242–11, shall be added.

(xix) [Reserved]

(xx) [Reserved]

(xxi) At the contracting officer's discretion, the clause, Duty-Free Entry—Qualifying Country End Products and Supplies, at 252.225–7003 may be used (see 225.605(S–72)).

(xxii) When required by FAR 22.305, the Contract Work Hours and Safety Standards Act—Overtime Compensation—General, clause in FAR 52.222–4 shall be added.

(xxiii) [Reserved]

(xxiv) [Reserved]

(xxv) When required by FAR 19.508(c), the Notice of Total Small Business Set-Aside clause in FAR 52.219–6 shall be added.

(xxvi) The changes authorized by Appendix U, para. 16–402.2 shall be incorporated when construction procedures are negotiated in accordance with FAR 36.401(c).

(xxvii) When required by FAR 47.305–4, the clause, FOB Destination, in FAR 52.247–34, and the clause, FOB Destination—Evidence of Shipments, in FAR 52.247–48, shall be added.

(xxviii) When required by 208.7303, the clause, Required Sources for Miniature and Instrument Ball Bearings, in 252.208–7000 shall be added.

(xxix) When required by 208.7403, the clause, Required Sources for Precision Components for Mechanical Time Devices, in 252.208–7001 shall be added.

(xxx) In accordance with 225.7312, all orders for the purchase of goods or services for Military Assistance Program (MAP), International Military Education Training (IMET) and Foreign Military Sales (FMS) shall include the clause, Exclusionary Policies and Practices of Foreign Governments, in 252.225–7013.

(xxxi) As required by FAR 22.1408, insert the clause, Affirmative Action for Handicapped Workers, in FAR 52.222–36.

(xxxii) If the order is to involve materials of a hazardous nature, include the clause, Hazardous Material Identification and Material Safety Data, in FAR 52.223–3, as prescribed in FAR 23.303.

(xxxiii) When the order involves the purchase of gas in contractor-furnished returnable cylinders and the contractor retains title to the cylinders, the clause in 252.213–7001, Returnable Gas Cylinders, shall be added. A similar clause may also be used in orders for other supplies involving reels, spools, drums, carboys, liquid petroleum gas containers, or other returnable containers, when the contractor is to retain title to the containers.

(xxxiv) In orders, except those exempted by FAR 22.807(a) or (b)(2) through (4), insert the Equal Opportunity clause in FAR 52.222–26.

(xxxv) When the purchase order includes FMS requirements, clearly indicate "FMS Requirement" on its face and specify within the order each FMS case indentifier code by line/subline item number, e.g., FMS Case Identifier GY–D–DCA.

(xxxvi) The clause, Delivery of Excess Quantities of $100 or Less, in FAR 52.212–10, may be used in accordance with instructions at FAR 12.403(b).

(xxxvii) For orders requiring payment in Canadian currency, the contract price shall be quoted in terms of Canadian dollars and shall be identified by the initials CN; e.g., $1,647.23CN. The contract shall clearly indicate on its face the U.S./Canadian conversion rate in effect at the time of award and the US dollar equivalent of the Canadian dollar contract amount.

(xxxviii) The Walsh-Healey Public Contracts Act clause in FAR 52.222–20 shall be used in each order for supplies that exceeds $10,000 and is otherwise subject to the act, in accordance with FAR 22.603.

(xxxix) Unless excepted under FAR 22.1302 or FAR 22.1308, the clause in FAR 52.222–35, Affirmative Action for Special Disabled and Vietnam Era Veterans, shall be in all orders of $10,000 or more.

(xl) The clause, Utilization of Small Business and Small Disadvantaged Business Concerns, in FAR 52.219–8 shall be in all orders exceeding $10,000 except those which will be performed entirely outside the United States, the District of Columbia, or the Commonwealth of Puerto Rico, or for orders which are for services personal in nature.

(xli) [Reserved]

(xlii) The clause Affirmative Action Compliance Requirements for Construction, in FAR 52.222–27 shall be inserted in orders exceeding $10,000 in accordance with FAR 22.810, unless excepted under FAR 22.807.

(xliii) The Equal Opportunity clause in FAR 52.222–26 shall be included in architect-engineering contracts and is applicable to contractors who have been or are awarded Federal contracts and/

or subcontracts which have an aggregate value in excess of $10,000. The clause is also applicable unless exempted under the rules, regulations and relevant orders of the Secretary of Labor (41 CFR, Ch. 60).

(xliv) Unless exempted by FAR 22.810, the clause, Certification of Nonsegregated Facilities, FAR 52.222–21 shall be inserted in orders exceeding $10,000 and is applicable to orders, subcontracts and agreements with applicants who are themselves performing Federally assisted construction contracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity clause.

(xlv) In accordance with FAR 22.810, the clause, Previous Contracts and Compliance Reports, in FAR 52.222–22 shall be inserted in all contracts that exceed $10,000.

(xlvi) Except for construction orders, the clause, Affirmative Action Compliance, in FAR 52.222–25 shall be inserted in all contracts that include the Equal Opportunity clause, in accordance with FAR 22.810.

(xlvii) Unless exempted by FAR 22.807, the clause, Notification of Visa Denial, FAR 52.222–29, shall be included in all orders to be performed in or on behalf of a foreign country.

(xlviii) In accordance with FAR 22.810, insert the clause, Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity, in FAR 52.222–23, in applicable solicitations involving construction in excess of $10,000. Follow the provision's parenthetical instructions for inserting the applicable construction trade(s), percentage goals, and geographical description of the covered area.

(xlix) In accordance with FAR 19.508(a), insert the clause, Notice of Small Business-Small Purchase Set-Aside, in FAR 52.219–4, in all requests for quotations and purchase orders of $10,000 or less, which are subject to small purchase procedures, unless excepted under FAR 13.105.

(2) *Use as a purchase order of not more than $25,000 outside the United States, its possessions, and Puerto Rico.* DD Form 1155 and 1155r–1, with executed contractor's acceptance when required, are authorized for negotiated purchases of not more than $25,000 when such purchases are for supplies and services procured and used outside the United States, its possessions, and Puerto Rico, *provided:*

(i) The procurement is unclassified.

(ii) No clauses covering the subject matter of any clause set forth in this Regulation, other than clauses set forth in DD Form 1155r–1, are to be used, except that—

(A) The Disputes clause at FAR 52.233–1 is inserted in the Schedule unless the contract is exempt pursuant to FAR 33.003.

(B) When the order is translated into another language, the Schedule shall contain the provision in 252.213–7000.

(C) When Government property having acquisition cost in excess of $50,000 is to be furnished (for use in performance of an order or for repair), the Government Property clause in FAR 52.245–2 shall be inserted in the Schedule in accordance with instruction in FAR 45.106. When Government property having an acquisition cost not in excess of $50,000 is to be furnished for use in performance of the order or for repair, the Government-Furnished Property (Short Form) clause in FAR 52.245–4 shall be inserted in the Schedule in accordance with instructions in that paragraph, *provided* that use of the clause shall be optional when the acquisition cost of property furnished for repair is not in excess of $10,000. When a Government Property clause is inserted in the Schedule, the contractor's signature shall be obtained on DD Form 1155r–1.

(D) A commercial warranty clause may be used in accordance with FAR 46.706.

(E) When required by 225.70 one of the clauses in 252.227–7005, Preference for Certain Domestic Commodities; or 252.227–7004(a), Preference for Domestic Specialty Metals (Major Programs); or 252.227–7004(b), Preference for Domestic Specialty Metals, shall be added. In purchases in excess of $2,500, the clause, Certain Communist Areas, in FAR 52.225–11 shall be inserted in the Schedule when acceptance of supplies, services, or construction is to take place outside the United States, its possessions or Puerto Rico. FAR 25.603 provides that supplies from the Communist areas of North Korea, Vietnam or Cuba may be acquired only in unusual situations; for example, in an emergency or when supplies are not available from any other source and a substitute supply is not acceptable. In such situations, the contracting officer shall determine for small purchases that there is need for an exception in accordance with Departmental procedures.

(F) The clause, Delivery of Excess Quantities of $100 or Less, in FAR 52.212–10 may be used in accordance with instructions at FAR 12.403(b).

(F) Unless exempted by FAR 22.807, the clause, Notification of Visa Denial, at FAR 52.222–29, shall be included in all orders to be performed in or on behalf of a foreign country.

(H) In accordance with FAR 25.302, the statement in FAR 52.225–6 or 7 to provide reporting of the balance of payments consequences of Defense procurement, will be placed on the face of applicable purchase orders.

(I) The contracting officer may delete the Taxes clause from the DD Form 1155r–1 in purchases under $1,000 if he determines that the administrative burden of securing relief from such taxes would be out of proportion to the relief obtained, *provided,* that such clause shall be included in all orders in support of NATO infrastructure programs involving the expenditures of funds under Section 503(b) of the Foreign Military Sales Act of 1968. (see FAR 29.402 on use of foreign taxes clauses).

213.505–70 Instructions for entries on DD Form 1155 and Standard Form 36.

(a) The instructions herein are mandatory for the preparation of orders if administration is assigned: (1) to DCAS, or (2) to a non-DCAS office listed in the DoD Directory of Contract Administration Services Components and the contractor is located in the continental United States or Canada.

(b) The organizational entity codes (address codes) referenced throughout Part 13 are as follows:

(1) *Codes published in DoD Activity Address Directory (DODAAD), DoD 4000.25D.* These codes will be used for Government entities in Blocks 6, 7, 9, 14, 15, and 19. However, the "Ship To" (Block 14) and "Ship To"/"Mark For" (Block 19) (viii) and (xi)) shall use a DODAAD code for non-Government entities for shipments to satisfy MILSTRIP requisitions for that non-Government entity. Foreign Military Sales (FMS) and Military Assistance Program (MAP), "Ship To"/"Mark For" (Block 14) shall use a Military Assistance Program Address Directory (MAPAD) code (MAPAC and TAC) in accordance with DoD 5105.38–D.

(2) *Codes published in Handbook of Non-Government Organizations for MILSCAP H8–1/H8–2 Handbooks.* These codes will be used for non-Government entities in Blocks 9, 14, and 19, except for the condition as noted in (b)(1) above.

(c) The right hand columns designate by alpha code the activities responsible for completing certain blocks on the DD Form 1155. The legend is "C" for contractor, "P" for purchasing office, and "—" for not applicable.

TITLE AND INSTRUCTIONS FOR ENTRIES

Block No.		Applicable to—		
		RFQ	PO	DO
1	*Contract/Purchase Order Number*—Enter the Procurement Instrument Identification (PII) number and, when applicable, the supplementary identification number for contracts and purchase orders as prescribed in Subpart 204.70.	—	P	P
2	*Delivery Order Number*—Enter PII number for delivery orders as prescribed in Subpart 204.70.	—	—	P
3	*Date of Order*—Enter the date of the order, i.e., 2 position numeric year, 3 position alpha month and 2 position numeric day. For example: 71 Sep 30.	—	P	P
4	*Requisition/Purchase Request Number*—Enter the applicable number authorizing the purchase. When the number differs by line item it will be listed in the schedule and this block annotated "see schedule".	P	P	P
5	*Certified for National Defense Under DMS Reg 1*—Enter the appropriate claimant program number as defined in Volume I, Section III of the DoD Procurement Coding Manual.	—	P	P
6	*Issued By*—Insert the name and address of the issuing office. In the Code Block, insert the appropriate DODAAD code for the issuing office. Directly below the address insert: Buyer/Symbol, followed by the appropriate buyer's name and routing symbol. Directly below the Buyer/Symbol insert: Phone: followed by the buyer's phone number and extension.	P	P	P
7	*Administered by*—Enter the name and address of the DCAS or military activity responsible for administration service. The "DoD Directory of Contract Administration Services Components" No. 4105.59H contains the complete listing of activities performing contract administration services. On purchase orders retained by purchasing offices for administration this block may be marked "see block 6." Enter in the code block the organizational entity code (address code) of the administration services office. In the lower right or left-hand corner, insert Criticality Designator code (see FAR 42.1105).	—	P	P
8	*Delivery FOB*—Indicate the FOB point by checking applicable box	P	P	P
9	*Contractor/Quoter*—(i) Enter the full business name and address of the contractor or quoter. Enter in the first code block the organizational entity code (address code) of the contractor. (ii) If it is known that all the work covered by the order is to be performed at an address different than the address represented by the contractor's code, and any contract administration function will be required at that facility, enter in the facility code block the appropriate address code for that facility, i.e., H8–1/H8–2 code for a nongovernment entity or DODAAD code for a government entity (DODAAD codes shall be used only to indicate "performed at" locations for orders specifying services at a government location.) If it is known that multiple facilities are involved, i.e., when the work covered by the order is performed both at the contractor's address and one or more other facilities, or when all the work is to be performed at two or more facilities other than the contractor's address), indicate the codes for all facilities at which work is to be performed, including the contractor's code if work is performed at that address, in the Standard Form 36 Continuation Sheet and mark the facility code block with "See Schedule." For orders specifying services which will be performed at locations other than the contractor's address, the locations shall be indicated as required above.	P	P	P
10	*Delivery to FOB Point by*—If a single date of delivery is applicable to the entire order it shall be entered in this block. Multiple delivery dates will be listed in the schedule and this block annotated "See Schedule".	P	P	P
11	*Small Business*—Check if the contractor/quoter is a small business concern as defined in FAR 19.	C	P	P
	Minority Business—Check if the contractor/quoter is a minority business enterprise as defined in FAR 52.219–2.	C	P	P
12	*Discount Terms*—Enter the discount for prompt payment in terms of percentages and corresponding days allowed. The percentage will be expressed in whole numbers and decimals. For example: 3.25%—10 days; 0.50%—20 days.	C	P	—
13	*Mail Invoices to*—Enter a reference to the block number containing the appropriate address to which invoices are to be mailed. When not contained in blocks 6, 7, 14 or 15 insert in block 18 "See Schedule".	—	P	P
14	*Ship to*—If a single ship to point is applicable to the entire order the name and address of that point may be entered in this block. Multiple ship to points will be shown in the schedule and this block annotated "See Schedule".	P	P	P
15	*Payment Will be Made by*—Enter the name and address of the activity making payment. For purchase orders assigned to DCAS see the "DoD Directory of Contract Administration Components No. 4105.59H for the DCAS Regional Office authorized to make payment. Enter in code block, the organizational entity code (address code) of the paying activity	—	P	P
16	*Type of Order*—Indicate by checking the appropriate box whether order is a purchase or delivery order. If a purchase order, further entries are made as follows: (i) Indentify the type of quotation, i.e., oral, letter or TWX on which the order is based. (ii) When the Fast Payment procedure is applicable, indicate by checking the appropriate box. (iii) Check the box when acceptance of the purchase order by the Contractor is desired and indicate the number of copies of the order to be returned to the issuing office.	—	P	P
17	*Accounting and Appropriation Data*—Enter the accounting classification applicable to the order. Enter the Accounting Classification Reference Number(s) in accordance with 4.71.	—	P	P
18	*Item Number*—Enter an item number for each item of supply or service separately identified in accordance with Subpart 204.71.	P	P	P
19	*Schedule of Supplies/Services*—The Schedule contains several elements of data. In order to accomplish standardization objectives, it will be necessary to treat and enter separately certain elements of data as indicated below. Though the order and arrangement of data in the schedule is only mandatory for purchase and delivery orders assigned to DCAS or Plant Cognizance Representatives for administration, it is encouraged, in order to establish uniformity, that this format be adopted for all orders.	P	P	P
	(i) *National Stock Number (NSN)*—Total Item Quantity for the line or subline item number followed by the appropriate National Stock Number or the word "non" if an NSN has not been assigned. On the same line and adjacent to NSN, enter the words "Total Item Quantity." This phrase is used in conjunction with the total quantity, unit of issue unit price, and dollar amount of the stock number or item cited (see entries for blocks 20, 21, 22 and 23).	P	P	P
	(ii) *Item Identification*—Enter first the most descriptive noun or verb of the supplies or services to be furnished, supplemented by additional description as prescribed in FAR 10. If multiple accounting classifications apply to the contract, enter the Accounting Classification Reference Number in accordance with Subpart 204.71.	P	P	P

TITLE AND INSTRUCTIONS FOR ENTRIES—Continued

	Block No.	Applicable to—		
		RFQ	FO	DO
	(iii) *Quantity Variance*—Enter the quantity variance permitted for the line item in terms of percentages, indicating whether the percentage is plus or minus and if applicable to each destination.	P	P	P
	(iv) *Inspection/Acceptance*—Enter the point at which inspection/acceptance will take place...	P	P	P
	(v) *Preservation and Packaging*—Enter the preservation and packaging requirements for the item described. These requirements may be expressed in terms of MIL-STD-726 codes or reference to applicable specifications. 1st Example: MIL STD 726 PRES/PACK: B/10/1/00/2/10/c/00/21/3/22/4/3/2/00. 2nd Example: Preservation and packaging shall be in accordance with instructions below DGSP P-54 in lieu of level "c" requirement.	P	P	P
	(vi) *Packing*—When required, enter the packing level designator and specification, standard, or document in which the requirements are stated or state the specific requirements. 1st Example: Packing. Preserved and packaged items shall be packed Level (A, B, or C depending on destination) in accordance with MIL-STD-794; 2nd Example: Packing. Preserved and packaged items shall be packed level (A, B, or C) in accordance with DESC. Manual 4100./.	P	P	P
	(vii) *Unitization*—When desired by the requiring activity, a requirement for cargo unitization for a particular destination should be specified for shipments involving two or more shipping containers having an aggregate total of not less than 20 cubic feet or 200 pounds. Example 1: Items packed for shipment shall be unitized in accordance with MIL-STD-147. Example 2: Nonperishable subsistence, packed as specified shall be unitized in accordance with MIL-L-3507BC Type (I or II) Class (A through F for Type I, A through D for Type II.) Supplemental waterproofing requirements of Appendix II (are/are not) applicable.	P	P	P
	(viii) *Ship to*—Enter the organizational entity code (address code) of the ship to point on the first line and the corresponding name and address on succeeding lines. If multiple accounting classifications apply to the same line or subline item, enter the Accounting Classification Reference Number in accordance with Subpart 204.71. When several items are to be shipped to the same point, the code will be listed; but, it will not be necessary to repeat the clear text address.	P	P	P
	(ix) *Delivery Date*—When multiple delivery dates apply, enter the required date of delivery on the same line with Ship to Code.	P	P	P
	(x) *Mark For*—Enter the organizational code (address code) on the first line and name and address of the ultimate recipient of the supplies and services on succeeding lines.	P	P	P
20	*Quantity Ordered/Accepted*—Enter the total quantity ordered for the line item. If applicable, enter the breakdown on quantities for each ship to point within the line item.	P	P	P
21	*Unit*—Enter the unit of measure applicable to the line items described	P	P	P
22	*Unit Price*—Enter the unit price applicable to the line item described	—	P	P
23	*Amount*—Enter the extended dollar amount (quantity x unit price) for each line item	—	P	P
24	*Contracting/Ordering Officer*—The contracting/ordering officer's signature will be entered in this block.	—	P	P
25	*Total Amount*—Enter the total dollar amount for all line items on the order	—	P	P
26-42	These blocks are utilized in the receiving and payment functions. Procedures for making entries are prescribed by the respective departments.			

213.505-71 Use of DD Form 1155 as a public voucher.

DD Form 1155 is authorized for use as a public voucher:

(a) Not exceeding $25,000 when the form is used as a purchase order,

(b) Without monetary limitation when the form is used as a delivery order, and

(c) Without monetary limitation as the basis for payment of an invoice against blanket purchase agreements, or basic ordering agreements with a firm price has been established.

PART 214—FORMAL ADVERTISING

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 214.2—Solicitation of Bids

214.201 Preparation of invitations for bids.

Reserved, pending determination to what extent guidance may be necessary.

214.202 General rules for solicitation of bids.

214.202-1 Bidding time.

(a) *Policy.* For potential sources in participating countries, see 225.7403(a); for sources in FMS/offset arrangement countries, see 225.7310(c)(2); and for sources in defense cooperation countries, see 225.7502.

214.202-5 Descriptive literature.

(b) *Policy.* It may be appropriate to require descriptive literature in the acquisition of highly technical or specialized equipment, where considerations such as design or style are important in determining acceptability of the product.

(d) *Requirements of invitation for bids.* When brand name or equal purchase descriptions are used, the requirements of FAR 14.202-5 are met by inserting in the invitation for bids the brand names provision at 252.210-7000.

214.205 Solicitation mailing lists.

214.205-1 Establishment of lists.

(a) For special instructions relative to the establishment of a Research and Development Bidders Mailing List, see Supplement No. 4, "Procedures for Submission of Applications to be Placed on Research and Development Bidders Mailing Lists."

214.205-5 Release of solicitation mailing lists.

(a) When it is necessary to dispatch identical information by means of electrical transmission to prospective bidders or offerors, the electrically transmitted message, when released for communications handling, shall be marked "BOOK MESSAGE—TRANSMIT A SINGLE ADDRESS MESSAGE" to preclude prospective bidders or offerors knowing the names of others solicited. However, information as to sources solicited may be made available to other Government agencies, at their specific request and upon the condition that the list will not be made available for inspection prior to award to anyone outside the Government.

214.207 Pre-bid conference.

A pre-bid conference may be used only when approved at a level higher than the contracting officer. All interested parties, including representatives from qualifying country sources, shall be invited to the pre-bid conference. (See 225.7403(a), 225.7310(c)(2), and 225.7502.)

214.208 Amendment of invitation for bids.

(a) Pen and ink entries, deletions, or alterations shall not be made in an invitation for bids after it has been reproduced for issue to prospective bidders. Any changes required to the IFB shall be made by standard Form 30.

214.270 Master solicitation.

A master solicitation is a document containing the text of special provisions which have been identified as being essential for carrying out the peculiar needs of a specific commodity assignment to a single contracting activity within DoD. The document is prepositioned with potential sources who are requested to retain them for continued and repetitive use. The purpose of this technique is to simplify solicitation and award documents, to reduce the size of solicitations and awards, and concurrently to achieve time and dollar savings for both the Government and industry. The master solicitation technique involves two separate phases, the issuance of the master solicitation and the issuance of the individual solicitation/award. In addition, use of this technique to meet such peculiar requirements shall be subject to the following criteria:

(a) The master solicitation shall not be used unless repetitive purchases are anticipated.

(b) The master solicitation shall not include nonessential or infrequently used provisions.

(c) The master solicitation shall consist primarily of those locally developed provisions relating to instructions and procedures requiring repetitive use that cannot otherwise be avoided through use of FAR or DoD FAR Supplement clauses. The master solicitation may include FAR Part 52 clauses and DoD FAR Supplement clauses.

(d) Copies of a master solicitation shall be made available upon request.

(e) Each individual solicitation shall reference the date of the current master solicitation and any changes thereto. Significant revisions or a significant number of revisions should result in a reissuance of the entire master solicitation.

(f) Copies of contracts furnished to the contract administration activity must be complete and shall include a copy of the master solicitation unless prior arrangements have been made.

(g) The use of this technique shall be limited to those situations where it is clearly demonstrable that a substantial reduction of paperwork and simplification of the contracting process will result. Approval by the Head of the Contracting Activity is required.

Subpart 214.4—Opening of Bids and Award of Contract

214.406 Mistakes in bids.

214.406–3 Other mistakes disclosed before award.

(e) Authority for making a determination under FAR 14.406–3(a), (b), (c), and (d) may be delegated, without power of redelegation, as follows:

(1) Department of the Army: To the Deputy Assistant Secretary (Acquisition), Office of the Assistant Secretary of the Army (Research, Development and Acquisition); General Counsel of the U.S. Army Materiel Development and Readiness Command; General Counsel of the Office of the Chief of Engineers; Chief, Contract law Division, Office of The Judge Advocate General, Headquarters, Department of the Army.

(2) Department of the Navy: To the Assistant Commander for Contracts, Naval Facilities Engineering Command Headquarters; the Deputy Commander Purchasing, Naval Supply Systems Command Headquarters.

(3) Department of the Air Force: To the Staff Judge Advocate, Headquarters, Air Force Logistics Command.

(4) Defense Logistics Agency: The Counsel and Assistant Counsel.

(5) National Security Agency: Director of Procurement.

(6) Defense Communications Agency: The Counsel.

(7) Defense Nuclear Agency: The Counsel.

(8) Defense Mapping Agency: The Counsel.

(g)(3)(iv) Supporting evidence (such as work sheets, or other data used in preparing the bid) of the existence of the mistake and manner in which it occurred, and supporting evidence of the bid actually intended, shall be submitted with the bidder's written request.

(h) A signed copy of the administrative determination authorizing withdrawal or modification of the bid made in accordance with FAR 14.406–3 shall accompany the appropriate finance center copy of the contract award.

214.407 Award.

214.407–1 General.

(c)(3) When two or more awards are made to a single bidder on an invitation, the copy of the successful bid marked "original" will be attached to the appropriate finance center copy and a copy marked "duplicate" will be attached to the retained office copy of the first award issued. Succeeding awards will be inscribed to indicate the number of the award to which the original and duplicated bids are attached. This is necessary for legal review and auditing the General Accounting Office.

214.407–3 Prompt payment discounts.

If the acquisition is one regarding which bidders may offer prompt payment discounts, the discounts provision in 252.214–7000 shall be included in the solicitation.

214.407–6 Equal low bids.

(b) When award is to be made by drawing by lot and the information available shows that the product of a particular manufacturer has been offered by more than one bidder, a preliminary drawing by lot shall be made to ascertain which of the bidders offering the product of a particular manufacturer will be included in the final drawing to determine the award.

214.408 Information to bidders.

214.408–2 Award of classified contracts.

Disposition action shall be taken in accordance with the industrial Security Manual, (DoD 5220.22–M).

Subpart 214.5—Two-step Formal Advertising

214.503 Procedures.

214.503–1 Step one.

(a) Requests for technical proposals may be in the form of letter.

(i) The written notification to offerors required by FAR 14.503–1(i) shall advise offerors of the discontinuance of two-step formal advertising and the reason therefor.

214.503–2 Step two.

(a)(3) The statement required by FAR 14.503–2(a)(3) should be set forth in the item description by a provision substantially in the form of the following example:

Radio Antenna, in accordance with Exhibit No.——dated——(use other description of specifications as appropriate), and your Technical Proposal——(insert specific identification of the bidder's proposal, including any revision thereof as finally accepted), incorporated herein by reference. Nothing contained in said Technical Proposal shall constitute a waiver of any of provisions of said Exhibit (or specifications).

PART 215—CONTRACTING BY NEGOTIATION

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 215.1—General Requirements for Negotiation

215.104 Authorization and approval.

(c) Business clearances or approvals shall be obtained as prescribed by applicable departmental procedures.

215.105 Competition.

(S–70) *Responsibility of requirements and other logistics personnel in purchasing offices.* Personnel other than the contracting officer, who determine type, quality, quantity, and delivery requirements for items to be purchased, can influence the degree of competition obtainable and exert a material effect upon prices. Failure to determine requirements in sufficient time to allow: (i) a reasonable period for preparation of requests for proposals; (ii) preparation of quotations be offerors; (iii) contract negotiation and preparation; or (iv) adequate manufacturing lead time; causes delays in deliveries and uneconomical prices. Requirements issued on an urgent basis or with unrealistic delivery schedules should be avoided, since they generally increase prices or restrict desired competition.

215.170 Records and reports of negotiated contracts.

In addition to the records and reports described in FAR 4.8 and this Supplement 215.211 and 215.217, each department is required to maintain a record of the total value of all contracts negotiated by it during each fiscal year under each of the circumstances permitting negotiation enumerated in FAR 15.2. These records, and reports based thereon, are maintained through the Department of Defense procurement reporting system described in Subpart 204.6.

215.171 Aid to small business and disadvantaged business concerns in negotiated acquisitions.

When negotiation is conducted, consideration shall be given to the size and minority status of the business concerns, and when subcontracting is consistent with the best interest of the Government, the extensive use of subcontractors shall be a favorable factor (See Part 219 and Subpart 217.1).

215.172 Aid to labor surplus area concerns in negotiated acquisitions.

When negotiation is conducted, consideration shall be given as to whether the prospective supplier is a labor surplus area concern (See Part 220).

215.173 Negotiation of initial production contracts for technical or specialized military supplies.

(a) The production of important new technical or specialized military supplies generally involves development, evaluation, and initial production phases. Examples of such supplies are tanks, radar, guided missiles, aircraft, rockets, and equipment of similar complexity; major components of such equipment as the foregoing; and any items of technical or specialized nature necessary for the use, maintenance or operation of such equipment. Contracting officers shall avoid, wherever practicable, awarding initial production contracts for supplies until completion of the development and evaluation phases. At the time of placing the initial production contract, it is essential that the Government be completely free to select the contractor as the best interest of the Government may dictate. In the placement and administration of research or development contracts, no commitments shall be made to contractors with respect to obtaining subsequent production contracts. Acquisition of initial production quantity of an item shall not be initiated until the item has been approved for service use unless prior approval has been obtained. When justified by special circumstances, acquisition of production quantities in advance of approval for service use may be authorized for the Departments of the Army and Air Force by Heads of the Contracting Activity, and for the Department of the Navy by the appropriate authority set forth in SECNAV Instruction 3900.30 and 3960.2.

(b) In connection with the foregoing it may be in the best interest of the Government that the initial production contract for technical and specialized supplies be placed with the contractor responsible for the development of the design for such supplies. Accordingly, it is essential that, in placing such initial production contracts, an analysis be made of the importance to be attached to the following considerations:

(1) Extensive preliminary research and development work which can be put to most effective use in production by the resarch and development contractor for any of the following reasons:

(i) A need for adaptation of the newly developed equipment for quantity manufacture, and for introduction of advanced production methods, together with a significant interrelationship between the design engineering and production engineering, which will yield best results from the standpoint of performance, reliability, and producibility; or

(ii) The substantial time and money which would be required for another contractor to indoctrinate and train his engineering staff in the specialized techniques or novel design concepts which have been employed, thereby adding to production lead time.

(2) Continuing improvement of the equipment, concurrent with production which can be most effectively accomplished by a single contractor because of the advantages of unified responsibility and close coordination of improved design features with production processes and equipment.

(3) Substantial time and effort which have been already expended by the development contractor in developing a prototype.

(4) The advantages to be gained through obtaining production drawings, e.g., detailed manufacturing, process, and assembly drawings, with rights to use for acquisition purposes at the earliest possible date for competitive reprocurement purposes by placing production engineering contracts and the first production contract with the developer (see (d) below).

(c) When it is in the Government's interest to award the initial production contract to the development contractor, price alone should not be allowed to dictate an award elsewhere unless a fair and reasonable price cannot be negotiated with the development contractor, or unless the price advantaged in award to another supplier is so substantial as to outweigh the other factors involved. This 215.173 is not to be construed to require or to prevent competitive pricing. Initial production contracts shall not be awarded to development contractors who do not have fully adequate and available financial, technical and production resources.

(d) The number of items to be acquired under an initial production contract will be established only after considering all pertinent factors, including the practical minimum quantity suitable to permit the development of the production design and a data package adequate to establish competitive acquisition of the item at the earliest practicable date.

(e) To the extent practicable, the initial production contract should also provide for the furnishing of an initial supply of special testing equipment, special tools, demonstration sets, and manuals required for operation, maintenance and training.

215.174 Abstract of offers.

The abstract of offers required by FAR 4.803(a)(10) shall be prepared on Abstract of Offers (SF Form 1409) or Abstract of Offers-Construction (SF Form 1419) appropriately modified (see FAR 53.2) to include all the information necessary for evaluation (but see FAR 15.413 and FAR 15.610). These forms need not be used in the case of acquisition from a single source of supply, for research and development, for the chartering of vessels by the Military Sealift Command, for the acquisition of coal and petroleum products by the Defense Fuel Supply Center, or for perishable subsistence items by the Defense Personnel Support Center.

Subpart 215.2—Negotiation Authorities

215.202 Public exigency.

(b) *Application.* The following are illustrative of circumstances with respect to which the authority of 10 U.S.C. 2304(a)(2) may be used:

(1) Supplies, services or construction needed at once because of fire, flood, explosion, or other disaster;

(2) Essential equipment for, or repair to, a ship when such equipment repair is needed at once for compliance with the orders of the ship;

(3) Essential equipment for, or repair to, aircraft grounded or about to be

grounded, when such equipment or repair is needed at once for the performance of the operational mission of such aircraft;

(4) Construction needed at once to preserve a structure or its contents from damage;

(5) Essential equipment for, or repair to, missiles or missile support equipment, when such equipment or repair is needed at once to preclude impairment of launch capabilities or mission performance;

(6) Purchase requests citing an issue priority designator under the Uniform Material Movement and Issue Priority system (UMMIPS), which may justify negotiation under this or other negotiation authority, but in such cases the specific circumstances must be set forth in the determination and findings; or

(7) Purchase requests citing "Electronic Warfare QRC Priority" as the priority designator.

215.210 Impracticable to secure competition by formal advertising.

(b) *Application.*

(14) The applicable agency regulation within DoD referred to in FAR 15.210(b)(14) is Joint Regulation DoD 4500.34–R.

215.212 Technical equipment requiring standardization and interchangeability of parts.

(b) *Application.*

(2)(ii) The phrase "during combat or other emergency" applies to the end of FAR 15.213(b)(2)(ii) within DoD.

(3)(ii) Within DoD, the "agency standardization program" referred to in FAR 15.213(b)(3)(ii) is the Defense Standardization Program.

(5) The period of standardization shall not exceed 6 years. In addition to this period bearing a reasonable relationship to the life of the equipment, it shall also be related to the anticipated rate of change in design and interchangeability of components. Actions taken under the authority of FAR 15.213 and this Section shall be recorded and reviewed by the originating department at a level designated by the approving authority, at least once every two years to determine whether the standardization should be continued, revised, or cancelled. The redesign or redesignation of a model which has been standardized will not require revision or cancellation of standardization approval if interchangeability of parts of the new model with those of the model standardized is not affected in any significant respect.

215.215 Otherwise authorized by law.

(b)(2) *Application.* The authority of this paragraph shall be used only if, and to the extent, approved for any Department and in accordance with Departmental procedures.

215.270 Records and reports for purchases for experimental, development or research work and purchases in the interest of national defense or industrial mobilization.

Each department is required to maintain a record of the name of each contractor with whom a contract has been entered into pursuant to the authority of FAR 15.211 and FAR 15.217, together with the amount of the contract and (with due consideration given to the national security) a description of the work required to be performed thereunder. These records, and reports based thereon, are maintained through the Department of Defense acquisition reporting system described in Subpart 204.6.

Subpart 215.3—Determinations and Findings to Justify Negotiation

215.302 General.

(c) As an example of reasonable variations in estimated quantities, if at the time a D&F is submitted for approval, historical evidence indicates the possibility of increased quantities, e.g., requirements of other Departments, and Military Assistance Program requirements, at the time of negotiation, the supporting data and the D&F may provide for limited additional quantities. Similarly, a provision may be included authorizing increased quantities if negotiations reveal that additional quantities can be acquired under the approved program and within available funds.

215.304 Content.

Additional guidance to that contained in FAR 15.304 for the preparation of a justification for negotiation in support of a D&F is set forth in Appendix J. A D&F with respect to negotiation of an individual contract or class of contracts should conform generally to the appropriate format set forth in Appendix J.

215.307 Signatory authority.

The Agency Head may also make any of the determinations, and written findings in support thereof, that may be made by the head of any contracting activity signing as a chief officer responsible for contracting or by a contracting officer. Determinations, and findings in support thereof, not required to be made by higher authority may be made with respect to individual purchases or contracts by the head of a contracting activity signing as chief officer responsible for contracting. D&Fs for acquisition by negotiation with respect to coordinated acquisition shall be made in accordance with Subpart 208.70. Whenever Table 15–1 of FAR 15.307 limits authority to sign a D&F to the agency head (see Subpart 2.1), the Under Secretary of Defense Research and Engineering shall exercise the authority with regard to any procurement proposed by a defense agency.

215.370 Responsibility for preparing the D&F.

The contracting officer is responsible for preparing the D&F. Requirements and technical personnel are responsible for the accuracy and adequacy of the factual information supporting the findings. Supporting information within the functional areas of requirements and technical personnel shall be furnished to the contracting officer in writing.

Subpart 215.4—Solicitation and Receipt of Proposals and Quotations

215.402 General.

(f) Examples of circumstances under which an oral solicitation may be used include those listed in 215.202(b). However, oral solicitation is not to be considered justified solely because a high issue Priority Designator has been assigned to the requirement. Should the issuance of a resulting contractual instrument be unduly delayed, following oral solicitation, the contract file should be documented to describe the reasons for the delay and justify award based upon the oral solicitation.

215.406 Preparing requests for proposals (RFP's) and requests for quotations (RFQ's).

Reserved, pending determination to what extent guidance may be necessary.

215.410 Amendment of solicitations before closing date.

Requests for quotations may be amended by letter.

215.411 Receipt of proposals and quotations.

215.411–70 Maintenance and disposition of proposals and quotations.

Both solicited and unsolicited proposals shall be maintained and disposed of pursuant to FAR 4.803.

215.414 Forms.

(a) Letter RFPs and RFQs may also be used provided they otherwise comply with the requirements of FAR and this regulation.

(b) In the acquisition of subsistence, DPSC Form 300, Order for Subsistence, may be used for award purposes.

215.470 Master solicitation.

A master solicitation for negotiated contracts may be established, maintained, and utilized in accordance with 214.270.

Subpart 215.5—Unsolicited Proposals

215.504 Advance guidance.

(b)(2) Agencies shall, where applicable, in addition to the requirements of FAR 15.504(b)(2), also make available to potential offerors of unsolicited proposals requirements concerning cost sharing (see 235.003(b)).

215.506 Agency procedures.

215.506–1 Receipt and initial review.

(c) In addition to the requirements of FAR 15.506–1(c), agencies shall advise offerors of the disposition or intended disposition of the material submitted as the unsolicited proposal. The agency shall not deny reconsideration of a timely and appropriately revised or supplemented proposal which meets the requirements of FAR 15.506–1(a). When it is determined that a meritorious unsolicited proposal is not related to the mission of the recipient agency or may be of interest to other agencies in addition to the recipient agency, the recipient agency may identify for the offeror other agencies whose missions bear a relationship to the subject matter of the unsolicited proposal.

215.507 Contracting methods.

(b)(S–70). When so limited by an applicable DoD Appropriation Act, contracts for studies, analyses, or consulting services (see FAR 37.2) may be entered into on the basis of an unsolicited proposal only when the head of the contracting activity or his designee (no lower than the chief of the contracting office) determines that:

(i) As a result of thorough evaluation, only one source is found fully qualified to perform the proposal work; or

(ii) The purpose of the contract is to explore an unsolicited proposal which offers significant scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source; or

(iii) The purpose of the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to insure that a new product or idea of a specific concern is given financial support; except that this limitation shall not apply to contracts in an amount of less than $25,000, contracts related to improvements of equipment that is in development or production, or contracts as to which a civilian official of the Department of Defense who has been confirmed by the Senate, determines that the award of such contract is in the interest of national defense.

Subpart 215.6—Source Selection

215.603 Purpose.

(d) In addition, source selection procedures are designed to ensure selection of the source whose proposals in the best interests of the Government, price and other factors considered.

215.607 Disclosure of mistakes before award.

(c)(3) Authority to make the determination is delegated to the head of the contracting activity with authority to redelegate to the chief of the contracting office.

215.613 Alternative source selection procedures.

"Four-Step" Source Selection Procedures are as follows:

(a) *General.*

(1) The Four-Step process, briefly described, is the (i) submission and evaluation of the offeror's technical proposal; (ii) submission and evaluation of the offeror's cost proposal; (iii) establishment of the competitive range and selection of the apparent successful offeror; and (iv) negotiation of a definitive contract.

(2) The conventional process differs in that (i) offerors' technical and cost proposals are submitted and evaluated simultaneously; (ii) definitive contracts are negotiated with all offerors in the competitive range; and (iii) the contractor is selected. One additional difference in the two processes involves discussion of proposal deficiencies. In the Four-Step process, deficiencies are not revealed to the individual offerors, while in the conventional process protracted discussions may evolve around proposal deficiencies.

(3) These procedures are designed primarily to: focus attention on technical excellence, maintain the integrity of each offeror's proposal, provide visibility of discriminating features between proposals, reduce the opportunity for buy-ins, preclude the opportunity for the use of auctioning techniques and assure a disciplined and orderly process in the selection of sources. To this end, early and open dialogue, e.g., pre-solicitation notices and conferences, pre-proposal conferences, informal solicitations and the tailoring of specifications, is encouraged to establish a better understanding of the Government's needs.

(4) Following the technical evaluation and discussions, cost/price proposals are obtained from each offeror together with any necessary clarifications of technical proposals. Subsequent to the receipt of the cost/price proposals and any technical clarifications, a competitive range is established. Those proposals outside the competitive range are eliminated at this point and the offerors so notified. Limited discussions are then held with the remaining offerors on their cost/prices proposals and any technical clarifications. Following such discussions, a proposal may be eliminated from further consideration and the offeror so notified when it is determined to be no longer in the competitive range.

(5) At the completion of technical and cost price discussions, a common cut-off date of the receipt of final technical and cost/price proposals based upon those discussions is then established and the remaining offerors so notified. An evaluation is then made of each offeror's total proposal and a single offeror is normally selected for negotiation of a contract (see 215.613(h)(7)). In order to release proposal teams at the earliest practical date, all offerors are notified of the contractor selected.

(6) A definitive contract is then nogotiated with the selected offeror and contract award accomplished. These negotiations must be completed in a timely manner and must not involve changes in the Government's requirements or the contractor's proposal which would affect the basis for source selection. In the event a definitive contract cannot be awarded on a timely basis, negotiations may be terminated and a new source selection decision made.

(b) *Applicability.* These procedures may be used at the discretion of the Contracting Officer for competitively negotiated research and development acquisitions with an estimated value of two million dollars or more. They may also be used for any other acquisition when approved in accordance with Departmental procedures subject to the restrictions below. Use of these procedures is not appropriate when Government evaluation of initial proposals, without discussion of proposal deficiencies, will be sufficient to determine the best overall offer to the Government. Acquisitions for which these procedures are not used shall follow the procedures of FAR 15.6.

(c) *Restrictions.* These procedures should not be used for acquisitions in which the necessity to conduct

extensive negotiations is anticipated. These procedures shall not be used for any acquisitions which:

(1) Are negotiated pursuant to FAR 15.202;

(2) Are solely for personal or nonpersonal services;

(3) Are for architect-engineer services; or

(4) Have an estimated value of less than two million dollars.

(d) *Procedures.* Acquisitions subject to this paragraph shall be conducted in accordance with the following procedures:

(1) *Solicitations.* Solicitations shall be developed in accordance with FAR 15.4 and shall include the following special requirements and instructions:

(i) A general statement explaining the concept and procedures to be used in the selection of a contractural source of the proposed acquisition.

(ii) The relative importance of technical/system performance criteria.

(iii) A notification that any proposals which are unrealistic in terms of technical or schedule commitments or unrealistically low in cost or price will be deemed reflective of an inherent lack of technical competence or indicative of failure to comprehend the complexity and risks of the proposed contractual requirements and may be grounds for the rejection of the proposal.

(iv) A schedule of planned source selection events including, but not limited to, specific dates for the submission of both technical and cost/price proposals.

(v) Provisions requiring sequential submission of separate technical and cost/price proposals.

(vi) Requirements for the technical proposal to include, where appropriate, identification of trade-offs among performance, production costs, operating and support costs, schedule and logistic support factors; and requirements for cost estimates which illustrate the impact of these trade-offs. In addition, requirements of the technical proposal to include information necessary to indicate that the design to cost and operating and support cost objectives, when used, would be achieved when the item(s) enters production.

(vii) Requirements for the cost proposal to include the detailed, substantiating cost information pertaining to the performance of the contemplated contract and other detailed data necessary for evaluation of cost factors to be considered in the source selection decision.

(viii) A statement that both technical and cost/price discussions will be limited as set forth in (f)(2) (ii) and (iii) below.

(ix) A notification that negotiations will be conducted only with the selected offeror, and that offerors should represent their most favorable technical and cost/price proposals initially.

(e) *Step one—evaluation and discussion of technical proposals.* A detailed evaluation shall be accomplished on all technical proposals received based upon the established criteria in the solicitation. Upon completion of the initial evaluation, limited discussions shall be conducted with all offerors for the purpose of achieving maximum understanding and clarification of the contents of the proposal. During such discussions, offerors shall not be advised of deficiencies in their proposals. A deficiency is defined as that part of an offeror's proposals which would not satisfy the Government's requirements. Offerors shall be advised of areas of their proposal in which the intent or meaning is unclear or for which additional substantiating data is required for evaluation. When necessary for complete understanding of proposals, clarifications and/or additional substantiating data may be requested concerning those areas of an offeror's proposal when there is uncertainty that a deficiency exists. In most cases, clarification of proposals and additional substantiating data, if required, will be included by offerors with their cost/price proposals in Step Two. When it is apparent from the proposals received that the Government's requirements have been misinterpreted, clarification shall be provided to all offerors to ensure complete understanding.

(f) *Step two—evaluation and discussion of cost price proposals.*

(1) Following the technical evaluation and discussions, complete, fully documented cost/priced proposals and clarifications, if required, of technical proposals shall be obtained. Each proposal shall be evaluated and those which have a no reasonable chance for award may be eliminated from the competition at this point and the offerors notified that they are outside the competitive range and will be given no further consideration.

(2) Limited discussions as indicated herein shall then be conducted with all remaining offerors in connection with their respective cost/price proposals, either on an element-by-element basis or in their entirety. These discussions may include (i) rectification and/or correction of inconsistencies or mathematical errors; (ii) correlation of elements of cost with their respective technical efforts, in order to assess the extent of realism in the cost proposal; and (iii) discussion necessary to ensure a complete understanding of the Government's requirements, what is being offered (including delivery schedules, trade-offs among performance, design to cost, life cycle cost, and logistics support factors) and other contract terms. An offeror shall not be advised during these discussions that its proposal or any of its elements are either too high or too low. When discussions of technical proposals are required they shall be limited as stated in (f)(2)(ii) above.

(3) Following such discussions, a proposal may be eliminated from further consideration and the offeror so notified (i) when the proposal was initially included in the competitive range because it might have been susceptible of being made acceptable, or (ii) because there was uncertainty whether it was in the competitive range, and in either case, through discussions relating to ambiguities and omissions it becomes clear that the proposal should not have been included in the competitive range initially.

(g) *Step three—common cut-off.*

(1) A common cut-off date for receipt of technical and cost/price proposal clarifications or substantiations shall be established and all participants so notified in accordance with FAR 15.611.

(2) Offerors shall be informed that any changes incorporated in the final proposal must be fully substantiated. Supporting data must provide traceability to the causative technical, business, or financial conditions that brought about any change. Lump sum reductions in cost/price shall not be accepted without supporting rationale.

(3) After the common cut-off date, requirements shall not be imposed for additional proposals or revisions to submitted technical or cost proposals without the prior approval of an official at a level no lower than that of a Head of a Contracting Activity (HCA). Auctioning through repetitive calls for offers is strictly prohibited.

(4) Final detailed negotiations leading to the bilateral execution of a definitive contract shall be deferred until after the selection of an offeror for final contract negotiations.

(h) *Selection of an offeror for final contract negotiations.*

(1) Complete evaluation of all factors in accordance with the criteria set forth in the solicitation, including cost/fee or price, shall be conducted with careful regard for security procedures and good business practice.

(2) Based upon the offeror's latest total acceptable technical and cost proposals, selection of a single source shall be made for the conduct of final negotiations leading to a definitive contract. (This does not preclude selecting more than one source when multiple sources are desired; e.g., competitive prototypes.) Procedures for waiver of this requirement are at (h)(7) below.

(3) Proposals unrealistic in terms of technical or schedule commitments or unrealistically low in cost or price will be deemed reflective of an inherent lack of technical competence or indicative of failure to comprehend the complexity and risks of the contract requirements and may be grounds for rejection of the proposal.

(4) The selection will be based on an integrated decision, involving consideration of technical approach, capability, management, design to cost, operating and support cost objectives, historical performance, price/cost and other factors.

(5) Following selection of the best offeror, all competitors shall be notified of the source to be awarded the contract, subject to negotiation of a satisfactory definitive contract.

(6) The source selection decision is conditional in that award of a fully negotiated contract to the selected offeror must be accomplished within a period of time prescribed by the source selection authority. In the event a definitive contract cannot be awarded on a timely basis, negotiations may be terminated and a new source selection decision made.

(7) Proposed contracts may be negotiated with two or more offerors within the competitive range, if the HCA makes a written determination that a final selection of a single source should not be made until such proposed contract have been negotiated. Such determination shall not be made solely for the purpose of maintaining a competitive environment. However, such a determination may be based, for example, on unique situations where there are no significant discriminating technical or cost features between two or more offerors. Notification of such determination shall be provided to OUSDRE(AM) through Departmental procedures.

(i) *Step four—final negotiations and contract award.* Final negotiations leading to bilateral execution of a single definitive contract will be conducted only with the selected offeror except when multiple negotiations are authorized by the HCA. Final negotiations shall include the disclosure and resolution of all technical deficiencies and all unsubstantiated areas of cost. Negotiations shall not involve changes in the Government's requirements or the contractor's proposal which would affect the basis for source selection. In the event that such changes are necessary, the procedures in FAR 15.806 shall be followed. The final negotiated contract must represent a reasonable probability that the Government's requirements will be satisfied at a fair and reasonable cost/fee or price.

(j) *Debriefings.* Formal debriefings shall be conducted after contract award, in accordance with FAR.

Subpart 215.7—Make-Or-Buy Programs

215.704 Items and work included.

The minimum dollar threshold within DOD referred to in FAR 15.704(b) is $500,000.

215.706 Evaluation, negotiation, and agreement.

(d) Contracting officers shall also give primary consideration to the effect of the proposed make-or-buy program on the contemplated type of subcontract.

215.707 Incorporating make-or-buy programs in contracts.

(a)(2) The contracting officer may exclude the make-or-buy program from (i) cost-plus-incentive-fee contracts to which FAR 15.707(b) is applicable and (ii) from cost-plus-incentive fee contracts having a cost incentive which provides for a swing from target fee of at least 3 percent and a contractors' overall share of cost of at least 10 percent (authority may be requested (see FAR Subpart 1.4) to exclude the make-or-buy program from other cost-plus-incentive-fee contracts having different incentive and cost-sharing patterns, whenever the contracting officer finds that such other contracts provide sufficient incentive for control of costs).

Subpart 215.8—Price Negotiation

215.802 Policy.

(b)(2) (This prohibition neither prevents the negotiation of indirect costs and other rates applicable to several contracts nor prohibits FPRA's applicable to several contracts.)

215.803 General.

(b) When necessary, requirements and technical specialists should be consulted. The primary responsibility for the adequacy of specifications and for the delivery requirements must necessarily rest with requirements and technical groups. However, the contracting officer should be aware of the effect which these factors may have on prices and competition, and should, prior to award, inform requirements and technical groups of any unsatisfactory effect which their decisions have on prices or competition.

(d) When products are sold in the open market, costs are not necessarily the controlling factor in establishing a particular seller's price. Similarly, where competition may be ineffective or lacking, estimated costs plus estimated profit are not the only pricing criteria. In some cases, the price appropriately may represent only a part of the seller's cost and include no estimate for profit or fee, as in research and development projects where the contractor is willing to share part of the costs. In other cases, price may be controlled by competition. The objective of the contracting officer shall be to negotiate fair and reasonable prices in which due weight is given to all relevant factors. When negotiations indicate the need for using other than a firm fixed-price contract, there should be compatibility between the type of contract selected and the contractor's accounting system.

215.804 Cost or pricing data.

215.804-2 Requiring certified cost or pricing data.

(a)(1)(ii) The term "price adjustment" or "pricing adjustment" means the aggregate increases and/or decreases in costs plus applicable profits.

(2) Partial or limited data may be requested when less than complete cost analysis (e.g., analysis of only specific factors) will provide a reasonable pricing result on awards under $500,000 without the submission of complete cost or pricing data. The contracting officer shall request only that data which he considers adequate to support the limited extent of the cost analysis required and he will not require certification.

(b)(1) Cost of pricing data shall not be required merely in anticipation of postaward review of the contract.

(2) If, after cost or pricing data were initially requested and received, it is determined that adequate price competition does exist, the data need not be certified.

215.804-3 Exemption from or waiver of submission of certified cost or pricing data.

(a)(1) When economic price adjustment provisions are included in competitive procurements, see FAR 16.203-2(b).

(b)(2)(ii) An example of a determinative advantage is where substantial costs, such as start-up or

other nonrecurring expenses, have already been absorbed in connection with previous sales, thus placing the competitor in a preferential position.

(3) Examples of a price "based on" adequate price competition are: (i) exercise of an option in a contract for which there was adequate price competition if the option price has been determined to be reasonable in accordance with FAR 17.207(d); and (ii) an item normally is procured competitively but in a particular situation only one offer is solicited or received, and the price clearly is reasonable in comparison with recent purchases of comparable quantities for which there was adequate price competition.

(c)(6) In addition, cost or pricing data may be requested, if necessary, where there is such a disparity between the quantity being procured and the quantity for which there is such a catalog or market price that pricing cannot reasonably be accomplished by comparing the two.

(7) In determining exemptions, it is the item under consideration that must meet the test. The ultimate objective is to achieve fair and reasonable prices for items bought. Altered terms, minor configuration changes, extra inspection requirements, or quantity differences are adequate reasons for pricing items differently from catalog or market prices.

(e)(3) In anticipation of repetitive procurements of a catalog item, the PCO or the cognizant ACO may make special arragements of submission of the exemption claim. The submission need not be on a Standard Form 1412, but shall include any data required by the form and include or incorporate by reference all the applicable definitions, representations and rights included in the form. Government approval of the exemption claim shall set forth the effective period, usually not more than one year, and require the contractor to furnish any later information that might raise a question as to the continuation of the exemption. Such approval may be extended to other Government purchasing offices with their concurrence. A copy of each waiver shall be sent to the Assistant Deputy Under Secretary for Acquisition, Office of Under Secretary of Defense, Research and Engineering.

215.804–4 Certificate of current cost or pricing data.

(c) The data on numerous minor material items each of which by itself would be insignificant may be reasonably available only as of a cut-off date prior to agreement on price because the volume of transactions would make the use of any later data impracticable. Furthermore, except where a single item is used in substantial quantity, the net effect of any changes to the prices of such minor items would likely be insignificant.

215.804–6 Procedural requirements.

(b)(2) The following may be used with the SF 1411:

(i) When Contract Cost Data Reports are required by the purchase request, the contractor shall be required to submit DD Forms 1921 and/or 1921–1 to support the SF 1411. The DD Forms 1921 shall be prepared in accordance with the Contractor Cost Data Reporting (CCDR) System (Army—AMCP 715–8, Navy—NAVMAT P5241, and Air Force—AFLCP/AFSCP 800–15). The contractor supporting data shall be prepared in such a manner as to support each cost element on the DD Form 1921–1.

(ii) *Contract Pricing Proposal Supporting Schedules* may be devised by contracting offices to require such supporting data to the foregoing forms as is considered necessary and reasonable through knowledge of industry, company or commodity practices.

(c) To the extent possible, the understanding should relate to the contractor's formal estimating system. Notwithstanding the foregoing, significant matters important to contractor management and to the Government and any related data within the contractor's organization or the organization of a subcontractor or prospective subcontractor would be expected to be current on the date of agreement on price and, therefore, will be treated as reasonably available as of that date. Although changes in the labor base or in prices of major material items are generally significant matters, no hard and fast rule can be laid down since what is significant can depend upon such circumstances as the size and nature of the procurement.

(e) The referral to higher authority shall also include a complete statement of the attempts made to resolve the matter, including (1) steps taken to secure essential cost or pricing data, (2) efforts to secure the contractor's cooperation in the establishment of a satisfactory business relationship, and (3) any assurances offered, such as agreements to adequately safeguard information furnished.

(f) Since an offeror may propose a price which does not include all preproduction and startup or other nonrecurring costs for the purpose of obtaining the first production contract and for gaining an advantage over competitors in negotiations for future procurements, it is important to know whether the offeror intends to absorb any portion of these costs or whether he plans to recover them in connection with subsequent pricing actions under the proposed or future contracts. This information is needed in evaluating competing proposals to determine which proposal is most likely to result in the lowest overall cost to the Government, particularly where the successful offeror is likely to become, in effect, a sole source for follow on procurements (including spare parts or other support items).

(g)(3) In addition to submitting cost or pricing data from the prospective subcontractor most likely to be awarded the subcontract, the contractor shall submit other data pertaining to subcontract costs, including other subcontractor quotations. Failure by the contractor to submit subcontract cost or pricing data may be cause for disqualification of the contractor from further consideration for award of the proposed contract.

215.804–7 Defective cost or pricing data.

(b)(2) In the absence of evidence to the contrary, the natural and probable consequence of defective data is an increase in the contract price in the amount of the defect plus related burden and profit or fee; therefore, unless there is a clear indication that the defective data were not used, or were not relied upon, the contract price should be reduced in that amount. In establishing that the defective data caused an increase in the contract price, the contracting officer is not expected to reconstruct the negotiation by speculating as to what would have been the mental attitudes of the negotiating parties if the correct data had been submitted at the time of agreement on price.

(d) An auditor's advisory report of postaward reviews of cost and pricing data may result either from a specific request of a contracting officer or from audit action initiated independent of a contracting officer's request.

(e) In exercising the Government's rights in such cases, the contracting officer will consider the varying circumstances discussed below.

(e)(S–70) In some instances, the prime contractor may have reached agreement on price with a subcontractor before the prime contractor and the Government agree on a definitive price. This might occur, for example, if the prime contractor commenced performance under an unpriced action such as a letter

contract. In such cases, the subcontractor's cost or pricing data must be submitted with the prime contractor's submission. If any such subcontractor data are subsequently found to be defective, the prime contract is subject to price adjustment in the same manner as would be the case if any other cost or pricing data submitted by the prime contractor proved to be defective.

(e)(S–71) The Government and the prime contractor will normally agree on the price of a contract prior to final agreement on price between the prime contractor and his subcontractor. In such cases, the prime contract price will be based, in part, on subcontract cost estimates. The prime contractor will be expected to support his subcontract cost estimates with subcontractor cost or pricing data. The prime contract price will be subject to adjustment on the basis of defective subcontractor cost or pricing data submitted prior to agreement on the prime contract price if:

(i) Such subcontractor data were not accurate, complete, or current as of the date certified in the prime contractor's Certificate of Cost or Pricing Data, or in some cases were not accurate as submitted by the subcontractor, and

(iii) The prime contract price was increased by a significant sum because of such defective subcontractor data.

(f) Conditions may be prescribed by: the Office of the Assistant Secretary of the Army (Research, Development and Acquisition), for the Army; Chief of Naval Material (DCNM for Contracts and Business Management), for the Navy; the Director of Contracting and Manufacturing Policy, Headquarters, USAF (AF/RDC), for the Air Force; and the Executive Director, Contracting, for the Defense Logistics Agency.

(2) Although the action is taken under those price reduction clauses rather than under Part 231 as a practical matter the result is the same, i.e., the increased costs will be disallowed under cost-type contracts or not considered as actual costs for final pricing of redeterminable or incentive-type contracts. The action is taken under the price reduction clauses because not only will the increased costs be disallowed or not considered as actual costs but also the fixed-fee or target profit included in the initial price may be subject to reduction in accordance with (1) and (2) of 215.804–7(e) above.

215.804–8 Contract clauses.

The requirement for inclusion of the specified clauses in contracts with foreign governments or agencies may be waived in exceptional cases by the Agency head (see FAR 15.804–3(i)). The contracting officer shall also include the clause at FAR 52.215–22 when obtaining partial cost or pricing data in accordance with 215.804–2(a)(2).

(S–70) The clause at 252.215–7000 shall be included in all solicitations and contracts which include a clause at FAR 52.215–23, FAR 52.215–24, or at FAR 52.215–25. The Contracting Officer may insert a lesser dollar amount, if appropriate.

(S–71) The contracting officer shall insert the clause at 252.215–7001, Pricing of Adjustments, in solicitations and contracts for supplies, services, and construction when a fixed-price contract is contemplated.

215.805 Proposal analysis.

215.805–1 General.

(a) The contracting officer should also note the following:

(a)(S–70) Each contracting officer is responsible for performing or having performed all administrative actions necessary for effective contracting.

(a)(S–71) For certain acquisitions, it may be necessary to convene a formal "Should Cost" (see FAR 15.810) team of specialists to evaluate the contractor's cost projections, supporting standards, and other in-plant management, operational and performance practices, on which cost projections are based.

(a)(S–72) Contract auditors are professional accountants who, although organizationally independent, are the principal advisors to contracting officers on contractor accounting and contract audit matters. Contract audit services are available in two forms:

(i) Audit reports setting forth the results of auditors' reviews and analyses of cost data submitted by contractors as part of pricing proposals, reviews of contractors' accounting systems, estimating methods, and other related matters; and

(ii) "On-the-spot" personal consultation and advice to contracting and contract administration personnel in connection with analyses of contractors' cost representations and related matters by liaison auditors stationed at contracting and contract administration offices. (DCAA provides procurement liaison auditors (PLAs) at most major procurement and contract administration offices to facilitate the receipt and use of audit service and to provide accounting and audit advice as to whether or not audit review of a price proposal should be waived.)

(b) Some form of price or cost analysis is required in connection with every negotiated procurement action. The method and degree of analysis, however, is dependent on the facts surrounding the particular procurement and pricing situation. The extent of cost analysis should be that necessary to assure reasonableness of the pricing result, taking into consideration the amount and complexity of the proposed contract. Normally, a sound conclusion as to value cannot be made on the basis of cost analysis alone. Depending on the information available, a price arrived at by cost analysis should be corroborated through price analysis techniques.

215.805–2 Price analysis.

(b) To provide a suitable basis for comparison, appropriate allowances must be made for differences in such factors as time of prior purchases, specifications, quantities ordered, time for delivery, Government-furnished materials, and experienced trends of improvement in production efficiency. It must also be recognized that such comparison may not detect an unreasonable current quotation unless the reasonableness of the prior prices was established and unless changes in the general level of business and prices have been considered.

215.805–4 Technical analysis.

Technical analyses by the Plant Rep/ACO and his team shall be based on their knowledge of such factors as production, quality assurance, engineering and manufacturing practices and techniques, and information as to plant capacity, scheduling, engineering and production "know-how," Government property, make-or-buy considerations, and industrial security, particularly as these relate to practices of the specific prospective contractor.

215.805–5 Field pricing support.

(a)(1) Information of the type described in (a)(1) (i) through (vi) below, which is often available to the contracting officer from the Plant Rep/ACO or from the Procurement Liaison Auditor (PLA), should be useful in determining the extent of any field pricing support that is needed.

(i) In-house engineering determination of level of effort required in connection with research and development or study contracts.

(ii) Audited cost information from contract awards in process, or recently negotiated contracts.

(iii) Adequately reviewed data on proposed subcontracts items which constitute the major portion of the prime contract price proposal.

(iv) Prices of standard commercial items which constitute the major portion of the prime contract price proposal.

(v) Special forward pricing formulas or rates such as for support items, or

forecast overhead rates, prescribed in an existing advance agreement.

(vi) Current labor rates, overhead rates, loading factors, per diem rates, and lot data based upon actual costs and labor hours. It should be borne in mind that no single category of information is necessarily sufficient by itself; for example, information as to rates for labor and overhead would normally require data concerning the base elements—labor hours, material costs, etc.—to which the rates apply.

(2) The Plant Rep/ACO, as well as the contract auditor, will be responsible for providing a complete and accurate field pricing report to the PCO. (See FAR 15.810(e) for field pricing reports submitted on acquisitions where should-cost analysis is conducted.) To accomplish this end, the Plant Rep/ACO must:

(i) In concert with the auditor and in consideration of his workload, establish a deadline for the auditor's input, subject to date adjustments when considered necessary (adjustments will be coordinated by the Plant Rep/ACO with the PCO and the contract auditor);

(ii) Identify areas for special consideration (these are areas in addition to those specified by the PCO);

(iii) Arrange for exchanges of technical and audit information; and

(iv) Be fully responsive to a request for technical information from the auditor.

(c)(1)(S–70) When field pricing reviews are required, contracting officers should note the following:

(A) The Plant Rep/ACO is the team manager for all PCO requests for field pricing support. Therefore, the PCO shall send all requests for field pricing support to the cognizant field contract administration activity; generally, the Plant Representative (Plant Rep) for the Services and the Administrative Contracting Officer (ACO) for DCAS(DLA). A copy of the request will also be sent to the cognizant audit activity.

(B) In sole source procurements, when the contracting officer knows in advance that field pricing support will be required, he shall provide the cognizant Plant Rep/ACO and auditor a copy of the solicitation. In addition, he may require the contractor to provide copies of his proposal direct to the Plant Rep/ACO and auditor. In this event the PCO shall, as soon as possible after receipt of the contractor's proposal, identify those specific areas for which field pricing support is required.

(C) Where audit reports are received on procurement actions that are subsequently canceled or unsuccessful, the cognizant auditor shall be notified in writing.

(d) The efforts of all field pricing support team members are complementary, advisory and also offer an excellent check and balance of the various analyses imperative to the PCO's final pricing decision. Therefore, it is essential that there be close understanding, cooperation and communication to ensure the exchange of information of mutual interest during the period of analysis. While they shall review the data concurrently when possible, each shall render his services within his own area of responsibility. For example, on quantitative factors (such as labor hours), the auditor may find it necessary to compare proposed hours with hours actually expended on the same or similar products in the past as reflected on the cost records of the contractor. From this information he can often project trend data. The technical specialist may also analyze the proposed hours on the basis of his knowledge of such things as shop practices, industrial engineering, time and motion factors, and the contractor's plant organization and capabilities. The interchange of this information will not only prevent duplication but will assure adequate and complementary analysis.

(e) The terms "audit review" and "audit" refer to examinations by contract auditors of contractors' statements of actual or estimated costs to the extent deemed appropriate by the auditors in the light of their experience with contractors and relying upon their appraisals of the effectiveness of contractors' policies, procedures, controls, and practices. Such audit reviews or audits may consist of desk reviews, test checks of a limited number of transactions, or examinations in depth, at the discretion of the auditor. The contract auditor is responsible for submission of information and advice, based on his analysis of the contractor's books and accounting records or other related data, as to the acceptability of the contractor's incurred and estimated costs.

(e)(6) Reports of technical analysis and review should be furnished to the auditor at the earliest possible date and at least five days prior to the due date of the audit report to enable the auditor to include the financial effect of technical findings in the audit report (for example, the necessary computations of dollar amounts arising from changes in proposed kinds and quantities of materials, labor hours, etc.). In the event the technical analyses are not available in time to be reflected in the audit report, the audit report shall so state, and this shall be made known to the Plant Rep/ACO so that comments may be incorporated in his submission to the PCO. If technical analyses are received later by the auditor, he shall issue a supplemental report if the status of the negotiation is such that a report would serve a useful purpose. The original of all technical reports received by the auditor shall be made a part of the audit report submitted to the Plant Rep/ACO.

(e)(7) When the PCO determines that deficiencies in the contractor's accounting system or estimating methods are such that the proposed contract cannot be adequately priced or administered, he shall, with the advice of the contract auditor and the Plant Rep/ACO, assure that necessary corrective action is initiated prior to the award of such contract. The auditor is responsible for performing that part of reviews and cost analyses which requires access to the contractor's books and financial records supporting proposed cost or pricing data, regardless of the dollar amount involved.

(e)(8) During the course of the examination, the Plant Rep/ACO and the auditor shall each confer with the contractor to fully understand the basis for each item in the contractor's proposal and to remove any doubts as to the validity and accuracy of their conclusions and findings.

(g) The Plant Rep/ACO (price analyst or negotiator) shall query the auditor or technical personnel about matters in audit or technical reports which appear to need clarification. When developing the Plant Rep/ACO statement to the PCO transmitting audit and technical reports, comments or observations shall be added about pertinent matters whether or not covered in the audit or technical reports. However, it is not contemplated, for example, that the price analyst or negotiator should attempt an examination of the contractor's accounting records for this purpose since the contract auditor has this responsibility.

(i) If in the opinion of the PCO, Plant Rep/ACO, or auditor, the review of a prime contractor's proposal requires further review of subcontractors' cost estimates at the subcontractors' plants (after due consideration of reviews performed by the prime contractor), such reviews should be fully coordinated with the Plant Rep/ACO having cognizance of the prime contractor before being initiated. If a review is required of a subcontract proposal, the prime Plant Rep/ACO shall forward the request to the subcontract ACO with an information copy to the subcontract auditor. In the event a lower tier subcontract proposal

requires review, the request should be coordinated in sequence with the Plant Rep/ACO's at higher tiers in the subcontract chain. The resulting pricing reports, including any audit reports, shall be forwarded by the subcontract Plant Rep/ACO to the prime Plant Rep/ACO with an information copy to the prime auditor. If the review is of a lower tier subcontract proposal, the report shall be transmitted through the Plant Rep/ACO's in the subcontract chain.

(j) The appropriate contract administration activities will be notified by the HCA when review and evaluation of subcontractors' proposals will require extensive field pricing assistance in connection with the acquisition of a major new weapon system, or require special or expedited action by field pricing personnel and such action if being, or has been, delayed.

215.806 Subcontract pricing considerations.

(S–70) Other subcontract pricing considerations include:

(1) Subcontract costs and pricing arrangements are significant elements to be considered during negotiation of prime contracts and during contract administration.

(2) Basic responsibility rests with the prime contractor for decisions to make or buy, for selection of subcontractors, for subcontract prices, and for subcontract performance. The contracting officer who is responsible for negotiating the contract price with the prime contractor must have adequate knowledge of these elements as they affect prime contract prices.

(3) Contractors' "make-or-buy" programs and proposed subcontracts must be reviewed in accordance with FAR Subpart 15.7 and with FAR Part 44. Information from these reviews should be used in evaluating subcontract costs when negotiating prime contract prices. The contracting officer, when appropriate, should secure from the contractor information concerning:

(i) The prime contractor's purchasing practices; and

(ii) The principal components to be subcontracted and the prospective or actual subcontractors, including (A) the extent of competition obtained or to be obtained, (B) the basis for the subcontract costs included in the contract pricing proposal (SF 1411), (C) any contractor cost or price analyses of subcontract proposals, including the cost or pricing data submitted by subcontractors, (D) the pricing arrangement contemplated or negotiated, and (E) the extent or subcontract supervision.

(4) The PCO is responsible for the reasonableness of the prime contract price which includes satisfying himself as to the reasonableness of the subcontract costs included in the prime contract price. Field pricing support from the Plant Rep/ACO cognizant of the prime contractor is generally required in determining reasonableness of the prime contract price. In some instances, it may be necessary to obtain field pricing support of proposed subcontracts. On the basis of a request from the PCO and/or advice from members of the field pricing team, the ACO cognizant of the prime contractor may request field pricing support from the ACO cognizant of the prospective subcontractor. These actions will be taken in accordance with 215.805–5.

(5) If the prime contractor's analysis is not considered adequate, the ACO will return the analysis package to the contractor for re-accomplishment indicating areas of inadequacy. In this case, the prime contractor will accomplish or cause the accomplishment of the additional review and resubmit the package to the ACO.

(6) When subcontracts have been placed on a price redetermination or fixed-price incentive basis and the prime contract is to be repriced, it may be appropriate to negotiate a firm prime contract price, even though the contractor has not yet established final subcontract prices. The contracting officer may do this when convinced the amount included for subcontracting is reasonable, e.g., where realistic cost or pricing data on subcontract efforts are available. However, even though the available cost data are highly indefinite and there is a distinct chance that one or more of the subcontracts eventually may be redetermined at prices that are lower than those predicted in redetermining the prime contract price, other circumstances may require the prompt negotiation of the final contract price. In such a case, the contract modification which evidences the revised contract prices should provide for adjustment of the total amount paid or to be paid under the contract on account of subsequent redetermination of the specified subcontracts. This may be done by including in the contract modification a statement substantially as follows:

> Promptly upon the establishment of firm prices for each of the subcontracts listed below, the Contractor shall submit, in such form and detail as the Contracting Officer may reasonably require, a statement of costs incurred in the performance of such subcontract and the firm price established therefor. Thereupon, notwithstanding any other provisions of this contract as amended by this modification, the Contractor and the Contracting Officer shall negotiate an equitable adjustment in the total amount paid or to be paid under this contract to reflect such subcontract price revision. The equitable adjustment shall be evidenced by a modification to this contract. (List Subcontracts)

(7) In considering cost-plus-fee subcontracts, the contracting officer shall make every effort to insure that fees under such subcontracts never exceed the fee limitations indentified in 215.903(d).

(8) The prime contractor may submit subcontractor claims for exemption at any time to the contracting officer for an advance review of their acceptability, but otherwise the prime contractor shall submit them with its proposal or request for subcontract consent; or other action by the contracting officer, whichever comes first.

215.807 Prenegotiation objectives.

(b) Prenegotiation objectives will be documented in accordance with Departmental procedures.

215.808 Price negotiation memorandum.

(a)(4) Comments should also be included on the current status of their contractor systems (e.g., estimating, accounting, compensation, etc.) to the extent that they impacted and were considered in the negotiation.

(10) The following applies to documentation of profit or fee negotiated:

(i) Since the profit objective is the contracting officer's pre-negotiation evaluation of the total estimated profit under the proposed contract, the amounts set forth for each category of cost will probably change in the course of negotiation. Furthermore, the negotiated profit will probably vary from the profit objective, and from a detailed application of the weighted guidelines method to each element of the Contractor's Input to Total Performance as anticipated prior to negotiation. Since the profit objective is viewed as a whole rather than as its component parts, insignificant variations from the pre-negotiation profit objective, as a result of changes of the Contractor's Input to Total Performance, need not be documented in detail. Conversely, significant deviations from the profit objective necessary to reach a final agreement on profit or fee shall be explained. The profit earned as a result of contract performance will generally vary from that anticipated at the time of negotiation.

(ii) When the weighted guidelines method is not used because of unusual pricing situations (see Subpart 215.9), the contract file shall be documented to support the exceptions.

(iii) DD Form 1547 (see Subpart 215.9) may be used in the Price Negotiation Memorandum, *Provided* that the rationale used in assigning the various rates is fully documented.

(iv) See also 215.807(c).

215.809 Forward pricing rate agreements.

(e) Indirect costs commonly known as overhead are defined and described in FAR 31.203. Criteria for treatment and application of indirect costs to contracts are also set forth in FAR 31.203. To assure a reasonable approximation and allocation of indirect costs on an equitable basis to individual contracts, negotiators shall utilize audited indirect cost data or negotiated indirect cost rates, when available, in connection with negotiation of contracts and shall not, unless authorized by the head of the contracting activity, seek preferential indirect cost rates. If there is any question with respect to audited indirect cost data or negotiated indirect cost rates, or if such are not available, the negotiator should normally use the advisory services of the cognizant Department of Defense auditor.

(e)(2) In assessing changed conditions, the ACO will consider: (i) the type of contract contemplated; (ii) whether the dollar amount of the proposed contract action would significantly change the rates in the agreement; (iii) whether the performance period of the proposed contract action is significantly different from the period to which the rate agreement applies; and (iv) any new data or other information that may raise a question as to the acceptability of the rates.

(f) When procurement representatives have received notice that changed conditions negate FPRA's, individual procurement actions should not be delayed.

215.810 Should-cost analysis.

(b) A should-cost review will be made in connection with the procurement of a system or item which will require a DSARC approval, unless the contracting officer makes written determination that the potential savings to be realized do not justify the expense of such a should-cost review.

215.811 Estimating systems.

(a)(S–70) The establishment, maintenance, and consistent use of formal cost estimating systems by contractors is to the mutual benefit of the Government and industry, particularly where a large portion of the contractor's business is defense work and there are a number of significant proposals requiring review. Procuring activities and contract administration activities are required to furnish full support to a program of encouraging major defense contractors to formalize and follow good estimating procedures. It is recognized that estimating procedures will vary among contractors, and may vary between plants or divisions of a contractor due to differences in products, size and methods of operations, production vs. research, and other factors. While formal systems do not eliminate the need for judgmental factors to be applied by contractors in developing cost proposals, they do provide a sound foundation for the systematic and orderly application of these judgment factors to specific proposals.

(a)(S–71) Reviews and reports shall be accomplished as a joint contract audit and contract administration office team effort, with the contract auditor designated as its head. Reviews shall be tailored to take full advantage of the day-to-day work done as an integral part of both the contract audit and contract administration activities. The program established by the contract audit activity shall be coordinated with the appropriate contract administration activity to assure that team membership includes qualified technical specialists, and that adequate personnel resources are made available to accomplish the program.

215.870 Procedures for identifying contractors' unallowable costs.

(a) The establishment, maintenance, and consistent use of procedures for identifying and segregating unallowable costs, which will assure compliance with CAS 405 and FAR Part 31 will benefit both the Government and contractors. Such procedures may vary between plants or divisions of a contractor due to size, mix of business and complexity of organization. Some of the advantages of sound procedures are that:

(1) A greater degree of confidence can be placed on the accuracy and reliability of contractors' proposals, billings and claims;

(2) They expedite the negotiation process; and

(3) They may reduce the scope of reviews performed by audit and other technical and procurement personnel.

(b) The responsible Federal Contract Audit organization shall review contractors' procedures and practices in conjunction with other contract audit activities. Deficiencies shall be reported to the cognizant ACO, and, as appropriate, PCOs having substantial business with the contractor. Among the matters to be considered in determining the adequacy of a contractor's procedures are its policy, practices and techniques for:

(1) Assignment of responsibilities within the contractor's organization for reviewing and approving claims against the Government;

(2) Identification of unallowable costs (expressly unallowable, mutually agreed to be unallowable or specifically designated as unallowable by written decision of the contracting officer) together with the individual employees incurring such costs;

(3) Identification and computation of directly associated costs;

(4) Assurance that unallowable and directly associated costs are not included in estimated costs proposed, or incurred amounts claimed by the contractor;

(5) Coordination and communication between the elements of the contractor's organization that prepare proposals and claims and those responsible for identifying unallowable and directly associated costs; and

(6) Assuring the adequacy of the documentation maintained by the contractor identifying the unallowable costs together with directly associated costs.

(c) Documentation in support of the contractor's procedures shall be made available to authorized Government personnel.

215.871 Estimated data prices (DD Form 1423).

(a) The Department of Defense requires estimates of the prices of data in order to evaluate the cost to the Government of data items in terms of their management, product or engineering value.

(b) When data are required to be delivered under a contract, the solicitation will include DD Form 1423, Contract Data Requirements List. The form and the provision included in the solicitation request the offeror to state what portion of the total price is estimated to be attributable to the production or development of the listed data for the Government (not to the sale of rights in the data). However, offerors' estimated prices may not reflect all such costs; and different offerors may reflect these costs in a different manner, for the following reasons:

(1) Differences in business practices in competitive situations;

(2) Differences in accounting systems among offerors;

(3) Use of factors or rates on some portions of the data;

(4) Application of common effort to two or more data items;

(5) Differences in data preparation methods among offerors.

For these and other reasons, data price estimates should not be used for contract pricing purposes without further analysis.

(c) The contracting officer shall assure that the contract does not include a requirement for data which the contractor has delivered or is obligated to deliver to the Government under another contract or subcontract, and that the successful offeror furnishes any certification required by the solicitation. However, where duplicate data are desired, the contract price shall include the costs of duplication, but not of preparation, of such data.

(d) In the case of procurements of $100,000 or over, the contracting officer, after agreeing upon a negotiated contract price, will adjust the estimated prices in Blocks 26 of the original DD Form 1423 for the data items listed thereon to equal the amount included in the related priced contract line or subline item(s) for the data item(s). Adjusted DD Form 1423 will be maintained so as to be available at each procuring activity. The detachable portion of the DD Form 1423 (Blocks 17–26) with the estimated or adjusted prices shall not appear in the contract.

(e) When printing is to be procured as an integral part of a contract for other supplies or services, each requirement in the contract for printing shall be listed as a separate line item on DD Form 1423; and the approval or waiver obtained pursuant to Subpart 208.8 shall be appropriately identified.

215.872 Capital investment incentives.

(a) *General.* Although the DoD profit policy is normally sufficient encouragement to increase contractor investment, it is recognized that situations will arise when additional incentives may be appropriate. In these individual cases, a special Capital Investment Incentive clause may be negotiated and included in contracts for research, development, and/or production of weapon systems or material to provide incentives to contractors to invest in severable plant equipment capital assets. Such clause must be tailored to the requirements of the individual situation, and then only after a careful analysis of the benefits in each case is made, to assure optimum results are obtained for the Government. This clause would become operative in the event that the contract or program is terminated or funds are not provided in subsequent fiscal years for the planned acquisition upon which the investment decision was based. Such clause may permit the Government to acquire specific capital investments at no more than the depreciated value. This value may be determined by considering a combination of investment incentives, income tax credits or incentives, and allowable depreciation costs pursuant to cost principles established in FAR Part 31.

(b) *Scope.*

(1) This technique is designed to transfer to the Government some of the risk associated with acquisition of certain capital assets by contractors. Its purpose is to cover only specifically identified cost-effective capital assets. It is not to be used to override the general policy that all facilities needed for the performance of Government contracts will be provided by the contractor as set forth in FAR Part 45.

(2) Capital assets which may be covered by such an investment clause are subject to the following criteria:

(i) Includes only severable industrial plant equipment, and other types of severable plant equipment with a unit value in excess of $10,000, including associated accessories which would be capitalized in accordance with the contractor's disclosed accounting practices, but excluding real property;

(ii) The capital investment would not otherwise be made by the contractor except to substantially benefit the program(s) involved;

(iii) The overall savings that will accrue to the Government on the program(s) for covered equipment exceed the related investment costs by a margin sufficient to make the acquisition economically viable;

(iv) The savings that will result from use of this equipment, as developed under (c) below, will be reflected in the pricing of the individual contracts.

(c) *Determination.* Prior to implementing this investment clause, the contracting officer shall make a written determination that the contractor will not make the investment without the use of this technique. This determination should be detailed and include the following elements:

(i) Consideration of the alternatives of acquiring such equipment through the manner listed in FAR 45.302;

(ii) An analysis of the costs of the investment and the overall cost savings to the Government, including the payback quantities and/or payback periods;

(iii) An assessment of the degree of competition present for the proposed requirement. If a competitive environment is present, the competition may cause the firms to consider bearing the total risks for the investments. When this technique is to be used, it shall be a factor in the source selection evaluation criteria;

(iv) An assessment stating the rationale why the DoD profit policy is insufficient motivation for the investment;

(v) Other considerations which should be addressed are:

(A) Effect upon the contractor's make or buy plan;

(B) Subcontractor participation in the investment technique;

(C) Consistency of depreciation rates with FAR 31.205.11;

(vi) Any other matter which has a bearing on the investment plan.

(d) *Limitations.*

(1) This investment incentive is designed primarily for DOD program which are listed in the Five Year Defense Program (FYDP) and designated as Defense System Acquisition Review Council (DSARC) Programs, in accordance with DOD Directive 5000.1, "Acquisition of Major Defense Systems." This incentive may also be extended to other DOD programs provided approval is obtained from the Secretary of the Department. The programs must provide for a sufficient buy to allow for amortization of the planned investment.

(2) The fiscal authority who commits funds to the resultant contract must certify that the following actions have been accomplished:

(i) The Approval Authority (see (g)(1) below) has approved by fiscal year the amount of contingent Government liability;

(ii) The Approval Authority has notified the Congress in advance that the technique will be used on contracts for a specific weapon system or material program element. Unless there are unusual circumstances, this notification will be included in the justification material submitted to the Congress in support of authorization and appropriation requests. A copy of the notification shall be retained in the contract file.

(3) *Negotiation requirements.*

(1) Since this investment incentive is predicated on the written determination specified in paragraph (c) above, the impact on contract cost will be recognized in the price(s) negotiated.

(2) In order for items of plant equipment to be covered, they must be listed (nomenclature and value) in the Capital Investment Incentive clause. The items of equipment can be incorporated in the contract using either or both of the following procedures:

(i) When the exact value and nomenclature of the item of plant equipment is known at the time of negotiations, it shall be listed in the investment clause at the time of the contract award. The contractor's proposal should reflect the impact on cost and other benefit to the Government that will accrue from use of the equipment in order to comply with Pub. L. 87–653;

(ii) If the exact value and nomenclature of each investment is not known at the time of negotiations and it can be mutually agreed that certain categories of plant equipment would benefit the Government, an additional provision to the investment clause should be used. This additional provision shall stipulate the conditions which the individual items of plant equipment must meet to be subsequently incorporated into the investment clause and shall establish the requirement for the contractor to submit financial and other justification necessary for the contracting officer to make the determination specifed in (c) above. Such items of equipment will be incorporated into the contract by supplemental agreement and the price revised, as appropriate; *Provided:* (A) they meet the contractual conditions and (B) the equipment value, when added to the value of previously covered equipment, will not exceed the stated dollar ceiling.

(3) The limit of the Government's contingent liability is subject to negotiation. Provision should be made to assume only that liability which is sufficient to motivate the contractor to invest.

(4) Application of the weighted guidelines in subpart 215.9 should reflect the assumption of risk by the parties associated with items covered by this technique.

(f) *Contractual requirements.* In order to incorporate this investment incentive, a special contractual Capital Investment clause shall be developed. Such a clause should include but not be limited to the following:

(1) A listing of the exact nomenclature and value of each item of plant equipment covered.

(2) A provision for additions to the listing after contract award, if appropriate. Such provision shall establish the conditions that must be met, the categories of equipment that will be covered, and the requirement for such additions to be incorporated by contract modification. This provision should allow for removal of an item from coverage at the request of the contractor with the concurrence of the contracting officer.

(3) Criteria for ascertaining when this special provision can be invoked as well as the criteria which will cancel the Government's contingent liability under the clause such as end-item quantity thresholds and performance dates, whichever occurs first.

(4) The dollar ceiling of the value of covered items as well as the Government's contingent liability by fiscal year.

(5) A specific method to establish the price to the Government at which each item would be acquired if this special provision is invoked.

(6) A provision that within 30 days of a Government decision that provides a basis for the contractor to invoke the special provision, the contracting officer shall notify the contractor in writing that the event has occurred and its date of occurrence. Further, the provision shall require that within 90 days after notification by the contracting officer, the contractor must provide to the contracting officer, in writing, a list of the specific investments which he desires to have the Government acquire. This list shall not include any investments which have not been incorporated into the investment clause of the contract prior to the contracting officer's notice to the contractor.

(7) A provision that once the contractor requests the Government to buy any equipment covered by the investment clause, the Government has the right to buy any and/or all other equipment covered by the clause whether the contractor requests it to do so or not.

(8) A provision for deferral of Government acquisition of those items of equipment needed for contract or program completion.

(9) A provision that the investment clause be carried over to successor contracts until the Government's responsibility to acquire the equipment expires.

(10) A provision that a supplemental agreement shall be executed for any equipment acquired by the Government under this special clause.

(11) A provision that as a condition of Government acquisition, the equipment shall be in good operating condition.

(12) Criteria for providing disposition instructions should the special provision for capital investment be exercised. Identify which party is to bear the cost of restoration, storage, disconnect and removal, packing and transportation upon removal of the equipment. The provisions of FAR 45.6 shall apply unless the contract provides specific exception thereto.

(13) A provision that in the event this special clause is invoked, the limitation stated in FAR 31.205–39 does not prevent acquisition or any payment for the covered equipment.

(14) A provision that this special clause for capital investment shall not apply in the event of contract termination for default.

(15) Provide that this investment clause can be made applicable to subcontracts, if appropriate benefits, as outlined in paragraph (b) above, are available. Provision must be made for Government approval, as outlined in paragraph (c) above, of all equipment for which the Government may assume contingent liability as well as a provision that the clause can be invoked only as a direct flow down from the prime's ability to invoke the clause.

(16) A provision that establishes the extent to which the contractor may use this equipment for other business.

(g) *Administration.*

(1) Approval for use of this investment incentive for contigent liabilities must be obtained from the Secretary of the Military Department or the Director of DLA. Authority up to $50 million may be delegated no lower than the Commander, AFSC, AFLC, NMC, DARCOM.

(2) In the event that it becomes apparent that the contingent liability resulting from the use of this technique will become an actual obligation, the approval authority shall be notified and immediate steps shall be taken to obtain sufficient funds to cover the obligation. These funds must be made available at the time the actual obligation materializes, to preclude a violation of the Anti-Deficiency Act.

Subpart 215.9—Profit

215.901 General.

(c) Furthermore, low average profit rates on defense contracts overall are detrimental to the public interest. Effective national defense in a free enterprise economy requires that the best industrial capabilities be attracted to defense contracts. These capabilities will be driven away from the defense market if defense contracts are characterized by low profit opportunities. Consequently, negotiations aimed merely at reducing prices by reducing profits, with no realization of the function of profit, cannot be condoned. For each contract in which profit is negotiated as a separate element of the contract price, the aim of negotiation should be to employ the profit motive so as to impel effective contract performance by which overall costs are economically controlled. To this end, the profit

objective must be fitted to the circumstances of the particular acquisition, giving due weight to each of the effort, risk, facilities investment, and special factors set forth in this subpart. This will result in a wider range of profits which, in many cases, will be significantly higher than previous norms.

215.902 Policy.

(a)(1) The weighted guidelines method shall be used as the structured approach for determining profit or fee in accordance with 215.905 and the following:

(i) The weighted guidelines method provides contracting officers with a technique that will insure consideration of the relative value of the appropriate profit factors in the establishment of a profit objective and the conduct of negotiations; and a basis for documentation of this objective, including an explanation of any significant departure from it in reaching a final agreement. The contracting officer's analysis of these profit factors is based on information available prior to negotiations. Such information is furnished in proposals, audit data, performance reports, preaward surveys, and the like. Except as set forth in 215.902(a)(2), the weighted guidelines method shall be used in the negotiation of all contracts where cost analysis is performed for:

(A) The manufacturing of supplies and equipment;

(B) Research and development as described in FAR Part 35, encompassing research, exploratory development, advanced development, engineering development, and operational systems development;

(C) Services as described in FAR Part 37.

a. The profit objective for manufacturing contracts shall be computed, except as indicated in *e.* below, using the manufacturing weighted guidelines method, which provides profit opportunity based on facilities capital investment.

b. The profit objective for research and development contracts shall be computed using the research and development weighted guidelines method unless, in the judgment of the contracting officer, a significant amount of facilities is required for efficient contract performance, in which case the manufacturing weighted guidelines shall be used.

c. The profit objective for service contracts shall be computed using the service contract weighted guidelines method unless, in the judgment of the contracting officer, a significant amount of facilities is required for efficient contract performance, in which case the manufacturing weighted guidelines shall be used.

d. In determining whether a particular contract shall be classified as manufacturing, research and development, or services, primary reliance shall be placed on the nature of the work to be performed, as indicated by the coding for Item B8A of the DD Form 350 (see DOD 4105.61–M, Department of Defense Procurement Coding Manual, Volume 1), notwithstanding the appropriation or negotiation authority used. The following guidelines shall apply:

1. Manufacturing Weighted Guidelines. Contracts coded under Section I, Part C, Supplies and Equipment.

2. Research and Development Weighted Guidelines. Contracts coded under Section I, Part A, Research, Development, Test and Evaluation, except for contracts coded as AD2–, Defense Services, and A–6, Management and Support.

3. Services Weighted Guidelines. Contracts coded under Section I, Part B, Other Services and Construction; and under Section I, Part A, as AD2– and as A—. Note, however, that there are blanket exceptions for certain services (see 215.902(a)(2)).

e. The categories listed above are intended to be used as a point of departure in determining which weighted guidelines method applies. Many contracts for research and development and for services will require a significant amount of facilities for efficient contract performance. When this is the case, the manufacturing weighted guidelines method shall be used. Similarly, certain contracts for the manufacture of small quantities of high technology supplies and equipment may not require a significant amount of facilities. In such cases, the research and development weighted guidelines method shall be used. Contracting officers shall apply sound judgment in determining which weighted guidelines method is most appropriate for a particular contracting situation. The difference in profit objectives that would result from the application of alternative weighted guidelines methods shall not be a consideration in making this determination.

f. In determining whether a significant amount of facilities is required for efficient contract performance, the contracting officer should assess the facilities needed, including contractor owned and leased and Government owned. When there is a relatively small amount of facilities capital cost of money allocated to the contract because some facilities are provided through operating leases and by the Government, this does not necessarily mean that an insignificant amount of facilities is required for efficient contract performance.

g. When a method other than the manufacturing weighted guidelines method is used to establish the prenegotiation profit objective, the profit objective shall be reduced by the amount of facilities capital cost of money allowed in accordance with 231.205–10. On cost-plus-award-fee contracts, the base fee shall be reduced by the amount of facilities capital cost of money or the contract shall contain a provision to disallow the cost.

(ii) The contractor's proposal should include cost information for evaluation and a total profit figure. Contractors shall not be required to submit the details of their profit objectives but they shall not be prohibited from doing so if they desire. Elaborate and voluminous presentations are neither required nor desired and may indicate a low index of cost effectiveness, which fact itself shall be taken into consideration by the contracting officer.

(iii) The negotiation process does not contemplate or require agreement on either estimated cost elements or profit elements, although the details of analysis and evaluation may be discussed in the fact-finding phase of the negotiation. If the difference between the contractor's profit objective and the contracting officer's profit objective is relatively small, no discussion of individual factors may be necessary. If the negotiating parties' objectives are relatively far apart, a disclosure of weightings and rationale by both parties may be made concerning the total assigned to contractor effort, contractor risk, facilities investment, and special factors. By thus developing a mutual understanding of the logic of the respective positions, an orderly progression to final agreement should result. Simultaneous, not sequential, agreement will be reached on cost, any incentive profit-sharing formulas or limitation on profits, and price. The profit objective is a part of an overall negotiation objective which, as a going-in objective, bears a distinct relationship to the target cost objective and any proposed sharing arrangement. Since the profit is merely one of several interrelated variables, the Government negotiator shall not complete the profit negotiation without simultaneously agreeing on the other variables. Specific agreement on the exact weights or values of the individual factors is not required and shall not be attempted.

(iv) The prime contractor may use the weighted guidelines or a structured approach that discriminates among different levels of investment if the acquisition would be subject to the weighted guidelines under a prime contract. (For applicability, see 230.570–1(c).) If the acquisition falls into one of the exceptions to the weighted guidelines (see 215.902(a)(2)), the prime contractor may use another method to establish profit objectives. In the absence of structured approach that discriminates among different levels of investment, similar to the weighted guidelines, the profit objective will be reduced by the amount of facilities capital cost of money allowed in accordance with FAR 231.205–10.

(v) The following factors shall be considered in all cases in which profit is to be specifically negotiated. The weight ranges listed after each factor shall be used in all instances where the weighted guidelines method is used.

	Weight ranges		
	Manufacturing*	R&D	Services
A. CONTRACTOR EFFORT			
Material Acquisition:			
Subcontract Items	1 to 5%	1 to 5%	1 to 5%.
Purchased Parts	1 to 4%	1 to 4%	1 to 4%.
Other Material	1 to 4%	1 to 4%	1 to 4%.
Engineering: Direct Labor	9 to 15%	9 to 15%	N/A.
Manufacturing: Direct Labor	5 to 9%	5 to 9%	N/A.
Services:			
Direct Labor	N/A	N/A	5 to 15%.
Overhead	N/A	N/A	4 to 8%.
Other: General Management	6 to 8%	6 to 8%	6 to 8%.
B. CONTRACTOR RISK	0 to 8%	0 to 7%	0 to 4%.
C. FACILITIES INVESTMENT	16 to 20%	N/A	N/A.
D. SPECIAL FACTORS			
Productivity	See 15.905–[illegible].	N/A	N/A.
Independent Development	1 to 4%	1 to 4%	N/A.
Other	−5 to +5%	−5 to +5%	−5 to +5%.

*An adjustment factor of .7 is applied to the results of the Contractor Effort evaluation to arrive at the dollar profit objective for this factor (see DD Form 1547).

(vi) Under the weighted guidelines method, the contracting officer shall first measure the "Contractor's Effort" by the assignment of a profit percentage, within the designated weight ranges, to each element of contract cost recognized by the contracting officer. Although certain classifications of acceptable cost, including travel, subsistence, facilities, test equipment, special tooling, Federal manufacturers' excise taxes, and royalty expenses, may have been historically excluded from the base upon which profit has been computed, they shall not be excluded when using the weighted guidelines method. Not to be included for the computation of profit as part of the cost base is the amount calculated for the cost of money for facilities capital. How this cost is determined and how it will be applied and administered is fully set forth in 230.70.

(vii) The suggested categories under the Contractor's Effort are similar to those on the Contract Pricing Proposal (SF 1411). Often, individual proposals will be in a different format, but since these categories are broad and basic, they provide sufficient guidance to evaluate all other items of cost.

(viii) After computing a total dollar profit for the Contractor's Effort, the contracting officer then shall add the specific profit dollars assigned for cost risk, facilities investment risk, and special factors. Weighted Guidelines Profit/Fee Objective (DD Form 1547) is to be used, as appropriate, to facilitate the calculation of this profit objective.

(ix) The weighted guidelines method was designed for arriving at profit or fee objectives for other than nonprofit organizations. However, if appropriate adjustments are made to reflect differences between profit and nonprofit organizations, the weighted guidelines method can be used as a basis for arriving at fee objectives for nonprofit organizations. Therefore, the policy of the Department of Defense is to use the weighted guidelines method, as modified in (a)(1)(ix)(B) below, to establish fee objectives that will stimulate efficient contract performance and attract the best capabilities of nonprofit organizations to defense-oriented activities. The modifications shall not be applied as deductions against historical fee levels but to the fee objective for such a contract, as calculated under the weighted guidelines method.

(A) For purposes of this subparagraph, nonprofit organizations are defined as those business entities organized and operated exclusively for charitable, scientific, or educational purposes, of which no part of the net earnings inure to the benefit of any private shareholder or individual, of which no substantial part of the activities is carrying on propaganda or otherwise attempting to influence legislation or participating in any political campaign on behalf of any candidate for public office, and which are exempt from Federal income taxation under Section 501 of the Internal Revenue Code.

(B) For contracts with nonprofit organizations where fees are involved, the following adjustments are required in the weighted guidelines method.

a. An adjustment of −1% of the total effort shall be assigned in all cases where the manufacturing weighted guidelines method is used. An adjustment of −3% of the total effort shall be assigned in all cases where the research and development or services weighted guidelines method is used.

b. The weight range under "Contractor Cost Risk" shall be −1% to 0% in lieu of 0% to 8% for contracts with those nonprofit organizations, or elements thereof, identified by the Secretary of Defense or the Secretary of a Department (or their respective designees) as receiving sustaining support on a cost-plus-a-fixed-fee basis from a particular Department or Agency of the Department of Defense.

(x) In making a judgment of the value of each factor, the contracting officer should be governed by the definition, description, and purpose of the factors, together with considerations for evaluating them as set forth herein.

(i) Under the following listed circumstances, other methods for establishing profit objectives may be used:

(A) Architect-engineering contracts;

(B) Management contracts for operation and/or maintenance of Government facilities;

(C) Construction contracts;

(D) Contracts primarily requiring delivery of material supplied by subcontractors;

(E) Termination settlements;

(F) Cost-plus-award-fee contracts;

(G) Contracts not expected to exceed $500,000; and

(H) Unusual pricing situations where the weighted guidelines method has been determined to be unsuitable. Such exceptions shall be justified in writing and shall be authorized by the head of the contracting activity.

(ii) If the contracting officer makes a written determination that the pricing situation meets any of the circumstances set forth above and that application of the manufacturing weighted guidelines will result in an equitable profit objective, other methods for establishing the profit objective may be used. These

methods shall be supported in a manner similar to that used in the weighted guidelines (profit factor breakdown and documentation of profit objectives); however, investment or other factors that would not be applicable to the contract shall be excluded from the profit objectives for noncapital intensive contracts that are below those generally developed for capital intensive contracts.

215.903 Contracting officer responsibilities.

(b) In analyzing profit, contracting officers should consider the following:

(1) When cost analysis is performed pursuant to 215.805–3, profit consideration shall be in accordance with the objectives set forth below. The Government should establish a profit objective for contract negotiations, which will—

(i) Motivate contractors to undertake more difficult work requiring higher skills and reward those who do so;

(ii) Allow the contractors an opportunity to earn profits commensurate with the extent of the cost risk they are willing to assume;

(iii) Motivate contractors to provide their own facilities and financing and to establish their competence through development work undertaken at their own risk and reward those who do so; and

(iv) Reward contractors for productivity increases.

The weighted guidelines method set forth in 215.902 for establishing profit objectives is designed to provide reasonably precise guidance in applying these principles. This method, properly applied, will tailor profits to the circumstances of each contract in such a way that long-range, cost-reduction objectives will be fostered, and a spread of profits will be achieved that is commensurate with varying circumstances.

(2) Development of a profit objective should not begin until after a thorough—

(i) Review of proposed contract work;

(ii) Review of all available knowledge regarding the contractor, including capability reports, audit data, preaward survey reports and financial statements, as appropriate; and

(iii) Analysis of the contractor's cost estimate and comparison with the Government's estimate or projection of cost.

(3) A profit objective is that part of the estimated contract price objective or value which, in the judgment of the contracting officer, is appropriate for the acquisition being considered, covering the profit or fee element of the price objective. This objective should realistically reflect the total overall task to be performed and the requirements placed on the contractor. Prior to the negotiation of a contract, change order, or contract modification where cost analysis is undertaken, the negotiator shall develop a profit objective. The weighted guidelines method, if applicable, shall be used for developing this profit objective.

(f) In cases where the change or modification calls for substantially different work, then the basic contract profit and the contractor's effort may be radically changed and a detailed analysis is necessary. Also, if the dollar amount of the change or contract modification is very significant in comparison to the contract dollar amount, a detailed analysis shall be made.

215.905 Profit-analysis factors.

215.905–1 Common factors.

(a) This factor is a measure of how much the contractor is expected to contribute to the overall effort necessary to meet the contract performance requirements in an efficient manner. This factor, which is apart from the contractor's responsibility for contract performance, takes into account what resources are necessary and what the contractor must do to accomplish a conversion of ideas and materials into the final product called for in the contract. This is a recognition that, within a given performance output or within a given sales dollar figure, necessary efforts on the part of individual contractors can vary widely in both value and quantity, and that the profit objective should reflect the extent and nature of the contractor's contribution to total performance. The evaluation of this factor requires an analysis of the cost content of the proposed contract as follows.

(1) Analysis of these cost items shall include an evaluation of the managerial and technical effort necessary to obtain the required purchased parts, subcontracted items, and other materials, including special tooling. This evaluation shall include consideration of the number of orders and suppliers and whether established sources are available or new sources must be developed. The contracting officer shall also determine whether the contractor will obtain the material and tooling by routine orders from readily available supplies (particularly those of substantial value in relation to the total contract cost) or by detailed subcontracts for which the prime contractor will be required to develop complex specifications involving creative design or close tolerance manufacturing requirements. Consideration shall be given to the managerial and technical efforts necessary for the prime contractor to administer subcontracts and select subcontractors, including efforts to break out subcontracts from sole sources through the introduction of competition. These determinations shall be made for purchases of raw materials or basic commodities, purchases of processed material, including all types of components of standard or near standard characteristics, and purchases of pieces, assemblies, subassemblies, special tooling, and other products special to the end item. In the application of this criterion, it should be recognized that the contribution of the prime contractor to his purchasing program may be substantial. This may apply in the management of subcontracting programs involving many sources, new complex components and instrumentation, incomplete specifications, and close surveillance by the prime contractor's representative. Recognized costs proposed as direct material costs, like scrap charges, shall be treated as material for profit evaluation. If the intracompany transfers are accepted at price, they shall be evaluated as material. Other intracompany transfers shall be evaluated by individual components of cost, i.e., material, labor, and overhead. Normally, the lowest unadjusted weight for direct material is 2%. A weighting of less than 2% would be appropriate only in unusual circumstances when there is a minimal contribution by the contractor.

(2) Analysis of the engineering, manufacturing, and service labor items of the cost content of the contract shall include evaluation of the comparative quality and level of the engineering talents, manufacturing and service skills, and experience to be employed. In evaluating engineering labor for the purpose of assigning profit dollars, consideration shall be given to the amount of notable scientific talent or unusual or scarce engineering talent needed in contrast to journeyman engineering effort or supporting personnel. The diversity, or lack thereof, of scientific and engineering specialties required for contract performance and the corresponding need for engineering supervision and coordination shall be evaluated. Similarly, the variety of manufacturing labor skills required and the contractor's manpower resources for meeting these requirements shall be considered. Service contract labor shall be evaluated in a like manner by

assigning higher weights to engineering or professional-type skills and lower weights to semiprofessional or other type skills required for contract performance. A weighting in excess of 10% for service contract labor will be justified normally only when the quality, skill, and experience of the service contract labor warrant a corresponding weighting under a research and development contract.

(3)(i) Analysis of conversion related indirect costs and general management (FAR 15.905–1(a)(4)) includes the evaluation of the makeup of these expenses and how much they contribute to contract performance. This analysis shall include a determination of the amount of labor within these overhead pools and how this labor would be treated if it were considered as direct labor under the contract. The allocable labor elements shall be given the same profit consideration that they would receive if they were treated as direct labor. The other elements of these overhead pools shall be evaluated to determine whether they are routine expenses, like utilities, depreciation, and maintenance, and hence given lesser profit consideration, or whether they are significant contributing elements. The composite of the individual determinations in relation to the elements of the overhead pools will be the profit consideration given the pools as a whole. The procedure for assigning relative values to these overhead expenses differs from the method used in assigning values of the direct labor. The upper and lower limits assignable to the direct labor are absolute. In the case of overhead expenses, individual expenses may be assigned values outside the range as long as the composite ratio is within the range.

(ii) It is not necessary that the contractor's accounting system break down the overhead expenses within the classifications of engineering overhead, manufacturing overhead, and general and administrative expenses, unless dictated by cost accounting standards (CAS). The contractor whose accounting system only reflects one overhead rate on all direct labor need not change the system (if CAS-exempt) to correspond with the above classifications. In evaluating such a contractor's overhead rate, the contracting officer can break out the applicable sections of the composite rate which can be classified as engineering overhead, manufacturing overhead, and general and administrative expenses, and follow the appropriate evaluation technique.

(iii) There is a critical factor to consider in the determination of profit in this area. Management problems surface in various degrees and the management expertise exercised to solve them shall be considered as an element of profit. For example, a new program for an item that is on the cutting edge of the state of the art will cause more problems and require more managerial time and abilities of a higher order than a follow-on contract. If new contracts create more problems and require a higher profit weight, follow-ons shall be adjusted downward as many of the problems shall have been solved. In any event, an evaluation shall be made of the underlying managerial effort involved on a case-by-case basis.

(iv) It may not be necessary for the contracting officer to make a separate profit evaluation of overhead expenses with each acquisition of substantially the same product with the same contractor. Where an analysis of the profit weight to be assigned to the overhead pool has been made, the weight assigned may be used for future contracts with the same contractor until there is a change in the cost composition of the overhead pool or the contract circumstances, or until the factors discussed in (a)(3)(iii) above are relevant.

(4) See (a)(3) above.

(b) In evaluating contract cost risk, contracting officers should also consider the following:

(1) This factor reflects the policy of the Department of Defense that contractors bear an equitable share of contract cost risk, and to compensate them for the assumption of that risk. A contractor's risk associated with costs to perform under a Government contract is usually minimal under cost-reimbursement type contracts. However, as acquisition progress from basic research through follow-on production and supply contracts, the use of increased contractor-risk-assumption-type contracts is appropriate for increasing the contractor's responsibility for performance. The generally accepted progression of the acquisition spectrum ranging from basic research through supply acquisitions and from cost to firm fixed-price contracts, is shown below:

Type of effort	Type of contract
1. Basic Research	Cost, CPFF.
2. Applied Research	Cost, CPFF.
3. Exploratory Development	Cost, CPFF.
4. Advanced Development	CPFF, CPAF.
5. Engineering Development	CPFF, CPAF, CPIF.
6. Operational System Development	CPIF, CPAF, FPI.
7. First Production	FPI.
8. Follow-on Production	FPI, FFP.
9. Supply	FFP.

(2) In developing the prenegotiation profit objective, the contracting officer will need to consider strongly the type of contract anticipated to be negotiated and the associated contractor risk when selecting the position in the weight range for profit that is appropriate for the risk to be borne by the contractor. This is one of the most important factors in arriving at prenegotiation profit objectives.

(3) Evaluation of this risk requires a determination of (i) the degree of cost responsibility the contractor assumes, (ii) the reliability of the cost estimates in relation to the task assumed, and (iii) the complexity of the task assumed by the contractor. This factor is specifically limited to the risk of contract costs. Thus, such risks on the part of the contractor as reputation, losing a commercial market, losing potential profits in other fields, or any risk on the part of the contracting activity, such as the risk of not acquiring an effective weapon, are not within the scope of this factor.

(4) The first and basic determination of the degree of cost responsibility assumed by the contractor is related to the sharing of total risk by contract cost by the Government and the contractor through the selection of contract type. The extremes are a cost-plus-fixed-fee contract, requiring only that the contractor use his best efforts to perform a task, and firm fixed-price contract for a complex item. A cost-plus-fixed-fee contract reflects a minimum assumption of cost responsibility, whereas a firm fixed-price contract reflects a complete assumption of cost responsibility.

(5) The second determination is that of the reliability of the cost estimates. Sound price negotiation requires well-defined contract objectives and reliable cost estimates. Prior production experience assists the contractor in preparing reliable cost estimates on new contracts for similar equipment. An excessive cost estimate reduces the possibility that the cost of performance will exceed the contract price, thereby reducing the contractor's assumption of contract cost risk.

(6) The third determination is that of the difficulty of the contractor's task. The contractor's task can be difficult or easy, regardless of the type of contract.

(7) Contractors are likely to assume greater cost risk only if contracting officers objectively analyze the risk incident to proposed contracts and are willing to compensate contractors for it. Generally, a cost-plus-fixed-fee contract will not justify a reward for risk in excess of 0.5%, nor will a firm fixed-price contract justify a reward of less

than the minimum on the weighted guidelines. Where proper contract-type selection has been made, the reward for risk, by contract type, will usually fall into the following percentage ranges:

(i) Type of contract and percentage ranges for profit objectives developed by using the manufacturing weighted guidelines method:

Cost-Plus-Fixed Fee	0 to 0.5%.
Cost-Plus-Incentive Fee	
With Cost Incentives Only	1 to 2%.
With Multiple Incentives	1.5 to 3%.
Fixed-Price-Incentive	
With Cost Incentives Only	3 to 5%.
With Multiple Incentives	4 to 6%.
Prospective Price Redetermination	4 to 6%.
Firm Fixed-Price	6 to 8%.

(ii) Type of contract and percentage ranges for profit objectives developed by using the research and development weighted guidelines method:

Cost-Plus-Fixed Fee	0 to 0.5%.
Cost-Plus-Incentive Fee	
With Cost Incentives Only	1 to 2%.
With Multiple Incentives	1.5 to 3%.
Fixed-Price-Incentive	
With Cost Incentives Only	2 to 4%.
With Multiple Incentives	3 to 5%.
Prospective Price Redetermination	3 to 5%.
Firm Fixed-Price	5 to 7%.

(iii) Type of contract and percentage ranges for profit objectives developed by using the service contract weighted guidelines method:

Cost-Plus-Fixed Fee	0 to 0.5%.
Cost-Plus-Incentive Fee	1 to 2%.
Fixed-Price-Incentive	2 to 3%.
Firm Fixed-Price	3 to 4%.

(A) These ranges may not be appropriate for all acquisitions. For instance, a fixed-price-incentive contract that is closely priced with a low ceiling price and high incentive share may be tantamount to a firm fixed-price contract. In this situation, the contracting officer may determine that a basis exists for high confidence in the reasonableness of the estimate and that little opportunity exists for cost reduction without extraordinary efforts. On the other hand, a contract with a high ceiling and low incentive formula can be considered to contain cost-plus-incentive-fee contract features. In this situation, the contracting officer may determine that the Government is retaining much of the contract cost responsibility and that the risk assumed by the contractor is minimal. Similarly, if a cost-plus-incentive-fee contract includes an unlimited downward (negative) fee adjustment on cost control, it could be comparable to a fixed-price-incentive contract. In such a pricing environment, the contracting officer may determine that the Government has transferred a greater amount of cost responsibility to the contractor than is typical under a normal cost-plus-incentive-fee contract.

(B) The contractor's subcontracting program may have a significant impact on the contractor's acceptance of risk under a contract form. It can cause risk to increase or decrease in terms of both cost and performance. This consideration shall be a part of the contracting officer's overall evaluation in selecting a factor to apply for cost risk. It may be determined, for instance, that the prime contractor has effectively transferred real cost risk to a subcontractor and the contract cost risk evaluation, as a result, may be below the range that would otherwise apply for the contract type being proposed. This situation will be found to exist only in a few extraordinary situations under circumstances of (i) a follow-on production contract, in which a substantial portion of the total contract costs represents a single subcontract or a few subcontracts, (ii) the fullest incentive reward and penalty feature on cost performance having been passed by the prime contractor to the subcontractor. In an acquisition in which all of these circumstances are found to exist, a lower than usual profit weight may be applied to the aggregate of all recognized costs including the subcontract portion. The contract cost risk evaluation shall not be lowered, however, merely on the basis that a substantial portion of the contract costs represents subcontracts without any substantial transfer of contractor's risk, since this can result eventually in a lessening of the amount of work let on subcontracts.

(C) In making a contract cost risk evaluation in an acquisition that involves definitization of a letter contract, unpriced change orders, and unpriced orders, under BOAs, consider the effect on total contract cost risk as a result of having partial performance before definitization. Under some circumstances it may be reasoned that the total amount of cost risk has been effectively reduced. Under other circumstances it may be apparent that the contractor's cost risk remained substantially unchanged. To be equitable, the determination of a profit weight for application to the total of all recognized costs, both those incurred and those yet to be expended, must be made with consideration to all attendant circumstances and not be just the portion of costs incurred, or percentage of work completed, prior to definitization.

(D) Time and material, labor hour, and overhaul contracts priced on a time and material basis shall be considered to be cost-plus-fixed-fee contracts for the purpose of establishing a profit weight in the evaluation of the contractor's assumption of contract cost risk.

(E) In determining the contract cost risk percentage under CONTRACTOR RISK in profit factors of the weighted guidelines provided in 215.902(a)(1), it is appropriate to consider additional risks associated with foreign military sales (FMS). To be recognized, an additional cost risk factor shall be demonstrated by the contractor to be significant and over and above that normally present in DoD contracts for similar items. If an additional cost risk factor associated with FMS is recognized, the total profit under the CONTRACTOR RISK Section shall not exceed the limits set forth in FAR 15.903(d) for different types of contracts. For example, when the manufacturing weighted guidelines method is used, the limitation will be 0.5% for CPFF contracts, 3% for CPIF contracts, 6% for FPI contracts, and 8% for FFP contracts. The additional cost risk factor shall not apply to FMS made from inventories or stocks nor to acquisitions made under DoD cooperative logistics support arrangements.

(c) See 215.905–2.

(d) This element relates to the consideration to be given in the profit objective in recognition of the investment risk associated with the facilities employed by the contractor. Sixteen to 20% of the net book value of facilities capital allocated to the contract is the normal range of weight for this profit factor. The key factors that the contracting officer shall consider in evaluating this risk are:

(1) The overall cost effectiveness of the facilities employed;

(2) Whether the facilities are general purpose or special purpose items;

(3) The age of the facilities;

(4) The undepreciated value of the facilities;

(5) The relationship of the remaining writeoff life of the investment and the length of the program(s) or contract(s) on which the facilities are employed; and

(6) Special contract provisions that reduce the contractor's risk of recovery of facilities capital investment (termination-protection clauses, multiyear cancellation ceilings, etc.). To assist in evaluating new investment, the contracting officer should request the contractor to submit reasonable evidence that the new facilities are part of an approved investment plan and that achievable benefits to the Government will result from the investment. New

industrial facilities and equipment shall receive maximum weight when they—

(i) Are to be acquired by the contractor primarily for defense business;

(ii) Have a long service life;

(iii) Have a limited economic life due to limited alternative uses; and

(iv) Reduce the total life cycle cost of the products produced for the Department of Defense.

To the extent that the new investment represents routine replacement of existing assets, a lesser weight shall be assigned.

(e) See 215.905–2.

(f) See 215.905–2.

215.905–2 Additional factors.

(a) *Productivity.*

(1) *General.* A key objective of the DoD profit policy is to reduce the cost of defense preparedness by incentivizing defense contractors' investment in modern cost-reducing facilities and other improvements in efficiency. To the extent that costs serve as the basis for pricing (both cost and profit), success in reducing costs can serve, in turn, to reduce profit dollars opportunity. For example, a fixed-price incentive-type contract is typically used for the first production contract of a major weapon system program. The incentive to increase productivity and reduce cost within one contract works against a contractor on follow-on production contracts because the reduced level of cost becomes a part of the basis for pricing subsequent contracts. In order to mitigate the loss of profit dollars opportunity that occurs when costs are reduced due to productivity gains, a special "Productivity Reward" may be included in the prenegotiation profit objective of a pending acquisition under certain circumstances.

(2) *Applicability criteria.* The "Productivity Reward" may be applied when the following criteria are met:

(i) The pending acquisition involves a follow-on production contract.

(ii) Reliable actual cost data is available to establish a fair and reasonable cost baseline.

(iii) Changes made in the configuration of the item being acquired are not of sufficient magnitude to invalidate price comparability.

(3) *Implementation procedures.* The amount of productivity reward for a given contract is based on the estimated cost reduction that can be attributed to productivity gains. Set forth below are principles and procedures that apply to estimating cost reductions and calculating the productivity reward:

(i) The contractor shall prepare and support the cost reduction estimate.

(ii) The overall contract cost decrease shall be based on estimated decreases measured at the unit cost level.

(iii) The lowest average unit cost (exclusive of profit) for a preceding production run shall serve as the unit cost baseline.

(iv) A technique shall be employed to determine that portion of the cost decrease attributable to productivity gains as opposed to the effects of quantity differences between the base contract and the pending acquisition.

(v) When the parties agree that the estimated overall contract cost decrease is materially affected by price level differences between the base period and the current point in time, an economic price adjustment may be applied to the estimate.

(vi) The productivity reward shall be calculated by multiplying the contract cost decrease due to productivity gains by the base profit objective rate.

(vii) The degree of review and validation of the data supporting the productivity reward calculation shall be commensurate with the materiality of this profit element in relation to the overall price objective. There may be several methods advanced, by both contracting officers and contractors, to quantify productivity gains. Any technique may be acceptable; *Provided* it takes into account equitably the principles and procedures listed above.

(b) *Independent development.* Contractors who develop items that have potential military application without Government assistance are entitled to special profit consideration on those items as a special profit factor to be considered within the weighted guidelines in arriving at a profit objective. One to 4% of recognized cost is established as the normal range of value for this profit factor. The criteria for selection of the specific percentage shall be the importance of the development in advancing defense purposes, the demonstratable initiative in determining the need and application of the development, the extent of the contractor's cost risk, and whether the development cost was recovered directly or indirectly from Government sources.

(c) *Other factors.* A composite percentage weight within the range of −5% to +5% of the basic profit objective may be assigned to other profit factors in arriving at the total profit objective. These other profit factors, which may apply to special circumstances or particular acquisitions, relate to contractor participation in the Government's Small Business, Small Disadvantaged Business, and Labor Surplus Programs, and to special situations not specifically set forth elsewhere in these guidelines. Participation that is rated as merely satisfactory shall be assigned a weight of zero, generally. Evidence of energetic support may justify a plus weight, and poor support a negative weight. Special situations may be assigned either a plus or minus weight, depending on the particular circumstances of the acquisition.

(1) *Small business and small disadvantaged business participation.* The contractor's policies and procedures that energetically support Government small business and small disadvantaged business subcontracting programs, pursuant to FAR 19, shall be given favorable consideration. Any unusual effort that the contractor displays in subcontracting with small business or small disadvantaged business concerns, particularly for development-type work likely to result in later production opportunities, and the overall effectiveness of the contractor in subcontracting with and furnishing assistance to such concerns shall be considered. Conversely, failure or unwillingness on the part of the contractor to support Government small business or small disadvantaged business policies shall be viewed as evidence of poor performance for the purpose of establishing a profit objective.

(2) *Labor surplus area participation.* A similar review and evaluation (as required in (c)(1) above) shall be given to the contractor's policies and procedures supporting the Government's Labor Surplus Area Program, pursuant to FAR 20. In particular, favorable consideration shall be given to a contractor who (i) makes a significant effort to help find jobs and provide training for the hardcore unemployed, or (ii) promotes maximum subcontractor utilization of certified eligible concerns, as defined in FAR 20.101.

(3) *Energy Conservation.* Favorable consideration shall be given to the contractor's initiatives and accomplishments in the conservation of energy.

(4) *Special Situations.* Particular situations may justify use of a profit factor other than those specifically identified in these guidelines. These situations shall be identified and the reason(s) for their use documented in the records of price negotiation. Examples of such situations include contractor effort to exploit additional production cost-reduction opportunities or to improve or develop new product/manufacturing technologies to reduce production cost.

Subpart 215.10—Preaward and Postaward Notifications, Protests and Mistakes

215.1001 Notification to Offerors.

(b)(1) Within DoD, the threshold for notification is $25,000 in accordance with 10 U.S.C. 2304(g).

(b)(2) Procurements processed under small purchase procedures are exempt from the requirements of FAR 15.1001(b)(2).

(c) Within DoD, the threshold for notification is $25,000 in accordance with 10 U.S.C. 2304(g).

215.1002 Debriefing Of Unsuccessful Offerors.

(a) Debriefings shall be provided at the earliest feasible time after contract award. They shall be conducted by purchasing office officials familiar with the rationale for the selection decision and contract award.

215.1070 Classified Information.

Classified information shall be furnished only in accordance with regulations governing classified information.

PART 216—TYPES OF CONTRACTS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 216.1—Selecting Contract Types

216.101 General.

(a) In addition, the role of profit in selecting contract type includes the following:

(1) Profit, generally, is the basic motive of business enterprise. Both the Government and its defense contractors should be concerned with harnessing this motive to work for the effective and economical contract performance required in the interest of national defense. To this end, the parties should seek to negotiate and use the contract type best calculated to stimulate outstanding performance. The objective should be to insure that outstandingly effective and economical performance is met by high profits, mediocre performance by mediocre profits, and poor performance by low profits or losses. The proper application of these objectives on a contract by contract basis should normally result in a range of profit rates.

(2) Success in harnessing the profit motive begins with the negotiation of sound performance goals and standards. This objective is met if the contractor either benefits or losses in relation to achieving or failing to achieve realistic targets. When award is based on effective price competition, there is reasonable assurance that the contract price represents a realistic pricing standard, including a profit factor which reflects an appropriate return to the contractor for the financial risk assumed in undertaking performance at the competitive price. In the absence of competitive forces, however, the contract type selected should provide for a profit factor that will tie profits to the contractor's efficiency in controlling costs and meeting desired standards of performance, reliability, quality, and delivery. Therefore, in noncompetitive situations, the degree to which available cost estimates are realistic, and the degree of uncertainty affecting the work to be performed, should be carefully considered in determining which type of contract should be selected and how it should be used.

(3) The policies in (a) (1) and (2) above required that the contractor assume a reasonable degree of cost responsibility as early in contract performance as is possible. This can be achieved only through vigorous contract administration and effort on the part of both parties to assure timely pricing. Particularly in fixed-price type contracts providing the price revisions, delays in pricing actions by either party may distort the type of contract which has been agreed upon and such delays must be avoided.

(4) When a contract type providing for a reasonable degree of contractor cost responsibility cannot be negotiated on a timely basis, due to the contractor's unwillingness to assume reasonable risk, profits should be negotiated so as to reflect this fact.

(4) When a contract type providing for a reasonable degree of contractor cost responsibility cannot be negotiated on a timely basis, due to the contractor's unwillingness to assume reasonable risk, profits should be negotiated so as to reflect this fact.

(5) Notwithstanding the validity of profit as a motivating factor in general, there are situations, particularly in the early stages of research and development, in which the profit motive may be secondary. Harnessing the profit motive at the early stages of such procurements may not be effective or desirable in view of the high degree of technical and cost risk associated with performance or consistent with achieving desired technical objectives. The contracting officer's objective should still be "effective and economical performance," but the relative weight of these factors must be kept in balance (see 216.104(S–71)). Of course, outstanding performance can still be rewarded under a research and development contract, by proper application of incentive techniques.

(6) The firm fixed-price contract is the most preferred type for harnessing the profit motive because the contractor accepts full cost responsibility, and the relationship between cost control and profit dollars is established at the outset of the contract. Accordingly, when a reasonable basis for firm pricing exists (see 216.202), the firm fixed-price contract shall be used, because its use under these circumstances will provide the contractor with a maximum profit incentive to control the costs of performance. However, the contracting officer must be alert to the fact that in certain situations the use of special contract incentive provisions may be more appropriate. While maximum incentive to a contract exists in a firm fixed-price contract, the basis for the application of firm fixed-price is the knowledge that the price has been arrived at either through competition or through sound pricing techniques which keep pricing uncertainties to a minimum. When contracting for research and development, or when price competition is not present, and (i) when the cost or pricing data available does not permit sufficiently realistic estimates of the probable cost of performance, or (ii) uncertainties surrounding the contract performance cannot be sufficiently identified to evaluate their impact on price, the use of a type of contract other than firm fixed-price should be considered. For example, a profit incentive to control costs can be achieved through use of the fixed-price incentive contract, and to a lesser degree, the cost-plus-incentive-fee contract, when appropriate target costs and incentive arrangements can be negotiated.

(b) The specific type of contract should be determined by the degree of risk in contract performance. When the risk is minimal or can be predicted with an acceptable degree of certainty, a firm fixed-price contract is preferred. However, as the uncertainties become more significant, other fixed price or cost type contracts should be employed to accommodate these uncertainties and to avoid placing too great a cost risk on the contractor.

216.104 Factors in selecting contract types.

(S–70) *Stability of Design.* Other factors to consider are stability of design, which in turn may influence such subordinate considerations as the adequacy and firmness of specifications, and the availability of relevant

historical pricing data and prior production experience and adequacy of the contractor's estimating system.

(S–71) Other factors based on development stage.

(1) *Research and development (R&D).* The selection of the appropriate contract type is, in the final analysis, the responsibility of the contracting officer. However, because of the importance of technical considerations at the R&D stage, the choice of contract type shall not be made without obtaining the recommendations of cognizant technical personnel. Generally, the selection of contract type should also be discussed with prospective contractors. Where appropriate, R&D solicitations should permit prospective contractors to propose an alternative contract type. Any counterproposal must be supported by the contractor's rationale for his choice. The contracting officer shall include a statement in the file, setting forth his rationale for the type of contract ultimately selected. The categories of Research, Exploratory Development, Advanced Development, Engineering Development and Operational Systems Development, represent the spectrum of the R&D cycle and were so designated to provide an appropriate breakdown of R&D effort for management purposes. Each category has a prime technical or functional objective and certain distinctive features. It should not be inferred, however, that each category is a discrete step in the R&D process with a clear beginning and end entirely separate and distinct each from the other. In the latter categories of development, it is possible for different parts of a project to fit several different category definitions. Thus, a project properly categorized as Engineering Development may include subsystem work or elements of work that are, because of their particular technical state of development, truly Advanced Development, or in rare cases, even Exploratory Development. Again, the contract must be selected to fit the work required, not selected solely on the basis of the classification of the overall program.

(2) *Research and exploratory development.* The categories of Research and Exploratory Development form a logical grouping of the R&D process at one end of the spectrum. In Research and Exploratory Development contracting, the nature of the work, the usual lack of definitive requirements, the inability to measure technical objectives, the inability to measure risk, the amount of government technical direction and control desired, the lack of competition, and whether the contractor will be an educational institution, commercial company, or a not-for-profit organization, may be primary consideration in choosing the type of contract. Price is not necessarily the primary factor in determining the contract type. While no restriction exists on the type of contract which may be used, the nature of the work in these categories most frequently necessitates the negotiation of a CPAF, CPFF term, cost-no-fee, or cost-sharing contract. In cases where the level of contractor effort desired can be identified and agreed upon in advance of performance, negotiation of a firm fixed-price level of effort contract may be appropriate. Incentive type contracts should not be used unless the contractor and Government agree that an incentive arrangement is desirable, can be effective, and, upon completion, can be evaluated in terms of the incentives.

(3) *Advanced development.* The primary objective of Advanced Development is to determine and demonstrate, experimentally, the acceptability of the technical, economic, logistic and operational characteristics of one or more advanced concepts considered suitable for solution of a clearly stated military problem or technical objective. Advanced development provides the development effort which couples the inventory of science, technological and feasibility concepts derived from research and exploratory development to the end use oriented engineering and operational system developments. Included in this is the experimental demonstration of advanced technologies, equipment, subsystems, or systems, as well as the study, design, development, test and evaluation of advanced or innovated hardware, equipment or instrumentation necessary to provide a basis for selection among alternatives. It includes systems analyses trade-off studies, cost effectiveness analyses and particularly exploratory technological effort directly responsive to the objectives of the specific advanced development. Further, it includes conceptual effort required to generate the information to satisfy the prerequisites to initiation of system development wherein advanced development efforts are aimed at risk reduction and providing feasibility—often referred to as the validation phase or prototype phase. It is in this category that the first significant hardware for test is developed. In this broad category of work, selection of the best contract type should be made only after careful identification of the specific nature of the work required. No restriction exists as to the type of contract that may be used for work in this category. The nature of the work, however, often necessitates the use of CPFF completion type contracts. Incentive contracts can be effectively used in this category when realistic, measurable targets can be identified and program success can be predicted with a reasonable degree of accuracy. Contracts with only cost incentive should not be used in procurement where, at the outset, it can be expected that there will be a large number of major technical changes in the project or where actions beyond the control of the contractor may influence the just determination of the contractor's achievement. Competition may be used in these efforts for risk reduction, design innovation and cost reduction.

(4) *Engineering development and operational systems development.* Engineering and Operational Systems Development, because of many similarities, from a logical grouping in the spectrum of R&D categories. These categories, the ultimate aim of which is production and development, include all effort the primary objective of which is the enginneering design and final engineering demonstration of the technical, economic, logistic and operational characteristic of an experimentally feasible and acceptable system, equipment, subsystem, component or process judged to be the optimum solution to clearly stated military problems or technical objectives. In Engineering Development, such effort is founded on the probability of eventual procurement for inventory and use, and, therefore, includes effort leading to the demonstration of acceptability for such procurement. Operational Systems Development effort has the primary objectives of producibility demonstation and R&D support of final service test of the logical and operational development of an acceptable system, equipment, subsystem or component, approved for procurement and operational deployment or otherwise specifically approved for inclusion in this category. It may include the building of one or more production prototypes utilizing all processes, tooling, and test equipment considered for the production process thereby constituting a demonstration and qualification of the production process. Even when the overall project is in Engineering or Operational System Development, there may be integral supporting tasks that are still in the Advanced Development stage and the contract type for these tasks should be selected accordingly. The type of contract selected should be decided on

the basis of major factors such as: (i) the definitiveness of the project at this stage and its bearing on the accuracy of cost estimates; (ii) the completion schedule required for satisfactory operational deployment; (iii) the degree of risk and uncertainty expected; (iv) the ability to establish meaningful and measureable incentives; (v) the need for effort overlapping that of earlier development stages; (vi) the desirability of firm technical direction by the Government and (vii) the degree of configuration control to be exercised. Any one or combination of these factors could have a direct bearing on the type of contract selected. Cost reimbursement type contracts are preferred to all development efforts and particularly for major defense systems. When risk has been reduced to the extent that realistic pricing can occur, fixed price type contracts should be used, e.g., when a program has reached the final stages of development and technical risks are minimal. The use of letter contracts shall be minimized.

Subpart 16.2—Fixed-Price Contracts

216.203–4 Contract clauses.

(a) In addition, the clause should normally be used only when the total contract price is over $5,000 and delivery is not to be completed within six months after the contract date.

(b) In addition, the clause should normally be used only when the total contract price is over $5,000 and delivery is not to be completed within six months after the contract date.

(c)(1) in addition, the clause shall be limited to contracts in which the price exceeds $50,000 and the period of performance exceeds six months unless its use otherwise is approved by the Chief of the contracting office. An appropriate modification of the clause may be used in advertised procurements. Further, the clause may be modified by increasing the 10 percent limit on aggregate increases specified in subparagraph (c)(4) of the clause upon approval by the chief of the contracting office.

(3) The following sample format illustrates a type of schedule description that may be used:

The following types of labor and material are subject to price adjustment pursuant to the "Economic Price Adjustment—Labor and Material" clause of this contract.

CONTRACT ITEM NO. 1

Type of labor and material	Rates of pay and material prices	Quantities and direct purchase of procurement
Drill press operator.	$3.00/hour, no fringe benefits included	
	$3.00	20 min—$1.00.
Welder	$2.75/hour .05/hour—vacation pay .20/hour—pension plan	
	$3.00	10 min—$0.50.
Copper sheet	$0.40/lb.	2 lb.—$0.80.
Purchased parts:		
(1) ABC tube X5721.	$1.00 each	3 ea.—$3.00.
(2) XYZ part #9348.	$0.50 each	10 ea.—$5.00.

(c)(4) Also, the specific terms and conditions of the authorized clause are not applicable, a modified economic price adjustment clause to cover increases or decreases in the actual costs incurred by the contractor for labor or materials may be included if it is consistent with the above guidelines and is approved by the department concerned.

(iv) Make the full amount of decrease in the labor rates and fringe benefits or unit prices for materials.

(d)(3) The following factors may be considered in preparing a price adjustment clause meeting the criteria above including construction of appropriate indices:

(i) The clause should not be overly complex.

(ii) Normally, the clause should not provide either a ceiling or a floor for adjustment unless adjustment is based on indices below the four digit level of the Bureau of Labor Statistics Producer Price Index or the Wage and Income Series by Standard Industrial Classification (Labor);

(iii) Normally, the clause should cover all potential economic fluctuations within the original contract period of performance;

(iv) The clause must have a positive and accurate identification of the applicable index(es) upon which adjustments will be based and provide appropriate economic fluctuation in the event of the discontinuance of the publication of the movement of the designated index. This might include the substitution of another index if the time remaining would so justify and an appropriate index is reasonably available, or some other method for repricing of the remaining portion of the work to be performed. There should not normally be any need to make an adjustment in the event computation of the identified index is altered; however, provision may be made to adjust the economic fluctuation computations in the event there is such a substantial alteration to the method of computing the index as to negate the original intent of the parties. When an index to be used is subject to revision (e.g., the Bureau of Labor Statistic Producer Price Indexes), the economic price adjustment clause shall further specify that any economic price adjustment shall be based upon the applicable revised index;

(v) An index should be structured to encompass a large sample of relevant items yet bear a logical relationship to the type of contract costs being measured. The basis of the index should not be so large and diverse that it is significantly affected by fluctuations not relevant to the contract performance, yet must be significantly broad so as to assure the minimal effect of any single company, including the anticipated contractors.

(vi) Construction of an index is largely dependent upon two general series published by the U.S. Department of Labor, Bureau of Statistics (BLS). These are the industrial Commodities portion of the Producer Price Index and the Wage and Income Series by Standard Industrial Classification for labor. Since there are no BLS published series currently available that relate directly to total prices of delivered DoD aircraft, ships, missiles, electronics, etc., such composite indices from major portions of the two series described above should be made.

(vii) Normally not more than two indices should be used, i.e., one for labor (direct and indirect) and one for material (direct and indirect).

(viii) The clause must establish and properly identify a base period comparable to the contract periods for which adjustments are to be made as a reference point for application of an index.

(ix) The clause should provide for adjustment from the beginning of the contract or from such period of time that the rate of expenditure is commensurate with the administrative cost and effort to adjust, but it should not provide for adjustment beyond the original contract performance period.

(x) The expenditure profile for both labor and material should be based on a predetermined rate of expenditure (expressed as the percentage of material or labor usage as it relates to total contract price) in lieu of actual cost incurred. In the event the clause is to be used in a competitive procurement, the labor and material allocations, with regard to both mix of labor and material

and rate of expenditure by percentage, shall be determined by the PCO in a manner which will, as nearly as possible, approximate the average expenditure profile of all companies to be solicited in order that all companies may compete on an equal basis. If the clause is to be used in a noncompetitive procurement, the labor and material allocations as determined by the PCO may be subject to negotiation and agreement. For multi-year contracts, there should be established predetermined expenditure profile tables for each of the annual increments in the multi-year buy, with each of the second and subsequent year tables being cumulative to reflect the total expenditures for all increments funded through the latest multi-year funding.

(xi) The clause should state that percentage of the contract price subject to price adjustment. Normally, adjustments would not be applied to the profit portion of the contract. Additionally, the labor and material portions of the contract must be examined to exclude any areas that do not require adjustment. It may not be necessary, for example, to include all subcontracting as being subject to economic price adjustment because some of the subcontracting could be for shorter periods of time during the early life of the contract and, would be covered therefor, by firm priced subcontracting. It may be possible to exclude certain areas of overhead from economic price adjustment protection; for example, depreciation charges, prepaid insurance costs, rental costs, leases, certain taxes, and utility charges are illustrated as some of the areas that should be examined in detail. In the same manner, consideration should be given to the necessities to include economic fluctuation protection covering that portion of labor for the period of time for which a definitive union agreement exists without additional factoring for such things as cost of living increases. Care should be taken to allocate to labor and material only those costs likely to be affected by fluctuation in the economy. That portion of the contract which is determined to be proper for economic fluctuation protection shall then be allocated to specific periods of time (e.g., quarterly, semiannually, etc.) based on the most probable expenditure or commitment basis (expenditure profile).

(xii) The clause should provide for definite times or events positive for price adjustments. Adjustments should be of such a frequency so as to afford the contractor appropriate economic relief without at the same time creating a burdensome administrative effort. The adjustment period should normally range from a minimum of quarterly to a maximum of annually.

(xiii) When the contract contains cost incentives, any sums paid to the contractor on account of economic price adjustment provisions shall be subtracted from the total of the contractor's allowable cost for the purpose of establishing the total costs to which the cost incentive provisions apply. If the incentive arrangement is cited in percentage ranges rather than dollar ranges, above and below target costs, the economic price adjustment clause should be structured to maintain the original contract incentive range in dollars.

(xiv) The economic price adjustment clause should provide that once the labor and material allocations have been established, they remain fixed through the life of the contract and are not modified except in the event of partial termination of the contract. The clause should state that pricing actions pursuant to the Changes clause or other provisions of the contract will be priced as though there were no provisions for economic price adjustment.

(4) Consistent with the factors set forth above, the contracting officer may also determine it appropriate to provide for certain economic price adjustment arrangements between the prime contractor and subcontractors to properly allocate risks. In such circumstances, provision for incorporation of price adjustment clauses in specified subcontracts should be included in the price adjustment provision of the prime contract.

(5) When economic price adjustment provisions are included in contracts that do not require submission of cost or pricing data as provided for in 215.804–3, it will be the responsibility of the contracting officer to obtain adequate information to establish the base line from which adjustments will be made. In addition, the contracting officer may require verification of the data submitted to the extent considered necessary to permit reliance upon it as a reasonable base line.

216.203–70 Fixed-price contracts with economic price adjustment.

(a) *Price adjustment for basic steel, aluminum, brass, bronze or copper mill products.* The price adjustment clause at 252.216–7000 is authorized for use in fixed-price supply contracts for basic steel, aluminum, brass, bronze or copper mill products, such as sheets, plates and bars, when an established catalog or market price exists for the particular product being procured and has been verified in accordance with criteria in 215.804–3(c). The 10 percent figure in paragraph (c)(1) of the clause shall not be exceeded unless approved by the Chief of the Contracting Office. No adjustment under this clause shall be made in the contract price until the requested adjustment has been verified by the contracting officer, in accordance with the criteria set forth in FAR 15.804–3 and as required by paragraph (c)(4) of the clause.

(b) *Price adjustment for nonstandard steel items.* The price adjustment clause at 252.216–7001 is authorized for use in fixed price supply contracts when:

(1) The contractor is a steel producer and actually manufactures the standard steel mill item referred to in paragraph (d) of the clause; and

(2) The items being procured are nonstandard steel items made wholly or in part of standard steel mill items.

When this clause is included in invitations for bids, Note (8) of the clause is inapplicable and shall be omitted. Invitations for bids or requests for proposals shall instruct bidders or offerors to complete all blanks in accordance with the applicable notes. When the clause is to provide for adjustment based on the contractor's "established price" (see paragraphs (a) and (d) of the clause and Note (8) of the clause), the established price shall be verified in accordance with 215.804–3 prior to contract award. When the clause is to provide for adjustment on another basis (see Note (9) of the clause), that price must be verified. No adjustment under this clause shall be made in the contract price until the requested adjustment has been verified by the contracting officer, in accordance with criteria set forth in FAR 15.804–3 (but see Note (8) of the clause) and as required by paragraph (f) of the clause. The 110% figure in paragraph (e) of the clause shall not be exceeded unless approved by the Chief of the Contracting Office.

216.206 Fixed-ceiling price contracts with retroactive price redetermination.

216.206–1 Description.

The redetermined price should be negotiated so as to give weight to the management effectiveness and ingenuity exhibited by the contractor during performance, and the basis for such negotiation should be fully discussed with the contractor when this type of contract is negotiated. Because the price is redetermined on a completely retroactive basis, this contract type (except for the price ceiling) does not provide the contractor with a calculable

incentive for effective cost control. Once established, the ceiling price is subject to adjustment only if required by the operation of other contract clauses (see FAR 16.201).

216.207 Firm-fixed-price, level-of-effort term contracts.

216.207-1 Description.

This type of contract can be a useful tool, particularly in the Research and Exploratory Development categories when the work cannot be clearly defined and the level of effort desired can be identified and agreed upon in advance of performance.

Subpart 216.3—Cost-Reimbursement Contracts

216.301 General.

216.301-2 Application.

While cost reimbursement contracts are particularly useful for procurements involving substantial amounts, e.g., estimated cost of $100,000 or more, the parties may agree in a given case to use this type of contract to cover transactions in which the estimated costs are less than $100,000.

216.303 Cost sharing contracts.

(b) *Application.* Cost sharing contracts are for use in research or development procurements.

216.306 Cost-plus-fixed-fee contracts.

(b) *Application.* In addition to the conditions of FAR 16.301–2 being present, a cost-plus-fixed-fee contract is suitable when:

(1) A cost-reimbursement type of contract is found necessary in accordance with 216.301–2;

(2) The parties agree that the contract should be fee bearing;

(3) Where the level of effort required is unknown; and where measuring achievements in contract performance does not lend itself to the subjective evaluation required in CPAF contracts;

(c)(S–70) This type of contract normally should not be used in the development of major weapons and equipment, once prerequisite preliminary exploration, studies, and risk reductions have indicated a high degree of probability that the development is achievable and the Government generally has determined its desired performance objectives and schedule of completion. The cost-plus-fixed-fee contract shall not be used for procurements categorized as either Engineering Development or Operational System Development; which have completed the Validation Phase except with the approval of the Head of a Contracting Activity or his designee, it may be used in these categories for individual procurements, ancillary to the development of a major weapons system or equipment, where the purpose of the procurement is clearly to determine or solve scientific problems associated with the major weapon system or equipment.

Subpart 216.4—Incentive Contracts

216.402 Application of predetermined, formula-type incentives.

216.402-2 Technical performance incentives.

Increases in profits or fees resulting from the use of incentive provisions are made only because cost, performance, or other contractual goals or standards have been surpassed.

(S–70) *Description.* A contract with a performance incentive is one which incorporates an incentive to the contractor to surpass stated performance targets by providing for increases to the extent that such targets are not met. Salient features and considerations in the use of this type of contract are as follows:

(1) "Performance," as used in this paragraph refers not only to the performance of the article being procured, but to the performance of the contractor as well. Performance which is the minimum which the Government will accept shall be mandatory under the terms of the Completion form contract and shall warrant only the minimum profit or fee related thereto. Performance which meets the stated targets will warrant the "target" profit or fee. Performance which surpasses these targets will be rewarded by additional profit or fee. The incentive feature (providing for increases or decreases, as appropriate) is applied to performance targets rather than performance requirements.

(2) The incentive, when applied to the product, should relate to specific performance characteristics, such as range of a missile, speed of an aircraft or ship, thrust of an engine, maneuverability to a vehicle, and fuel economy. However, high overall performance of the end item is the primary objective of such contracts. Accordingly, the incentive feature should reflect a balancing of the various characteristics which together account for overall performance, so that no one characteristic will be exaggerated to the detriment of the end item as a whole. When applied to the performance of the contractor, the incentive should relate to specific performance areas of milestones, such as delivery or test schedules, quality controls, maintenance requirements, and reliability standards.

(3) Since performance tests generally are essential in order to determine the degree of attainment of performance targets, the control must be as specific as possible in establishing test criteria, such as conditions of testing, precision of instrumentation, and interpretation of test data.

(S–71) *Application.* Contracts with performance incentives are suitable for use in procurements where it is desired to provide the contractor with an incentive in the form of financial reward for surpassing stated performance targets, counter-balance by a penalty in the form of decreased profit or fee for failure to achieve such targets. Performance incentives are particularly appropriate for inclusion in contracts for major weapons and equipment, both in development when desired performance objectives are known and the fabrication of prototypes for test and evaluation is required, and in production where there is potential for improved performance that would be highly desirable to the Government. Effort always should be made in these procurement situations to include a performance incentive in the contract. Performance incentives present complex problems in contract administration and should be negotiated and administered by contracting officers with full cooperation of Government engineering and pricing specialists.

216.403 Fixed-price incentive contracts.

(b)(3) *Application.* Separate incentive provisions may be made applicable to individual line items of a contract, e.g., when dissimilar work is best incentivized by use of separate formulas.

(c) *Limitations.* In no case should such contracts be used where the sole or principal purpose is to shift substantially all cost responsibility to the Government. Further, in no case shall the firm target profit or formula for final profit and price be established independently.

216.403-2 Fixed-price incentive (successive targets).

(a)(1) This formula does not apply for the life of the contract but simply is used to fix the firm target profit for the contract. To provide an incentive consistent with the circumstances, the formula for fixing the firm target profit should reflect the relative risk involved in establishing an incentive arrangement where cost and pricing information were not sufficient to permit the negotiation of firm targets at the outset.

216.404 Cost-reimbursement incentive contracts.

216.404–1 Cost-plus incentive fee contracts.

(b) *Application.* Where it is highly probable that the development is feasible and the Government generally has determined its desired performance objectives, the cost-plus-incentive-fee contract should be used in conjunction with performance incentives in the development of major systems, and in other development programs where use of the cost and performance incentive approach is considered both desirable and administratively practical. Range of fee and the fee adjustment formula should be negotiated so as to give appropriate weight to basic procurement objectives. For example, in an initial product development contract, it may be appropriate to negotiate a cost-plus-incentive-fee contract providing for relatively small increases, or decreases in fee tied to the cost incentive feature, balanced by the inclusion of performance incentive provisions providing for significant upward or downward fee adjustment as an incentive for the contractor to meet or surpass negotiated performance targets. Conversely, in subsequent development and test contracts, it may be more appropriate to negotiate an incentive formula where the opportunity to earn additional fee is based primarily on the contractor's success in controlling costs. With regard to the cost incentive provisions of a contract, the minimum and maximum fees, and the fee adjustment formula, should be negotiated so as to provide an incentive which will be effective over variations in costs throughout the full range of reasonably foreseeable variations from target cost. Whenever this type of contract, with or without the inclusion of performance incentives, is negotiated so as to provide incentive up to a high maximum fee, the contract also shall provide for a low minimum fee, which may even be a "zero" fee or, in rare cases, a "negative" fee.

216.404–2 Cost-plus-award-fee contracts.

(a) *Description.* The CPAF contract is a cost reimbursement type of contract with special fee provisions. It provides a means of applying incentives in contracts which are not susceptible to finite measurements of performance necessary for structuring incentive contracts. Award fee may be earned in whole or in part. The number of criteria used and the requirements which are represented will differ widely from one contract to another. Therefore, when determining criteria and rating plans the using activity should be flexible and select a plan which will motivate the contractor in a positive way to improve performance. Evaluations are furnished to the contractor to afford him an opportunity to comment on the evaluation findings. The decision that award fee has been earned is based on the reports of performance made by the Government personnel knowledgeable with respect to the contract requirements.

(b) *Application.* The CPAF contract is suitable for:

(1)(S–70) Level of effort contracts for performance of services where mission feasibility is established but measurement of achievement must be by subjective evaluation rather than objective measurement; and

(1)(S–71) Work which would have been placed under another type of contract is the performance objectives could be expressed in advance by definite milestones, targets or goals susceptible of measuring actual performance.

(b)(S–70) *Weighted guidelines.* The weighted guidelines method shall not be applied to CPAF contracts with respect to either the base (fixed) fee or the award fee.

(b)(S–71) *Fee.* The amount of the base fee shall not exceed three percent of the estimated cost of the contract exclusive of the fee, and the maximum fee (base fee plus award fee) shall not exceed the limitations stated in FAR 15.903.

(b)(S–72)(i) *Evaluation.* The contract should provide for evaluation at stated intervals during contract performance, so that the contractor will periodically be made aware of the quality of his performance and will know in which areas improvement is expected. Partial payment of fee will generally correspond to the evaluation periods. This will make effective the incentive which the award fee can create by inducing the contractor to improve poor performance or to continue good performance.

(ii) Consideration may be given to (A) constituting a board to evaluate the contractor's performance and determine the amount of the award fee or recommend an amount to the contracting officer and, (B) to afford the contractor an opportunity to present matters on his own behalf.

(iii) The contract shall set forth those criteria to be used in evaluating the contractor's performance to arrive at the award fee. See examples of such criteria set forth in charts below.

(b)(S–73) *Disputes.* The contract shall expressly exclude from the operation of the Disputes clause any dispute over the amount of the award fee.

(c)(S–70) *Limitations.* The CPAF contract shall not be used as an administrative technique to avoid CPFF contracts when the criteria for CPFF contracts apply, nor shall a CPAF contract be used to avoid the effort of establishing objective targets so as to make feasible the use of a CPIF type contract.

(c)(S–71) The CPAF contract shall not be used where the contract amount, period of performance or the benefits expected are insufficient to warrant the additional administrative effort or cost.

(c)(S–72) The CPAF contract shall not be used for procurements categorized as either Engineering Development or Operational System Development which have undergone contract definition, except that where it may be more advantageous to do so, it may be used in these categories for individual procurements, ancillary to the development of a major weapon system or equipment, where the purpose of the procurement is clearly to determine or solve specific problems associated with the major weapon system or equipment.

(S–70) *Other application of the award fee provision.* In certain cases, it may be desirable to motivate and reward a contractor for management performance over and above that which can be objectively measured and incentivised under other forms of government contracts. For example, logistics support, quality, timeliness, cooperation, ingenuity, and cost effectiveness are areas under the control of management which may be susceptible only to subjective measurement and evaluation. In such cases, the "award amount" portion of the fee applicable to the CPAF contract is an ideal method for incorporation of these additional incentives into government contracts; the "base fee" or fixed amount portion would not be applicable in these procurements. When approved by the Chief of the Contracting Office, the "award amount" portion of the CPAF contract may be used in conjunction with other types and kinds of contracts for Government's benefit. An Award Review Board shall be appointed at each appropriate installation or activity. Procedures shall be established for the conduct of the evaluation. Further, the award fee provision shall not be used in conjunction with other types and kinds of contracts when the administrative effort or costs for evaluation exceed the benefits to be derived from the use of this arrangement.

Examples of Criteria

(Examples on Following Pages)

PERFORMANCE EVALUATION REPORT CRITERIA

		Submarginal 0–60	Marginal 61–70	Good 71–80	Very Good 81–90	Excellent 91–100
A Time of Delivery.	(A–1) Adherence to plan schedule.	Consistently late on 20% of plans.	Late on 10% plans w/o prior agreement.	Occasional plan late w/o justification.	Meets plan schedule	Delivers all plans on schedule & meets prod. change requirements on schedule.
	(A–2) Action on Anticipated delays.	Does not expose changes or resolve them as soon as recognized.	Exposes changes but is dilatory in resolution on plans.	Anticipates changes, advise Shipyard but misses completion of design plans 10%.	Keeps Yard posted on delays, resolves independently on plans.	Anticipates in good time, advises Shipyard, resolves independently and meets production schedule.
	(A–3) Plan Maintenance.	Does not complete interrelated systems studies concurrently.	System studies completed but constr. plan changes delayed.	Major work plans coordinated in time to meet production schedules.	Design changes from studies and interrelated plans issued in time to meet product schedules.	Design changes, studies resolved and test data issued ahead of production requirements.
B Quality of Work.	(B–1) Work Appearance.	25% dwgs. not compatible with Shipyard repro. processes and use.	20% not compatible with Shipyard repro. processes and use.	10% not compatible with Shipyard repro. processes and use.	0% dwgs. prepared by Des. agent not compatible with Shipyard repro. processes and use.	0% dwgs. prepared incl. Des. agent, vendors, subcontr. not compatible with Shipyard repro. processes and use.
	(B–2) Thoroughness and Accuracy of Work.	Is brief on plans tending to leave questionable situations for Shipyard to resolve.	Has followed guidance, type and standard dwgs.	Has followed guidance, type & standard dwgs. questioning and resolving doubtful areas.	Work complete with notes and thorough explanations for anticipated question-some areas.	Work of highest caliber incorporating all pertinent data required including related activities.
	(B–3) Engineering Competence.	Tendency to follow past practice with no variation to meet reqmts. job in hand.	Adequate engrg. to use & adapt existing designs to suit job on hand for routine work.	Engineered to satisfy specs., guidance plans and material provided.	Displays excellent knowledge of constr. reqmts. considering systems aspect, cost, shop capabilities and procurement problems.	Exceptional knowledge of Naval shipwork & adaptability to work process incorporating knowledge of future planning in Design.
	(B–4) Liaison Effectiveness.	Indifferent to requirements of associated activities, related systems, and Shipyard advice.	Satisfactory but dependent on Shipyard to force resolution of problems without constructive recommendations to subcontr. or vendors.	Maintains normal contact with associated activities depending on Shipyard for problems requiring military resolution.	Maintains independent contact with all associated activities, keeping them informed to produce compatible design with little assist. for Yard.	Maintains expert contact, keeping Yard informed, obtaining info from equip., supplies w/o prompting by Shipyard.
	(B–5) Independence and Initiative.	Constant surveillance req'd. to keep job from slipping—assign to low priority to satisfy needs.	Requires occasional prodding to stay on schedule & expects Shipyard resolution of most problems.	Normal interest and desire to provide workable plans with average assistance & direction by Shipyard.	Complete & accurate job, free of incompatibilities with little or no direction by Shipyard.	Develops complete and accurate plans, seeks out problem areas and resolves with assoc. act. ahead of schedule.
C Effectiveness in Controlling and/or Reducing Costs.	(C–1) Utilization of Personnel.	Planning of work left to designers on drafting boards.	Supervision acts & reviews goals for designers.	System planningby supervisory, personnel, studies checked by engineers.	Design parameters established by system engineers & held in design plans.	Mods. to design plans limited to less than 5% as result lack engrg. system correlation
	(C–2) Control Direct Charges (Except labor)..	Expenditures not controlled for services.	Expenditures reviewed occasionally by supervision.	Direct charges set & accounted for on each work package.	Provides services as part of normal design function w/o extra charges.	No cost overruns on original estimated absorbs service demands by Shipyard.
	(C–3) Performance to Cost Estimates.	Does not meet cost estimate for original work or changes 30% time.	Does not meet cost estimate for original work or changes 20% time.	Exceeds original est. on change orders 10% time and meets original design costs.	Exceeds original est. on change orders 5% time.	Never exceeds estimates of original package or change orders.

Subpart 216.5—Indefinite-Delivery Contracts

216.501 General.

(d) For items with a shelf-life of less than six months, consideration will be given to use of indefinite type contracts with orders to be placed either (i) directly by the users, or (ii) by central purchasing offices with deliveries direct to users. When it is desired to authorize the use of the fast pay procedure for orders not in excess of $10,000, the special data required by FAR 13.3 shall be included in the contract. The required clause in FAR 52.213–1 shall be modified for this purpose to refer to delivery orders and to the appropriate contract clause of the indefinite delivery type contract for the preparation of invoices.

216.502 Definite quantity contracts.

(S–70) Advantages of this type of contract are that it permits stocks in storage depots to be maintained at minimum levels and permits direct shipment to the user. Further advantages of this type of contract are:

(1) Flexibility with respect to both quantities and delivery scheduling;

(2) Supplies or services need to be ordered only after actual needs have materialized;

(3) The obligation of the Government is limited; and

(4) It permits stocks to be maintained at minimum levels and allows direct shipment to the user.

216.503 Requirement contracts.

(S–70) Advantages of this type of contract are:

(1) Flexibility with respect to both quantities and delivery scheduling;

(2) Supplies or services need be ordered only after actual needs have materialized;

(3) When production lead time is involved, deliveries may be made more promptly because the contractor is usually willing to maintain limited stocks in view of the Government's commitment;

(4) Price advantages or savings may be realized through combining several anticipated requirements into one quantity procurement; and

(5) It permits stocks to be maintained at minimum levels and allows direct shipment to the user.

Subpart 216.6—Time-and-Materials, Labor-Hour, and Letter Contracts

216.601 Time-and-material contracts.

(b)(2) Material handling costs may include all indirect costs, including general and administrative expense, allocated to direct materials in accordance with the contractor's usual accounting practices consistent with Part 231. Such material handling cost should include only costs clearly excluded from the labor hour rate. This type of contract does not afford the contractor any positive profit incentive to control the cost of materials or to manage his labor force effectively. This type of contract may be used in the procurement of (i) engineering and design services in connection with the production of supplies; (ii) the engineering, design and manufacture of discs, jigs, fixtures, gauges, and special machine tools, (iii) repair, maintenance or overhaul work; and (iv) work to be performed in emergency situations.

216.603 Letter contracts.

216.603–2 Application.

(c) Letter contracts shall be specifically negotiated and, as a minimum, shall include the appropriate clauses from Part 252. Whether executed on Standard Form 26 or Standard Form 30, a definitized contract will be numbered as a modification of the letter contract as provided in Subpart 208.70.

Subpart 16.7—Agreements

216.702 Basic agreements.

(b) *Application.* The use of the basic agreement contemplates the coverage which will provide for the scope of the work, price, delivery, and additional matters peculiar to the requirements of the specific procurement involved, and shall incorporate by reference or append the contract clauses agreed upon in the basic agreement as required or applicable.

(3) To minimize modification, revisions to FAR involving changes in authorized contract clauses utilized in basic agreements will provide appropriate direction with respect to any required modifications of basic agreements and to the extent possible, modifications will be required only in matters resulting from changes in statutes or Executive Orders.

(b)(S–70) Basic agreements may include negotiated overhead rates for cost-reimbursement type contracts. A basic agreement shall be used to cover all subsequent procurements which fall within its scope. Provisions of the basic agreement, including supplements thereto, shall be incorporated into the formal contractual document covering the particular procurement by referring therein to the number of the basic agreement and each of its supplements. The reference "Basic Agreement No.—, as amended," shall not be used.

(b)(S–71) Basic agreements generally shall be utilized only in connection with negotiated contracts. An existing contract may be amended by a supplemental agreement affecting new procurement without incorporating the most recent basic agreement only if all clauses then required by statute, Executive Order, and this Regulation are included in the contract or the proposed supplemental agreement.

(b)(S–72) Supplemental agreements negotiated pursuant to the terms of an existing contract and not involving new procurement may, if determined to be in the interest of the Government, amend the existing contract to conform to a subsequently executed or supplemented basic agreement.

(b)(S–73) Clauses pertaining to subjects not covered in a basic agreement but applicable to the contract being negotiated shall be included in the contract as if no basic agreement existed.

(b)(S–74) Where a clause which was included in the basic agreement pursuant to a deviation must be replaced by a revised clause, the revised clause may deviate to the same extent as the original clause if the revision is not related to the deviation, and if the deviation has not expired or been rescinded.

(b)(S–75) If a letter contract has been entered into under a basic agreement

which thereafter was superseded by a new basic agreement, or amended by supplemental agreement, the contractual instrument which definitizes such letter contract shall incorporate the superseding basic agreement or supplemental agreement, as applicable. If the basic agreement has been terminated without being superseded, or has expired, the definitive contract which supersedes the letter contract shall incorporate the clauses required by statute, Executive Order, or this Regulation.

(S–70) *Content and form.*

Basic agreements shall contain a set of "General Provisions." These general provisions shall include two groups of clauses. The first group, identified as "Part A", shall include all of the clauses made mandatory by statute, Executive Order, the FAR and this Supplement, for use in negotiated Government contracts, and shall be made a part of each formal contractual document. The second group, identified as "Part B", shall consist of clauses which may be made a part of each formal contractual document, depending upon their applicability to the particular procurement. The format set forth below may be adapted to fit specific circumstances.

BASIC AGREEMENT BETWEEN THE UNITED STATES OF AMERICA AND ———.

This Agreement is entered into as of the — day of ———, 19— between the United States of America, hereinafter called the "Government", represented by the Contracting Officer, ——— and ———, a corporation organized and existing under the laws of the State of ———, herein called "Contractor."

The clauses and provisions of Parts A and B hereinafter set forth have been agreed upon by the parties hereto for use in negotiated ——— type contracts and in letter contracts contemplating conversion to ——— type contracts, between parties, entered into on or after the date of this Agreement, and prior to its termination. It is further agreed that (i) the clauses and provisions set forth in Part A are mandatory clauses and shall, by reference or attachment, be incorporated in each contract awarded pursuant to this Agreement, and (ii) the clauses and provisions set forth in Part B are to be similarly incorporated in such contracts only when applicable and agreed to by the parties for each individual contract.

This Agreement, including Parts A and B hereof, may be amended only by mutual agreement of the parties, and the Agreement may be terminated in its entirety by either party upon thirty (30) days written notice to the other party, except that this Agreement may be terminated by the Government at any time if the parties fail to agree upon any deletion, amendment or addition to this Agreement which is required by statute, Executive Order, or the FAR and this Supplement. No deletion, modification, addition to, or termination of, this Agreement shall affect any contracts theretofore entered into between the parties in which this Agreement or a portion thereof has been incorporated by reference.

This Agreement shall be reviewed, as a minimum annually before the anniversary of its effective date, and revised to conform with all requirements of statutes, Exective Orders, or the FAR and this Supplement. This revision shall be evidenced by an agreement modifying this Basic Agreement or by the issuance of a superseding Basic Agreement.

This Agreement shall not be referred to by the Contractor in bids submitted in response to invitations for bids nor become a part of any contract placed through the process of formal advertising.

In WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year first above written:

UNITED STATES OF AMERICA

By _____

(Contracting Officer)

_____

(Name of Company)

By _____

(Title)

216.703 Basic ordering agreements.

(b) *Application.* If after a competitive solicitation of quotations or proposals from the maximum number of qualified sources, other than a solicitation accomplished by use of Standard Form 33, it is determined that the successful responsive offeror holds a basic ordering agreement, the terms of which are either identical to those of the solicitation or different in a way that could have no impact on price, quality or delivery, and if it is determined further that issuance of an order against the basic ordering agreement rather than preparation of a separate contract would not be prejudicial to the other offerors. In situations covered by the foregoing, the choice of firms to be solicited shall be made in accordance with normal procedures, without regard to which firms hold basic ordering agreements; firms not holding a basic ordering agreement shall not be precluded by the solicitation from proposing or quoting; and the existence of a basic ordering agreement shall not be a consideration in source selection.

(c) *Limitations.* The clause in 252.213–1 shall be modified to refer to orders and to the appropriate clause of the basic ordering agreement for the preparation of invoices when fast pay is desired on orders less than $25,000. The basic ordering agreement shall specify the point at which each order becomes a binding contract. For example, the agreement may provide either (1) that issuance of an order gives rise to a contract immediately, (2) that a contract arises upon the contractor's failure to reject the order within a specified number of days, or (3) that a contract arises when the contractor accepts the order in a specified manner, such as by postcard, telegram, letter, signing and returning a copy of Standard Form 26 or DD Form 1155.

(c)(S–70) As a general rule, prices should be established prior to authorizing the contractor to begin work. However, where the contractor is allowed to begin work prior to pricing in accordance with this paragraph, the contractor and the contracting officer shall proceed with pricing as soon as practicable. The basic ordering agreement shall provide that failure to reach agreement on price in such circumstances will constitute a dispute subject to the procedures of the Disputes clause.

(c)(S–71) To minimize modifications, revisions to FAR involving changes in authorized contract clauses, utilized in basic ordering agreements shall provide appropriate direction with respect to any required modifications of basic ordering agreements; and, to the extent possible, modifications shall be required only in matters resulting from changes in statutes, or Executive Order.

(c)(S–72) The basic ordering agreement shall list one or more activities which are authorized to issue orders under the agreement. Any activity so named may issue orders specifying the supplies or services required. Orders shall be issued on DD Form 1155 or Standard Form 26 and shall incorporate by reference the provisions of the basic ordering agreement.

(d)(1)(S–70) The contracting officer issuing an order under a basic ordering agreement shall be responsible for assuring compliance with the provisions of all limitations of this section.

(d)(3)(ii) However, incentive provisions consistent with this part are permitted.

PART 217—SPECIAL CONTRACTING METHODS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 217.1—Multiyear Contracting

217.101 Definitions.

"Property," as used in this subpart means items of supplies, including but not limited to systems, subsystems, major equipment, components, parts, materials, supplies, and the advance acquisition thereof, and commercial and noncommercial items.

217.102 Policy.

217.102-2 General.

(a) Multiyear contract quantities are budgeted for and financed in accordance with the applicable program year as reflected in the DoD Five-Year Defense Program.

217.102-3 Objectives.

(a)(S-70) Implementation of the industrial preparedness program for planned items with planned producers;

(d)(4) The decision not to request dual proposals must also take into account the determinations required by 217.103-1(b) (S-70) or (S-71).

217.103 Procedures.

217.103-1 General.

(a)(1) The use of such a contract will promote the national security of the United States.

(b)(1) For exceptions to this paragraph see 217.104-70 for multiyear contracting of specified services, and 217.104-71 for multiyear contracting of supplies and services of the maintenance and operation of family housing.

(b)(S-70) A multiyear contract may not be executed in the case of services, until a written determination has been made by the HCA or his designee that (i) there will be a continuing requirement for the services and incidental supplies, consonant with current plans for the proposed contract period; (ii) the furnishing of such services and incidental supplies will require a substantial initial investment in plant or equipment or the incurrence of substantial contingent liabilities for the assembly, training, or transportation of a specialized work force, or other substantial startup costs; and (iii) the use of such a contract will promote the best interest of the United States by encouraging effective competition and promoting economies of operation.

(b)(S-71) A multiyear contract may not be executed in the case of property, until a written determination has been made by the Secretary or his designee that the criteria specified in FAR 17.103-1 have been met.

(d)(1) Such ceilings shall be expressed in the schedule and shall be a not-to-exceed amount to apply alike to all bidders or offerors.

217.103-2 Solicitations.

Solicitations for multiyear contracts should be appropriately structured to reflect any selected variations to standard multiyear techniques allowed by FAR 17.102-3(d).

217.103-4 Awards.

(c) Prior to award of a multiyear contract, the contracting officer shall verify that findings made in accordance with 217.103-1(b) (S-70) or (S-71) remain valid and shall annotate the findings document accordingly.

217.103-70 Funding of multiyear contracts.

Before any multiyear contract that contains a clause setting forth a cancellation ceiling in excess of $100 million may be awarded, the Secretary shall give written notification of the proposed contract and of the proposed cancellation ceiling for that contract to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, and such contract may not then be awarded until the end of a period of 30 calendar days beginning on the date of such notification. Departments shall establish reporting procedures. Copies of the notification shall be submitted to the Office of the Secretary of Defense, OUSDRE(AM), and Deputy Assistant Secretary of Defense, OASD(C) (P/B). Departments shall also comply with any notification requirements or restrictions contained in annual authorization or appropriation acts.

(a) The planning and coordination of multiyear acquisition strategies should begin sufficiently early to permit required integration of the acquisition into the Planning Programming and Budgeting System (PPBS). The degree of integration and the extent of data required will vary with the type and size of the program. Guidelines shall be included, as required, in DoD and Service instructions for preparing program objective memoranda (POM) submissions and budget estimate submissions (BES).

(b) Policies and procedures for the funding of procurements within the procurement title of the DoD Appropriation Act are contained in DoD Directive (DoDD) 7200.4, Full Funding of DoD Procurement Programs.

217.104 Related areas.

217.104-70 Multiyear contracting of services under Pub. L. 90-378.

(a) Under Pub. L. 90-378 (10 U.S.C. 2306(g)), the Department of Defense is authorized to enter into multiyear acquisitions for the following listed services, to obtain requirements which are not in excess of the Five-Year Defense Program and for which funds are limited by statute for obligation during the fiscal year in which the contract is executed:

(1) Operation, maintenance, and support of facilities and installations;

(2) Maintenance or modification of aircraft, ships, vehicles, and other highly complex military equipment;

(3) Specialized training necessitating high quality instructor skills (for example, pilot and other aircrew members; foreign language training); and

(4) Base services (for example, ground maintenance; in-plane refueling; bus transportation; refuse collection and disposal). However, such acquisitions shall be entered into for no more than a 5-year period and only when such acquisitions are consistent with the policies of and satisfy the requirements set forth in FAR 17.101 through 17.105. The performance years specified in the schedule shall not extend beyond the end of any fiscal year (1 October-30 September).

(b) Since acquisitions under this authority are limited for execution on a fiscal year basis, references to "program year" throughout 217.104-70 shall be considered to mean "fiscal year".

217.104-71 Multiyear acquisition of supplies and services under Pub. L. 91-142.

(a) Under Section 512 of Pub. L. 91-142, the Department of Defense is authorized to enter into contracts for periods of no more than 4 years for supplies and services required for the maintenance and operation of family housing for which funds would otherwise be available only within the fiscal year for which appropriated. Such acquisitions shall be entered into only when they are consistent with the policies and satisfy the requirements set forth in FAR 17.101 through 17.105. The performance years specified in the schedule shall not extend beyond the end of any fiscal year (1 October-30 September).

(b) Since acquisitions under this authority are limited for execution on a fiscal year basis, references to "program year" shall be considered to mean "fiscal year".

Subpart 217.2—Options

217.203 Solicitations.

(a) When the contracting officer knows or anticipates that the option may be exercised to fulfill Foreign Military Sales (FMS) commitments and when the Government and the contractor are able to negotiate a price in advance for FMS requirements, the solicitation and contract shall notify contractors of the Government's intent in this regard and shall identify the FMS requirements (see 217.208(d)). When the contracting officer knows or anticipates that the option may be exercised to fulfill FMS requirements and the

Government and the contractor are unable to negotiate any additional cost or profit considerations attributable to FMS included in until a specific country or countries are subsequently identified, the solicitation and contract shall advise contractors that the U.S. Government will identify the foreign country for the purpose of negotiating an equitable price adjustment for any additional cost or profit considerations attributable to FMS included in (see 217.208(d)). Such notification shall not be placed in solicitations and contracts for the establishment or replenishment of DoD inventories or stocks or acquisitions made under DoD Cooperative Logistics Support Arrangements.

(g)(2) The Chief of the Contracting Office is the person authorized to make the approval cited in FAR 17.203(g)(2).

217.206 Evaluation.

(a) The Chief of the Contracting Office is the person authorized to make the determination referred to in FAR 17.206(a).

(b) The contracting officer may consider the option quantity in the award evaluation for types of contracts other than those discussed in FAR 17.206 (a) and (b) if—

(1) The determination in FAR 17.206(a) was made before issuance of the solicitation; and

(2) Departmental approval procedures are followed.

217.207 Exercise of options.

(c)(2) An FMS commitment undertaken by the United States Government on behalf of a foreign country constitutes the type of need described in FAR 17.207(c)(2). In such cases, the contract shall expressly provide for the Government's right to exercise the option for FMS purposes (see 217.203(a)).

217.208 Solicitation provisions and contract clauses.

(d) The contracting officer shall insert the clause at 252.217–7000, Exercise of Option to Fulfill Foreign Military Sales Commitments, in solicitations and contracts when the inclusion of such a clause is appropriate (see 217.203(a)). This clause shall also be inserted in solicitation and contracts, as appropriate, when the clauses described in FAR 17.208 (e), (f) or (g) are inserted in solicitation and contracts.

Subpart 217.5—Interagency Acquisitions Under the Economy Act

217.502 General.

(a) For purposes of FAR 17.502, the designee of the head of the requesting agency within DoD is the contracting officer unless otherwise directed by departmental regulations.

(b) Except as provided in FAR Subpart 7.3, it is the policy of the Department of Defense not to place Government agencies in direct competition with commercial sources.

(c) An order for services shall not be placed with a department or agency when such services can be performed as conveniently or more economically by private contractors.

217.503 Determination requirements.

(b) In addition to the requirements of FAR 17.503(b), the determination shall also include a finding that the services cannot be performed as conveniently or more economically by private contractors.

217.504 Ordering procedures.

(b) Invitations for bids and requests for proposals shall not be sent to Government agencies. Orders for supplies and services placed within a department shall be in accordance with procedures prescribed by that department. Delivery orders may be placed on DD Form 1155.

Subpart 217.6—Management and Operating Contracts

The provisions of FAR Subpart 17.6 are not applicable within DOD.

Subpart 217.70—Exchange of Personal Property

217.7000 Scope of subpart.

This subpart prescribes contracting policy and procedures governing the use by Department of Defense components of the exchange authority of Section 201(c) of the Federal Property and Administrative Services Act of 1949, 63 Stat. 384, as amended (40 U.S.C. 481(c)), when exchange is accomplished concurrently with procurement. The Act authorizes the exchange of personal property and the application of the exchange allowance to the acquisition of similar property. Exchange policy, authority, applicability, and limitations are governed by the Federal Property Management Regulations issued by the Administrator for General Services, and by Department of Defense Instruction 4140.51, "Exchange of Nonexcess Personal Property in the Department of Defense."

217.7001 Definitions.

"Exchange (trade-in) property" means property not in excess of the needs of the owning DoD component, but eligible for replacement because of obsolescence, unserviceability, or other valid reason, that is exchanged and applied as whole or partial payment allowance toward the acquisition of similar items.

"Similar items" in exchange transactions means both the item being acquired and the item being replaced. Both must fall within one of the single generic categories listed in 217.7003–1, and the item being acquired must be designed and constructed for the same specific purpose as the item being replaced.

217.7002 Policy.

It is DoD policy to use exchange processing for replacing eligible nonexcess items. It shall be used to the maximum extent possible when such transactions foster the economical and efficient accomplishment of an approved program.

217.7003 Categories of property eligible for exchange and categories of property ineligible for exchange.

217.7003–1 Property eligible for exchange.

Nonexcess personal property in the categories listed below is eligible for exchange. However, in the exchange of such property, both the item to be acquired and the item to be replaced must fall within a single number category. Categories of property not listed below or not included in 17.7003–2 are also eligible for exchange if designed and constructed for the same specific purpose.

1. Agriculture products, processed foods, and forage.
2. Ammunition and ammunition components.
3. Animals and animal products.
4. Batteries, storage.
5. Cards, tabulating.
6. Ditching machines.
7. Dozer blades.
8. Drill presses.
9. Drugs, biologicals, and official reagents.
10. Earth augers.
11. Graders, self-powered and towed.
12. Lathes.
13. Machines, adding and calculating.
14. Machines, addressing and mailing.
15. Machines, dictating and transcribing.
16. Machines, duplicating.
17. Machines, punched card, bookkeeping, tabulating, and accounting.
18. Milling machines.
19. Mixers, concrete, portable or truck mounted.
20. Pile drivers.
21. Plows, snow, motor.
22. Road rollers, wheeled and sheepsfoot.

23. Saws, circular or band.
24. Scrapers, earth moving, self-powered.
25. Scrapers, earth moving, towed.
26. Sedans, station wagons, coupes, limousines.
27. Shovels, power.
28. Spreaders, aggregate and line.
29. Tractors, warehouse.
30. Tractors, wheeled or crawler, with or without special attachments, up to 65 h.p.
31. Tractors, wheeled or crawler, with or without special attachments, 65 h.p. and up.
32. Trailers, general purpose, multiple axle.
33. Trailers, general purpose, single axle.
34. Trailers, tank mounted.
35. Trucks, forklift.
36. Trucks, general purpose, cargo and construction, 12,500 GVW and up (including truck tractors, dump, and multiple drive).
37. Trucks, general purpose and utility, up to 12,500 GVW (including suburbans, carryalls, and sedan deliveries)
38. Trucks, straddle.
39. Trucks, tank (special purpose truck on which the tank is integral part of the construction).
40. Trucks, warehouse, platform, electric and gasoline powered.
41. Typewriters, manual and electric.

217.7003–2 Property ineligible for exchange.

Items that are found in any of the FSCGs listed below are not eligible for handling under exchange procedures without the prior approval of the General Services Administration. (Such approval shall accompany the purchase request):

10 Weapons
11 Nuclear ordnance
12 Fire control equipment
14 Guided missiles
15 Aircraft, and airframe structural components*
16 Aircraft components and accessories*
17 Aircraft launching, landing, and ground handling equipment
20 Ship and marine equipment
22 Railway equipment
31 Bearings
32 Woodworking machinery and equipment, except lathes, milling machines, and saws, circular or band
34 Metalworking machinery, except drill presses, lathes, milling machines, and saws, circular or band
40 Rope, cable, chain, and fittings
41 Refrigeration and air conditioning equipment
42 Fire fighting, rescue, and safety equipment
44 Furnace, steam plant, and drying equipment; and nuclear reactors
45 Plumbing, heating, and sanitation equipment
46 Water purification and sewage treatment equipment
47 Pipes, tubing, hoses, and fittings
48 Valves
51 Hand Tools
53 Hardware and abrasives
54 Prefabricated structures and scaffolding
55 Lumber, millwork, plywood, and veneer
56 Construction and building materials
68 Chemicals and chemical products, except medicinal chemicals
71 Furniture
75 Office supplies and devices, except cards, tabulating
83 Textiles, leather, and furs
84 Clothing and individual equipment

*These line items shall be exchanged directly when the Military Departments rely on a contract with a manufacturer for full spare parts support for commercial type aircraft.

217.7004 Procedures.

217.7004–1 Offering property for exchange.

(a) Sale of nonexcess personal property is not authorized pursuant to this Part. The objective in exchanging nonexcess personal property shall be to acquire new property from an offeror whose offer will be most advantageous to the Government, price and other factors considered. When acquiring new property concurrent with offering exchange property, formal advertising shall be used, except that—

(1) Property may be exchanged through negotiation, obtaining maximum practicable competition, in accordance with applicable laws and regulations.

(2) When the personal property is required to be acquired against a mandatory Federal Supply Schedule Contract, the property shall be acquired against such contract, regardless of whether the exchange can be effected under such contract.

(b) The following notation shall be included in the solicitation:

> The property described in item number(s) ———, is being offered in accordance with the exchange provisions of Section 201(c) of the Federal Property and Administrative Services Act of 1949, 63 Stat. 384 (40 U.S.C. 481(c)).

(c) A minimum of 14 calendar days should be allowed in Continental United States (CONUS) for the inspection of property being offered for exchange. For exchanges outside Continental United States, the minimum inspection period should normally be 21 calendar days.

217.7004–2 Purchase request and certification.

In connection with an acquisition involving exchange, the purchase request must be accompanied by a certification that the property is eligible for exchange and complies with all conditions and limitations specified in DODI 4140.51 including a written administrative determination of economic advantage which shall indicate—

(a) The anticipated economic advantage to the Government resulting from the use of the exchange authority.

(b) That exchange allowances shall be applied toward or in partial payment for the items to be acquired.

(c) That if required, the exchange property has been rendered safe or innocuous, or has been demilitarized.

217.7005 Exchange of exchange property.

Each solicitation listing exchange property, in addition to asking for prices for the new items being acquired, shall request offers in terms of exchange (trade-in allowance) for the exchange property listed. The solicitation shall provide for award(s) which are in the best overall interest of the Government. Exchanges may only be effected with the successful offeror. Thus, if the lowest net price to the Government of the property to be procured (i.e., the price of the new property less the amount offered for the exchange property) results from an offer by a supplier of the new property who agrees to accept the exchange property as a trade-in, a single award would be made which would cover both the acquisition by the Government of the new property and the disposal of the exchange property by trade-in. If, however, the lowest net price to the Government results from a low offered price from a supplier of the new property, without exchange of the exchange property, award shall be made to the low offeror to purchase the new property and the exchange shall not be made.

Subpart 217.71—Master Agreement for Repair and Alteration of Vessels

Reserved, guidance will be included prior to 1 April 1984.

Subpart 217.72—Acquisition of Component Parts

217.7201 Privately developed items.

217.7201–1 General.

It is Department of Defense policy:

(a) To make all procurements on a competitive basis to the maximum practicable extent, and

(b) To provide an incentive to industry creativity by honoring the rights in data resulting from private development and by limiting the demands for such data to that which is essential for Government purposes.

It is important that the efforts directed toward increasing competition do not demand or use privately developed data in a manner which is contrary to the policies and procedures established in FAR Part 27. Accordingly, when the two policies stated above produce situations which require the contracting officer to decide whether to procure data for future competitive procurement, the provisions of Part 227, as supplemented by this paragraph, shall govern.

217.7201-2 Specific procurement methods.

(a) When Defense requirements are for items which are available from more than one source as a result of either licensing, competitive copying, or independent, the contracting officer shall seek full and free competition for such items.

(b) When the Government desires to purchase privately developed items but does not have necessary data with unlimited rights for use in a specification for competitive procurement, the contracting officer shall use one of the following alternative procedures with reference in the order of this listing (see also 217.7203).

(1) When practical, procurement shall be competitive using performance or other specifications, including purchase descriptions, which do not contain data developed at private expense to which the Government does not have unlimited rights. Procurement in this basis will normally not provide items of identical design. However, it frequently is not necessary that items of identical design be purchased. There are two methods of competitive procurement which may provide items of the same or of similar design and suitable performance. One of these is purchased by two-step formal advertising. The other is by the use of "brand name or equal" purchase descriptions. To encourage participating by technically oriented firms that are desirous of offering their privately developed products in competition with similar articles, procuring activities should consider incorporating a requirement in the IFB or RFP for a bid sample to be used for evaluation purposes only (see 210.004(b)(3)(i)).

(2) When items of design or composition similar or identical to a privately developed item are required and it is determined that competitive procurement is not practicable, procurement should be on a noncompetitive basis from the firm which developed or designed the item or process or its licensees, *provided* productive capacity and quality are adequate and price is fair and reasonable.

(3) When additional sources are required for items of design or composition similar or identical to a privately developed item in order to meet total current or mobilization requirements, and the procedures in (b)(1) above cannot practicably be used to create additional sources, the developer should be encouraged to license others to manufacture such items. Procuring activities should also consider the specific acquisition by the Government of the necessary rights in data. When complex technical equipment is involved and the establishment of satisfactory additional sources will require, in addition to data, technical assistance from the primary source, consideration should be given to the use of the leader company procurement technique (see FAR Subpart 17.4).

(4) As a last alternative, a design specification may be developed by the Government through inspection and analysis of the product (i.e. reverse engineering) and used for competitive procurement. Reverse engineering shall not be used unless significant cost savings can be reasonably demonstrated and the action is authorized by the Head of the Contracting Activity. In the case of the Air Force this authority may be delegated to the Commanders of the Air Force Systems Command Divisions and Centers and the Air Force Logistics Command Air Logistics Centers.

217.7201-3 Purchase of patented items when Government is a licensee.

Award of a contract shall not be refused to a bidder/offeror merely because he is not the owner of or a licensee under any patent involved in the procurement. If, at the time a solicitation is issued, the Government is obligated to pay royalties applicable to the proposed procurement because of a pre-existing license agreement between the Government and a patent owner, the solicitation shall so state and shall: (a) Identify the patents and specify the royalty rate; and (b) advise that an amount equal to the royalty which the Government will be required to pay under the license agreement will be added as an evaluation factor to each bid/offer unless the bidder/offeror includes in his bid/offer a statement that he is the owner of or a licensee under the patents.

217.7202 Component Breakout.

217.7202-1 Scope of paragraph.

(a) This section sets forth guidance of making decisions on whether or not components should be purchased by the Government directly and furnished to an end item contractor as Government-furnished material, for incorporation in the end item. This paragraph, however, does not pertain to all such decisions, but only to those which deal with whether components that have been included as contractor-furnished material in a previous procurement of the end item should be "broken out" from a forthcoming end item procurement for direct Government purchase. Thus, except as set forth in, this paragraph does not pertain to the initial Government-furnished equipment/contractor-furnished equipment decisions that must be made at the inception of a procurement program.

(b) Parts procured for replenishment are not covered by this paragraph, but are governed by Supplement 6, Replenishment Parts Breakout Program.

(c) This paragraph applies to procurements of weapons systems or other items of major equipment involving components whose direct purchase by the Government may result in substantial net cost savings over the life of the procurement program. Accordingly, it will seldom be applicable to a procurement of such a system or item of less than $1,000,000. The term "component," as used in this paragraph, includes subsystems, assemblies, subassemblies, and other major elements of an end item, but does not include elements of relatively small annual purchase value.

217.7202-2 Policy.

Whenever it is anticipated that the prime contract for a weapons system or other major end item will be awarded without adequate price competition, and the prime contractor is expected to acquire a component without such competition, it is Department of Defense policy to break out that component if:

(a) Substantial net cost savings will probably be achieved; and

(b) Such action will not jeopardize the quality, reliability, performance or timely delivery of the end item. The desirability of breakout should also be considered (regardless of whether the prime contract or the component being purchased by the prime contractor is on the basis of price competition) whenever substantial net cost savings will result

(1) from greater quantity purchases or (2) from such factors as improved logistics support through reduction in varieties of spare parts and economies in operations and training through standardization of design. Primary breakout consideration shall be given to those components of the end item representing the highest annual procurement costs and offering the largest potential net savings through breakout.

217.7202-3 Responsibility for component breakout selection, review and decision

The program manager, project manager, project officer, program director, or other official responsible for the material program concerned, supported by a project team (to include the Small Business Specialist, cognizant engineering, production, logistics, maintenance and other appropriate personnel, and the contracting officer or his designee), shall be responsible for:

(i) Earmarking as susceptible to breakout those components potentially conforming to the criteria and policy set forth herein;

(ii) Conducting the breakout review and evaluation described in 217.7202-4;

(iii) Making the decision whether or not to break out the component; and

(iv) Preparing records explaining such decisions in compliance with 217.7202-5.

217.7202-4 Breakout guidelines.

(a) Each decision on whether or not to break out a component must embrace (1) assessment of the potential risks of degrading the end item through such contingencies as delayed delivery and reduced reliability of the component, (2) calculation of estimated net cost savings (i.e., estimated purchase savings less any offsetting costs), and (3) analysis of the technical, operational, logistic and administrative factors involved. As to each of these, the decision must be supported by adequate explanatory information, including an assessment by, and consultation with, the end item contractor when feasible.

(b) In deciding whether a component should be broken out, the guidelines set forth below (in the form of questions) should be considered. Answers will rarely be "positively yes" or "positively no" but usually "probably yes" or "probably no", with the degree of probability governed by the facts of the particular case. The decisions will depend largely upon the degree and significance of the risks to quality performance, reliability and timely delivery of the end item which would be involved in breakout and upon the estimated overall cost savings. Where the risks, if any, are acceptable and breakout is expected to result in substantial overall costs savings, the component should be broken out. On the other hand, if such risks are unacceptable, the components should not be broken out.

(1) Are the design of the component (and the design of the end item insofar as it will affect the component) sufficiently stable that further design or engineering effort by the end item contractor in respect to the component is unlikely to be required?

(2) Is a suitable data package available with rights to use if for Government procurement? (Note that breakout may be warranted even though competitive procurement is not possible.)

(3) Can any problems of quality control and reliability of the component be resolved without requiring effort by the end item contractor?

(4) Is it anticipated that requirements for technical support (i.e., functions such as development of proposed detailed specifications; development of test requirements to prove design adequacy or compliance with design; monitoring tests to assure compliance with established requirements; definition of quality assurance requirements for production of articles; and analysis and correction of service-revealed deficiencies) heretofore performed by the end item contractor will be negligible? If not, does the Government have the resources (manpower, technical competence, facilities, etc.) to provide such support, or can such support be obtained from the end item contractor (even though the component is broken out) or other source?

(5) Can breakout be accomplished without causing unacceptable difficulties in logistics support (e.g., by jeopardizing requisite standardization of components)?

(6) Can breakout be accomplished without causing over fragmentation of the end item that might materially impede administration, management, and performance of the end item contract (e.g., by unduly complicating production scheduling or identifying (and fixing responsibility for) end item failure that may be caused by a defective component)?

(7) Can breakout be accomplished without jeopardizing delivery requirements of the end item?

(8) If a decision is made to break out a component and to acquire it from a new source, can advance procurement funds be made available to provide that source any necessary additional lead time?

(9) Is there a source other than the present manufacturer capable of supplying the component?

(10) Has the component been (or is it known that it is going to be) purchased directly by the Government as a support item in the supply system or as GFE in other end items?

(11) Would the financial risks and other responsibilities being assumed by the prime contractor that will have to be assumed by the Government if the item is broken out be acceptable?

(12) Will breakout result in substantial net cost savings? Estimates of probable savings in cost, should be developed for each case on its own facts, with consideration given to any estimated offsetting costs such as increases in the cost of requirements determination and control, contracting, contract administration, data package purchase, material inspection, qualification or preproduction testing, ground support and test equipment, transportation, security, storage, distribution, and technical support.

(c) If application of the guidelines in (b) above reveals conditions currently unfavorable to breakout, the feasibility of eliminating such conditions should be considered. For example, where adequate technical support is not available from Government resources, or similar assistance must be obtained in order to successfully accomplish breakout, consideration should be given to the procurement of the necessary services, such as product assurance suitability services, from the end item contractor or other qualified source.

217.7202-5 Records and review procedure.

The records of the purchasing activity shall contain documentation of:

(a) Those components which have been reviewed and determined to have no potential for breakout;

(b) Those components which have been reviewed and earmarked as being susceptible to breakout pursuant to 217.7202-3; and

(c) Those components for which a decision to breakout has been made.

Documentation of these three categories, and for those components once earmarked but no longer considered susceptible to breakout, shall be signed by the cognizant project manager or other designated official and reflect the facts and conditions of the case, including any assessment by the contractor, and the basis for the decision. Components that have been earmarked for potential breakout shall be reviewed well in advance of each successive procurement, with a decision

made as to whether the component will be broken out for the ensuing procurement. Such reviews, made preferably in the course of requirements determination, but in any event before procurement of the requirement is initiated, shall be repeated until a final decision on whether or not to breakout is reached, and shall be documented. When breakout is delayed or postponed, the documentation shall include a description of the actions required to accomplish breakout, identify the activities responsible for such actions, and indicate the fiscal year when breakout should be effected.

217.7203 Procurement of parts.

(a) Any part, subassembly, or component (hereinafter called "part") for military equipment, to be used for replenishment of stock, repair, or replacement, must be procured so as to assure the requisite safe, dependable, and effective operation of the equipment. Where it is feasible to do so without impairing this assurance, parts should be procured on a competitive basis, as in the kind of cases described in (b) below. However, where this assurance can be had only if the parts are procured from the original manufacturer of the equipment or his supplier, the procurement should be restricted accordingly, as in the kind of cases described in (c) below. Centrally managed replenishment parts for military systems and equipment (except replenishment parts acquired under other specifically defined initial support programs or acquired through local purchase) are governed by Supplement 6, the Replenishment Parts Breakout Program.

(b) Parts that are fully identified and can be obtained from a number of known sources, and parts for which fully adequate manufacturing drawings and any other needed data are available with the right to use for procurement purposes (or can be made so available in keeping with the policies in FAR Part 27 are to be procured on a competitive basis. In general, such parts are of a standard design configuration. They include individual items that are susceptible of separate procurement, such as resistors, transformers, generators, spark plugs, electron tubes, or other parts having commercial equivalents.

(c) Parts not within the scope of (b) above generally should be procured (either directly or indirectly) only from sources that have satisfactorily manufactured or furnished such parts in the past, unless fully adequate data (including any necessary data developed at private expense), test results, and quality assurance procedures, are available with the right to use for procurement purposes (or can reasonably be made so available in keeping with the policies in FAR Part 27 to assure the requisite reliability and interchangeability of the parts, and acquisition on a competitive basis would be consistent with the assurance described in (a) above. In assessing this assurance, the nature and function of the equipment of which the part is needed should be considered. Parts qualifying under this criteria are normally sole source or source controlled parts (see MILSTD 100) which exclusively provide the performance, installation and interchangeability characteristics required for specific critical applications. To illustrate, acceptable tolerances for a commercial television part may be far less stringent than those for a comparable military radar part, permitting competitive contracting for the former but not for the latter. The exacting performance requirements of specially designed military equipment may demand that parts be closely controlled and have proven capabilities of precise integration with the system in which they operate, to a degree that precludes the use of even apparently identical parts from new sources, since the functioning of the whole may depend on latent characteristics of each part which are not definitely known.

(d) When an award is made to a source that has not previously produced the item, the cognizant Government inspection activity and the appropriate contract administration office should be notified by the contracting office that the contractor will be producing the item for the first time.

Subpart 217.73—Special Commodities

217.7301 Bakery and dairy products contracts.

217.7301-1 Scope.

This section sets forth special policies and requirements for acquisition of perishable bakery and dairy products.

217.7301-2 Plant locations.

Prior to award of a contract for perishable bakery or dairy products the contractor must identify the plant or plants at which any manufacturing or processing will occur and from which shipment will be made. The plants named by the successful contractor shall be listed in the Schedule.

217.7301-3 Chemical and microbiological requirements (fresh dairy foods).

(a) *Chemical requirements.* Fresh dairy foods shall meet the chemical requirements for each fresh dairy food specification cited in the contract on the date of award.

(b) *Microbiological requirements.* Milk and milk products as defined in DLAM 8200.1, shall meet microbiological requirements stated in the Public Health Service Publication 229 in effect on the date of award. In the event of conflict between these requirements and individual product specifications, the requirements of Public Health Service Publication 229 shall govern.

(c) *Cultured products.* Cultured products shall meet the coliform requirements as specified in the Public Health Service Publication 229 in effect on the date of award. In the event of conflict between these requirements and individual product specifications, the requirements of Public Health Service Publication 229 shall govern.

(d) *Solicitation and contract requirements.* The requirements of (a), (b) and (c) above shall be expressed in solicitations and contracts for fresh dairy products.

217.7301-4 Containers and equipment (milk dispensing).

If the contractor is to furnish cabinets for dispensing milk from bulk containers, a notice so stating shall be included in the Schedule of solicitations and resultant contracts. The notice shall state (a) the number of dispenser cabinets required, or a reasonably accurate estimate thereof, (b) whether metal stands for the cabinets are required, (c) the number of cabinets required with a capacity of two containers each, and (d) the number required with a capacity of three containers each.

217.7301-5 Contract clauses.

(a) The contracting officer shall insert the following clauses in solicitations and contracts for perishable bakery and dairy products when an indefinite delivery type contract (see FAR 16.5) is to be used.

(1) 252.217-7300, Delivery Vehicles.

(2) 252.217-7301, Time of Delivery. When an indefinite quantity contract is to be used, rather than a requirements contract, the contracting officer shall use the clause as modified by its Alternate I.

(3) 252.217-7302, Change in Plant Location, (see 217.7301-2).

(4) 252.217-7303, Sanitary Conditions. When an indefinite quantity contract is used, rather than a requirements contract, the contracting officer shall use the clause as modified by its Alternate I.

(5) 252.217-7304, Remedies Under Delivery Orders. When delivery orders are to be placed by an activity other

than the activity which awarded the contract, and in order to establish authority in the ordering officer under the Changes, Extras, Inspection, Default (Fixed Price Supply and Service), and Disputes clauses, the contracting officer shall use the clause with its Alternate I.

(b) The contracting officer shall insert the following clauses, substantially the same as the clauses prescribed below, in solicitations and indefinite delivery contracts for perishable dairy products.

(1) 252.217–7305, Examination and Testing.

(2) 252.217–7306, Deficiency Adjustment. The formulas prescribed in the clause may be modified to accommodate purchasing or ordering activities which do not have access to the Department of Agriculture reports cited therein.

(3) 252.217–7307, Warning.

(4) 252.217–7308, Suspension. When an indefinite quantity contract is used, rather than a requirements contract, the contracting officer shall use the clause with its Alternate I.

(5) 252.217–7309, Default.

(6) 252.217–7310, Reinstatement.

(c) The contracting officer shall insert the clause at 252.217–7311, Code Dating, in solicitations and indefinite delivery type contracts for perishable bakery and dairy products when a Schedule or specification provision requires the labels of one or more items to show the date of pasteurization, manufacture, production, or processing, and in order to permit the use of a coding system.

(d) The contracting officer shall insert the clause at 252.217–7312, Marking, in solicitations and indefinite delivery contracts for perishable bakery and dairy products except when a provision is inserted in the Schedule specifically requiring supplies to be marked in accordance with MIL–STD–129, Marking for Shipment and Storage.

(e) The contracting officer shall insert the clause at 252.217–7313, Responsibility for Containers and Equipment, in solicitations and indefinite delivery contracts for perishable bakery and dairy products when the contractor is to provide reusable containers and equipment.

(f) The contracting officer shall insert the clause at 252.217–7314, Containers and Equipment, in solicitations and indefinite delivery contracts for perishable bakery and dairy products when the contractor is to furnish cabinets for dispensing milk from bulk containers (see 217.7301–4).

Subchapter D—Socioeconomic Programs

PART 219—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 219.1—Terms and Size Standards

219.102–6 Size standards for transportation industries.

(c) No concern offering to provide local and/or long distance trucking, warehousing and/or packing and crating, and/or freight forwarding will be denied small business status for the purpose of Government acquisition solely because of its contractual relationship with a large interstate van line if the concern's annual receipts have not exceeded $7 million during its most recently completed fiscal year.

Subpart 219.2—Policies

219.201 General policy.

(b)(1) The Director of Small and Disadvantaged Business Utilization is responsible for the development of overall DoD small business and disadvantaged business goals and for consulting with SBA regarding the establishment of such goals.

(2) Departmental Directors of Small and Disadvantaged Business Utilization are responsible for the development of small business and disadvantaged business utilization goals for subordinate elements within their department. These goals will be further assigned by these subordinate elements as appropriate, such as engineer district offices or individual contracting divisions within a central contracting activity or major commodity command.

(3) Heads of contracting activities are responsible for the attainment of assigned small business and disadvantaged business utilization goals.

(4) Within 60 days after the conclusion of each fiscal year, the Secretaries of the Military Departments and the Directors of Defense agencies shall report to the Secretary of Defense on the extent of participation by small business concerns and disadvantaged business concerns in contracts awarded by their Department. Such report shall contain appropriate justifications for failure to meet goals established by the Office of the Secretary of Defense, as well as actions planned to increase the rate of participation by such firms in future contract awards. The Office of the Secretary of Defense will submit information to SBA concerning any failure to meet established goals and actions to be taken to improve future performance.

(d)(1) Small and disadvantaged business utilization specialists shall be appointed by name, in writing, for contracting activities, contract administration offices, and other such offices, as the Departments consider appropriate. They shall be responsible directly to the appointing authority and shall not be subject to the direction of contracting, contract administration, or technical personnel. The appointing authority, without power of redelegation, is as follows:

(i) Army—Commanders of major commands, Commanders of major subordinate commands, and installation, post, camp, station or activity commanders. For each major command, one specialist will be appointed as the Associate Director for Small and Disadvantaged Business Utilization, reporting directly to the Commander or the second-in-command. The Associate Director will have primary responsibility for the effective implemention of the Army's small business, disadvantaged business utilization, labor surplus area and other socio-economic business programs within the Command. The Associate Director for Small and Disadvantaged Business Utilization Policy at Major Command Headquarters other than at the Materiel Development and Readiness Command (DARCOM), Office, Chief of Engineers (OCE), Forces Command (FORSCOM), Training and Doctrine Command (TRADOC), may be assigned on a part-time basis.

(ii) Navy—Head of a contracting activity or the official in charge of an activity having purchase authority of $10,000 or more, or in charge of a contract administration activity;

(iii) Air Force—Commander of each central procurement activity; the Wing/Base Commander of each local purchasing activity and the Chief of each contract administration activity. In addition, an Executive for Small and Disadvantaged Business Utilization shall be appointed by the Commander of each Major Air Command in the United States, not mandatorily reporting directly to the Commander but having ready access to such person, who will have primary responsibility for the effective implementation of the Air Force small business, small disadvantaged business utilization and labor area programs(s) within the Command;

(iv) Defense Logistics Agency—Commanders of Defense Supply Centers, Commanders, Defense Contract Administration Services Regions and

Commanders of other DLA contracting activities;

(v) National Security Agency—the Director;

(vi) Defense Communications Agency—the Director;

(vii) Defense Nuclear Agency—the Director;

(viii) Defense Mapping Agency—Director; directors of subordinate components.

A copy of each appointment and termination of appointment of all such specialists shall be forwarded to the appropriate Department or Agency Office of Small and Disadvantaged Business Utilization (219.201(S–71)). In addition to performing that portion of the specific program outlined in (d)(2) below that is normally performed in the activity to which he is assigned, the small and disadvantaged business utilization specialist shall advise the head of the activity and shall perform such additional functions as are prescribed for him in furtherance of the overall small business, small disadvantaged business utilization and labor surplus area programs. A small and disadvantaged business utilization specialist shall be appointed on a full-time basis in all activities having sufficient business or program responsibility to justify such action. When the volume of contracting does not warrant assignment of a full time small and disadvantaged business utilization specialist, an individual shall be appointed as the specialist on a part-time basis. The responsibilities of this assignment shall take precedence over collateral responsibilities.

(2) A small and disadvantaged business utilization specialist (SADBU), appointed pursuant to the above, shall: Perform the following duties, as determined to be appropirate to the activity by the appointing officer or by the Departmental or Agency Director or Staff Director of Small and Disadvantaged Business Utilization. The SADRU shall:

(i) Maintain a program designed to locate capable small business, small disadvantaged business and labor surplus area business sources for current and future acquisitions, through SBA or other methods;

(ii) Coordinate inquiries and requests for advice from small business, small disadvantaged business and labor surplus area business concerns on acquisition matters;

(iii) Review acquisitions to insure maximum opportunity for participation by small and disadvantaged business, women-owned, and LSA, and to make recommendations for set-aside and 8(a) awards (see 19.501(c));

(iv) When small business concerns cannot be given an opportunity to compete because adequate specifications or drawings are not available, unless there are sufficient and valid reasons to the contrary, initiate action, in writing, with appropriate technical and contracting personnel to insure that necessary specifications or drawings of the current or future acquisitions, as appropriate, are available;

(v) Review acquisition programs for possible breakout of items suitable for acquisition from small business concerns;

(vi) Insure that financial assistance available under existing regulations is offered and that requests by small business concerns for proper assistance are not treated as a handicap in the award of contracts;

(vii) Participate in determinations concerning responsibility of a prospective contractor whenever small business concerns are involved;

(viii) Participate in the evaluation of a prime contractor's small business, labor surplus, and small disadvantaged business subcontracting plans;

(ix) Review and make appropriate recommendations to the contracting officer on any proposal to furnish Government-owned facilities to a contractor if such action may hurt the small business program;

(x) Assure that participation of small business concerns is accurately reported;

(xi) Bring to the attention of the Department Director or Staff Director for Small and Disadvantaged Business Utilization possible contracting opportunities in labor surplus area;

(xii) Make available to SBA copies of solicitations when so requested;

(xiii) When a bid from a small business, small disadvantaged business or labor surplus area firm has been rejected for nonresponsiveness or nonresponsibility, upon request, aid, counsel and assist that firm in understanding requirements for responsiveness and responsibility so that the firm may be able to qualify for future awards;

(xiv) Participate in government-industry conferences to assist small business, small disadvantaged business and labor surplus area concerns, including Business Opportunity/Federal Procurement Conferences, Minority Business Enterprises Procurement Seminars, and Minority Business Opportunity Committee meetings;

(xv) Advise potential suppliers how they can obtain information about formal advertising and negotiated acquisitions and that they can subscribe to the Commerce Business Daily as a source of information on proposed acquisitions;

(xvi) Brief his commander at least once quarterly concerning the status of the installation's small business, small disadvantaged business utilization and labor surplus area programs in relation to goals and objectives established by higher headquarters;

(xvii) Participate in the development, implementation and review of automated contracting systems to assure that the interests of small business, small disadvantaged business and labor surplus area firms are fully considered with particular reference to FAR 19.202–4(c), FAR 19.501(c), and FAR 19.502;

(xviii) Assist program managers as early as possible in the development cycle of major system aquisitions and system programs as pertains to the small business programs;

(xix) Assist contracting officers in establishing criteria for and determining acceptability of small business and small disadvantaged business concerns subcontracting plans submitted by prime contractors;

(xx) Assure that the installation's small business, small disadvantaged business and labor surplus area business programs are frequently publicized in the appropiate media;

(xxi) Assure that the organization maintains a list of products and services which have been placed on repetitive small business set-aside;

(xxii) Provide small business, small disadvantaged business and labor surplus area firms information regarding assistance available from Federal agencies such as the Small Business Administration, Office of Minority Business Enterprise, Bureau of Indian Affairs, Office of Economic Development, National Science Foundation, Department of Labor and others including state, trade, and other associations;

(xxiii) Be responsible for establishing an education and training program for personnel whose duties and functions affect the activity's small business, small disadvantaged business and firms located in labor surplus areas;

(xxiv) Recommend to his Commander the activity small business and disadvantaged business utilization overall goals and goals to be placed on subordinate contracting offices;

(xxv) Participate in interagency programs relating to small business, small disadvantaged business and labor surplus area matters as authorized by the Director of SADBU; and

(xxvi) Advise and assist contracting officers in discharging their responsibilities by:

(A) Monitoring and reviewing contractor performance to determine compliance with small and disadvantaged small business subcontracting plans;

(B) Developing and maintaining records and reports that reflect such compliance or noncompliance.

(S–70) *Office of the Secretary of Defense Directors.*

(1) *Director of Small and Disadvantaged Business Utilization.* The Director of Small and Disadvantaged Business Utilization reports directly to the Deputy Secretary of Defense and is responsible for the overall management and direction of the DoD small business, disadvantaged business utilization, and labor surplus area programs and for advising the Secretary of Defense and the Deputy Secretary of Defense in matters relating to these programs. To that end, the Director will provide guidance to the Departments and periodically review the direction and implementation of their activities in promoting contract awards to small business, small disadvantaged business, and labor surplus area concerns.

(2) *Director of Small Business and Economic Utilization Policy.* The Director of Small Business and Economic Utilization Policy is responsible for the establishment, implementation, and execution of DoD small business and labor surplus area programs. Negotiations with the SBA, the Office of Federal Procurement Policy, the Office of Management and Budget, and other agencies or departments outside the Department of Defense, concerning small business and labor surplus area policy, programs, and DoD goals shall be conducted by the Director of Small Business and Economic Utilization Policy or, with authorization, by representatives of the Departments. The Director of Small Business and Economic Utilization Policy, on behalf of the Director of Small and Disadvantaged Business Utilization will provide guidance to the Departments' Directors of Small and Disadvantaged Business Utilization regarding small business and labor surplus area matters.

(3) *Director of Disadvantaged Business Utilization Policy.* The Director of Disadvantaged Business Utilization Policy is responsible for the establishment, implementation, and execution of the DoD socially and economically disadvantaged business utilization program. Negotiations with the Small Business Administration, the Office of Federal Procurement Policy, the Office of Management and Budget, and other agencies or departments outside the Department of Defense, concerning disadvantaged business utilization policy, programs, and DoD goals shall be conducted by the Director for Disadvantaged Business Utilization Policy or, with authorization, by representatives of the Departments. The Director of Disadvantaged Business Utilization Policy, on behalf of the Director of Small and Disadvantaged Business Utilization, will provide guidance to the Departments' Directors of Small and Disadvantaged Business Utilization regarding disadvantaged business utilization matters.

(S–71) *Departmental Directors of Small and Disadvantaged Business Utilization.*

(1) Each department or agency shall maintain an Office of Small and Disadvantaged Business Utilization as follows:

(i) Army—Director, Office of Small and Disadvantaged Business Utilization, Office of the Secretary of the Army, Pentagon, Washington, D.C. 20310;

(ii) Navy—Director, Office of Small and Disadvantaged Business Utilization, Office of the Secretary of the Navy, Washington, D.C. 20360;

(iii) Air Force—Director, Office of Small and Disadvantaged Business Utilization, DCS/RD&A, Pentagon, Washington, D.C. 20330;

(iv) Defense Logistics Agency—Staff Director, Office of Small and Disadvantaged Business Utilization, Code DLA–U, Cameron Station, Alexandria, VA 22314;

(v) National Security Agency—Director, Office of Small and Disadvantaged Business Utilization, Fort Meade, MD 20755;

(vi) Defense Communications Agency—Director, Office of Small and Disadvantaged Business Utilization, Code 280, Washington, D.C. 20035;

(vii) Defense Nuclear Agency—Director, Office of Small and Disadvantaged Business Utilization (Code OAFR), Washington, D.C. 20305;

(viii) Defense Mapping Agency—Director, Office of Small and Disadvantaged Business Utilization, Headquarters, Washington, D.C. 20305.

(2) Each Departmental Office of Small and Disadvantaged Business Utilization shall be managed by a Director who shall be appointed by the Secretary of the department and shall be responsible to and report directly to the Secretary or Under Secretary of the Department. Directors of Defense agencies shall appoint a Staff Director for Small and Disadvantaged Business Utilization who shall be responsible to and report directly to the Director or his Deputy.

(3) The primary responsibility of the Director or Staff Director of each Office of Small and Disadvantaged Business Utilization shall be in matters concerning small business, small disadvantaged business utilization, and labor surplus areas. The Director or Staff Director advises the Secretary on small business, small disadvantaged business utilization and labor surplus area matters, implements such DoD programs within the Department or Agency and represents the Department or Agency in negotiations with other Departments or Governmental agencies on small business, small disadvantaged business utilization and labor surplus area matters. The Director or Staff Director will exercise supervisory authority over Department or Agency Small and Disadvantaged Business Utilization Specialists regarding small business, disadvantaged business utilization and labor surplus area matters. Appointment of Small and Disadvantaged Business Utilization Specialists shall be made after consultation with the Director or Staff Director of the Office of Small and Disadvantaged Business Utilization of the Department or Agency involved. In addition, such Director shall be afforded an opportunity to comment upon, and contribute to the performance evaluations of the Specialists for the contracting activities and contract administration offices or major organizational elements of the Department involved, including pay pursuant to the Civil Service Reform Act of 1978.

(S–72) *Small Business Technical Advisor.*

(1) The Military Departments shall assign small business technical advisors to assist each resident SBA Procurement Center Representative in the performance of his duties.

(2) A Small Business Technical Advisor (SBTA) shall be a full-time employee of the contracting activity and shall be well qualified, technically trained, and familiar with the supplies or services acquired at the activity.

(3) The principal duty of this advisor shall be to assist the SBA Procurement Center Representative in his duties and functions relating to Sections 8 and 15 of the Small Business Act. Providing such assistance shall take precedence over any other collateral duties that may be the responsibility of the SBTA.

219.202-1 Encouraging small business participation in acquisitions.

The Departments to the extent consistent with the best interests of the Government and in order to broaden the industrial base shall:

(a) Attempt to locate additional qualified small business suppliers by all appropriate methods including use of the assistance of SBA, particularly where only a limited number of small business concerns are on bidders' mailing lists;

(b) Give wide publicity to contracting methods and practices;

(c) Publicize proposed acquisitions by use of advance notices or other appropriate methods (see FAR 5.2);

(d) Include all established and qualified potential small business suppliers on mailing lists;

(e) Send solicitations to all firms on the appropriate list, except that where less than a complete list is to be used pursuant to FAR 14.205-4, at least a *pro rata* number of small business concerns shall be solicited;

(f) Divide proposed acquisition of supplies and services, except construction, into quantities not less than economic production runs, so as to permit bidding on quantities less than the total requirements; allow the maximum time practicable for preparation and submission of bids, proposals, or quotations; where feasible, establish delivery schedules which will encourage small business participation;

(g) Examine each major acquisition to determine the extent to which small business subcontracting should be encouraged or required;

(h) Use small business concerns to the maximum extent feasible as planned producers in the Industrial Readiness Planning Program; and

(i) Maintain liaison with Federal, State (including Governor's Commissions), and local agencies and other organizations for the purpose of providing information and assistance to small business concerns.

219.202-5 Data collection and reporting requirements

Records of the total value of contracts and subcontracts placed with small business concerns during each fiscal year shall be maintained by the use of DD Form 350 (Individual Procurement Action Report), DD Form 1057 (Monthly Procurement Summary by Purchasing Office), Standard Form 294 (Subcontracting Report for Individual Contracts), and Standard Form 295 (Summary Subcontract Report), as appropriate.

Subpart 219.4—Cooperation With the Small Business Administration

219.401 General.

(b) The contracting activity Small and Disadvantaged Business Utilization Specialist shall be the activity focal point for interface with the SBA.

219.402 Small business administration procurement center representatives.

(b) The SBA procurement center representative's request for access to contract information will be processed through the activity's Small and Disadvantaged Business Utilization Office.

Subpart 219.5—Set-asides for small business

219.501 General.

(c) The Small and Disadvantaged Business Utilization Specialist is responsible for reviewing those acquisitions not set-aside or not acquired through small business-small purchase set-aside. The SADBU shall, prior to the issuance of solicitation or contract modifications (except those which exercise an option), (1) for additional supplies or services in excess of $5,000 which have not been set-aside under FAR 19.502, or (2) for a dissolved small business-small purchase set-aside in excess of $5,000 (FAR 13.105), review the acquisition and the contracting officer's justification for not making a set-aside or for dissolving a small business-small purchase set-aside. The SADBU shall make recommendation to the contracting officer for set-aside, as appropriate, on an individual acquisition, or class of acquisition, or portion thereof. In automated contracting systems, such reviews will be accomplished prior to entering the item into the automated system after which no further review of the individual acquisition will be necessary if the automated system is so programmed that any changes in the acquisition of the item satisfy the provisions of FAR 19.502-2. Disagreements between the specialist and the contracting officer on proposed set-aside actions for small business shall be resolved under FAR 19.505. Disagreements on small business-small purchase set-asides shall be resolved under FAR 13.105.1(d)(2) by the contracting officer.

(d) All cases involving the noninitiation of a set-aside, whether resulting from a joint decision of the small business specialist and the contracting officer or a determination by the contracting officer alone, require referral to the SBA representative (if one is assigned and available) for his review. The SBA representative will either concur with the decision of the contracting officer or appeal the case in accordance with the provisions of FAR 19-505.

(g) This procedure is applicable to DoD.

219.502 Setting aside acquisitions.

219.502-1 Requirements for setting aside acquisitions.

Department of Defense activities follow the order of precedence in 219.504. Acquisition of supplies which were developed and financed in whole or in part by Canadian sources under the U.S.-Canadian Defense Development Sharing Program shall not be set-aside for small business. Supplies covered by the Program shall be identified by the cognizant Department.

219.502-2 Total set-asides.

Where multiyear contracting procedures are appropriate, total set-asides may be made in connection therewith.

219.502-4 Methods of conducting set-asides.

(a) Contracts for total (including combined small business/LSA) or partial set-asides entered into by conventional negotiation or by "Small Business Restricted Advertising" are negotiated acquisitions and shall cite as authority 10 U.S.C 2304(a)(1) in the case of a unilateral determination or U.S.C. 2304.(a)(17) and Section 15 of the Small Business Act in the case of a joint determination.

219.502-70 Combined small business—labor surplus area set-asides.

(a) In the acquisition of certain items, the objectives of both the Small Business Act and Defense Manpower Policy (DMP) No. 4 may be attained in a single acquisition. Under this procedure, the total required quantity of an item would be set aside for exclusive participation by small business firms and a portion of that total quantity would be further set-aside for award to small business concerns which are also LSA firms.

(b) For acquisitions exceeding $25,000 the use of this combined small business-LSA set-aside procedure shall be considered. This procedure shall be used in preference to all others when the proposed acquisition meets the criteria for:

(1) Total small business set-aside (FAR 19.502-2), and

(2) A partial LSA set-aside (220.7003(a)).

(c) Contracts utilizing this procedure may be entered into by "Small Business Restricted Advertising," the preferred method, (FAR 15.201) or by conventional negotiation. This set-aside procedure may be used in multi-year contracting (FAR Subpart 17.1). Solicitations shall provide that offers may be submitted by small business firms only and that a part of the total requirement is further set-aside for LSA firms which are also small business concerns. Offers received from firms which do not qualify as small business concerns shall be considered nonresponsive and shall be rejected.

(d)(1) In combined small business-LSA set-asides each solicitation shall contain the clause at 252.219–7001, Notice of Combined Small Business Labor Surplus Area Set Aside (except see (d)(2) below).

(2) When experience indicates that token bidding, block bidding, tie-in bidding, or similar devices may occur, the alternate clause at 252.219-7002, Notice of Combined Small Business Labor Surplus Area Set Aside, Alternate, may be used.

(e)(1) After the award price for the non-LSA set-aside portion has been determined, negotiations may be conducted for the LSA set-aside portion. Acquisition of the LSA set-aside portion shall in all instances be effected by negotiation. Negotiations shall be conducted only with those offerors who have submitted responsive offers on the non-LSA set-aside portion. Negotiations shall be conducted in the order of priority as indicated in the foregoing clause; *provided* that, when equal low offers are received on the non-LSA set-aside portion from concerns which are equally eligible for the LSA set-aside portion, the concern which is awarded the non-LSA set-aside portion (under the equal low bid procedure of 214.407–6) shall have first priority with respect to negotiations for the LSA set-aside portion. The LSA set-aside portion shall be awarded as provided in the clause. An offeror entitled to receive the award for quantities of an item under the non-LSA set-aside portion and who accepts the award of additional quantities under the LSA set-aside portion shall not be requested to accept a lower price because of the increased quantities of the award, nor shall negotiation be conducted with a view to obtaining such a lower price based solely upon receipt of award of both portions of the acquisition. This does not prevent acceptance by the contracting officer of voluntary reductions in price from the low eligible offeror prior to award, acceptance of voluntary refunds, or the changes of prices after award by negotiation of a contract modification.

(2) Offers obtained under the provisions of the set-aside clause from firms eligible for the set-aside portion of the requirement shall be in writing and shall include (i) agreement as to the established set-aside price for the available set-aside quantity, (ii) agreement as to the required delivery, (iii) agreement that all other terms and conditions of the solicitation will apply to the set-aside award, and (iv) agreement to inclusion of the clauses at FAR 52.215–1, Examination of Records by Comptroller General, and at FAR 52.215–2, Audit—Negotiation.

(3) When the award of the non-set-aside portion has been made to a small business concern and the same small business concern is entitled to receive the set-aside portion of the solicitation, the LSA set-aside portion may be added to the basic contract by supplemental agreement utilizing Standard Form 30. The supplemental agreement shall (1) include a reference to the contractor's letter offering on the set-aside quantity, (ii) state the price and delivery schedule applicable to the set-aside quantity, and (iii) include the clauses at FAR 52.215–1, Examination of Records by Comptroller General, and at FAR 52.215–2, Audit—Negotiation, applicable to the LSA set-aside portion only. Copies of all pertinent documents, including the signed offer, shall be attached. The supplemental agreement shall be signed by the contracting officer but need not be signed by the contractor since his signature on the attached offer will be deemed sufficient.

(4) When the award for the non-set-aside portion has been made to a firm other than the concern entitled to receive the set-aside portion of the solicitation, award of the set-aside portion will be made utilizing Standard Form 26. The offers obtained and the award utilized shall reference and include the same data indicated in paragraphs (e) (2) and (3) above. Also, the award shall reference in Block 26 of the Standard From 26, the applicable solicitation and the contractor's written offer, and copies of the solicitation and offer shall be attached. The Standard Form 26 shall be signed by the contracting officer but need not be signed by the contractor. The contractor's signature on the attached offer will be deemed sufficient.

For purposes of Subpart 204.6, the non-LSA-set-aside portion shall be reported separately. (See FAR 19.507 for automatic dissolution of set-asides.)

219.503 Setting aside a class of acquisitions.

(d) The contracting officer may initiate withdrawal of an individual acquisition or modification of a class set-aside by giving written notice to the activity's SADBUS and the SBA procurement center representative. In case of disagreement, the matter will be resolved under the procedures in FAR 19.506(b).

219.504 Set-aside program order of precedence.

(b) The following order of precedence applies to DoD:

(1) Combined small business/LSA set-aside 219.502–70)

(2) Partial set-aside for LSA firms (220.7003(a))

(3) Total set-aside for small business firms (FAR 19.502–2)

(4) Partial set-aside for small business (FAR 19.502–3)

219.505 Rejecting set-aside recommendations.

(a) Upon a recommendation of the Small and Disadvantaged Business Utilization Specialist that an individual acquisition or class of acquisitions, or portion thereof, be set-aside the contracting officer shall promptly either:

(1) Concur in the recommendation, or

(2) Disapprove, stating in writing his reasons for disapproval.

If the contracting officer disapproves the recommendation of the Small and Disadvantaged Business Utilization Specialist, the case shall be promptly referred to the SBA representative (if one is assigned and available) for his review. No further appeal action will be taken by the small business specialist. In those cases where an SBA representative is not assigned or available, and the contracting officer disagrees with the recommendation of the small business specialist regarding a small business set-aside for an individual acquisition or class of acquisitions or a portion thereof and so notifies the small business specialist in writing, or if the small business specialist disagrees with the contracting officer regarding a withdrawal or modification of a set-aside determination, the small business specialist may appeal in writing to the appointing authority (see 219.201(d)(1)) for decision. A memorandum of the decision by the appointing authority shall be placed in the contract file. After receipt of a decision from the appointing authority, which shall be decision final, and if the decision approves the action of the contracting officer, the small busi-

ness specialist shall forward for information and management purposes complete documentation of the case to the appropriate Departmental Director for Small and Disadvantaged Business Utilization or his designee as identified in 219.201(c)(S–71). The specialist's signed memorandum of nonconcurrence in a recommended set-aside action or of any withdrawal or modification shall be made and retained in the contract file.

(b) The head of the contracting activity's designee shall be at a level no lower than the chief of the contracting office.

(d) The matter shall be forwarded with full justification of the action taken through normal channels.

(e) Should it be determined that a decision cannot be made within 30 business days, a later date will be established in writing by the Secretary of the Department concerned to the Administrator, SBA, citing the reasons why additional time is required. A copy of such correspondence will be provided to the Director of Small and Disadvantaged Business Utilization, Office of the Deputy Secretary of Defense.

(f) The contracting officer must determine that contracting action must proceed without delay in order to protect the public interest. The contracting officer's statement shall be approved at a level above the contracting officer.

219.506 Withdrawing or modifying set-asides.

(b) Disagreements between the contracting officer and the Small and Disadvantaged Business Utilization Specialist will be resolved in accordance with the procedures in 219–505.

219.508 Solicitation provisions and contract clauses.

(d) When using the clause at FAR 52.219–7, the contracting officer shall insert the clause at 252.219–7003, Determining the Set-Aside Award Price.

(S–70) The contracting officer shall insert the clause at 252.219–7004, Eligibility for Preference as a Labor Surplus Concern, in solicitations and contracts for partial small business set-asides under FAR 19.502–3, for Combined Small Business—Labor Surplus Area Set-Asides under 219.502–70, and for partial set asides for Labor Surplus Area Concerns under 220.7003.

Subpart 219.6—Certificates of Competency and Determinations of Eligibility

219.602 Procedures.

219.602–1 Referral.

(a) A preaward survey shall be conducted prior to a determination by a contracting officer that a small business concern is not responsible on a proposed award. The contracting officer will refer the matter directly to the SBA, or he may notify the preaward survey activity to refer the matter to the SBA, whichever is more expeditious (e.g., where the surveying activity is nearer to the cognizant SBA office). The activity that refers the matter to the SBA shall maintain close liaison. If the activity does not hear from the cognizant SBA field office within 5 working days after referral, the activity will contact the SBA office to which the matter was referred to determine whether a Certificate of Competency (CoC) is being processed. When the PCO has requested the preaward survey activity to refer the matter to SBA, that activity shall keep the PCO advised of significant developments, including the results of any inquiry to the SBA at the end of the 5-working day period, and any new or additional facts that warrant a change in the preaward survey activity's findings.

219.602–3 Resolving differences between the agency and the Small Business Administration.

(a) Prior to final SBA action, the PCO (or the preaward survey activity when authorized to act as his representative) will be afforded an opportunity to meet or communicate with SBA field office representatives and furnish to them new or additional information on the cases. Copies of significant data developed by SBA that are pertinent to the case will be available, upon request, to the PCO or his representative at such a meeting or through correspondence. SBA case files may be examined at the meeting and pertinent notes taken by the contracting officer or his representative, but such files will not be released outside of SBA. Personnel from a contracting office or surveying activity who participated in a preaward survey of the prospective contractor or other personnel having cognizance of the survey shall be prepared to discuss with the SBA the basis for the preaward findings. Every effort should be made to resolve any differences between the SBA and the Departments through a complete exchange of preaward information developed by each agency.

(b)(2) If the contracting officer intends to appeal a proposed CoC issuance, upon receipt of initial notification from the SBA Central Office that it concurs with its Regional Office, the contracting officer shall immediately inform the Department or Agency Director or Staff Director of Small and Disadvantaged Business Utilization identified in 219.201(c)(S–71). If the Department elects to present a formal appeal to HQ SBA, a factual case shall be prepared as expeditiously as possible and processed through Departmental channels for approval at the Secretarial level prior to presenting the matter to HQ SBA. Any competent level of review within the Department or Agency may conclude that a formal appeal should not be made and that the contract should be awarded to the small business concern in question without a CoC or that a CoC should be accepted and the award made. If such action is taken, the contracting officer and HQ SBA shall be advised accordingly.

219.670 Quarterly reporting.

The Departmental Director or Staff Director of Small and Disadvantaged Business Utilization, identified in 219.201(c)(S–71), shall be informed by the contracting activity Small and Disadvantaged Business Utilization Specialist, in writing, on a quarterly basis, of all certificate of competency cases initiated during a particular quarter and of the final disposition made on cases during the quarter, including the number and dollar value of CoC's issued during the period. The information shall include company name, item being acquired, solicitation number, dollar value of the contract, and the date the case was submitted to SBA. In addition, advice and data will be furnished for all cases where (a) the small business concern elects not to file an application for a CoC; or (b) SBA declines to issue a CoC; or (c) the contracting activity reverses the preaward survey activity's negative finding concerning responsibility, withdraws the request for the CoC, and makes the award. This reporting requirement is assigned RCS DD–DR&E(Q)1152.

Subpart 219.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

219.703 Eligibility requirements for participating in the program.

(a) The SBA Size Appeals Board has final authority to determine the eligibility of a concern to be designated as a small business. The contracting

officer, in connection with small business subcontracting requirements, may question the prime contractor concerning a written representation of small business status, or the refusal to accept such written representation by either the prime contractor or a subcontractor, of a concern offering as a subcontractor on a particular acquisition. Other interested parties may also question such representation or refusal. If the matter(s) cannot be resolved, the contractor (prime or sub) is responsible for referring it for a size determination to the SBA Regional Office in which region the concern submitting the written representation has its principal office.

219.706 Responsibilities of the cognizant administrative contracting officer.

(a) *Evaluation of subcontract reports.* The ACO is responsible for reviewing, evaluating, and approving master subcontracting plans. In the evaluation of subcontract reports, the SADBU Specialist shall support the ACO in evaluating a contractor's performance and compliance with its subcontract plans. The original of the Standard Form 294, Subcontracting Report for Individual Contracts, and a copy of the Standard Form 295, Summary Subcontract Report, and reports of periodic reviews of contractor performance shall be retained by the cognizant SADBU Specialist. These reports together with other pertinent information shall be used as a basis for advising the ACO as to contractor's compliance with subcontracting plans.

219.708 Solicitation provisions and contract clauses.

(b) The contracting officer shall include the clause at 252.219–7000, Small Business and Small Disadvantaged Business Subcontracting Plan (Master Plans), in all solicitations and contracts that contain the clause at FAR 52.219–9.

Subpart 219.8—Contracting With the Small Business Administration (the 8(a) Program)

219.809 Preparing the contracts.

219.809–1 General.

(a) The negotiation authority to be cited is 10 U.S.C. 2304(a)(17).

PART 220—LABOR SURPLUS AREA CONCERNS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 220.70—Labor Surplus Area Policy and Procedures

220.7000 Scope.

As authorized by FAR 20.201–2, this subpart sets forth Department of Defense policy and procedures with respect to aiding labor surplus areas in the United States, its possessions, Puerto Rico, and the Trust Territory of the Pacific Islands. This subpart implements Defense Manpower Policy No. 4B, 23 May 1980 (44 CFR Part 331), and the Small Business Act as amended (15 U.S.C. 631), and U.S. Department of Labor Regs (20 CFR Part 654). Defense Manpower Policy No. 4B states the policy of the Government to encourage the placing of contracts and facilities in labor surplus areas and to assist such areas in making the best use of their available resources.

220.7001 General policy.

Except as provided in 220.7005 with respect to depressed industries, it is the policy of the Department of Defense to aid Labor Surplus Areas (LSA) by placing contracts with LSA concerns, to the extent consistent with procurement objectives and when such contracts can be awarded at prices no higher than those obtainable from other concerns and by encouraging prime contractors to place subcontracts with LSA concerns. In carrying out this policy, and to accommodate the small business policies of Part 19, preference shall be given in the following order of priority to (i) LSA concerns which are also small business concerns, (ii) other LSA concerns, and (iii) small business concerns which are not LSA concerns. In no case will price differentials be paid for the purpose of carrying out this policy. Heads of contracting activities and chiefs of purchasing and contract administration offices are responsible for the effective implementation of the Labor Surplus Area Program within their respective offices. Responsibility for administration of the program shall be assigned to small business specialists appointed pursuant to Part 19.

220.7002 Application of policy.

(a) Within the policy set forth in 220.7001, the following shall be applied to contracts which are estimated to exceed $25,000:

(1) Negotiated contracts shall, where acquisition objectives permit, be awarded to labor surplus area concerns; *provided,* that in no case shall price differentials be paid for the purpose of carrying out this policy;

(2) When appropriate, acquisitions shall be made from LSA concerns by partial set-aside procedures, in accordance with 220.7003 (but no total set-aside shall be made for LSA concerns) and such set-asides shall be given preference over any small business set-aside;

(3) Each Department shall assure that information identifying LSA is disseminated promptly to contracting personnel;

(4) When less than a complete bidders list is to be used pursuant to 214.205–4, at least a *pro rata* number of prospective LSA concerns shall be solicited;

(5) Subcontracting with concerns in LSA shall be encouraged in accordance with 220.7004.

(6) See 225.103 regarding purchase from qualifying country sources where LSA set-asides are involved.

(b) Records of the total value of all contracts in excess of $25,000 placed with LSA concerns during each fiscal year, and reports based thereon, are maintained by each Department through the Department of Defense Reporting System described Subpart 204.6. Accordingly, each Department, in soliciting bids and proposals for any contract estimated to exceed $25,000 shall request from any offeror, or other source, any information needed to determine whether the offeror is a LSA concern. Contract files shall be documented to indicate the extent to which LSA concerns were considered and the action taken with respect thereto.

220.7003 Partial set-asiders for labor surplus area concerns.

(a) *General.*

(1)(i) In accordance with the policy set forth in 220.7001 and 220.7002 (see also 219.504) a portion of each acquisition shall be set aside for LSA concerns if:

(A) The acquisition is severable into two or more economic production runs or reasonable lots; and

(B) One or more LSA concerns are expected to qualify as LSA concerns and to have the capability to furnish a severable portion of the acquisition at a reasonable price, except that a partial set-aside shall not be made if there is a reasonable expectation that offers will be received from only two concerns with capability (one concern which will not qualify as a LSA concern and one concern which will qualify as a LSA concern) unless authorized by the Head of the Contracting Activity on a case-by-case basis. Before reaching this conclusion, the contracting officer shall consult with the LSA specialist and may make advance inquires to determine the number and expected classification of interested concerns.

(ii) In determining whether a proposed procurement is susceptible to division into two or more economic production runs or reasonable lots, consideration should be given to the following factors and any others deemed appropriate:

(A) Price and procurement history of the items,

(B) Open industry capacity,

(C) Startup cost including special tooling requirements,

(D) Delivery schedule, and

(E) Nature of item and quantity being procured.

Before a portion or portions, constituting more than 50% of the total requirement may be set aside, a determination must be made that there is a reasonable expectation the action proposed will not result in the payment of a price differential. The determination and supporting information will be made part of the contract file.

(iii) In furtherance of the policy to assure that a fair proportion of procurements is placed with small business concerns, each LSA set-aside shall provide that, in addition to LSA concerns, small business concerns not performing in such areas are also eligible for participation in the set-aside for such quantities thereof as are not awarded to LSA concerns. In this respect, see the provisions of 220.7003(b)(2)(i) for notice to offerors, and 220.7003(b)(2)(ii) for conduct of set-aside negotiations.

(2) None of the following is, in itself, sufficient cause for not making a set-aside:

(i) A large part of previous procurements of the item in question has been placed with LSA concerns;

(ii) The item to be purchased is on an established planning list under the Industrial Readiness Planning Program;

(iii) The item to be purchased is on a Qualified Products List;

(iv) A period of less than 30 days from the date of issuance of invitations for bids or requests for proposals is prescribed for the submission of offers;

(v) The procurement is classified; or

(vi) LSA concerns are receiving a fair proportion of contracts.

(3) Procurement of supplies which were developed and financed in whole or in part by Canadian sources under the U.S.-Canadian Defense Development Sharing Program shall not be set aside for LSA. Identification of the supplies covered by the Program will be in accordance with Departmental procedures.

(b) *Set-aside procedures.*

(1) When a portion of a procurement is to be set aside, the procurement shall be divided into a non-set-aside portion and set-aside portion, each of which shall be not less than an economic production run or reasonable lot. Insofar as practical, the set-aside portion of this Part will be such as to make the maximum use of the capacity of LSA concerns. Delivery terms and other terms applicable to the set-aside portion of an item and those applicable to the non-set-aside portion of that item shall be comparable.

(2)(i) In procurements involving set-asides pursuant to this Part, each solicitation and resulting contract shall contain the clause in 252.220–7000, Notice of Labor Surplus Area Set-Asides, (except see (b)(2)(ii) below).

(ii) When experience indictes that token bidding, block bidding, tie-in bidding, or similar devices may occur, the alternate clause in 252.220–7001, Notice of Labor Surplus Area Set-Asides, may be used.

(iii) See 219.508(S–70) for use of the clause at 252.219–7004 for preference as a Labor Surplus concern.

(3)(i) After the award price for the non-set-aside portion has been determined, negotiations may be conducted for the set-aside portion. Procurement of the set-aside portion shall in all instances be effected by negotiation. Negotiations shall be conducted only with those offerors who have submitted responsive offers on the non-set-aside portion. Negotiations shall be conducted in the order of priority as indicated in the clauses required by 220.7003(b)(2) (i) and (ii) above; *provided* that, when equal low offers are received on the non-set-aside portion from concerns which are equally eligible for the set-aside portion, the concern which is awarded the non-set-aside portion (under the equal low bid procedure of 214.407–6 shall have first priority with respect to negotiations for the set-aside portion. The set-aside portion shall be awarded as provided in the clause. An offeror entitled to receive the award for quantities of an item under the non-set-aside portion and who accepts the award of additional quantities under the set-aside portion shall not be requested to accept a lower price because of the increased quantities of the award, nor shall negotiation be conducted with a view to obtaining such a lower price based solely upon receipt of award of both portions of the procurement. This does not prevent acceptance by the contracting officer of voluntary reductions in price from the low eligible offeror prior to award, acceptance of voluntary refunds or the change of prices after award by negotiation of a contract modification. If the entire set-aside portion cannot be awarded by the method described herein, any unawarded portion may be procured by advertising or negotiation, as appropriate, in accordance with existing regulations, FAR 15.201 or 15.210 as to negotiation. Since considerable time may have elapsed since the initiation of the requirement, contracting officers, prior to issuing a new solicitation, shall review the required delivery schedule (see FAR 12.101) to ensure that it is realistic in the light of all relevant factors including the capabilities of LSA concerns.

(ii) Offers obtained under the provisions of the set-aside clause from firms eligible for the set-aside portion of the requirement shall be in writing and shall include (A) agreement as to the established set-aside price for the available set-aside quantity, (B) agreement as to the required delivery, (C) agreement that all other terms and conditions of the original solicitation will apply to the set-aside award, and (D) agreement to inclusion of the clauses *"Examination of Records by the Comptroller General"* in FAR 52.215–1 and *"Audit Negotiation"* in FAR 52.215–2.

(iii) When the award of the non-set-aside portion has been made to a concern which is entitled to receive the set-aside portion of the solicitation, the set-aside portion may be added to the basic contract by supplemental agreement utilizing Standard Form 30. The supplemental agreement shall (A) include a reference to the contractor's letter offering on the set-aside quantity, (B) state the price and delivery schedule applicable to the set-aside quantity, and (C) include the clauses *"Examination of Records by Comptroller General"* in FAR 52.215–1 and *"Audit Negotiation"* in FAR 52.215–2 applicable to the set-aside portion only. Copies of all pertinent documents, including the signed offer, should be attached. The supplemental agreement shall be signed by the contracting officer but need not be signed by the contractor since his signature on the attached offer will be deemed sufficient.

(iv) When the award for the non-set-aside portion has been made to a firm other than the concern entitled to receive the set-aside portion of the solicitation, award of the set-aside portion will be made utilizing Standard Form 26. The offers obtained and the award utilized shall reference and include the same data indicated in paragraphs (b)(3)(ii) and (iii) above. Also, the award shall reference in Block 26 of Standard Form 26, the applicable solicitation and the contractor's written offer, and copies of the solicitation and offer shall be attached. The Standard

Form 26 shall be signed by the contracting officer but need not be signed by the contractor. The contractor's signature on the attached offer will be deemed sufficient. For purposes of Subpart 204.6, the non-set-aside and set-aside portions shall be reported separately.

(c) *Withdrawal of set-asides.* If, prior to the award of a contract involving a labor surplus set-aside, the contracting officer considers that the set-aside is detrimental to the public interest, e.g., because of unreasonable prices, the contracting officer shall withdraw the set-aside and complete the procurement by advertising or negotiation as appropriate in accordance with existing regulations. A signed memorandum setting forth the basis of the withdrawal of any set-aside shall be made and retained.

(d) *Contract authority.* Contracts for set-aside made under this shall cite as authority 10 U.S.C. 2304(a)(1). For reporting purposes, see FAR 15.201(b)(1)(i) for contracts awarded to labor surplus area concerns and FAR 15.201(b)(1)(ii) for contracts awarded to small business concerns which are not labor surplus area concerns.

220.7004 Subcontracting with labor surplus area concerns.

(a) *General policy.*

(1) It is the policy of the Government to promote equitable opportunities for labor surplus area concerns to compete for defense subcontracts and to encourage placement of subcontracts with concerns which will perform such contracts substantially in labor surplus areas in the order of priority described in 220.7001 where this can be done, consistent with efficient performance of contracts, at prices no higher than are obtainable elsewhere.

(2) To more effectively carry out the Government's policy objectives stated in (a) above, prime contractors and subcontractors having labor surplus area subcontracting programs must be informed of (i) the Government's evaluation of their efforts in carrying out an effective labor surplus area subcontracting program, (ii) any specific noted deficiencies in their Labor Surplus Area Subcontracting Programs, and (iii) any areas of outstanding achievement where they may have exceeded contractual requirements. To motivate a contractor to improve his program, he should be advised in general terms as to the type of actions which will result in a reward, penalty, or no impact on profit or fee actions. Any evaluation and remarks to the contractor which has exceeded contractual requirements, must be documented to furnish a basis for evaluation in connection with future awards.

(b) *Labor surplus area subcontracting program.* The Government's labor surplus area subcontracting program requires Government prime contractors to assume an affirmative obligation with respect to subcontracting with labor surplus area concerns. These obligations are in addition to those required by the minority business enterprise subcontracting program and the small business subcontracting program, FAR Subpart 19.7. In contracts which range from $25,000 to $500,000, the contractor undertakes the simple obligation of using his best efforts to place his subcontracts with concerns which will perform such subcontracts substantially in labor surplus areas where this can be done, consistent with the efficient performance of the contract, at prices no higher than are obtainable elsewhere. This undertaking is set forth in the contract clause prescribed in 220.7004(c)(1). In contracts which may exceed $500,000, the contractor is required, pursuant to the clause required by 220.7004(c)(2) to undertake a number of specific responsibilities designed to ensure achievement of the objectives referred to above and to impose similar responsibilities on major subcontractors.

(c) *Required clauses.*

(1) The clause at FAR 52.220–3, Utilization of Labor Surplus Area Concerns, shall be inserted in all contracts which may exceed $25,000, except:

(i) Contracts with foreign contractors which, including all subcontracts thereunder, are to be performed entirely outside the United States, its possessions, Puerto Rico, and the Trust Territory of the Pacific Islands;

(ii) Contracts for services which are personal in nature;

(iii) Contracts for construction; and

(iv) Contracts with the petroleum and petroleum products industry.

(2) The clause at FAR 52.220–4, Labor Surplus Area Subcontracting Program, shall be included in all contracts which may exceed $500,000, but which contain the clause required by (a) above and which, in the opinion of the purchasing activity, offer substantial subcontracting possibilities. Prime contractors who are to be awarded contracts that do not exceed $500,000, which in the opinion of the purchasing activity offer substantial subcontracting possibilities, shall be urged to accept the clause.

220.7005 Depressed industries.

(a) *General.* When an entire industry is depressed, the Director of the Federal Preparedness Agency of the General Services Administration may, under Defense Manpower Policy No. 4, establish appropriate measures on an industry-wide, rather than on an area, basis. Designations of such industries are made by the Federal Preparedness Agency and such industries will be given special treatment as specified therein.

(b) *Petroleum and petroleum products industry. (Notification No. 58).* There shall be no labor surplus area set-asides in this industry.

PART 222—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Subpart 222.1—Basic Labor Policies

222.101 Labor Relations.

222.101–1 General.

(S–70) Authorization shall be obtained from Departmental headquarters prior to initiating any contact on labor relation matters with a national office of any labor organization, Government department, agency or other governmental organization and shall promptly notify such headquarters of each contact by the national office of any of these organizations.

(S–71) All problems arising out of the industrial labor relations of contractors and all communications with contractors, labor organizations or Federal agencies relative thereto shall be handled in accordance with the procedures prescribed in this Section. Industrial security matters concerning contractor employees are governed by the DoD Industrial Security Regulation 5220.22R and the DoD Industrial Security Manual 5220.22M.

(S–72) Approval of the Office of the Deputy Under Secretary of Defense R&E(AM) will be obtained on major policies relating to all labor relations matters. Recommendations for plant seizure or injunctive action relating to potential or actual work stoppages and resolution of inter-service disagreements are examples of major policy actions.

(S–73) [Reserved]

(S–74) Questions involving FAR Part 22 or other contractor labor relations matters may be addressed to the appropriate departmental/agency headquarters labor advisor:

For the Army: Assistant Secretary of the Army (RDA), Attention: Labor Advisor

For the Navy: Chief of Naval Material, Attention: Contractor Labor Relations Advisor

For the Air Force: Headquarters, United States Air Force/RDC–LA, Attention: Special Assistant for Labor Affairs

For the DLA: Headquarters, Defense Logistics Agency; For all matters excepting strikes and disputes-Executive Directorate contracting, Attention: DLA–PA; For matters involving strikes and disputes-Executive Director Contract Management, Attention: DLA–AP

For the DCA: Headquarters, Defense Communications Agency, Attention: Counsel

For the DMA: Headquarters, Defense Mapping Agency, Attention: Staff Director of Logistics

For the DNA: Headquarters, Defense Nuclear Agency, Attention: Deputy Director of Operations and Administration

For the NSA: Headquarters, National Security Agency, Attention: Director of Procurement

222.101–2 Contract pricing and administration.

(S–70) Nothing in FAR 22.101–1 should be construed to relieve a contracting office from the responsibility to achieve efficient contract pricing and administration.

(S–71) Inspection personnel in the discharge of their duties, consistent with the policy of FAR 22.101–1(b), shall refrain from taking or expressing a position upon the merits of any dispute between labor and private management.

222.101–3 Reporting labor disputes.

When an interference is likely to occur, the CAO shall notify the purchasing offices, their Heads of Contracting Activities and their Departmental headquarters labor relations office (see listing at 222.101–1(S–74)). Further dissemination of labor dispute information shall be made by the CAO as requested by the Departmental headquarters labor relations offices. Labor disputes should be reported on DD Form 1507, Work Stoppage Report. An initial report should be submitted when a work stoppage due to a labor dispute is imminent or when such work stoppage occurs and thereafter when a significant changes occurs in the dispute situation. This reporting requirement is assigned RCS DD I&L (AR) 1153 (See 253.303–70–DD–1507).

222.101–4 Removal of items from contractors' facilities affected by work stoppages.

(a) It is the policy of the Department of Defense with respect to the movement of items from facilities affected by work stoppages to avoid the use of force or the appearance of force and to prevent the occurrence of incidents which will detrimentally affect relations with labor and management.

(b) Materials which the contractor is unable to deliver because of a work stoppage at the plant, and the delivery of which is urgent and critical to an important program, and may be obtained in accordance with procedures set forth below:

(1) The procuring contracting officer, upon the direction of the Departmental Headquarters Labor Relations Office, (see listing at 222.101–1(S–74)) shall furnish a written request for removal of the material to Contract Administration Office (CAO) having cognizance over the plant. The Commander of the cognizant CAO, his representative or the Headquarters Labor Relations Advisor shall attempt to work out an arrangement agreeable to both management and the labor representatives involved for shipment by normal means of urgently required material: Prior to making any removal, the Departmental Headquarters Labor Relations Office will solicit the opinion of the National Office of the Federal Mediation and Conciliation Service or other appropriate mediation agency as to the effect the movement of items would have on negotiations. The procuring contracting officer's request will include the following:

(i) A statement as to the urgency and criticality of the system, subsystem or item needed;

(ii) Description of items to be moved (Nature of item, amount, approximate weight and cubic feet, contract number, item number, etc.);

(iii) Mode of transportation by which items are to be moved if different from contract and whether by Government or commercial bill of lading; and

(iv) Destination of material if different than contract.

(2) If an arrangement in accord with (i) cannot be made, the Commander of the CAO or his representative, after obtaining approval from the Departmental Headquarters Labor Relations Office, may seek the concurrence of parties to the dispute to permit movement of the required material by military vehicles with military personnel to the extent needed. On receipt of such concurrences, he may proceed to make necessary arrangements to move the material.

(3) If satisfactory arrangements under (i) and (ii) cannot be made, the matter shall be referred to the Departmental Headquarters Labor Relations Office with the information required by 222.101–70(b). If that office is unsuccessful in obtaining the voluntary concurrences of the parties for movement of the material involved and further action to obtain the material is deemed necessary, the matter shall be referred to the DUSD, R&E(AM).

(4) Upon review and vertification that the material is urgently or critically needed and cannot be moved with the consent of the parties, the DUSD, R&E(AM) may request the Secretary of the Department to order removal of the material from the plant or plants involved.

222.101–70 Impact of labor disputes on defense programs.

(a) Each Department shall determine the degree of impact of potential or actual labor disputes on its own programs and requirements, considering among others the following factors:

(1) Whether the dispute involves a product, project (including construction) or service which must be obtained in order to meet schedules of urgently needed military programs or requirements; or

(2) Whether alternative sources of supply for the product, project, or service involved are reasonably available to fulfill the requirement or program in time to maintain essential military schedules.

(b) Within each department, the contracting activity involved shall obtain and develop data reflecting the impact of a dispute on requirements and programs. Upon determining the impact, the Head of the Contracting Activity shall submit through appropriate channels a report of his findings, together with recommendations, to the headquarters labor relations office originally notified pursuant to FAR 22.101–3. Such report shall be in narrative form and shall include the following information:

(1) Location of dispute and name of contractor or subcontractor involved;

(2) A statement indicating the degree of impact, relating specific items or construction involved to the programs or requirements affected;

(3) Identity of alternate sources available to furnish supply or service within the time required; and

(4) A description of any action taken to reduce impact.

(c) Reports of impact shall be made to the Office of the Deputy Under Secretary of Defense, R&E(AM).

(1) Upon specific request; or

(2) When considered by the Department to be of sufficient urgency to warrant the attention of the Deputy Under Secretary.

(d) Report submitted in accordance with (c) above shall be developed by the headquarters labor relations office concerned and shall cover the following areas of fact, as appropriate:

(1) *Description of military program, project, or service*—Identify item, project, or service which will be or is being affected by the work stoppage, describing its normal use and current functions in combat, combat support, or deterrent operations. For components or raw materials identify the end item(s) for which used.

(2) *Requirements and assets*—State requirements and assets in appropriate detail in terms commonly used by the DoD component.

(i) For *production programs* include requirements for each using military service. Where applicable, state in detail production schedules, inventory objectives, assets against these objectives, and critical shortages. For spares and highly expendable items, such as ground and air ammunition, show usage (consumption) rates and assets in absolute terms and in terms of daily, weekly, or monthly supplies. For components, include requirements for spares.

(ii) For *projects*, describe the potential adverse effects of a delay in meeting schedules and explain how a security disadvantage would result from such a delay. Attention should be given to feature any relative loss in balance of strength vis-a-vis potential enemies' capabilities.

(iii) For *services*, describe how a loss or interruption affects ability to support defense operations in terms of traffic requirements, assets, testing programs, etc.-

(3) *Possible measures to minimize strike impact*—Describe:

(i) Capabilities, if any, to substitute items or to use alternate sources. (Note how many other facilities are available and the relative capabilities of such facilities in meeting total requirements.);

(ii) How much time would be required to replace the loss of the facilities or service affected by a work stoppage; and

(iii) Feasibility of transfer of assets from theater to theater to relieve deficits in some areas of urgency.

(4) *Conclusion: Impact on operations of a 15–30, of a 30–60, and of a 60–90 day work stoppage*—Degree of criticality of a program, project, or service resulting from a work stoppage will be projected on a calendar basis, indicating the increased impact, if any, as the stoppage lengthens. Criticality is measured by the time required for the work stoppage to have an effect on operational capability. This time must be stated in terms of days.

222.101–71 Procurement of stevedoring services during labor disputes.

When stevedoring services are furnished by a contractor to a Department, and the performance under the contract, although urgently required, is delayed through a labor dispute, the following procedures shall be utilized in the order or priority listed. Each successive procedure shall be used only when the preceding steps are inadequate.

(a) An attempt shall be made to have management and labor voluntarily agree to exempt military supplies from the labor dispute by continuing the movement of such material.

(b) Vessels shall be diverted to alternate ports able to provide necessary stevedoring services.

(c) Consideration shall be given to contracting with reliable alternative sources of supply within the stevedoring industry.

(d) Civil Service stevedores shall be utilized to perform the work therefore performed by contract stevedores.

(e) Military personnel shall be utilized to handle the cargo which was being handled by contract stevedores prior to the labor dispute.

(f) When the exigencies of a situation require deviation format the procedures outlined above, the Departmental headquarters labor advisor (see listing at 222.101–1(S–74)) shall be promptly notified.

222.102 Federal and state labor requirements.

222.102–70 Applications by contractors for relaxation of requirements.

(a) Departments shall not initiate applications of any kind for suspension or relaxation of labor requirements without prior coordination of the departmental headquarter labor advisor (see listing at 222.101–1(S–74)). They may, however, support such applications by contractors or suppliers when all of the following circumstances and conditions have been met:

(1) The interested contractor or supplier has filed his application for relaxation of the laws, orders or regulations involved with the appropriate Governmental official charged with the enforcement of such labor requirements applicable to the contract involved;

(2) The required products or services are in short supply and unless the application is granted, production schedules for critically needed military material cannot be met;

(3) There is no alternative source of supply reasonably available to furnish the products or services within the period of time delivery is required;

(4) There is no practicable possibility of taking remedial action (such as recruiting, training, and more effective utilization of manpower) as an alternative to relaxation of applicable Governmental labor requirements;

(5) The apparent supply of labor, and in particular of critical skills, is limited, and it is not practicable to set up new production lines or to use additional facilities as an alternative to the relief requested; and

(6) The granting of the application will not result in an excessive increase in hours or work, an unreasonable curtailment of rest and lunch periods, an undesireable impairment of working conditions, or otherwise adversely affect the productivity of the facility involved.

(b) Requests for authority to support an application on behalf of a contractor or supplier shall be submitted to the Departmental headquarters labor advisor (see listing at 222.101–1(S–74)). Such requests shall contain the following information:

(1) The facilities and services involved and affected;

(2) Provision(s) of law which require relaxation;

(3) Criticality or relative scarcity of the material;

(4) Circumstances necessitating the relaxation (for example, a shortage in the local supply of skilled labor);

(5) Remedial action being taken by the manufacturer (e.g., training, recruiting, more effective utilization of manpower);

(6) The most limited relaxation of the requirement necessary for completion of the specific work; and

(7) The approximate period of time required for completion of the work.

(c) Consistent with the limitations of security and the foregoing requirements, contract information may be furnished to the appropriate Governmental official, upon his request, in connection with an application of a contractor or supplier for relaxation of a labor requirement as to the execution of a contract in pursuance of a military procurement program.

222.103 Overtime.

222.103–4 Approvals.

The Deputy Assistant Secretary (Acquisition), Office of the Assistant Secretary of the Army (Research Development and Acquisition), for the Army; the Deputy Chief of Naval Material (Contracts and Business Management), for the Navy; the Director of Contracting and Manufacturing Policy, Headquarters, USAF, for the Air

Force; the Executive Director for Contracting, for the Defense Logistics Agency; the Director of Procurement, for the National Security Agency; the Assistant to the Director for Administration, for the Defense Communications Agency; the Chief, Office of Procurement, for the Defense Nuclear Agency; and the Staff Director of Logistics, of the Defense Mapping Agency; are authorized, without power of delegation, to designate without power of redesignation, offices and civilian officials for the purpose of approving overtime premiums at Government expense. Such approval may be for an individual contract, project, or program, or for a plant, divisions, or company, as most practicable, and shall ordinarily be prospective, but may be retroactive when justified by the circumstances. When two or more purchasing offices have current contract at a single facility, and the approval of overtime by one purchasing office will affect the performance or cost of contracts of another, the approving official will obtain the concurrence of other appropriate approving officials and seek agreement as to the contracts under which overtime premiums will be approved. If the approving officials do not agree within a reasonable time as to the action to be taken, a decision shall be obtained through normal channels. Ordinarily, in the absence of evidence to the contrary, a purchasing office may relay on the contractor's statement that such approval will not affect the performance, or payments in connection with any contract of another purchasing office.

Subpart 222.4—Labor Standards for Contracts Involving Construction

This Subpart has been reserved pending development of appropriate coverage in FAR Subpart 22.4 to reflect recent changes in Department of Labor Regulations. Coverage on this subject matter will be provided prior to the FAR effective date.

Subpart 222.6—Walsh-Healey Public Contracts Act

222.604 Exemptions.

222.604–4 Regulatory exemptions.

(c) In addition to the requirements contained in FAR 2.604–2(c) regarding head of agency requests to the Secretary of Labor for exemption of contracts or classes of contracts from any or all stipulations of the Walsh-Healey Public Contracts Act, all applications for such exemptions shall (1) contain pertinent data (including a statement of justification) and recommendation and (2) be submitted through contract channels to the departmental headquarters labor relations advisor (see listing at 222.101–1(S–74)).

222.609 Regional Jurisdictions of the Department of Labor, Wage and Hour Division.

In contrast to FAR 22.609, the regional office locations set forth below contain both street addresses and telephone numbers.

(a) *Boston Region*—For the States of Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, and Connecticut: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, Room 1612C, John F. Kennedy Federal Building, Government Center, Boston, MA 02203 (telephone: 617–223–2035).

(b) *New York Region*—For the States of New York and New Jersey and for Puerto Rico and the Virgin Islands: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, 1515 Broadway, New York, NY 10036 (telephone: 212–971–5451).

(c) *Philadelphia*—For the States of Pennsylvania, Maryland, Delaware, Virginia, West Virginia, and the District of Columbia: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, Room 704C, 1317 Filbert Street, Philadelphia, PA 19107 (telephone: 215–597–9633).

(d) *Atlanta Region*—For the States of Florida, Georgia, North Carolina, South Carolina, Tennessee, Alabama, Kentucky, and Mississippi: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, Room 331, 1371 Peachtree Street, NE, Atlanta, GA 30309 (telephone; 404–526–5801).

(e) *Chicago Region*—For the States of Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin: Regional Administrator, Employment Standards Administration, U.S. Department of Labor U.S. Courthouse and Federal Office Building, Room 742, 219 South Dearborn Street, Chicago. IL 60604 (telephone: 312–353–7280).

(f) *Dallas Region*—For the States of Texas, New Mexico, Oklahoma, Arkansas, and Louisiana: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, Room 13F12, 1100 Commerce Street, Dallas, TX 75202 (telephone: 214–749–2037).

(g) *Kansas City Region*—For the States of Missouri, Kansas, Nebraska, and Iowa: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, Room 2000, Federal Office Building, 911 Walnut Street, Kansas City, MO 64102 (telephone: 816–374–5384).

(h) *Denver Region*—For the States of Colorado, North Dakota, South Dakota, Utah, Wyoming, and Montana: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, Room 246, 232 New Customshouse, 721 19th Street, Denver, CO 80202 (telephone: 303–837–4613.

(i) *San Francisco Region*—For the States of California, Nevada, Arizona, and Hawaii, and for Guam, and various Pacific Islands: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, 450 Golden Gate Avenue, Room 10431, San Francisco, CA 94102 (telephone: 415–556–1318).

(j) *Seattle Region*—For the States of Washington, Oregon, Idaho, and Alaska: Regional Administrator, Employment Standards Administration, U.S. Department of Labor, 2008 Smith Tower, 506 Second Avenue, Seattle, WA 98104 (telephone: 206–442–1536).

Subpart 222.8—Equal Employment Opportunity

222.804 Affirmative action programs.

222.804–2 Construction.

(b) Requests for instructions shall be forwarded through contracting channels to: Labor Advisor, OASA(RDA), for the Army; the cognizant field office of the Naval Facilities Engineering Command, for the Navy; Director of Contracting and Manufacturing Policy, Headquarters USAF, for the Air Force; Executive Director for Contracting, for the Defense Logistics Agency; Director of Procurement, for the National Security Agency: the Counsel, for the Defense Communications Agency; Director, Acquisition Management, for the Defense Nuclear Agency; Staff Director of Logistics, for the Defense Mapping Agency and the Assistant Director for Administrative Services for the Defense Civil Preparedness Agency.

222.805 Procedures.

(a)(2) A listing of Department of Labor regional offices can be found at 222.609 (in using the listing, replace "Wage and Hour Division" with "Office of Federal Compliance Programs").

222.806 Inquiries.

(b) Matters requiring the attention of OFCCP, Washington, D.C. Headquarters shall be forwarded to the departmental labor advisor (see listing at 222.101–1(S–74)) for referral to the Director, OFCCP.

222.807 Exemptions.

(c) The contracting officer's justification for exemption, shall be submitted through appropriate contracting channels to the departmental labor advisor (see listing at 222.101(S–74)) for departmental coordination and submission, if favorably endorsed, to the Deputy Under Secretary of Defense for Research and Engineering (Acquisition Management) (DUSD, R&E(AM)). If the request is submitted under FAR 222.807(a)(1), the DUSD, R&E(AM) shall forward it to the Secretary of Defense for granting of the exemption, and if the exemption is granted, shall notify the Director, OFCCP within 30 days of such action. If the request is submitted under FAR 22.807(a)(2) or FAR 22.807(b)(5), the DUSD, R&E(AM) shall forward it to the Director, OFCCP.

Subpart 222.10—Service Contract Act of 1965

222.1003 Applicability.

(e) *Requests for determinations and exemptions.*

(1) The contracting officer shall direct requests for determination of applicability of the Act or determination of the applicability or appropriateness of Department of Labor Wage determinations of the departmental labor advisor (see listing at 222.101–1(S–74)).

(2) The contracting officer shall submit in writing requests for exemption from the Act through contracting channels, as appropriate, to the departmental labor advisor (see 222.101–1(S–74)). The labor advisor shall effect necessary departmental coordination and submit the request, if endorsed, to the Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Washington, D.C. 20210.

222.1006 Clauses for contracts over $2,500.

(S–70) *Potential application clause.* The contracting officer shall insert the clause at 252.222–7000, Potential Application of the Service Contract Act, As Amended (Fixed Price), (SEP 1979) in solicitations and contracts for overhaul and modification of equipment, which are considered by the contracting office to be subject to the Walsh-Healey Public Contracts Act rather than the Service Contract Act, as amended. In paragraph (c) of the clause, "60 days" may be substituted for "30 days".

(S–71) *Minimum wages and fringe benefits.* The contracting officer shall insert the clause at 252.222–7001, Service Contract Act (SCA) Minimum Wages and Fringe Benefits, in solicitations and contracts when-

(1) The Clause at FAR 52.222–41 applies;

(2) The contract resulting from the solicitation succeeds an ongoing contract for substantially the same services;

(3) The incumbent contractor has negotiated or is negotiating a CBA with some or all of its service employes; an

(4) All applicable Department of Labor wage determinations have been requested but not received.

222.1007 Notice of intent to make a service contract.

(e) Requests, other than routine requests to check the status of the submitted Notice of Intention to Make a Service Contract and Response to Notice (SF–98/98(a)), to the Department of Labor, Washington, D.C. headquarters is not authorized other-than-routine requests shall be made through the departmental labor advisor (see listing at 222.101–1(S–74)) who, if the request is justified, shall contact cognizant Department of Labor headquarters officials regarding the request.

(S–70)(1) If the SCA wage determination requested in accordance with FAR 22.1007(a) is not received in time for inclusion in the solicitation, and absent an incumbent contractor union agreement, the contracting officer should proceed using the latest wage determination included in the existing contract, if any. If a new wage determination is subsequently received 10 or more days prior to the opening of bids or the date established for the initial receipt of proposals, the solicitation must be amended accordingly. However, if a new wage determination is received less than 10 days before the opening of bids or the date established for the initial receipt of proposals, it shall be included in the solicitation only when there is a reasonable time to notify offerors thereof.

(2) In those cases involving an incumbent contractor operating under a collective bargaining agreement, the wage determination in the incumbent's contract shall not be included in any solicitation that must be released without a new SCA wage determination. Instead, using the solicitation provisions as prescribed at 222.1006(S–71), offerors shall be informed that—

(i) The economic terms of such agreement(s) will apply to the contract and should be considered in developing an offer; however,

(ii) Pursuant to Department of Labor Regulations at 29 CFR 4.1c, and subject to the conditions set forth in FAR 22.1007(f) and 222.1008–1, the economic terms of any agreement entered into subsequent to this solicitation might apply to the contract.

(3) The contracting officer shall notify, in writing, the Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, of each case when compelled to proceed without a new wage determination due to a delayed response from the Department of Labor. An information copy of each such notice shall be forwarded to the appropriate departmental labor advisor (see 222.101–1(S–74)).

222.1008 Wage determinations and collective bargaining agreements.

222.1008–1 Before award.

(a) Solicitations and contracts for more than $2,500 shall contain an attachment (wage determination or appropriate revisions thereto) issue by the Administrator in response to the notice required under FAR 22.1007(a), setting forth the minimum wages and fringe benefits for service employees to be employed thereunder. However, wage determinations and revisions thereto shall *not* apply:

(1) Where no collective bargaining agreement exists and wage determinations or revisions are received less than 10 days before the opening of bids or date established for the initial receipt of proposals, unless the contracting officer finds that there is a reasonable time to notify bidders or offerors thereof;

(2) Where a collective bargaining agreement does exist and (i) the contracting agency has received notice of the existence thereof less than 10 days before bid opening or commencement of performance of a negotiated contract, option, or contract extension, *and* (ii) the contracting officer determines that there is not reasonable time to incorporate a new wage determination in the solicitation, *and* (iii) the notices required by FAR 22.1007(a) and (f) have been given.

222.1009 Notice of award.

Two copies of SF 99 shall be prepared for contracts of $2,500 or more but less than $25,000 containing the clause in FAR 52.222–41; for the initial order (if less than $25,000) under an indefinite-type contract or basic ordering agreement containing the clause in FAR 52.222–41; and for the initial purchase (if less than $25,000) under a blanket purchase agreement containing the clause in FAR 52.222–41. The address for

the Department of Labor office cited is Washington, D.C. 20210.

(S–70) *Individual Procurement Action Report (DD Form 350).* The contracting officer shall not report to the Department of Labor awards of service contracts of $25,000 or more containing the clause in FAR 52.222–41 and initial orders/calls of $25,000 or more under indefinite delivery-type contracts, basic ordering agreements, and blanket purchase agreements containing the clause in FAR 52.222–41. SF 99 information pertinent to such contracts and agreements is contained in DD Form 350 Data Input which is accessible to the Department of Labor via the Federal Procurement Data System.

222.1011 Hearings.

(a) The contracting officer shall submit a request for a hearing to the departmental labor advisor (see listing at 222.101–1(S–74)) who shall effect necessary departmental coordination and forward the request, if endorsed, to the Department of Labor.

222.1012 Withholding of contract payments.

Generally, sums withheld shall be forwarded immediately to the Department of Labor for payment to employees unless otherwise directed by the Department of Labor.

Subpart 222.13—Special Disabled and Vietnam Era Veterans

222.1303 Waivers.

(c) The contracting officer shall submit a request for waiver under FAR 22.1303(a) and (b) via appropriate procurement channels to the departmental or agency headquarters contractor labor relations advisor (see 222.101–1(S–74)) for listing of advisors). If the waiver request is justified, the advisor shall endorse the request and forward it to the ODUSD, R&E(AM) (CP) for waiver by the Secretary of Defense. Only the Secretary of Defense may make waivers under FAR 22.1303.

222.1306 Complaint procedures.

Each complaint received shall be forwarded by the contracting officer as indicated in FAR 22.1306. Also, the contracting officer shall notify the complainant of such referral. The contractor in question shall not be advised in any manner or for any reason of the complainant's name, the nature of the complaint, or the fact that the complaint was received.

Subpart 222.14—Employment of the Handicapped

222.1403 Waivers.

(c) The contracting officer shall submit a request for waiver under FAR 22.1403 (a) and (b) via appropriate procurement channels to the departmental or agency headquarters contractor labor relations advisor (see 222.101–1(S–74) for listing of advisors). If the waiver request is justified, the advisor shall endorse the request and forward it to the ODUSD, R&E(AM) (CP) for waiver by the Secretary of Defense. Only the Secretary of Defense may make waiver under FAR 222.1403.

222.1404 Department of Labor notices.

To assist the contracting officer in obtaining appropriate notices to be furnished the contractor, a listing of Department of Labor regional offices is located at 222.609 (for this purpose, replace "Wage and Hour Division" with "Office of Federal Contract Compliance Programs").

222.1406 Complaint procedures.

Each complaint received shall be forwarded by the contracting officer as indicated in FAR 12.1406 (see 222.609 for listing of Department of Labor regional/area offices). Also, the contracting officer shall notify the complainant of such referral. The contractor in question shall not be advised in any manner or for any reason of the complainant's name, the nature of the complaint, or the fact that the complaint was received.

Subpart 222.70—Safety and Health Regulations for Shipyard and Related Employment

222.7001 Safety and health regulations.

The Secretary of Labor has promulgated safety and health regulations for shipyard and related employment pursuant to the authority of Pub. L. 85–742, 72 Stat. 835 (approved August 23, 1958) amending section 41 of the Longshoremen's and Harbor Worker's Compensation Act (33 U.S.C. 941). These regulations are set forth in Title 29, Code of Federal Regulations, Subtitle B, Part 1915.

222.7002 Applicability.

These regulations apply to ship repair and shipbuilding or related work, as defined therein, performed within the Federal maritime jurisdiction on the navigable waters of the United States, including any dry dock or marine railway.

222.7003 Contract clause.

The Master Agreement for Repair and Alteration of Vessels includes a clause entitled "U.S. Department of Labor Safety and Health Regulations for Ship Repairing" directing the attention of the contractor to the applicability of these regulations. Similar clauses should be included in shipbuilding and ship conversion contracts.

222.7004 Administration and enforcement.

The responsibility for compliance with the U.S. Department of Labor Regulations is placed upon employers, any of whose employees are engaged in any ship repair, shipbuilding, or related employment aboard any vessel upon the navigable waters of the United States, including any dry dock or marine railway. Consequently, prime contractors or subcontractors or both may be responsible for compliance with these regulations. Insofar as the Government is concerned, the responsibility for the administration and enforcement of these regulations is with the U.S. Department of Labor. Contractors or employees who inquire concerning applicability or interpretation of the foregoing regulations shall be advised that rulings concerning such matters fall within the jurisdiction of the U.S. Department of Labor and shall be given the address of the appropriate field office of the Bureau of Labor Standards of the U.S. Department of Labor.

Subpart 222.71—Fair Labor Standards Act of 1938

222.7101 Basic statute.

The Fair Labor Standards Act of 1938 (Act of June 30, 1938; 29 U.S.C. 201–219), as amended, provides for the establishment of minimum wage and maximum hour standards, creates a Wage and Hour Division in the Department of Labor for purposes of interpretation and enforcement (including investigations and inspections of Government contractors), and prohibits oppressive child labor. Said Act applies to all employees, unless otherwise exempted, who are engaged in (a) interstate commerce or (b) any closely related process or occupation essential to such production.

222.7102 Suits against government contractors.

Payments made pursuant to the provisions of the Fair Labor Standards Act are usually reimbursable under cost or cost-plus-a-fixed-fee contracts. Consequently, each Department has a direct interest in claims and suits under said Act which are made or brought in connection with such contracts. In this connection, procedures have been established, by agreement between the

Department of Justice on the one hand and the Departments on the other hand, governing the defense of such Fair Labor Standards Act suits. These procedures in general contemplate the defense of Fair Labor Standards Act suits by private counsel employed by the contractor, the employment of whom is approved by the Department concerned. These procedures must be followed if contractors are to be reimbursed for the amount of any judgment under said Act, or for any litigation expenses (including the reasonable fees of such private counsel).

222.7103 Rulings on applicability or interpretation.

Contractors or contractor employees who inquire concerning applicability or interpretation of the Fair Labor Standards Act shall be advised that rulings concerning such matters fall within the jurisdiction of the Department of Labor and shall be given the address of the appropriate Regional Director of the Wage and Hour and Public Contracts Divisions of the Department of Labor.

Part 223—Environmental, Conservation and Occupational Safety [No DoD FAR Supplement]

PART 224—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 224.1—Protection of Individual Privacy

224.102 General.

(a)(1) The Act applies to systems of records on individuals when, for example:

(i) Determinations on benefits are made by Federal agencies;

(ii) Records are maintained for administrative functions of the Federal agency such as personnel, payroll, etc.; or

(iii) Health records are maintained by an outside contractor engaged to provide health services to agency personnel.

(2) The Act does not apply to systems of records on individuals when:

(i) Records are maintained by the contractor on individuals whom the contractor employs in the process of providing goods and services to the Federal Government;

(ii) An agency contracts with a state or private educational organization to provide training, and the records generated on contract students pursuant to their attendance (admission forms, grade reports) are similar to those maintained on other students and are commingled with their records on other students.

224.103 Procedures.

(b)(2) Implementation of the requirements of the Privacy Act is located in DoD Directive 5400.11 (see Appendix P).

Subpart 224.2—Freedom of Information Act

224.202 Policy.

Implementation of the requirements of the Freedom of Information Act is located in DoD Directive 5400.7 and DoD Regulation 5400.7–R (see Appendix L).

PART 25—FOREIGN ACQUISITION

Coverage on Part 25: Subject Matter will be provided prior to the FAR effective date.

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 27—PATENTS, DATA, AND COPYRIGHTS

Patents, Data, and Copyrights has been reserved pending final development of FAR Part 227. Coverage on Part 227 subject matter will be provided prior to the FAR effective date.

PART 228—BONDS AND INSURANCE

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

228.001 Definitions.

"Fidelity bond" means a bond which secures an employer up to an amount stated in the bond for losses caused by dishonesty on the part of an employee. A blanket fidelity bond covers all employees, except those expressly excluded by written endorsement on the bond.

"Forgery bond or policy" (Depositors Form) means a bond or policy which secures the person or persons named therein up to the amount stated for losses caused by the forging or altering of a check, draft, or similar instrument issued by or purporting to have been issued by any of the insureds, and for losses resulting from a check or draft having been obtained from the insureds through impersonation.

"Purchased insurance" means insurance purchased from insurers independent of and external to the contractor.

"Self-insurance" means the assumption or retention of the risk of loss, whether voluntarily or involuntarily, by the contractor. Self-insurance includes the deductible portion of purchased insurance. Insurance provided by captive insurers; i.e., insurers owned by or under the control of the contractor, is self-insurance except that if the captive insurer sells insurance to the general public in substantial quantities and it can be demonstrated that the charge to the contractor is based on competitive forces, then the insurance will be considered purchased insurance. This definition applies only to contracts subject to the provisions of the Cost Accounting Standard (CAS) 416 or to contracts not subject to the provisions of CAS 416 when the contractor elects to establish a program of self-insurance (FAR 31.205–19(a)). Self-insurance is not recognized on contracts not subject to the provisions of CAS 416 unless the contractor makes such an election.

Subpart 228.1—Bonds

228.102 Performance and payment bonds for construction contracts.

228.102–1 General

(a) The requirement of a performance and payment bond has been waived for all cost-reimbursement type construction contracts. In unusual circumstances, either or both bonds may be required of a prime contractor, subject to approval by the Chief of the Contracting Office. Contracting officers shall, however, require a cost-reimbursement type prime contractor to obtain a payment bond from his subcontractor in favor of the prime contractor, in an amount sufficient to assure payment of suppliers of labor and materials for any fixed-priced construction subcontract exceeding $25,000. In such a case, a performance bond in an equal amount should also be obtained if available at no additional cost.

228.103 Performance and payment bonds for other than construction contracts.

228.103–1 General.

Subcontract bonds shall not be executed on Standard Forms 25 and 25–A, or on DD Form 1673. The forms set forth in FAR 53.228 are authorized and may be adapted to fit specific cases.

228.103–2 Performance bonds.

(a)(1) Subject to the general policy stated in FAR 28.103–2, determinations that performance bonds will be required in specified classes of cases (e.g., for particular types of supplies or services) may be made (i) for the Army, by the Director and Deputy Director of Procurement and Production, US Army

Materiel and Development Command, and by all Heads of Contracting Activities not subordinate to that command; (ii) for the Navy, by the Chief of Naval Material; (iii) for the Air Force, by the Director of Contracting and Manufacturing Policy, DCS/RD&A; (iv) for the Defense Logistics Agency, by the Executive Director, Contracting; (v) for the National Security Agency, by the Director of Procurement; (vi) for the Defense Nuclear Agency, by the Director; (vii) for the Defense Communications Agency, by the Chief, Contract Management Division (Code 260); and for the Defense Mapping Agency, by the Staff Director of Logistics. A copy of each such determination covering a class of cases shall be forwarded to the Office of Under Secretary of Defense (Research and Engineering) for information.

(a)(4) The contracting officer shall insert the provision at 252.228–7004, Bonds or Other Security, as well as the clause at FAR 252.228–1, Bid Guarantee, in solicitations for dismantling, demolition, or removal of improvements in accordance with 237.302.

228.105 Other types of bonds.

228.105–70 Fidelity and forgery bonds.

Fidelity and forgery bonds are not generally required in any procurement. However, in connection with cost-reimbursement contracts for supplies, construction, or for operation of government-owned plants, such bonds may be required when necessary for the protection of the Government or the contractor, or when it is considered desirable to obtain the investigative and claims services of a surety company. Approval for requiring these bonds shall be obtained, (a) for the Army, by the Head of a Contracting Activity; (b) for the Navy, by the Chief of Naval Material (MAT 0242); (c) for the Air Force, by the Air Force Logistics Command (PMC); (d) for the Defense Logistics Agency, by the Head of a Contracting Activity; (e) for the National Security Agency, by the Director of Procurement; (f) for the Defense Communications Agency, by the Chief, Contract Management Division (Code 260); (g) for the Defense Nuclear Agency, by the Director, and (h) for the Defense Mapping Agency, by the Staff Director of Logistics.

228.106 Administration.

228.106–2 Substitution of surety bonds.

A new surety bond may be substituted when approved, (a) for the Army, by The Judge Advocate General; (b) for the Navy, by the Chief of Naval Material; (c) for the Air Force, by the Air Force Logistics Command; (d) for the Defense Logistics Agency, by the Head of a Contracting Activity; (e) for the National Security Agency, by the Director of Procurement; (f) for the Defense Communications Agency, by the Chief, Contract Management Division (Code 260); (g) for the Defense Nuclear Agency, by the Director; and (h) for the Defense Mapping Agency, by the Staff Director of Logistics. When so approved and authorized by Departments other than the Air Force, the principal and surety of the original bond will be notified that the original bond will not be considered as security for any default occurring after the date of acceptance of the new bond. When approved by the Air Force, authority to relieve an original surety of liability for default occurring subsequent to the date of approval of a substitute bond will be obtained from the Commander, Air Force Logistics Command, prior to giving such notification.

228.106–70 Review of bonds and notification of surety.

All bonds will be reviewed by the contracting officer to ascertain that the bond is in the penal sum required and, when appropriate, properly describes the contract. Additional review, approval, and distribution of bonds and consents of surety will be accomplished by each military department. When a contractor is performing his contract in such a manner as to lead to default, timely notification to the surety may result in action by the surety that will avoid a default. Therefore, on all such contracts, the surety shall be promptly notified of any failure by the contractor to perform (see FAR 49.402–4(a)).

Subpart 228.3—Insurance

228.304 Risk-pooling arrangements.

The following describes the Department of Defense Special Casualty Insurance Rating Plan, the National Defense Projects Rating Plan.

(a) *Special casualty insurance rating plan.* The National Defense Projects Rating Plan is available for application on both domestic and foreign contracts, which meet the eligibility requirements set forth herein. This plan provides a special rating formula for the purchase of the casualty insurance coverages listed in FAR 28.307–2 (a) through (c), and is mandatory as to contracts which meet the use and eligibility standards in (c) below. Construction subcontractors whose contracts provide that the prime contractor shall furnish insurance, and whose operations are at the project site, shall be included automatically in the prime contractor's rating plan policies for similar coverage. Construction subcontractors whose operations are away from the project site shall be included in the prime contractor's rating plan.

(b) This plan is effected by endorsements attached to standard insurance policy forms for workmen's compensation, employer's liability, general liability, and automobile liability. The rating plan provides for a fixed deposit premium, for a reduced rate of current premium payments, for yearly adjustments of the premium depending upon loss experience during the period, and for final adjustment of the premium based upon the experience of the entire period covered by the policies. The final adjustment may be deferred for a maximum of 68 months after expiration of the policies. The total adjusted premium is the sum of the following:

(1) A fixed charge which is a percentage of the standard premium and is to compensate the insurance company for general expenses other than those referred to hereafter;

(2) Modified losses, which are the losses paid or incurred, multiplied by a conversion factor of 201.12 to compensate the insurance company for claim department expense;

(3) Allocated claims expenses, which are expenses for claims services not of the type ordinarily rendered by the insurer's claim department, such as actual expenditures for attorney's fees and other trial or hearing expenses in connection with litigated cases;

(4) Special assessments imposed by the applicable jurisdiction for purposes such as second injury funds, rehabilitation funds, maintenance of workmen's compensation commissions, etc.; and

(5) Actual premium taxes.

Each of the above adjustments are subject to review by authorized representatives of the Department concerned, and the total adjusted premium derived therefrom, cannot exceed a maximum premium which is a percentage of the standard premium developed by use of manual rates issued or approved by the appropriate rating organization. In general, the plan is a variation of commercially available insurance rating plans, but has been specifically developed to meet the requirements of the Departments.

(c) The rating plan shall be applied to all eligible defense projects where such application is determined by the Heads of Contracting Activities, for the Department of the Army; the Chief of Naval Material, Attn: Contract Insurance Branch, for the Department of the Navy; Air Force Systems Command,

administrative contracting officers, for the Department of the Air Force; the Deputy Director, Contract Administration Services, Attn: DLA–AF, for the Defense Logistics Agency; the Director of Procurement, for the National Security Agency; the Director, for the Defense Communications Agency; the Chief, Office of Procurement, for the Defense Nuclear Agency; and the Staff Director of Logistics, for the Defense Mapping Agency; to be in the best interest of the Government. The rating plan may be applied to cost-reimbursement type contracts and also, in appropriate cases, to fixed-price contracts with price redetermination provisions. A defense project is eligible for application of a plan when (i) eligible Government contracts represent, at inception of the plan, at least 90 percent of the payroll for total operations at the specific locations of the project; and (ii) the annual premium for insurance is estimated to be at least $10,000. A defense project may include contracts awarded by more than one Department to the same contractor.

(d) The following agreement shall be used for accomplishing the assignment to the Government of the interest in return premiums, premium refund, etc., on insurance policies issued under the National Defense Projects Rating Plan, upon termination or completion of the contract, when the Government has assumed the payment of the contractor's obligation for futher premium payment under such policies:

Special Casualty Insurance Rating Plan Assignment-Assumption of Premium Obligations

It is agreed that 100 percent* of the return premiums and premium refunds (and dividends) due or to become due the prime contractor under the policies to which the National Defense Projects Rating Plan Endorsement made a part of policy _____ applies are hereby assigned to and shall be paid to the United States of America, and the prime contractor directs the Company to make such payments to the office designated for contract administration acting for and on account of the United States of America.

The United States of America hereby assumes and agrees to fulfill all present and future obligations of the prime contractor with respect to the payment of 100 percent* of the premiums under said policies.

* In the event the Government has less than a 100% interest in premium refunds or dividends, the assignment shall be appropriately modified to reflect the percentage of interest and of the extent of the Government's assumption of additional premium obligation.

This agreement, upon acceptance by the prime contractor, the United States of America and the Company shall be effective from _____

Accepted _____ (Date)

_____
(Name of Insurance Company)

By _____
(Title of Official Signing)

Accepted _____ (Date)
United States of America

By _____
(Authorized Representative)

Accepted _____ (Date)

_____
(Prime Contractor)

By _____
(Authorized Representative)

(e) Since the Federal Tort Claims Act provides protection for employees of the Government while driving government-owned vehicles within the scope of their employment, the National Defense Projects Rating Plan shall exclude coverage for such employees. The following endorsement shall be attached to automobile liability coverage provided under the plan:

It is agreed that such insurance as is afforded by the policy with respect to the ownership, maintenance or use of automobiles, including loading and unloading thereof, does not apply to the following as insureds: The United States of America, any of its agencies, or any of its officers or employees.

228.305 Overseas workers' compensation and war hazard insurance.

(d) Requests for waivers shall be submitted through channels (1) for the Army, to the Labor Advisor, Office of the Assistant Secretary of the Army (RDA); (2) for the Navy, to the Chief of Naval Material; (3) for the Air Force, to the Directorate of Contracting and Manufacturing Policy, Headquarters USAF: (4) for the Defense Logistics Agency, to the Deputy Director, Contract Administration Services, Attn: DCAS–AF; (5) for the Defense Communications Agency, to the Chief, Contract Management Division; (6) for the Defense Nuclear Agency, to the Chief, Office of Procurement; and (7) for the Defense Mapping Agency, to the Staff Director of Logistics. The request for waiver shall include the following:

(i) Name of contractor;

(ii) Business mailing address of contractor;

(iii) Contract number;

(iv) Date of award;

(v) Geographic location where the contract will be performed;

(vi) Name of insurance company providing the Defense Base Act coverage;

(vii) Nationality of employees to whom waiver is to apply; and

(viii) Reason for waiver.

(e)(1) If the Defense Base Act has been waived with respect to some or all of the contractor's employees, the benefits of the War Hazards Compensation Act will also have been waived as to such employees. In case of such waivers, the contractor shall provide protection against the risk of work injury or death (workmen's compensation type coverage) for the benefit of such waived employees. Insurance for this purpose as in any other case should be obtained at competitive rates in line with the policies of FAR Part 31, particularly if there has been a waiver and the insurance has been or is to be obtained to comply with workmen's compensation or equivalent statutes of a foreign country.

(2) The contractor shall also assume liability to such waived employees and their beneficiaries for war hazard injury, death, capture or detention. At the option of the Government, either the costs of this liability or the reasonable cost of insurance against this liability shall be allowed as a cost under the contract. When the clause at FAR 52.228–4 is required and if it is decided by the Head of the Contracting Activity or designee that the contractor shall not purchase insurance against this liability, the contracting officer shall insert the clause at 252.228–7000, Reimbursement for War Hazard Losses.

228.306 Insurance under fixed-price contracts.

(a) *General.*

(1) Negotiated fixed-price type contracts for the production, modification, maintenance, or overhaul of aircraft shall, except as provided in (a)(2) below, include the clause at 252.228–7001, Ground and Flight Risk.

(2)(i) In paragraph (b) of the clause at 252.228–7001, certain of the defined terms may be modified by insertion of appropriate additional definitions in the contract in accordance with the following. The purpose of the clause is to have the Government to assume risks which generally entail unusually high insurance premiums and which are not covered by the contractor's "contents," "work-in-process," or other similar insurance. It is recognized that all of the definitions prescribed in the clause may not cover all situations which should be covered if the above purpose is to be accomplished. Therefore, changes may be effected in the contract as set forth below.

(A) Since the standard definition of "aircraft" contemplates conventional types of winged aircraft, a modified definition is necessary if the contract covers helicopters, vertical take-off aircraft, lighter-than-air airships or other nonconventional types of aircraft. The modified definition should take into consideration that the aircraft has reached a point of manufacture comparable to that required in the standard definition;

(B) The definition of "in the open" may be modified to include "hush houses", test hangars, and comparable structures, and other designated areas;

(C) "Contractor's premises" shall be expressly defined and shall be limited to those locations where aircraft, as defined in the clause, may be located during and for the performance of the contract. "Contractor's premises" may include, but are not limited, premises owned or leased by the contractor or premises as to which the contractor has a permit, license, or other right of use either exclusively or jointly with others, including Government airfields.

(ii) The Government need not assume the risk of damage to, or loss or destruction of, aircraft, as provided by the clause, if the best estimate of premium costs which would be included in the contract price for insurance coverage for such damage, loss, or destruction at any plant or facility is less than $500. The Government shall not assume such risks if the aircraft is being acquired in connection with a Foreign Military Sale and the foreign government involved has not agreed to assume such risks. If it is determined not to assume such risks, the clause shall not be made a part of the contract, and the cost of necessary insurance to be obtained by the contractor to cover such risks shall be considered in establishing the contract price. In such cases, however, if performance of the contract is expected to involve the flight of Government-furnished aircraft, the substance of the Flight Risks clause in 252.228–7002, suitably adapted for use in a fixed-price type contract, shall be used.

(iii) Subparagraph (d) of the clause in 252.228–7001 may be varied to provide for government assumption of risk of transportation by conveyance on streets or highways where the contracting officer determines that such transportation is limited to the vicinity of the contractor's premises and is merely an incident to work being performed under the contract.

228.307 Insurance under cost-reimbursement contracts.

228.307–1 Group insurance plans.

(a) *Prior approval requirement.* Group insurance plans under cost-reimbursement contracts shall be submitted for approval to the Heads of Contracting Activities, for the Department of the Army; the Chief of Naval Material for the Department of the Navy; Air Force Systems Command, administrative contracting officers, for the Department of the Air Force; the Director of Procurement, for the National Security Agency; the Director, for the Defense Communications Agency; the Director, for the Defense Nuclear Agency; and the Staff Director of Logistics, for the Defense Mapping Agency. For the Defense Logistics Agency such plans shall be submitted for approval to the Directors, Directorate of Contract Administration, DCASR New York (DCRN–C), DCASR Chicago (DCRI–C), or DCASR Los Angeles (DCRL–C), as appropriate.

(S–70) The Defense Department Group Term Insurance Plan is available for use by cost-reimbursement type contractors. A contractor is eligible only if the number of covered employees is 500 or more, and (i) the contractor is wholly engaged in operations under eligible contracts, or (ii) 90 percent or more of the payroll of contractor's operations to be insured under the Plan arises under eligible contracts. Insurance policies under this plan shall be submitted for approval to the Heads of Contracting Activities, for the Department of the Army; the Chief of Naval Material, for the Department of the Navy; Air Force Systems Command, administrative contracting officers for the Department of the Air Force; the Deputy Director, Contract Administration Services, Attn: DLA–AF, for the Defense Logistics Agency; the Director of Procurement, for the National Security Agency; the Director, for the Defense Communications Agency; the Chief, Office of Procurement, for the Defense Nuclear Agency; and the Staff Director of Logistics, for the Defense Mapping Agency.

228.307–2 Liability.

(S–70) *Aircraft flight risk.*

(1) Cost-reimbursement-type contracts for the development, production, modification, maintenance, or overhaul of aircraft, or otherwise involving the furnishing of aircraft to the contractor by the Government, shall, except as provided in (2) below, include the clause at 252.228–7002, Flight Risks.

(2) In the clause, the definition of "aircraft" may be appropriately modified if the contract covers helicopters, vertical take-off aircraft, lighter-than-air airships, or other nonconventional types of aircraft.

228.309 Contract clauses for workers' compensation insurance.

(S–70) The Contracting Officer is authorized to insert the clause at 252.228–7003, Capture and Detention, when the employees of a contractor are subject to capture and detention under circumstances which may be outside the scope of the War Hazards Compensation Act (42 U.S.C. 1701 et seq.).

228.311 Solicitation provision and contract clause on insurance liability under cost reimbursement contracts.

(S–70) *Contract clause for construction.* The Contracting Officer shall insert the clause at 252.228–7005, Insurance, in accordance with 236.573.

Subpart 228.70—Indemnification

228.7000 General.

Indemnification under research and development contracts against unusually hazardous risks is covered in 235.070(a). Indemnification under Pub. L. 85–804 is covered in FAR Subpart 50.4. Indemnification under contracts involving both research and development and work that cannot be so classified is covered in 235.070(b) and 250.403–70.

Subpart 228.71—Accident Reporting and Safety

228.7101 Accident reporting.

The Contracting Officer may insert the clause at 252.228–7006, Accident Reporting and Investigation Involving Aircraft, Missiles and Space Launch Vehicles, in solicitations and contracts which involve or are in connection with the manufacture, modification, overhaul or repair of aircraft, missiles or space launch vehicles.

228.7102 Safety precautions for ammunition and explosives.

(a) The safety requirements of DoD 4145.26M, "DoD Contractors' Safety Manual for Ammunition, Explosives, and Related Dangerous Material" are to be applied to all contracts involving ammunition or explosives. To accomplish this policy, all solicitations and resulting contracts involving the development, testing, storage, manufacture, modification, renovation, demilitarization, packaging, transportation, handling, disposal, inspection, repair or other use of ammunition and explosives shall include the clause set forth in 252.228–

7007, Safety Precautions for Ammunition and Explosives. The clause is not to be included in contracts solely because of:

(1) Insert components containing no explosives, active chemicals or pyrotechnics, or

(2) Flammable liquids, acids or other chemicals are intended for initiation, propulsion or detonation as an integral or component part of an ammunition or explosive end item or weapon system.

(b) It is essential that contracts containing the above clause be administered in such a manner as to assure safety without unnecessary application of the requirements of the Manual to contractor operations or facilities not directly involved. As provided in the clause, the requirements of the manual are to be applied only to the contractor's operation relating to ammunition and explosives.

(c) Omission of the clause from solicitation and contracts referred to in (a) above or waiver of mandatory requirements of the Manual prior to contract award must be approved by the HCA or his sole designee. When mandatory requirements of the Manual are to be waived prior to award, the specific requirements to be waived must be set forth in the solicitation or by modification there to. Care must be taken to assure that the waivers grated are compatible with sound safety principles.

(d) In contracts involving shipments of ammunition and explosives by military aircraft or to an aerial part of embarkation, add Alternate I to the basic clause.

PART 229—TAXES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 229.1—General

229.101 Resolving tax problems

(a) Agency-designated legal counsel are responsbile for resolving tax issues affecting the agency. Within the Department of Defense, these agency-designated legal counsel are: Chief, Contract Law Division, Office of the Judge Advocate General, for the Army; the General Counsel, for the Navy; the General Counsel, for the Air Force; the General Counsel, for the Defense Logistics Agency; the General Counsel, for the National Security Agency; the General Counsel, for the Defense Communications Agency; the General Counsel, for the Defense Nuclear Agency; and the General Counsel, for the Defense Mapping Agency.

(b) and (c) Within the Department of Defense, a contractor having a cost-reimbursement type contract or a fixed-price type contract containing a tax escalation clause may be directed, after coordination with the appropriate agency-designated legal counsel through the Department of Defense Tax Policy and Advisory Group, to litigate the applicability of a particular tax. In such cases, guidance will be issued in Defense Acquisition Circulars informing purchasing activities of the litigation, the need for special contract clauses covering the tax in question, and instructions to be given contractors regarding nonpayment, payment, protest or other specific treatment of the tax. In addition, similar guidance may be furnished concerning an anticipated repeal or reduction in the rate of a tax. It is particularly important that this guidance be considered by those negotiating incentive type contracts in order that the tax in question may be treated separately in the establishment of a target price.

229.101-70 Resolving foreign tax relief issues.

(a) The definitions, policies, and responsibilities of the DoD Foreign Tax Relief Program are set forth in DoD Directive 5100.64, and that Directive and applicable implementing regulations or instructions should be consulted by contracting activities prior to the initiation of foreign procurement. Implementing instructions within the Services and DoD agencies are as follows:

Department of the Army Regulation AR 27-70;

Department of the Navy Instruction SECNAVINST 5840.5;

Department of the Air force Regulation AFR 110-18;

Defense Communications Agency Instruction 100-50-6;

Defense Contract Audit Agency Regulation 5110.2;

Defense Mapping Agency Instruction 5500.2;

Defense Nuclear Agency Instruction 5100.64; and

Defense Logistics Agency Regulation 5500.6.

(b) In addition, the following Unified Commands have issued management procedures to guide and coordinate the administration of the foreign tax relief program throughout their respective area commands—

Commander in Chief, European Command (USCINCEUR) EUCOM DIRECTIVE 45-8;

Commander in Chief, Atlantic Command (CINCLANT) CINCLANTINST 5840.2A;

Commander in Chief, Pacific Command (CINCPAC) CINCPACINST 5840.2B

As regards Canada and Greenland, Commander, SPACE COMMAND Regulation 110.1.

(c) Questions relating to the implementation of the DoD Foreign Tax Relief Program shall first be referred to the designated Commanding Officers below. Several foreign countries or areas have been designated, pursuant to subsection E.7 of DODD 5100.64, to make and maintain a current tax law study, serve as a single point of contact for U.S. contracting officers and contracting activities for the investigation and resolution of specific foreign tax relief matters, and to serve as a liaison point with the responsible diplomatic mission and local foreign tax authorities:

Country or area	Designated Commanding Officer
Australia	Commander in Chief, Pacific Rep., Australia.
Azores	Commander, U.S. Forces, Azores.
Bahrain	Commander in Chief, U.S. Naval Forces, Europe.
Belgium	Commander in Chief, U.S. Army, Europe.
Bermuda	Commanding Officer, U.S. Naval Air Station, Bermuda.
Canada	Commander, Space Command.
Caribbean Islands (including Bahamas).	Commander, Antilles Defense Command.
Denmark	Commander in Chief, U.S. Air Forces, Europe.
Ethiopia	Commander in Chief, U.S. Army, Europe.
France	Commander in Chief, U.S. Army, Europe.
Germany	Commander in Chief, U.S. Army, Europe.
Greece	Commander in Chief, U.S. Air Forces, Europe.
Greenland	Commander, Space Command.
Iceland	Commander, Iceland Defense Force.
Iran	Commander in Chief, U.S. Army, Europe.
Italy	Commander in Chief, U.S. Naval Forces, Europe.
Japan	Commander, U.S. Forces, Japan.
Korea	Commander, U.S. Forces, Korea.
Luxembourg	Commander in Chief, U.S. Army, Europe.
Morocco	Commander in Chief, U.S. Naval Forces, Europe.
Netherlands	Commander in Chief, U.S. Air Forces, Europe.
New Zealand	Commander, U.S. Naval Support Forces, Antarctica.
Norway	Commander in Chief, U.S. Air Forces, Europe.
Philippines	Commander in Chief, Pacific Rep., Philippines.
Portugal	Commander in Chief, U.S. Naval Forces, Europe.
Spain	Commander in Chief, U.S. Air Forces, Europe.
Taiwan	Commander, U.S. Military Assistance Command, Thailand.
Turkey	Commander in Chief, U.S. Air Forces, Europe.
United Kingdom	Commander in Chief, U.S. Air Forces, Europe

(d) The activity initially raising the tax issue shall, in turn, refer unanswered questions on the DoD Foreign Tax Relief

Program to its agency designated legal counsel listed at 229.101.

Subpart 229.2—Federal Excise Taxes

229.202 General exemptions.

(b) *Certificate of export to a possession or to Puerto Rico.* The following form of exemption certificate shall be used as proof of export or shipment to a possession or to Puerto Rico:

Certificate of Export

(For use by purchasers of articles for export or shipment to a possession under Section 4221(a)(2), Internal Revenue Code of 1954)

———19———

(Name of Contractor)

The undersigned does hereby certify that———(quantity and description of supplies)———which were purchased for export, or for shipment to a possession of the United States or to Puerto Rico, under Contract No.———, were in fact exported to a foreign country, or shipped to a possession of the United States or to Puerto Rico, and a copy of the documents pursuant to which the supplies were shipped, is being retained in the files of——— (official address of office).

(Signature)

(Title)

(Address)

(d) *Exemption certificate for supplies for vessels of war.* The following form of exemption certificate shall be used in claiming an exemption for supplies for vessels of war (including aircraft).

Exemption Certificate

(For use by purchasers of articles for use as fuel supplies, ships' stores, sea stores, or legitimate equipment on certain vessels under Section 4041(g)(1) and 4221(d)(3), Internal Revenue Code)

———19———

(Name of Contractor)

The undersigned hereby certifies that he is an authorized agent of the United States of America and that the article or articles specified in the accompanying orders, or a specified below, or on the reverse side hereof, will be used only for fuel supplies, ships' stores, sea stores, or legitimate equipment on vessels of war of the United States or of a foreign nation, including aircraft owned by the United States or by a foreign nation and constituting a part of the armed forces thereof.

The undersigned understands that if the article or articles are used for any purpose other than as stated in this certificate, or are resold or otherwise disposed of, the purchaser must report such fact to the manufacturer; or, in the case of special motor fuel, that if the fuel is sold or used otherwise than as stated in 4041(g) of the Internal Revenue Code, liability for the tax upon such sale or use will attach. The undersigned also understands that the purchases must be prepared to establish by satisfactory evidence the purposes for which the article was used.

The fraudulent use of this certificate for the purpose of securing exemption from the payment or adjustment of taxes will subject the guilty party to a fine of not more than $10,000 or imprisonment for not more than five (5) years, or both, together with cost of prosecution.

(Signature)

(Title)

(Address)

(S–70) *Federal tax exemptions-other exemptions.*

(1) Pursuant to Title 26, Section 4293, the Secretary of the Treasury may authorize exemption for specific taxes imposed on particular articles or services purchased for the exclusive use of the United States when such impositions will cause substantial burden or expense which can be avoided by granting a tax exemption and when the full benefit of such exemption will accrue to the United States. The Secretary of Treasury has authorized tax exemptions from taxes imposed in the following Articles and Services:

(i) Communication Supplies and Services for the Exclusive Use of the United States;

(ii) Air Transportation of Persons and Property; and,

(iii) Manufacture of Trucks and Production or Purchase of Tread Rubber.

(2) Pursuant to Title 26, Section 4483(b), the Secretary of the Treasury has authorized exemption from the Federal excise tax imposed by Section 4481 of the Internal Revenue Code on the use of heavy highway vehicles on the public highways in the United States when the use of such heavy highway vehicles is by the United States and whether or not such highway vehicles are owned by the United States.

Subpart 229.3—State and Local Taxes

229.303 Application of State and local taxes to government contracts and subcontractors.

(a)(1) It is DoD policy that DoD contract shall not contain contract clauses expressly designating prime contractors of cost-type contracts to be performed within the United States as agents of the Government to purchase supplies for the purposes of avoiding state and local taxes. This policy was adopted to preclude the inclusion of contract clauses designed to avoid otherwise validly impose state or local taxes.

(2) Although circumstances may exist under which a contractor is an agent of the Government, even in the absence of a contract clause expressly designating the contractor as such, these circumstances are exceedingly rare. Before any DoD activity may contend that any of its contractors are agents of the Government for the purpose of claiming immunity from state and local sales and use taxes, the matter will be referred to the Office of the Secretary of Defense (OSD), Under Secretary of Defense (R&E) for review to ensure that DoD policy is compiled with and that the agency contention is fully in accord with the pertinent legal principles and precedents. Each case forwarded will be reviewed by the head of the agency before referral to OSD. The referral will include all pertinent data on which an agency contention is based, together with a thorough analysis of all relevant legal precedents.

(3) Whenever clauses, procedures and business practices are cited by DoD activities to support the contention that a contractor is an agent of the Government for the purpose of immunity from a state or local sales or use tax, contracting activities should whenever possible, devise alternative clauses, procedures and practices for future use which will accomplish their intended purpose without providing the basis for the contention that the contractor is an agent of the Government for the purpose of immunity from state or local sales or use taxes. Therefore, any referral to OSD will include comment on the extent to which alternate clauses, procedures or practices may be utilized to accomplish the intended purpose without providing the basis for the contention that the contractor is an agent of the Government for the purpose of immunity from state and local sales and use taxes.

Subpart 229.4—Contract Clauses

229.402 Foreign contracts.

229.402–1 Foreign fixed-price contracts.

(S–70) The contracting officer shall insert a clause substantially as shown at 252.229–7000, Fixed-Price, Into-Plane, Fuel Contracts at Overseas Locations, in solicitations and contracts when a fixed-price contract is contemplated for into-Plane fueling at overseas locations.

229.402–70 Use of foreign tax clauses

(a) *Exclusion of specific taxes from the contract price.* The contracting officer shall not attempt to provide a contractor or prospective contractor information as to foreign taxes or duties normally applicable to the acquisition.

The contracting officer shall, however, at the time of negotiation of a contract to be performed in a country or area listed in 229.101–70(c) obtain from the appropriate Designated Commanding Officer detailed information concerning the taxes and duties from which the Government of the United States is exempt under the provisions of applicable international agreements or foreign law. Information obtained by the contracting officer regarding exemptions shall be made available to the contractor or prospective contractor and retained as part of the contract file.

(b) *Tax exemption certificates and other assistance.* During the administration of the contract, the contracting officer shall, as appropriate, issue tax exemption certificates or use other procedures, if available, to assist the contractor in obtaining relief from foreign taxes and duties which were excluded from the contract price. If, in accordance with its contract, the contractor notifies the contracting officer that a tax or duty has been assessed by a foreign government on the contractor which could result in an increase in the contract price, the contracting officer shall immediately seek advice and assistance in accordance with 229.101–70(d).

PART 230—COST ACCOUNTING STANDARDS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 230.1—General

230.103 Cost Accounting Standards Board (CASB) publications.

Copies of the CASB Standards, Regulations, and Interpretations are contained in Appendix O.

Subpart 230.4—CAS Administration

230.401 Responsibility.

(a) In accordance with FAR Part 30, Cost Accounting Standards, and FAR Part 31, Contract Cost Principles and Procedures, the cognizant contract auditor shall be responsible for making recommendations to the ACO as to whether:

(1) A contractor's Disclosure Statement, submitted as a condition of contracting, adequately describes the actual or proposed cost accounting practices as required by Pub. L. 91–379, 50 U.S.C. App. 2168, as implemented by the Cost Accounting Standards Board;

(2) A contractor's disclosed cost accounting practices are in compliance with FAR Part 31 and applicable cost accounting standards;

(3) A contractor's or subcontractor's failure to comply with applicable cost accounting standards or to follow consistently his disclosed cost accounting practices has resulted, or may result, in any increased cost paid by the Government; and

(4) A contractor's or subcontractor's proposed price changes, submitted as a result of changes made to previously disclosed or established cost accounting practices, are fair and reasonable.

Subpart 230.70—Facilities Capital Employed for Facilities in Use

230.7001 Policy.

(a) It is the policy of the Department of Defense to recognize facilities capital employed as an element in establishing the price of certain negotiated defense contracts when such contracts are priced on the basis of cost analysis. The inclusion of this recognition is intended to reward contractor investments, motivate increased productivity and reduced costs through the use of modern manufacturing technology, and to generate other efficiencies in the performance of defense contracts. The recognition of contractor investments in the development of the profit objective will result in a profit objective based on a combination of effort, risk, and investment factors.

(b) Separate recognition shall be given to the cost of capital and the special risk associated with the facilities capital employed for defense contract purposes.

(1) The risk aspect of facilities capital employed shall be recognized as a part of profit when the profit objective is established in accordance with the guidelines set forth in 215.905–1(d).

(2) Cost of money for facilities capital will be recognized as an allowable cost in those negotiated defense contracts priced on the basis of cost analysis (See FAR 31.205–10(a)).

230.7002 Definitions, measurement and allocation.

Cost Accounting Standard (CAS) No. 414, "Cost of Money as an Element of the Cost of Facilities Capital" (See Appendix O), establishes criteria for the measurement and allocation of the cost of capital committed to facilities, as an element of contract cost for historical cost determination purposes. Important features of the CAS are its definitions, techniques for application, and a prescribed Form CASB–CMF with instructions. This Subpart adopts the techniques of CAS 414 as the approved methods of measurement and allocation of facilities cost of money to overhead pools at the business unit level, and adds only such supplementary procedures as are necessary to extend those techniques to contract forward pricing and administration purposes. Therefore, these procedures are intended to be completely compatible with, and an extension of, the definitions, criteria and techniques of CAS 414. Contractors who computerize their financial data are encouraged to meet the requirements of both CAS 414 and this Subpart from the same data bank and programs.

30.7003 Estimating business unit facilities capital and cost of money.

The method of estimating the business unit facilities capital and cost of money utilizes the techniques of CAS.414. Cost of money factors (CMF) by overhead pools at the business unit are developed using Form CASB–CMF. Three elements are required to develop cost of money factors: business unit facilities capital data, overhead allocation base data, and the interest rate promulgated by the Secretary of the Treasury pursuant to Pub. L. 92–41. These elements are discussed below.

(a) *Business unit facilities capital data.* The net book value (acquisition cost less accumulated depreciation) is used for each cost accounting period. The net book value used is the total of (1) the new book value of facilities recorded on the accounting records of the business unit, (2) the capitalized value of leases (See FAR 31.205–2 and FAR 31.205–36) and (3) the net book value of facilities at the corporate or group level that support depreciation charges allocated to the business unit in accordance with the provisions of CAS 403. Projections of facilities capital will be supported by budget plans and/or similar type documentation and the estimated depreciation will be the same as used in projected overhead rates. Projections will accommodate changes in the level of facilities net book value, e.g., facilities additions, deletions of facilities by sale, abandonment or other disposal, idle facilities (See FAR 31.205–17).

(b) *Overhead allocation bases.* The base data used to compute the CMF must be the same as that used to compute the proposed overhead rates. CMF's should be submitted and evaluated as part of the proposal.

(c) *Interest rate.* For purpose of projection, the most recent interest rate promulgated by the Secretary of the Treasury will be used as the cost of money rate in Column 1 of Form CASB–CMF and the same rate must be used on the DD Form 1861 to determine Contract Facilities Capital Employed (See 230.7004 below). Where actual costs are

used in definitization actions, the actual treasury rate(s) applicable to the period(s) of the incurred cost will be recognized by development of a composite rate.

(d) *Determination of final cost of money.* CMF's estimated in accordance with the above procedures are used to develop the facilities investment base used in the pre-negotiation profit objectives. Actual CMF's are required when it is necessary to determine final allowable costs for cost settlement and/or repricing in accordance with CAS 414 and FAR 31.205–10.

230.7004 Contract facilities capital estimates.

(a) After the appropriate Forms CASB–CMF have been analyzed and CMF's have been developed, the contracting officer is in a position to estimate the facilities capital cost of money and capital employed for a contract proposal. DD Form 1861 "Contract Facilities Capital and Cost of Money" has been provided for this purpose and, when properly completed, becomes a connecting link between the Forms CASB–CMF and DD Form 1547 "Weighted Guidelines Profit/Fee Objectives". An evaluated contract cost breakdown, reduced to the contracting officer's prenegotiation cost objective must be available. The procedure is similar to applying overhead rates to appropriate overhead allocations bases to determine contract overhead costs.

(b) DD Form 1861 provides for listing overhead pools and direct-charging service centers (if used) in the same structure they appear on the contractor's cost proposal and Forms CASB–CMF. The structure and allocation base units-of-measure must be compatible on all three displays. The base for each overhead pool must be broken down by year to match each separate Form CASB–CMF. Appropriate contract overhead allocation base data are extracted by year from the evaluated cost breakdown or pre-negotiation cost objective, and are listed against each separate Form CASB–CMF. Each allocation base is multiplied by its corresponding cost of money factor to get the Facilities Capital Cost of Money estimated to be incurred each year. The sum of these products represents the estimated Contract Facilities Capital Cost of Money for the year's effort. Total contract facilities cost of money is the sum of the yearly amounts.

(c) Since the Facilities Capital Cost of Money Factors reflect the applicable cost of money rate in Column 1 of Form CASB–CMF, the Contract Facilities Capital Employed can be determined by dividing the contract Cost of Money by that same rate. DD Form 1861 is designed to record and compute all the above in the most direct way possible, and the end result is the Contract Facilities Capital Cost of Money and Capital Employed which is carried forward to DD Form 1547.

230.7005 Pre-award facilities capital applications.

Facilities Capital Cost of Money and Capital Employed as determined above, are applied in establishing cost and price objectives as follows:

(a) *Cost of money.*

(1) *Cost objective.* The special, imputed cost of money shall be used, together with normal, booked costs, in establishing a cost objective or the target cost when structuring an incentive type contract. Target costs thus established at the outset, shall not be adjusted as actual cost of money rates become available for the periods during which contract performance takes place.

(2) *Profit objective.* Cost of money shall not be included as part of the cost base when measuring the contractor's effort in connection with establishing a pre-negotiation profit objective. The cost base for this purpose shall be restricted to normal, booked costs.

(b) *Facilities capital employed.* The profit objective as it relates to the risk associated with facilities capital employed shall be assessed and weighted in accordance with the profit guidelines set forth in 215.905–1(d).

230.7006 Post award facilities capital applications.

(a) *Interim billings based on costs incurred.* Contract Facilities Capital Cost of Money may be included in cost reimbursement and progress of the "Cost Reimbursement, Fee and Payment" or "Progress Payment" clause of the contract is the result of multiplying the incurred portions of the overhead pool allocation bases by the latest available Cost of Money Factors. Like applied overhead at forecasted overhead rates, such computations are interim estimates subject to adjustment. As each year's data are finalized by computation of the actual Cost of Money Factors under CAS 414 and FAR 31.205–10 the new factor should be used to calculate contract facilities cost of money for the next accounting period.

(b) *Final settlement.* Contract facilities capital cost of money for final cost determination or repricing is based on each year's final Cost of Money Factors determined under CAS 414 and supported by separate Forms CASB–CMF. Contract cost must be separately computed in a manner similar to yearly final overhead rates. Also like overhead costs, the final settlement will include an adjustment from interim to final contract cost of money. However, estimated or target cost will not be adjusted.

230.7007 Administrative procedures.

(a) Contractor submission of Forms CASB–CMF will normally be initiated under the same circumstances as Forward Pricing Rate Agreements (See FAR 15.809) and evaluated as complementary documents and procedures. Separate Forms are required for each prospective cost accounting period during which Government contract performance is anticipated. If the contractor does not annually negotiate FPRA's submissions may nevertheless be made annually or with individual contract pricing proposals, as agreed to by the contractor and the cognizant ACO. The cognizant ACO shall, with the assistance of the cognizant auditor, evaluate the cost of money factors, and retain approved factors with other negotiated forward pricing data and rates.

(b) When a contracting officer uses the Weighted Guidelines method of determining a profit objective under the criteria of 215.902 DD Form 1861 "Contract Facilities Capital and Cost of Money" after evaluating the contractor's cost proposal and determining this prenegotiation cost objective, but before completing a DD Form 1547 "Weighted Guidelines Profit/Fee Objective". When available, a computer generated form is acceptable, provided all essential elements of data are included and identified as DD Form 1861 data. At his option, a PCO may request the cognizant ACO to complete the DD Form 1861 in connection with normal field pricing support under FAR 15.805, and include it in his field pricing report with appropriate evaluation comments and recommendations.

(c) A final Form CASB–CMF must be submitted by the contractor under CAS 414 as soon after the end of each cost accounting period as possible, for the purpose of final cost determinations and/or repricing. The submission should accompany the contractor's proposal for actual overhead costs and rates, and be evaluated as complementary documents and procedures.

Subpart 230.71—Facilities Capital Employed for Facilities Under Construction

230.7101 Policy.

It is the policy of the Department of Defense to recognize a contractor's investment in capital facilities while

these are being constructed, fabricated, or developed for the contractor's own use. This recognition is made through the allowance of an imputed cost of money amount which is (a) calculated in accordance with 230.7103 below, (b) capitalized along with the other costs of the asset for which the investment is made, and (c) allocated to Department of Defense contracts in accordance with 230.7104.

230.7102 Definitions.

The following definitions have been taken or developed from Cost Accounting Standard (CAS) 417, Cost of Money as an Element of the Cost of Capital Assets Under Construction (See Appendix O).

(a) *Intangible capital asset.* An asset that has no physical substance, has more than minimal value, and is expected to be held by an enterprise for continued use or possession beyond the current accounting period for the benefit it yields.

(b) *Tangible capital asset.* An asset that has physical substance, more than minimal value, and is expected to be held by an enterprise for continued use or possession beyond the current accounting period for the service it yields.

(c) *Cost of money rate.* The cost of money rate is either the interest rate determined by the Secretary of the Treasury pursuant to Pub. L. 92–41 (85 Stat 97), or the time-weighted average of such rates for each cost accounting period during which the asset is being constructed, fabricated, or developed. The time-weighted average interest rate is calculated by multiplying the various rates in effect during the months of construction by the number of months each rate was in effect. The sum of the products is divided by the total number of months in which the rates were experienced.

(d) *Representative investment.* The representative investment is the calculated amount considered invested by the contractor in the project to construct, fabricate, or develop the asset during the cost accounting period. In calculating the representative investment, consideration must be given to the rate or expenditure pattern of the investment, i.e., if most of the investment was at the end of the cost accounting period, the representative investment calculation must reflect this fact.

(1) If the contractor experiences an irregular or uneven expenditure pattern in the construction, fabrication, or development of a capital asset, i.e., a majority of the construction costs were incurred toward the beginning, middle, or end of the cost accounting period, the contractor must either:

(i) Determine a representative investment amount for the cost accounting period by calculating the average of the month-end balances for that cost accounting period; or

(ii) Treat month-end balances as individual representative investment amounts.

(2) If the construction, fabrication, or development costs were incurred in a fairly uniform expenditure pattern throughout the construction period, the contractor may:

(i) Determine a representative investment amount for the cost accounting period by averaging the beginning and ending balances of the construction, fabrication, or development cost account for the cost accounting period; or

(ii) Treat month-end balances as individual representative investment amounts.

230.7103 Measurement.

(a) The imputed cost of money for an asset under construction, fabrication, or development is calculated by applying a cost of money rate (see 230.7102(c)) to the representative investment amount (see 230.7102(d)).

(1) When a representative investment amount is determined for a cost accounting period in accordance with 230.7102(d)(1)(i) or 230.7102(d)(2)(1) the cost of money rate used shall be the time-weighted average rate.

(2) When a monthly representative investment amount (see 230.7102(d)(2)(ii) or 230.7102(d)(2)(ii)) is used, the cost of money rate shall be the rate in effect each month (Note: Under this method, the cost of money calculation is made monthly and the total for the cost accounting period is the sum of the monthly calculations).

(b) The method chosen by a contractor for determining the representative investment amount may be different for each capital asset being constructed, fabricated, or developed as long as the method fits the expenditure pattern of the construction costs incurred.

(c) The imputed cost of money will be capitalized only once in any cost accounting period; either at the end of the period or at the end of the construction period, whichever comes first.

(d) When the construction of an asset takes more than one cost accounting period, the cost of money capitalized for the first cost accounting period will be included in determining the representative investment amount for any future cost accounting periods.

230.7104 Composition and allocation of costs.

(a) The cost of money for a tangible capital asset determined in accordance with 230.7102 and 230.7103 shall be capitalized along with the other construction, fabrication, or development cost of that asset for purposes of depreciation pursuant to FAR 31.205–11.

(b) The cost of money for an intangible capital asset determined in accordance with 230.7102 and 230.7103 shall be capitalized along with other construction, fabrication, or development costs of that asset and amortized over appropriate cost accounting periods.

(c) Where CAS 414 cost of money is allocated to construction, fabrication, or development effort in accordance with 230.70 it will be recognized and considered an element of total construction costs and be included in all calculations of the asset's representative investment amount.

230.7105 Limitations.

If substantially all activities necessary to get an asset ready for its intended use are discontinued, cost of money shall not be capitalized for the period of discontinuance, except when such discontinuance arises out of causes beyond the control and without the fault or negligence of the contractor.

230.7106 Preaward capital employed application.

An offset to the profit objectives as set forth in FAR 15.9 required for CAS 417 cost of money.

PART 231—CONTRACT COST PRINCIPLES AND PROCEDURES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 231.1—Applicability

231.101 Objectives.

Pursuant to FAR 31.101 and to reflect DoD policy, the DAR Council has granted certain exceptions to FAR Part 31 cost principles. These exceptions are set forth in this supplement.

231.103 Contracts with commercial organizations.

(S–70) The FAR and this supplement apply to purchases and contracts made by the DoD in support of Foreign Military Sales (FMS) (see 201.103). Accordingly, the cost principles and procedures in FAR 31.2, as supplemented, shall be used in pricing FMS contracts (see 225.7304 and 225.7305).

Subpart 231.2—Contracts With Commercial Organizations

231.201 General.

The contracting officer shall insert the clause at 252.231–7000, Supplemental Cost Principles, in all solicitations and contracts, except acquisitions made under the small purchase procedures in FAR Part 13.

231.205–10 Cost of money.

(a)(2)(i) The contractor's capital investment must also be measured, allocated to contracts, and costed in accordance with 230.70.

(ii) The contractor must also maintain records to demonstrate compliance with (i) above.

(b)(2)(i)(A) The cost of money must be calculated, allocated to contracts, and costed in accordance with 230.70.

(B) The contractor must also maintain records to demonstrate compliance with (b)(a)(i)(A) above.

231.205–18 Independent research and development and bid and proposal costs.

(c) The total amount of IR&D/B&P costs allocated to DoD contracts shall not exceed the total of expenditures for IR&D/B&P projects with a potential relationship to a military function or operation. For contracts which do not provide for cost determinations on a historical basis, the requirement will be considered to have been met if the estimated IR&D/B&P costs allocated to the contract do not exceed its proportionate share of the total estimated costs of IR&D/B&P with a potential relationship to a military function or operation. IR&D/B&P costs will be considered to satisfy the potential relationship requirement when the contractor can demonstrate that the effort under a proposed contract or grant would have a potential relationship to a military function or operation. The potential relationship of IR&D/B&P will be determined by the contracting officer, and the results of the determination will be made available to the contractor. For additional allowability requirements affecting Foreign Military Sales (FMS) contracts, see 225.7304.

231.205–22 Lobbying costs.

For DoD contracts, the following lobbying cost principle is substituted for the lobbying cost principle contained in FAR 231.205–22:

(a) For the purpose of this section, lobbying is defined as any activity, including legislative liaison, or communication which is intended or designed to influence, directly or indirectly, or to engage in any campaign to encourage others to influence members of any legislative body, their staffs, or the staffs of their committees to favor or oppose legislation, appropriations or other actions of the legislative body, its members, or its committees. Lobbying activity includes, but is not limited to, all forms of communications for the above-mentioned purposes by the contractor, its employees, or its agents with the legislative body, its members, and staffs of members and committees.

(b) The costs of lobbying as defined herein, including the applicable portion of the salaries of the contractor's employees and the fees of individuals or firms engaged in lobbying, on behalf of the contractor (whether or not the individuals or firms are registered as lobbyists under any applicable law) are unallowable. In addition, the directly associated costs (FAR 231.201–6) of lobbying are unallowable.

231.205–38 Selling costs.

Additional allowability requirements for Foreign Military Sales (FMS) contracts are contained in 225.7304 and 225.7305.

PART 232—CONTRACT FINANCING

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 232.1—General

232.102 Description of contract financing methods.

(e)(2) Progress payments based on percentage or state of completion will be confined to contracts for construction, shipbuilding and ship conversion, alteration or repair.

232.108 Financial consultation.

The contract financing offices are: the Chief of Contract Financing, Office of the Comptroller of the Army; the Executive Assistant Comptroller for Banking, Cash Management, Contract Financing and Compensation Systems, Assistant Comptroller of the Navy for Financial Management; the Chief of Banking and Contract Financing, Directorate of Accounting, Air Force Accounting and Finance Center; and the Comptroller, Defense Logistics Agency. For other Departments, the contracting financing office will be within the Office of the Agency Comptroller.

232.111 Contract clauses.

(a), (b), (c) and (d) See DAC 76–42, Item I, for authorized modifications with respect to payment due dates.

(S–70) The contracting officer shall insert the clause at 252.232–7000, Invoices, in solicitations and contracts for supplies and services when a fixed price contract is contemplated.

232.170 Responsibilities.

232.170–1 Organization.

The financing function should be separated from the procurement function, but close cooperation should be preserved at all times. For progress payments, contract financing officers will ordinarily participate in the development of appropriate regulations and standard contract provisions designed to avoid undue risk to the Government, and in specific cases involving policy questions or unusual financing arrangements.

232.170–2 Resolution of disagreements.

If a disagreement arises between the financing office and the procuring activity on financing provisions, the matter will be referred to and resolved in the higher echelons of the authority responsible for both financing and procurement functions.

232.170–3 Responsibility, administration, contract finance committee.

The Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management) has the responsibility for insuring uniform administration of financing. Only policy issues or important procedural problems shall be referred to the Office of the Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management). Usual financing operations shall be the responsibility of the Departments.

(a) Responsibility for financing in each Department shall be in the Under or Assistant Secretary, or other designated official, responsible for the comptroller function, with the focal point for such activities at Departmental headquarters. Contract financing offices may be established at the operational level determined by the Departments.

(b) There shall be a Contract Finance Committee composed of a representative of the Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management) as chairman, a representative of the Assistant Secretary of Defense (Comptroller), and two representatives of each Military Department and DLA (one representing procurement and one representing the contract finance office). The Committee shall meet upon call by the Chairman or when requested by a member. The Committee shall advise and assist the Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management) in assuring proper and uniform application of

policies, procedures and forms. The Committee may recommend to the Secretary of Defense through the Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management) further policy directives on financing matters. The Committee shall be responsible for the formulation, revision and promulgation of uniform contract financing regulations.

232.171 Deviations.

Actions in the exercise of the judgment and discretion allowed by these regulations are not deviations. Actions contrary to or inconsistent with these regulations constitute deviations. Deviations will be permitted only in exceptional circumstances, after the proposed deviation has been presented to the Contract Finance Committee and a recommendation obtained, and the approval of the Deputy Under Secretary of Defense, Research and Engineering (Acquisition Management) or his designated representative has been given. This procedure will also be followed for amendments to these regulations.

232.172 Financial responsibility of contractors.

Procuring activities must give due regard to the financial capabilities of potential suppliers. Financial difficulties encountered by contractors and subcontractors may disrupt production schedules; cause wastage of manpower and materials; and if connected with guaranteed loans, advance payments or progress payments, result in monetary loss to the Government. If financial crises occur in the course of a contractor's production, the need for continued production may make guaranteed loans or advance payments imperative for continued production, even though monetary losses may be likely.

232.173 Financial information and analysis.

(a) The necessity for financial information and analysis of the financial capability of contractors vary with the circumstances of particular cases. Judgment must be used in accumulating and evaluating data. Financial analysis would serve little useful purpose when providing customary progress payments:

(1) For contractors who are known from experience to be fairly relied upon to perform their contracts satisfactorily;

(2) For contractors who are in a satisfactory financial condition and operating profitably, where the items involved are regularly produced by the contractor and the contract amounts are within the normal sales volume of the contractor. In such cases, the financial evaluation may consist of scrutiny of the contractor's balance sheets and operating statements. In doubtful cases, the financial analysis would have to be as detailed as necessary to fit the circumstances.

(b) Obtaining and analyzing data on a contractor's financial capability is of particular importance when:

(1) The contractor is a new supplier,

(2) The contractor has not supplied the item (or a similar item) within the preceding twelve months,

(3) The contractor is a newly organized concern,

(4) The contractor is on a list requiring pre-award clearances or special clearance prior to award,

(5) The contractor is on any current list indicating current or post contract defaults or delinquencies,

(6) The contractor is known to be involved in performance difficulties as a supplier or subcontractor for private customers on Government or commercial work,

(7) The contractor is listed on the Consolidated List of Contractors Indebted to the Government (Hold-Up List), or,

(8) There are any facts or circumstances which support reasonable doubts as to the contractor's financial capability to perform.

232.174 Appropriate information.

The kinds of information and data that may be appropriate in particular cases are outlined below. Only those items which are appropriate to a particular case are required. The purpose of obtaining this data is to gain a full understanding of the propriety and reasonable necessity for contract financing, for evaluation of a contractor's ability to perform contracts without loss to the Government, and for informed judgment related to terms, conditions and protective provisions that may be appropriate for the protection of the Government.

(a) Balance sheet and income statement for the recent fiscal year prepared and certified by an independent public accountant (including his comments, if any), and, if available, similar financial data for the two previous years; latest available interim balance sheet and income statement of the current fiscal year; a separate statement of amounts of defense and commercial sales. If audited reports are not available, then corresponding statements should be submitted, certified by an authorized officer, partner, or individual proprietor as truly and fully setting forth the financial condition and operating results of the applicant; if a proprietorship, partnership or joint venture, personal financial statements of proprietor, partners, or members of joint venture and description of individual liabilities of partners or members of joint venture on contracts of partnership or joint venture;

(b) Summary history of contractor and its principal management personnel, indicating particularly any past insolvencies of the contractor or a predecessor or of the officers, partners, or proprietors; also a description of its products or services;

(c) Statement of all affiliates of the contractor, showing financial interests of the contractor in affiliates and of affiliates in the contractor, and also mutual officers, directors and major stockholders or owners, and disclosing character and amount of business transactions with affiliates or with officers, directors, major stockholders or owners of the contractor or its affiliates; also, if a corporation, list of major stockholders, and shares held;

(d) Statement of compensation payable to each officer, partner, proprietor, and principal executive, and to each key employee receiving comparable compensation, including bonus, commission, and profit-sharing arrangements, together with similar data for the past two years; also past and projected dividends, unless obtained with (a) above;

(e) Schedule of principal contracts and orders on hand, showing defense orders and civilian orders separately, and showing face amounts, unfinished amounts, and unliquidated advance or progress payments, and also indicating bids outstanding and contemplated and explanation concerning contracts under negotiation;

(f) Cash forecast, showing estimated disbursements and receipts for the period or periods involved (see 232.174–1 and 232.174–2);

(g) Estimated income statements and estimated balance sheets (see 232.174–3);

(h) Comparison of past financial results with estimates previously furnished by the contractor;

(i) Credit agency ratings of the contractor, and, when significant, credit agency ratings of principal subcontractors and of principal business customers (defense and commercial) of the contractor;

(j) Existing and contemplated credit or financing arrangements, names of parties and relationship, if any, to contractor, amounts available or to be available, periods of availability; and required or contemplated payments,

including (1) loans and credits, (2) advances and progress payments, (3) projected equity capital increases, (4) deferred trade credit, if any, (5) creditor subordinations or standbys, and (6) mortgages, liens, pledges, assignments, conditional sales, lease/purchases, hypothecations, and other encumbrances or security arrangements, both existing and contemplated;

(k) Status of all tax accounts, particularly Federal income, excise, and withholding taxes, and social security taxes or contributions (including verification with Internal Revenue Service, when appropriate) with special attention to the matter of Federal tax delinquencies (which are covered by the lien and right of distraint and levy provided by Sections 6321 and 6331 of the Internal Revenue Code);

(l) Appropriate information, explanation and schedules to indicate (1) leases, deferred purchased arrangements, and patent or royalty arrangements, outlining terms and showing relationship, if any, of other parties to the contractor, (2) insurance maintained and to be maintained, (3) contemplated capital expenditures, debt reduction or retirement, and acquisitions of capital stock, (4) delinquencies on contracts, subcontracts or purchase orders, and status thereof, (5) pending or anticipated liability for contract price refunds, or for renegotiation, or for other Government claims, (6) anticipated losses on contracts, (7) contingent liabilities, including those on endorsements, guarantees, warranties, surety bonds, and material litigation pending or threatened, (8) aging and collectibility of accounts and notes receivable, status of disputed receivables, identification of any amounts included in receivables but not currently due and payable, (9) obsolescence of inventory and method of valuing inventory, (10) aging of accounts and notes payable, identifying major creditors and interest rates and other charges, if any, and status of significant disputed items, (11) adequacy of reserves for depreciation, (12) analysis of surplus;

(m) Significant ratios such as (1) inventory to annual sales, (2) inventory to current assets, (3) liquid assets to current assets, (4) liquid assets to current liabilities, (5) current assets to current liabilities, and (6) net worth to debt;

(n) Comments and opinion of audit agency concerning contractor's accounting system and controls, and available audit agency analysis of important elements of financial statements or projections;

(o) Other facts that may be appropriate for the purposes stated at the beginning of this 232.174.

232.174-1 Cash flow forecast and estimated financial statements.

In doubtful cases, an estimated cash budget (Cash Flow Forecast) and related estimated income statements and estimated balance sheets prepared by the contractor, will be very useful for the purpose of arriving at an informed judgement as to the cash requirements (both for the contract and for the contractor's other activities), cash receipts for the contract period, and cash or credit needed to supply any excess or projected expenditures over projected receipts. When considered useful or necessary, such estimates should be requested from the prospective contractor, analyzed by financial personnel, and discussed to the extent necessary or appropriate with the prospective contractor. Many contractors will have such projects readily available, perhaps not including estimated balance sheets. The failure of the contractor to have prepared such estimates, or resistance to their preparation, or difficulties and delays in preparation, or poor quality of the projections, or the use of unreasonable or unrealistic assumptions in their preparation, may well constitute warning signals that the company's planning has been insufficient and that significant financial troubles may be encountered during the contemplated period of contract performance.

232.174-2 Realistic assumptions.

Cash forecasts can, of course, be no more reliable and representative of probable financial developments than the assumptions on which these forecasts are based. Each cash forecast and related projection should disclose the important underlying assumptions. Most important of these assumptions are the—

(1) Estimated amounts and timing of purchases of materials, parts, components, subassemblies, services, and payments therefor;

(2) Estimated amounts of timing of purchases of machinery and equipment, other production or test facilities, other fixed assets, and purchases or production of special tooling, and payments therefore;

(3) Schedule of fixed cash charges, such as debt installments, interest, rentals and taxes;

(4) Projected manufacturing and production schedules;

(5) Projected shipments, or delivery acceptances;

(6) Estimated amounts and timing of billings to customers (including progress payments), and customer payments;

(7) Estimated amounts and timing of cash receipts from lenders or other credit sources, and liquidation of loans; and

(8) Estimated amounts and timing of cash receipts from other sources.

The assumptions underlying cash forecasts should be checked for reasonableness and realism—with the contractor, Government personnel responsible in the areas of engineering, production scheduling, cost and price analysis, and with others (including prospective supply, subcontract, and loan or credit sources)—as may be prudent in the circumstances of the case.

232.174-3 Estimated income statements and balance sheets.

The cash budget or cash forecast does not show anticipated profit or loss, and is limited to the forecast of movements within a company's cash account. The concurrent submission of an estimated income statement covering the same period serves to tie in the anticipated cash transactions with the estimated sales and expense activity, and culminates in the estimated balance sheet position. The estimated income statement also can serve as a guide for evaluating the company's projections with respect to sales volume, cost of goods sold, gross profit and net profit in relation to the known results of past performance.

232.175 Interpretations.

It is important that these regulations and contract clauses be applied fairly and uniformly for all contractors. When a serious question of interpretation or application of these regulations arises, an advance opinion should be obtained from the procurement policy office at the headquarters of the Department primarily interested. If the circumstances do not reasonably permit requesting an advance opinion, report of an interpretation made should be made to the appropriate Departmental headquarters procurement policy office. That office should obtain the views of interested offices of the other Departments, including the contract financing offices (232.108). When questions submitted are considered to be of importance in the general interest of uniformity and of fair and effective administration of these regulations, appropriate revision of these regulations will be considered. Changes and additions to these regulations will be developed by the Contract Finance

Committee (see 232.170–3(b) and 232.171).

Subpart 232.3—Loan Guarantees for Defense Production

232.302 Authority.

(a) The Department of the Army, the Department of the Navy, the Department of the Air Force, and the Defense Logistics Agency, among others, are designated as "guaranteeing agencies" within the Department of Defense.

232.304 Procedures.

232.304–1 Application for guarantee.

(a) Guaranteed loans will be used primarily for working capital purposes and not for facilities expansion. Guarantees are not precluded where a relatively small portion of the loan might be used for facilities expansion of a minor or incidental nature, provided that the contractor's financial condition is such that the facilities expansion will not impair repayment of the guaranteed loan.

232.304–2 Certificate of eligibility.

(a) Contracting officers are expected to immediately take appropriate steps for the determination of eligibility. Their findings and report, including certificate of eligibility where appropriate, should be submitted to the contract financing office within the guaranteeing agency.

(c) The Department that has the preponderance of interest on the basis of the dollar amount of unfilled and unpaid balances (without regard to the existence of progress payments and without regard to the issuance or nonissuance of certificates of eligibility on particular contracts) on contracts and subcontracts will be the guaranteeing agency. Contracts with advance payments will be included only if the guaranteed loan will liquidate the advance payment. Service procurement contracts are deemed those of the purchasing department. If the application is approved and a guarantee agreement is executed, the guaranteeing agency will bear all losses and expenses and receive all revenues under the guarantee. In exceptional cases, one Department may act for others through a sharing arrangement. If preponderance of interest should shift to another Department during the guaranteed loan period, actions on requests for increases in amount or extension of maturity will ordinarily be taken by the Department with the current preponderance of interest. However, the new guarantee should simply replace the former guarantee so as not to disturb or impair any security for the existing loan. The existing loan agreement and collateral security instruments should be appropriately revised. The contract financing office of the Department which authorized the existing guaranteed loan will transfer the file to the contract financing office of the Department with the current preponderance of interest. If the loan is in distress with foreseeable losses, and the purpose of the request is for the purpose of orderly liquidation of the loan to reduce the amount of the loss, the Department which guaranteed the loan will take action.

232.304–70 Guraranteed loans for an extended period of time.

It is not the policy of the Department of Defense to continue furnishing assistance in the form of guaranteed loans over an extended period of time unless it is reasonably necessary to obtain required products.

Subpart 232.4—Advance Payments

232.409 Contracting officer action.

232.409–1 Recommendation for approval.

The departmental contract financing office (see 32.108) shall prepare the documents required by FAR 32.409–1(e)&(f). This is necessary to assure uniform application of this subpart as required by FAR 32.402(e)(1).

232.410 Findings, determination, and authorization.

(a) Modifications to incorporate special facts and circumstances are permitted.

(b) In cases where the procedure for advance payments without a special bank account is to be used in accordance with 232.470, insert the following paragraph instead of paragraph (a)(4) of the Findings, Determination, and Authorization for Advance Payments at FAR 32.410.

(4) The proposed advance payment clause contains appropriate provisions for the protection of the Government, as security for advance payments. These include provisions that the outstanding advance payments will be liquidated from cost reimbursements as they become due the contractor. Such security is deemed to be adequate.

232.412 Contract clause.

(S–70) The contracting office shall insert the clause at 252.232–7001, Advance Payments Pool, in any contract that will be subject to the terms of an advance payment pool agreement with a nonprofit educational or research and development institution. Normally this will include all cost reimbursement type contracts with the particular institution.

(S–71) The contracting office shall insert the clause at 252.232–7002, Disposition of Payment, in contracts when the payments under the contract are to be made by a disbursing officer other than the disbursing office designated in the advance payment pool agreement.

232.470 Procedure for advance payments to nonprofit educational and research and development institutions without a special bank account.

In view of the nonprofit position of educational and certain research institutions and the Government objective of strengthening the research capabilities of these institutions, interest-free advance payments in reasonable amounts may be authorized, when prudent and practical, to finance experimental, research and development contracts. The advance payments may be made directly to the institutions without the use of either a special bank account or letter of credit under the procedure described below:

(a) The contracting officer shall advise the departmental contract financing office upon the award of any cost-type contract to an institutions with an advance payment pool arrangement (see 232.471).

(b) The agreement set forth at 232.472 will be used. These arrangements will allow advance payments directly to the contractor to meet its contractual cash needs for the shortest practical periods of time to cover contract performance. The contractor shall periodically determine its cash requirements for contract(s) performance and submit requests for advance payments, in an acceptable format with supporting information as prescribed by the administering office, to the designated approving official who shall determine the necessity for the advance payment. If the approving official concurs with the amount of advance payment requested by the contractor, the request will be promptly approved and forwarded to the designated disbursing office for payment. In the event that the approving official determines that the amount of advance payments requested for the specified period is in excess of the needs, the request will be approved and forwarded to the disbursing office for payment of only the amount needed. The approving official shall act promptly, in accordance with the contract or pool agreement terms and departmental procedures, to resolve any disagreement on the unapproved portion of the request.

(c) The contractor shall submit cost reimbursement vouchers on a monthly basis for the contract(s) being financed by advance payments to the disbursing office designated in the contract. The

proceeds from the payments that would otherwise be due the contractor shall be applied in liquidation of the outstanding advance payments. If the proceeds exceed the outstanding advance payments, the remaining balance shall be paid to the contractor.

(d) The advance payments shall be requested, approved, and paid based on estimates. There may be a variance between the contractor's estimated and actual cash requirements for each period. These variances represent over-or-under financing by the Government and could become significant. Consequently, these variances must be identified and taken into consideration with each new request for an advance payment. This is a joint responsibility of the contractor and the approving official.

232.471 Pooled advance payments.

An advance payment pool arrangement is an instrument for conveniently financing the performance of more than one contract, held by a single contractor. The agreement is separate from the contracts financed under it. It is especially convenient for the financing of cost-type contracts with nonprofit educational or research institutions for experimental, or research and development work, when several contracts or a series of contracts require financing by advance payments. When advance payments are appropriate, pooled advance payments may also be used to finance performance of other types of contracts held by a single contractor. They may be established without regard to the number of appropriations involved, and regardless of the fact that contracts affected may be those of more than one DOD purchasing office, DOD procuring activity, or Military Department. If more convenient or otherwise preferable, there also may be more than one advance payment pool agreement in force at the same time with a single contractor, designed separately to finance contracts of the Military Departments respectively concerned, or of one or more DOD procuring activities respectively. Advance payment pool agreements may be established under the statutes mentioned in FAR 232.401 and will be in accordance with the procedure that follows for arrangements with nonprofit institutions. Advance payment pool arrangements with other than nonprofit organizations shall be in accordance with the specific directions of the departmental contract financing office.

232.471-1 Distinction between pool contracts and designated pool contracts.

An advance payment pool agreement may cover a broad area of a contractor's financial needs rather than piecemeal segments related to separate contracts. A pool agreement is based upon the contractor's financing requirements for a group of DOD contracts to be performed at the same time. The monetary requirements for the group of contracts are considered in fixing the maximum dollar amount for the advance payment pool agreement. Advances are normally not made on each separate contract, but can be made on and charged against one or more contracts, so as to supply the monetary requirements of smaller contracts included in the advance payment pool. A contract to which the advance payments are charged is called a "designated pool contract." All other contracts financed by the pool agreement are called "pool contracts."

232.471-2 Advance payment pool agreement—special features.

The principal features distinguishing an advance payment pool agreement from an advance payment provision affecting only a single contract are:

(a) The advance payment pool agreement specifies one or more designated pool contract, and provides for substitution from time to time of new or different contracts as the designated pool contract(s);

(c) The advance payment pool agreement defines the contracts included as pool contracts, and provides for inclusion of them as they are awarded;

(d) All payments under the pool contracts and designated pool contracts are made into a special bank account, except where the procedure for advance payments without a special bank account is to be used in accordance with 232.409-3 and 232.470. Where a special bank account is not used, payments otherwise due the contractor are applied in liquidation of the outstanding advance payments; and

(e) The appropriate provisions of the advance payment clause are made applicable to all pool contracts, including the designated pool contracts.

232.471-3 Liquidation—designated pool contracts—administering office.

It is imperative for each advance payment pool that effective arrangements be made to ensure that the advances outstanding do not exceed the amount authorized in the advance payment pool agreement and that timely liquidation is accomplished. For each pool agreement, there shall be a single administering office, and to the extent possible, there should be a single disbursing office for all of the contracts in the pool, especially those contracts which are designated pool contracts.

232.471-4 Advance payment pool—understandings.

Advance payment pools including contracts of more than one Military Department require approval from the contract financing office of each department concerned. The following guidance is provided:

(a) Requests to establish an advance payment pool agreement may be initiated by the contractor, the contracting officer, chief of a procuring activity, or at Departmental headquarters.

(b) When the advance payment pool includes contracts of more than one Military Department, the authorizing Department should be the one having a preponderant interest in the contractor's unfinished contracts. The Military Department with the preponderant interest is the Department with the largest dollar value of the contractor's unfinished contracts. Possible exceptions to the preponderance principle are cases in which it would be more convenient to use a relatively large long-term contract of a nonpreponderant Department as the designated pool contract, or where it is reasonably expected that preponderance will shift during the term of the advance payment pool agreement.

(c) Situations may occur in which the remaining payments available on pool contracts are not sufficient to liquidate the outstanding advance. These circumstances will not affect the normal practice of offsetting mutual debits and credits. If there is only one open designated pool contract, the entire advance payment loss should fall on that contract. If there is more than one open designated pool contract on which advance payments remain outstanding after adjustment for debits and credits under each separate contract, the advance payment loss (insofar as contracts of two or more Military Departments are involved) will fall on all of those designated pool contracts, in proportion to the contract prices of the designated pool contracts.

(d) Normally, records will not be maintained to show separately the amount of advance payments invested in each one of the separate contracts. The keeping of such records is unnecessary, and would not be consistent with the purposes of advance payment pools.

232.472 Agreement for advance payments without special bank account.

An agreement with a nonprofit educational or research and development institution for pooled advance payments without a special bank account is constructed by making the following changes to the Advance Payments clause at 252.232–12.

(a) Change the clause title to "Advance Payment Pool Agreement Without Special Bank Account."

(b) Throughout the clause text: Change all occurrences of the word "contract" to "agreement."

(c) Add the following preamble immediately below the title:

This agreement is entered into this ——— day of ———, 19— between the United States of America (the government), represented by ————————, and ———————— (insert institution name and appropriate identification information) (hereinafter referred to as the "contractor").

(d) In paragraph "(a)(2)," in the blank space left for the amount, insert the following:

* * * the amount stated in the Designations and Determinations paragraph hereof or the aggregate of the total unpaid designated pool contracts' prices, whichever is less.

(e) Delete paragraph (b) and insert the following:

(b) Amount of Advance Payments.

(1) The Contractor shall determine the estimated amount of advance payment(s) necessary to meet the requirements of paragraph (c) herein entitled "Use of Funds" to cover performance of the pool contract(s). This determination shall be pursuant to written instructions provided by the Administering Office (see Designations and Determinations paragraph herein) relative to the (i) shortest practical period for which advance payments will be provided, (ii) format and frequency of requests for advance payments, and (iii) data required in support of each request. The estimate shall be adjusted for the amount by which actual cash expenditures for prior period performance of the pool contract(s) exceeded or was less than the advance payments provided for such performance. The Contractor shall submit its estimate and supporting data in a request for advance payment(s) to the Approving Official designated in writing by the Administering Office for advance payments. The request should be submitted sufficiently early to permit review, approval, and disbursement of the required advance payment(s) by the time the funds are actually needed by the Contractor.

(2) The Approving Official will review the Contractor's advance payment requirements to determine the reasonableness thereof, and if concurrence is given, the request will be approved and the Disbursing Office designated (see Designations and Determinations paragraph herein) will be notified by the Approving Official to make payment. If the Approving Official determines that the advance payment requested by the Contractor is in excess of cash requirements for performance of pool contract during the specified period of time, the Approving Official will approve an amount based on such determination and notify the Disbursing Office of the reduced amount. Upon any such reduction, the Approving Official will immediately notify the Administering Office for this advance payment pool agreement in writing, with a copy to the Contractor, of the amount requested, the amount approved, and the reasons for reduction. The Administering Office will determine whether additional funds will be advanced to the Contractor.

(3) Upon notification of the approved request, the Disbursing Office will draw a Treasury check payable to the Contractor for the amount authorized by the Approving Official and mail such check to the Contractor in time to be received on or about the date the funds are required for contract performance.

(f) Delete paragraph (c) and insert the following:

(c) *Use of funds.* Advance payments hereunder are to be used by the Contractor solely for the purpose of making payments for direct materials, direct labor, and administrative and overhead expenses allowable in accordance with the provisions of the pool contracts, or for the purpose of reimbursing the Contractor for such payments. Any interpretation required as to the proper use of funds shall be made in writing by the Administering Office.

(g) Delete the last sentence of paragraph (d).

(h) Delete paragraph (e) and insert the following:

(e) *Liquidation.* The Contractor will submit monthly cost reimbursement vouchers in accordance with the payment provisions of the pool contracts. The Government shall withhold payments of such vouchers due the Contractor and apply the amounts withheld against the Contractor's obligation to repay advance payments made hereunder and interest charges thereon until such advance payments and interest charges shall have been fully liquidated. Upon completion or termination of the advance payment pool agreement, the balance of liquidated advance payments shall be deducted from any amount otherwise due or which may become due to the Contractor from the Government, and any deficiency shall be paid by the Contractor to the Government upon demand.

(i) Add the following to the last sentence of paragraph (f)(2):

* * * except as provided in the Liquidation and Default paragraphs herein.

(j) Add the following sentence at the end of paragraph (f)(2):

If interest is required, the interest will be calculated in accordance with paragraph (f) herein.

(k) Delete from paragraph (f)(3):

* * * the higher of (i) the published prime rate of the banking institution (depository) in which the special bank account is established or (ii) * * *

(l) Delete paragraphs (g) and (h).

(m) Change paragraph letters (i) through (p) to (g) through (n).

(n) Delete old paragraph (m) and insert the following:

(k) *Information and access to records.* The Contractor shall furnish to the administering office (1) monthly or at other intervals as required, signed or certified balance sheets and profit and loss statements together; and (2) if requested, other information concerning the operation of the Contractor's business. The Contractor shall provide the authorized Government representatives proper facilities for inspection of the Contractor's books, records, and accounts.

(o) Add the following new paragraphs:

(o) *Designations and determinations:*

(1) *Amount.* The amount of advance payments at any time outstanding shall not exceed $——— of the aggregate of the total undisbursed obligation of the designated pool contract, whichever is less.

(2) *Administering office.* The office administering advance payments: ———————

(3) *Disbursing office.* The office making advance payments under this Agreement: ———————

(4) *Approving office.* The approving office shall be ————————.

(p) *Limiting date.* Advance payments made hereunder are to finance all pool contracts subject to this Agreement, including amendments issued thereunder which result in increasing the contract price, that are executed on or before ———————— (insert a date, normally not more than two years in the future).

(p) Add the following at the conclusion of the agreement:

Signatures and official titles:
For the Contractor:
————————————(name)
————————————(title)
————————————(date)
For the United States:
————————————(name)
————————————(title)
————————————(date)

Subpart 232.5—Progress Payments Based on Costs

232.501 General.

232.501–1 Customary progress payment rates.

(a) The customary progress payment rate applicable to Foreign Military Sales requirements is 95% for other than small businesses, and 100% for small businesses. The customary progress payment rate for flexible progress payments is the rate determined by use of the CASH II computer program in accordance with the requirements of 232.502–1(S–71). Except for contracts which contain both U.S. and FMS

requirements, no more than one progress payment rate or liquidation rate is applicable to a contract at any point in time.

232.501-2 Unusual progress payments.

(a) Contracting officers shall not modify contracts to authorize unliquidated unusual progress payments in excess of $25,000,000 without the prior written consent of the Office of The Deputy Under Secretary of Defense (Research and Engineering). All other unusual progress payment provisions shall be coordinated by the departmental contract financing office, with the Department of Defense Contract Finance Committee.

232.501-3 Contract price.

(b) For purposes of making progress payments, the contract price may exceed the funds obligated under the contract if the contract contains an appropriate Limitation of Funds clause. In such cases, the progress payments shall be limited to the lesser of the applicable percentage of the contract price, or 100% of the funds obligated.

232.502 Preaward matters.

232.502-1 Use of customary progress payments.

(S-70) *Customary FMS progress payments.*

(1) FMS progress payments shall be applicable to Department of Defense acquisitions on behalf of foreign governments or international organizations pursuant to Section 22 of the Arms Export Control Act (FMS requirements).

(2) FMS progress payments are not applicable to:

(i) Acquisitions for replenishment of U.S. Government inventories or stocks, and

(ii) Acquisitions made under DoD cooperative logistic support arrangements.

(S-71) *Customary flexible progress payments.*

(1) Paying progress payments assists in financing a contractor's performance and reduces the contractor's investment in its work in progress inventory. The actual investment held by a contractor in work in process inventory is influenced by a number of factors in addition to progress payments, such as delivery schedules, cash management practices, and Government payment practices. Progress payments amounts that are determined by using uniform, standard progress payment rates (i.e., 90% or 95%) are insensitive to these factors influencing investment and, as a consequence, result in investments by contractors in work process inventory that vary among contractors and across contracts; on the other hand, flexible progress payment rates (expressed as a percentage that will be applied to costs to determine the amount payable as a progress payment in the same manner as uniform, standard progress payment rates) are designed to tailor more closely the progress payment rate to the cash needs for financing performance of a particular contractor for a given contract.

(2) For flexible progress payments, cash needs are measured and projected in relation to investment underlying the work in process inventory over the life of the contract. Total investment is measured by a weighted average of total costs paid by the contractor to complete performance of the contract, and the contractor's investment is the weighted average of the amount not paid by the Government. The Department of Defense (DoD), as a matter of policy, has concluded that a contractor should retain at least a 5% investment in work in process inventory over the live of the contract. Accordingly, the DoD will make progress payments at a rate (expressed as a whole number) that is the highest rate which yields a corresponding investment by the contractor in work in process inventory of not less than 5%. This progress payment rate is to be determined by the DoD Cash Flow Computer Model. In no event will the progress payment rate be greater than 100%, or less than the uniform, standard progress payment rate that would have been applied to the contract absent flexible progress payments.

(3) Contracting officers shall use a flexible progress payment rate in lieu of the uniform standard rates if:

(i) The contractor requests the use of flexible progress payments rates,

(ii) The contractor agrees to the requirements of this section, and

(iii) The criteria in paragraph (a)(5) below are met.

(4) The flexible progress payment rate shall be determined through application of the DoD Cash Flow Computer Model, available to contracting officers on the COPPER IMPACT computer time sharing network under the computer file name "CASH II." The model takes into account key cash flow factors, such as contract cost profile, delivery schedules, subcontractor progress payments, liquidation rates, and payment/reimbursement cycles. Operating instructions and cash flow data requirements are retrievable within the model in a conversational mode. Contractors may obtain copies of the DoD Cash Flow Computer Model User's Guide from the Defense Technical Information Center, Building 5, Cameron Station, Alexandria, VA 22314. Contracting officers shall not grant contractor access to Government leased COPPER IMPACT time sharing computer network.

(5) Contractors who submit certified cost pricing data, as defined in FAR 15.804-2, for negotiated fixed-price contracts in excess of $1 million may request flexible progress payments. Formally advertised contracts are not eligible for flexible progress payments. Flexible progress payments are not available for contracts awarded and performed entirely outside of the United States, its possessions and territories.

(6) Contractors will furnish to the contracting officer cash flow data in the form and context specified by the DoD Cash Flow Computer Model. These data include: actual and projected incurred cost broken down by element of cost and by month for the duration of the contract, float times for each element of cost, progress payment receipts and delivery payment receipts and associated contract prices and profit percentage. Contracting officers will verify the cash flow data in accordance with normal procedures used to verify contractor cost and pricing data. Administrative contracting officers are encouraged to establish advance agreements at contractor locations for float and payment lag which are common to several contracts. Such agreements should be established when administratively practical.

(7) A redetermination of the flexible progress payment rate shall be made upon the request of the Government or contractor if measurement of the contractor's cumulative investment in work in process inventory using actual and projected cash flow data indicates an investment level above 7% or below 3%. The cash flow computer model is designed to generate a progress payment rate that yields a target investment of 5%, based on a weighted average. Accordingly, there should normally be no need to request actual and projected contract cash flow data unless delivery schedules are revised, Government progress payment lag times are substantially changed from those used in the establishment of the progress payment rate, or substantial new work (e.g., option) is added to the contract.

(8) As noted in FAR 32.504, the standards for progress payments to subcontractors ought to be the same as those applicable to prime contractors. Accordingly, subcontractors who request a flexible progress payment rate, meet the criteria in paragraph (a)(5) above and agree to the requirements of

this section are to receive a flexible progress payment rate. The subcontract flexible progress payment rate will be determined by the prime contractor without regard to the progress payment rate in the prime contract. The DoD Cash Flow Computer Model and associated procedures will be used by the prime contractor and a reasonable review of the cash flow data provided by the subcontractor will be made.

(9) When flexible progress payments are contemplated for use on a definitive contract superseding a letter contract or an unpriced BOA order, the applicable standard progress payment clause at FAR 52.232–16 shall be used until definitization.

232.502–2 Contract finance office clearance.

Deviation from the Progress Payment clause, policy and procedures prescribed in FAR Part 32 and this Supplement shall be authorized only by the Office of The Deputy Under Secretary of Defense (Research and Engineering), in accordance with 232.171.

232.502–4 Contract clauses.

(S–70) The contracting officer shall insert the clause at 252.232–7003, Progress Payments for Foreign Military Sales Acquisitions, in any contract that provides for progress payments and contains FMS requirements.

(S–71) The contracting officer shall insert the clause at 252.232–7004, Flexible Progress Payments, when a flexible progress payment rate is used in the contract.

232.503 Postaward matters.

232.503–1 Contractor requests.

Subject to the specific requirements of agency procedures, contractor requests for progress payments may be submitted by computer generated equivalents of the Standard Form 1443.

232.503–6 Suspension or reduction of payments.

(g) *Loss contracts.*

(S–70) *Loss ratio adjustment procedures.* The following procedures shall be followed whenever the adjustments required by FAR 32.503–6 (f) and (g) are made:

(i) Except as provided in paragraph (g)(S–70)(ii) below, the loss ratio adjustment shall be calculated by the contracting officer using the procedures in FAR 32.503–6(g) by preparation of a supplementary analysis to the contractor's request for progress payments;

(ii) The Contractor may be requested to prepare the supplementary analysis as an attachment to the progress payment request, when the contracting officer determines, after a review, that the contractor's methods of estimating the Costs to Complete are reliable, accurate, and not susceptible to improper influences, prejudicial to the Government's interests; and

(iii) In order to maintain an audit trail, and permit verification of calculations, the loss ratio adjustment shall not be made by alteration or replacement of the data on the contractor's original request for progress payment (SF 1443 or computer generated equivalent).

Subpart 232.6—Contract Debts

232.600 Scope.

This subpart provides additional guidance for the collection of contract debts, the charging of interest thereon, the deferral of payments, the compromise and termination of claims, and the reporting of contractor bankruptcies.

232.601 Definition.

Unless otherwise indicated in this subpart, the contract financing office within each military department and DLA is the "responsible official" for purposes of FAR Subpart 32.6.

232.605 Responsibilities and cooperation among government officials.

(b) A disbursing officer has primary responsibility for determining the amount and collection of contract debt whenever overpayments or erroneous payments have been made. The disbursing officer also has such primary responsibility when the amounts due and dates for payment are fixed by the terms of the contract itself, and copy of such contract has been furnished to the disbursing officer with notice to collect as amounts become due. Disbursing officers are those officials designated to make payments under a contract or to receive payments of amounts due under a contract, including finance and accounting officers at installations where integrated accounting is in effect.

232.606 Debt determination and collection.

(c)(9)(vii) Upon transfer of a case to the contract financing office, the debt record mantained by a contracting officer shall be closed by appropriate reference to the date of transfer. When a disbursing officer is primarily responsible for collection, the record of the debt shall be maintained until payment or advice of collection is received. In all cases transferred to a contract financing office, that office shall establish and maintain an accounts receivable record showing all pertinent information relating to the debt, including an indebtedness and payment record reflecting current status, to be closed upon collection or compromise, or referral of the case to the General Accounting Office or to the Department of Justice.

(d) In the absence of a deferment agreement made by the contract financing office, a report of indebtedness will be made to the General Accounting Office upon failure to effect collection within a reasonable period, generally not to exceed 180 days from the date the debt is established.

(e) Before a debt is placed on the Hold-Up List (see 232.173), or before distribution of a new listing, the office undertaking to effect collection may sometimes request other offices having dealings with the contractor on other contracts, whether contracting officers or disbursing officers, to withhold payments on contracts, for application on the debt. Government personnel are expected to cooperate and assist in the fulfillment of such requests, giving due regard, however, to the effect of abrupt cessation of payments on the operations of the contractor, performance of the contracts, and the interest of the United States in such contracts. In the making of these requests to other offices, and in complying with such requests, care will be taken at all times to avoid overcollection or duplicate collection. Each check to liquidate indebtedness pursuant to such requests will be drawn payable to "(contractor's name (or office designated for contract administration))," and transmitted to the disbursing officer on the contract under which the indebtedness arose, and will be accompained by a statement sufficient to identify the indebtedness to which it is to be applied. Appropriate notice of the deduction will be given to the contractor concerned, by the agency making the deduction.

232.610 Demand for payment of contract debt.

(a) Demands for payment of contract debts resulting from other than a termination of default shall be made by the office which first determines an amount due, whether it be the Contract Administration Office, the Contracting Office, the Disbursing Office, or the selling office/agency, and will be handled in accordance with the regulations of the department or agency to which that office is assigned. A copy of the demand shall be provided to the payment office cited in the contract and designated to receive payment. Demands for payment of contract debts resulting from a termination for default,

e.g., excess costs, unliquidated progress payments, and liquidated damages, shall be made by the Procuring Contracting Officer and shall direct the debtor to make payment to an office of the Procuring Department. If this action will result in the payment being made to a payment office other than the one cited in the contract, the assigned ACO will issue a contract modification designating the new payment office.

232.613 Deferment of collection.

(S–70) Deferment requests will be forwarded as soon as possible to the contract financing office of the Department concerned. Such requests shall be supported by adequate identifying and explanatory information, including relevant memoranda and correspondence, accounting data, amounts and dates of any collections, name and location of disbursing office and, if applicable, the assignee, date of filing of appeal or of action with the Claims Court, information on hand concerning financial condition of the contractor, and recommendations for action on the deferment request. Incident to its review and action of a deferment or installment proposal, the contract financing office may request additional information, as well as other assistance needed from the transmitting office. Such requested information and assistance will be furnished promptly so that final action on the proposed deferment or installment may be taken by the contract financing office without unnecessary delay. Whenever deemed appropriate by the contract financing office, it may deal directly with the contractor concerning collection or deferment of the debt.

(S–71) When the contract financing office enters into a deferral agreement or a compromise, it will furnish copies to the appropriate contracting officer and disbursing officer when deemed necessary.

(S–72) When the contract financing office denies a deferral request, or does not reach agreement with a contractor on a deferment, it will give timely notice to the appropriate contracting officer when deemed necessary.

232.614 Interest.

232.614–1 Interest charges.

(c) The interest rates established by the Secretary of the Treasury will be published in the **Federal Register** every 6 months. The current rate may also be obtained from the Departmental contract financing office representative.

232.616 Compromise actions.

Department of Defense authority under the cited statute and joint regulations has been delegated to the Departments. Within each Department, for those debts covered by this subpart authority to act in conformity to the cited statute and joint regulations has been delegated to the contract financing office.

232.617 Contract clause.

(a)(7) The following further exceptions have been established:

(i) contracts for instructions of military personnel or ROTC personnel at civilian schools, colleges, and universities;

(ii) basic agreements with telephone companies, under which communications services and facilities will be ordered, and purchases under such agreements; and

(iii) transportation contracts with common carriers for common carrier services, e.g., common carrier transportation services procured by transportation requests, transportation warrants, bills of lading, and similar transportation forms.

(S–70) Contractors and contracts mentioned in FAR 32.617 (a) (2) through (5), and other contractors in exceptional circumstances, may be exempted from the administrative interest charges required by this subpart when so agreed by the DoD Contract Finance Committee, with the approval of the Under Secretary of Defense (Research and Engineering) or his representative.

232.670 Transfer of responsibility for debt collection.

(a) Transfer of the debt case will be made to the contract financing office upon the expiration of 45 days without full collection after the date of initial demand, whether or not postponement has been requested. Debt cases under contracts terminated for default shall be transferred to the contract financing office of the Procuring Department. Debt cases transferred to the contract financing office of the Procuring Department under contracts terminated for default shall not include that portion of a debt related to actions where a disbursing officer has primary responsibility. All debt cases where the disbursing officer has primary responsibility shall be transferred to the contract financing office of the disbursing office's department. Other types of debt cases shall be transferred to the contract financing office or other office of the Department which first determines an amount to be due in accordance with the regulations of that Department.

(b) The transfers required above will not be made for amounts less than $800.00. However, it is incumbent on contracting officers and disbursing officers to effect collection whenever and by such means as are practicable.

(c) The contract financing office of each military department shall take appropriate actions to effect collection of debts referred to it. This includes administration of deferment agreements; causing debts to be listed on the consolidated list of contractors indebted to the United States, commonly known as the "Hold-Up List;" to remove names from the "Hold-Up List;" to determine administrative uncollectibility; and to refer debts to the General Accounting Office or the Department of Justice as appropriate. Within each Department, no arrangement for installment or deferral of payments may be made without the approval of the contract financing office. Acting in conformity to the standards stated in this subpart, those offices may approve or deny deferment proposals transmitted to them or made directly to them by contractors, or approve such proposals on prescribed conditions.

(d) Responsibility for assuring effective administration in accordance with this subpart shall be in the Under Secretary of Defense (Research and Engineering). Responsibility for effective administration under this subpart in each Department shall be in the Under or Assistant Secretary, or other designated official, responsible for the comptroller function. The DoD Contract Finance Committee shall advise and assist the Under Secretary of Defense (Research and Engineering) in assuring proper application of policies and the development of procedures hereunder, and in the formulation of such further instructions on this subject as may appear desirable. That Committee is responsible for this section and will develop and promulgate herein supplemental instructions on this subject.

232.671 Bankruptcy reporting.

For those debts covered by this subpart, claims in bankruptcy, insolvency, or in proceedings for reorganization or rearrangement will be furnished to the Department of Justice. These claims are (a) those which have been transferred to a contract financing office; (b) those on their way to a contract financing office at inception of bankruptcy or insolvency proceedings; (c) those pending and not forwarded to a contract financing office at inception of bankruptcy or insolvency proceedings; and (d) those which are the consequence of bankruptcy or insolvency proceedings. Information on a bankruptcy, insolvency, reorganization

or rearrangement will be provided as soon as possible by the office or origin of a debt to that office within a Department designated to receive such information. Proof of claim, with pertinent supporting data and documentation shall be furnished to the Department of Justice by the contract financing office or by such other office as may be designated within a Department. All claims arising under the same contract will be filed by the procuring department which awarded the contract. Information, reports, and proof of claim under this paragraph are not expected on debts of less than $600.

Subpart 232.7—Contract Funding

232.705 Contract Clauses.

232.705-2 Clauses for limitation of cost or funds.

(a) When a contract is of the installment type, the clause at FAR 52.232-20, Limitation of Costs, may be appropriately modified.

(c) When a contract is of the installment type, the clause at FAR 52.232-22, Limitation of Funds, may be appropriately modified.

Subpart 232.8—Assignment of Claims

232.800 Scope of subpart.

Note: 31 U.S.C. 203 has been recodified at 31 U.S.C. 3727 by Public Law 97-258.

232.803 Policies.

(b) Only DOD contracts for personal services may prohibit the assignment of claims (see FAR 32.806(b) for appropriate clause).

(d) For purposes of DOD contracts, a national emergency shall be deemed to exist (see 50 U.S.C. 1651(a) (4) and (5)). Departments, in accordance with their procedures, may exclude a no set-off commitment when they determine it is in the Government's interest.

232.806 Contract clauses.

(a)(2) When the clause at FAR 52.232-32 is used, the contracting officer shall also insert Alternate I, unless excluded under FAR 32.803(d).

PART 233—DISPUTES AND APPEALS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

233.013 Obligation to continue performance.

(a) The acquisitions of aircraft, naval vessels, missiles, tracked combat vehicles, and related electronic systems shall include the alternate paragraph (h). In addition, the alternate (h) may also be used in those contracts or classes of contracts when it has been determined, in accordance with Department procedures, that it is essential because of unusual circumstances in which the performance of a contract may be so vital to the national security or to the public health and welfare that performance must be guaranteed even in the event of a dispute that may be characterized as a claim relating to, as opposed to arising under, the contract. Examples of the types of unusual circumstances when continued performance may be determined to be vital to the national security or public health and welfare include the acquisition of weapons, support systems, and related components other than those listed above, or other essential supplies or services whose timely reprocurement from other sources would be impracticable. The determination to use the alternate paragraph (h) in other situations shall be made by the head of the contracting activity responsible for the acquisition involved.

233.014 Contract clause.

The contracting officer may use Alternate I under the conditions set forth in 233.013(a) above.

233.070 Claims for interest penalties under the Prompt Payment Act.

(a) The Prompt Payment Act (Public Law 97-177) provides that a contractor will be paid interest penalties when certain payments by the Government are not made on time or when discounts are taken for payments that are not made within the discount period. The act applies to payments made on contracts awarded on or after 1 October 1982. Under the act, interest penalties are due if the contractor is not paid for delivery of complete items of supplies or services within 15 days after the required payment date (within 3 days for meat or meat food products and within 5 days for perishable agricultural commodities). Interest penalties are also due on the unpaid portion of discount payments made after the discount period. Claims for interest penalties not paid may be made under the Contract Disputes Act.

(b) The required payment date for purposes of the Prompt Payment Act is the date on which payment is due under the terms of the contract or, if a specific date on which payment is due is not established by the contract, 30 days after the later of the date on which a proper invoice is received in the designated paying office or the date on which the supplies or services are accepted. The required payment date for meat and meat food products is not later than the 7th day after delivery, and for perishable agricultural commodities is not later than the 10th day after delivery, unless another date is specified in the contract. The required payment date for improperly taken discounts is the last day of the discount period.

(c) Interest penalties begin to accrue on the day after the required payment date and end on the date on which payment of the amount due is made. Interest penalties do not continue to accrue under the Prompt Payment Act after the filing of a claim for such penalties under the Contract Disputes Act or for more than one year. Interest penalties also do not accrue under the Prompt Payment Act when payment is not made within the prescribed period after the required payment date because of a dispute over the amount of the payment or other allegations concerning compliance with the contract.

Subpart 233.70—Certification Under Section 813 of Public Law 95-485

233.7000 Certification of requests for adjustment or relief exceeding $100,000.

(a) Section 813 of the 1979 Department of Defense Appropriation Authorization Act, Public Law 95-485, requires the certification of contract claims, requests for equitable adjustment to contract terms, requests for relief under Public Law 85-804, and similar requests exceeding $100,000. This certification must be signed by a senior company official in charge at the plant or location involved. Although the law only requires submission of the certification with requests exceeding $100,000, even if the requirement is not set forth in the contract, the clause contained at 252.233-7000, Certification of Requests for Adjustments or Relief Exceeding $100,000, shall be inserted in all contracts expected to exceed $100,000 in value.

(b) Submission of the Section 813 certification is required in addition to any certification required by the Truth in Negotiations Act and by FAR 15.804-4.

(c) Section 6(c) of the Contract Disputes Act, Public Law 95-563, also requires the certification of claims. The Section 813 certification described above is due when the claim or request for relief is first asserted to the Government. However, the certification under the Contract Disputes Act is due only after a dispute has come into being and the contractor submits a written claim for the purpose of obtaining a contracting officer's decision. A single certification, using the language

prescribed by the Contract Disputes Act but signed by a senior company official in charge at the plant or location involved, can be used to comply with both statutes in those situations where the first assertion of a claim or request for relief coincides with the inception of a contract dispute.

(d) In determining when the dollar thresholds requiring a Section 813 certification described above are met, the aggregate amount of both the increased and decreased costs shall be used. (See 215.804–2(a)(1) (ii).)

Subchapter F—Special Categories of Contracting

PART 234—MAJOR SYSTEM ACQUISITION

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

234.000 Scope of part.

Department of Defense implementation of OMB Circular A–109, Major System Acquisitions, is contained in DoD Directive 5000.1, Major System Acquisitions, and DoD Instruction 5000.2, Major System Acquisition Procedures.

PART 235—RESEARCH AND DEVELOPMENT CONTRACTING

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

235.001 Definitions.

The following terms and categories relating to "research and development" are those set forth by the Department of Defense for management of RDT&E programs. However, the term "research and development" as used in this regulation ordinarily encompasses only the Research, Exploratory Development, Advanced Development, Engineering Development, and Operational Systems Development categories below. Generally, it does not cover the management and support category. For example, construction of recreational facilities at an installation used exclusively or generally for research and development would not be acquisition of "research and development" under this regulation. Nevertheless in an exceptional case, depending upon the particular facts, some kinds of work within management and support could be "research and development" within this regulation:

"Advanced development" means all effort directed toward projects which have moved into the development of hardware for test. The prime result of this type of effort is proof of design concept rather than the development of hardware for service use. Projects in this category have a potential military application.

"Educational or other nonprofit organization" means any corporation, foundation, trust, or institution operated for purposes of higher education or whose primary purpose is the conduct of scientific research, nor organized for profit and no part of whose net earnings inure to the profit of any private shareholder or individual.

"Engineering development" means those projects in full-scale engineering development for Service use but which have not yet received approval for production or had production funds included in the DoD budget submission for the budget or subsequent fiscal year. This area is characterized by major line item projects and program control will be exercised by review of individual projects.

"Exploratory development" means all effort directed toward the solution of specific military problems, short of major development projects. This type of effort may vary from fairly fundamental applied research to quite sophisticated bread-board hardware, study programming and planning efforts. It would thus include studies, investigations and minor development effort. The dominant characteristic of this category of effort is that it be pointed toward specific military problem areas with a view toward developing and evaluating the feasibility and practicability of proposed solutions and determining their parameters.

"Management and support" means all effort directed toward support of installations or operations required for general research and development use. Included would be military construction of a general nature unrelated to specific programs, maintenance support of laboratories, operation and maintenance of test ranges, and maintenance of test aircraft and ships. Costs of laboratory personnel, either in-house or contract-operated, would be assigned to appropriate projects or as a line item in the Research Exploratory Development, or Advanced Development Program areas, as appropriate.

"Operational system development" means those projects still in full-scale engineering development but which have received approval for production through DSARC or other action, or production funds have been included in the DoD budget submission for the budget or subsequent fiscal year. All items in this area are major line items projects which appear as RDT&E Costs of Weapons Systems Elements in other programs. Program control will thus be exercised by review of the individual projects.

"Research" means all effort of scientific study and experimentation directed toward increasing knowledge and understanding in those fields of the physical, engineering, environmental and life sciences related to long-term national security needs. It provides fundamental knowledge required for the solution of military problems. It forms a part of the base for (a) subsequent exploratory and advanced developments in Defense related technologies, and (b) new or improved military functional capabilities in areas such as communications, detection, tracking, surveillance, propulsion, mobility, guidance and control, navigation, energy conversion, materials and structures, and personnel support.

"Unsolicited proposal" means a research or development proposal which is made to the Government by a prospective contractor without prior formal or informal solicitation from a contracting activity. Also see FAR subpart 15.5.

235.003 Policy.

(a) *Use of contracts.* Grants are authorized under 42 U.S.C. 1891 for basic research at educational institutions and other nonprofit organizations whose primary purpose is the conduct of scientific research. The policies and procedures for grants are prescribed by other Department of Defense directives as implemented in Departmental procedures.

(b) *Cost sharing.* Cost sharing under DoD contracts is encouraged in accordance with Federal Management Circular, FMC 73–3: "Cost Sharing on Federal Research," in the acquisition of basic and applied research. This paragraph provides guidelines for participation by contractors, both profit and nonprofit, in the cost of research supported by DoD.

(b)(S–70) *Scope.*

(i) These guidelines are applicable to all research contracts.

(ii) These guidelines need not be applied to development projects (i.e., projects for which the principal purpose is the production of, or design, testing or improvement of, products, materials devices, systems of methods). However, contracting officers may apply some or all of these guidelines to development contracts.

(b)(S–71) *Cost participation by contractors.*

(i) Participation by contractors in the cost of conducting research projects is intended to serve the mutual interests of the DoD and the contractors by helping

to assure efficient utilization of the resources available for the conduct of research projects and by promoting sound planning and prudent fiscal policies by contractors.

(ii) Contractors shall be encouraged to contribute to the cost of performing research unless it is concluded that a request for cost sharing would not be appropriate because of any one of the following:

(A) The particular research objective or scope of effort for the contract is specified by the Government rather than proposed by the contractor; this would usually include any formal Government request for proposals for a specific project;

(B) The research effort has only minor relevance to the commercial activities of the contractor, and the organization is proposing to undertake the research primarily as a service to the Government; or

(C) The contractor has little or no outside sources of funds from which to make a cost contribution. Cost sharing should generally not be requested if cost sharing would mean that the Government would have to provide funds through some other means (such as fees) to enable the contractor to cost share. It should be recognized that those contractors who are predominantly engaged in research and development and have little or no production or other service activities may not be in a favorable position to make a cost contribution.

(b)(S–72) *Amount of cost sharing.* When cost sharing is required, the amount of cost participation by the contractor may vary in accordance with a number of factors relating to the contractor's organization (profit or nonprofit), and the character of the research effort. The amount of cost participation should reflect the mutual agreement of the parties. Factors which the contracting officer may consider in any negotiations with contractors regarding the amount of cost participation, include the following:

(i) Cost participation by educational institutions and other not-for-profit or nonprofit contractors should normally be at least 1% of total contract cost. In many cases cost sharing of less than 5% of total project cost would be appropriate in view of the contractor's nonprofit status and limited ability to recover the cost of such participation from non-Federal sources. However, in some cases, it may be appropriate for educational institutions to provide a higher degree of cost sharing, such as when the cost of the research consists primarily of the academic year salary of faculty members, or when the equipment acquired by the institution for the project will be of significant value to the institution in its educational activities.

(ii) The amount of cost participation by commercial contractors should depend to a large extent on whether the research effort or results are likely to enhance the contractor's capability, expertise or competitive position, and the value of such enhancement to the contractor. It should be recognized that those contractors who are predominantly engaged in research and development and have little or no production or other service activities may not be in a favorable position to derive a monetary benefit from their research under Government contracts. Therefore, cost participation by commercial contractors could reasonably range from as little as 1% or less of the total project cost, to more than 50% of total project cost.

(iii) If the contractor will not acquire title to or the right to use inventions, patents, or technical information resulting from the research project, it would generally be appropriate to obtain less cost sharing than in cases in which the contractor acquires such rights.

(iv) A relatively low degree of cost sharing may be appropriate if, in the view of the contracting officer, an area of research requires special stimulus in the national interest.

(v) A fee or profit will usually not be paid if the contractor is to contribute to the cost of the research effort, but the amount of cost sharing may be reduced to reflect the fact that the organization is foregoing a normal fee or profit on the research. However, if the research is expected to be of only minor value to the contractor, it may be appropriate for the contractor to make a contribution in the form of a reduced fee or profit rather than sharing the costs of the contract.

(b)(S–73) *Administration.*

(i) Cost participation may be accomplished by a contribution to either direct or indirect costs, provided that such costs would otherwise be allowable in accordance with any cost principles applicable to the contract, and that the costs are not charged to the Government under any other grant or contract.

(ii) The amount of cost participation by a contractor may be determined for each individual research contract or, if the contracting officer desires, for the aggregate of all or some of the contractor's research projects supported by DoD. When the amount of cost sharing is determined for individual projects, the contracting officer may consider the contractor's participation over the total term of the project so that a relatively high contribution in one year may be offset by a relatively low contribution in another year. If the amount of the contractor's cost sharing is to be determined for the aggregate of all or some of DoD's projects, relatively high contributions on some projects may be offset by relatively low contributions on other projects.

(c) *Recoupment.* The policy and procedures in Subpart 235.71 apply with respect to the recovery of nonrecurring costs on commercial sales of defense products and technology. Also, see Part 225 for guidance on recovery of nonrecurring research, development, test and evaluation costs when acquisitions are made for foreign military sales customers.

235.004 Publicizing requirements and expanding research and development sources.

(a) In addition to the requirements of FAR 35.004(a), where the contracting mission warrants it, Research and Development Bidders Mailing Lists will be established by purchasing activities in accordance with Supplement No. 4, Procedures for Submission of Applications To Be Placed on Research and Development Bidders Mailing Lists.

(a)(2) Contracting officers, technical personnel, and small business specialists shall cooperatively seek and develop information on the technical competence of small business concerns for research and development contracts. Small business specialists shall regularly bring to the attention of contracting officers and technical personnel descriptive data, brochures, and other information as to small business concerns that are apparently competent to perform research or development work in fields in which the contracting activity is interested. In order to cooperate with the Small Business Administration in carrying out its responsibility of assisting small business concerns to obtain contracts for research and development, contracting officers, technical personnel and small business specialists shall, upon request, provide to authorized SBA representatives information necessary to understand the Government's need concerning research and development programs consideration for specific future acquisition actions. Normally, this information shall be provided, as early as practicable, to SBA representatives assigned to a contracting activity and shall cover the Government's requirements for each proposed research and development acquisition exceeding $25,000. To the maximum extent feasible, SBA shall be afforded a

minimum of 15 working days to provide pertinent information concerning qualified potential small business sources developed through its investigation of the capabilities of specific firms in the particular field of research and development covered by such acquisitions. Full evaluation shall be given to any such information in selecting qualified sources. Sources recommended by SBA for a specific acquisition shall be solicited. Exception to the policy of providing SBA a minimum 15 working day interval to recommend additional qualified small research and development sources for a proposed acquisition will be permitted only in those cases where the head of the contracting activity or the HCA's designated representative advises the SBA representative that such action would result in unjustifiable delay.

235.005 Work statement.

(d)(6) Other considerations peculiar to the work to be performed include—

(i) Technical considerations, such as any known specific phenomena or techniques, and

(ii) A detailed description of the technical requirements and subordinate tasks (the emphasis on the detailed description of the technical requirements and subordinate tasks shall be on achievement of performance, operational and support requirements, rather than specifying detailed procedures or methods of accomplishment).

235.006 Contracting methods and contract type.

(a) Acquisition by negotiation may not be necessary in research and development acquisitions. Two-step formal advertising (see FAR 14.5) may be appropriate, for example, in the case of an advanced developmental project.

235.007 Solicitations.

(a) Through its research and development programs, the Department of Defense must seek the most advanced scientific knowledge attainable and the best possible equipment, weapons, and weapon systems that can be devised and produced. This means two things. First, it means seeking the best scientific and technological sources consistent with the demands of the proposed acquisition for the best mix of cost, performances and schedules. Second, it means continuing efforts to increase the number of qualified sources, and to encourage participation by small business concerns, as well as others, in Defense research and development (see also FAR 9.104).

(5) Other relevant factors include review of information obtained as a result of synopsis of the requirement or other advance publicity (FAR 35.004(a)(1)).

(b) Sources that become known as a result of synopsis or other means of publicizing requirements shall be solicited only if such sources possess the necessary security clearance. When a source not initially solicited requests a copy of a solicitation and such source has been technically evaluated within the past six months and determined not qualified, he may be so advised and his request denied. In the event such source has not been technically evaluated within the past six months, a copy of the request for proposal shall be furnished but only after advice has been given to the source making the request as to the reasons for the limited solicitation and, as appropriate, the unlikelihood of any other source being able to qualify for a contract award under the circumstances. The formal solicitation process is not the only method of entering into contracts for research and development. The ongoing research and development work pursued in industrial laboratories is producing ideas and products of interest to the Government; this is especially true in the exploratory and advanced development segment of the research and development spectrum. In the R&D areas where there has been unique and significant industrial accomplishment by a specific concern, the establishment of specifications for solicitation of others may defeat the purpose of taking advantage of this industrial initiative. In such cases, see FAR 35.007(i). In all acquisitions of research and development in which no small business source was solicited for a proposal, a statement shall be included in the solicitation file setting forth the reasons for not soliciting small business. Where there is no substantial question as to the choice of the source, as set forth in (b)(1), (2) and (3) below, solicitations may be limited to a single source:

(1) As a result of thorough evaluation, only one source is found fully qualified to perform the proposed work.

(2) The purpose of the contract is to explore an unsolicited proposal which offers significant scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source.

(3) Where the purpose of the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to insure that a new product or idea of a specific concern is given financial support.

(c) The requirements of FAR 35.007(c) apply only as applicable to a specific acquisition. Solicitations shall also provide offerors the opportunity to indicate the appropriate specifications and standards and to specify the way they will be applied and tailored to achieve the objectives, desired results and comply with the requirements stated in the solicitation.

(g) In soliciting proposals for the conduct of research and exploratory development, it may be desirable for the Government to furnish prospective contractors with certain information elaborating on the proposed statement of work, in order to permit optimum response by offerors and to allow more timely and comparable evaluation of proposals by the Government. This information normally should consist of the Government's estimate of the scientific and technical man-effort, or other reasonable indicators, it envisions when it is not possible to describe the magnitude of the proposed work to a sufficiently definitive degree. For example, the estimated effort may be expressed in terms of numbers of man-months or years in particular occupational categories. This technique may be appropriate in cases of contractors for research studies, investigations, or laboratory scale evaluations of feasibility where the Government desires to limit the scope of effort or depth of research. Where the degree of effort type of information is furnished, it should be made clear that such information is advisory only and is not cause for restricting what the contractor believes to be a meritorious technical proposal.

(i) Under the circumstances discussed in FAR 35.007(i) and subject to 215.2 and 215.5, the contracting officer may discuss new ideas or products, encourage submission of proposals and negotiate with prospective sources without a formal solicitation.

235.008 Evaluation for award.

(a) Before determining the technical competence of prospective contractors, and recommending to the contracting officer the concern or concerns that they consider most technically competent, cognizant technical personnel shall consider all the evaluation factors set forth in the solicitation (see FAR 35.007(e) for examples of evaluation factors).

(e) Proposals for cost reimbursement type or fixed price type contracts may be penalized during evaluation to the degree that the estimated cost is unrealistically low. The contracting officer, in accordance with FAR 15.1001, shall notify of that decision those

offerors whose proposals or offers have been determined to be unacceptable.

(e)(S–70) *Evaluation of price and costs.*

(i) While cost or price should not be the controlling factor in selecting a contractor for a research or development contract, cost or price should not be disregarded in the choice of the contractor.

(ii) Price analysis generally considers the overall reasonableness of the proposals in relation to the total contemplated expenditures and the extent and nature of the task scheduled to be accomplished. In most research and development contracts, the inability to define specifications and the nature of the end items prevent the effective use of certain techniques of price analysis, such as comparisons with prior quotations and current prices and evaluations in terms of quantitative yardsticks. The conclusions reached by price analysis techniques must be supported by cost analysis procedures, used to examine the details of the offerors' proposals.

(iii) The analysis of cost factors begins with an evaluation of the reliability of the offeror's cost estimating procedures and the dependability of his cost controls, as demonstrated by his history of cost management in the performance of other contracts or by his establishment of sound practice for this purpose. The cost analysis proceeds with a critical examination of the composition of each cost element in terms of its expected application to the objectives of the contract, and its conformance to the accepted principles of allocability and reasonableness. (See FAR 31.3 and FAR 31.201). A Government cost estimate may help in projecting tools for these purposes and may develop the expected incidence of various cost factors in relation to performance phases, planned segments, or identification "milestones." This estimate should provide a summary forecast of the time, effort, materials, equipment, and services necessary to accomplish the research or development objective. The comparison and reconciliation of the Government cost estimate with the offeror's cost estimate for the same phases, segments, or events should bring into focus any areas of excessive or insufficient emphasis and provide a foundation for meaningful discussions with the offeror.

(iv) Special care should be exercised to comply with FAR 31.205–1 and FAR 31.205–18 in the allowance of advertising costs under FAR 31.311–1.

(e)(S–71) *Documentation.* Contract files for research and development acquisition shall be fully documented to include the basis and reasons for the selection of the sources solicited and for the award. Such documentation should be adequate to justify the selection of the contractor over others whose proposals, from the standpoint of some single factor (such as lower estimated costs or short performance time), might appear more advantageous to the Government (see FAR 4.1).

235.010 Scientific and technical reports.

(a) Scientific and technical reports are documents written for the permanent record to document results obtained from and recommendations made on scientific and technical activities relating to a single project, task or contract, or relating to a small group of closely connected efforts within the Department of Defense Research and Development Program. A completed Report Documentation Page (DD Form 1473) is to be included in each copy of a scientific or technical report required by the contract (see Part 53). Whenever a scientific or technical report is required as a product of the Research, Development Test and Evaluation Effort, the contracting officer will assure that the requirement for a completed DD Form 1473 is clearly stated and that a complete DD Form 1473 is included with each copy of the required scientific and technical reports. Scientific and technical reports should be reproduced as economically as practicable, consistent with the reporting needs of the Government.

(b) Copies of scientific and technical reports resulting from DoD contracts are furnished to the Defense Technical Information Center (DTIC) which provides a central service for the interchange of scientific and technical information of value to the Department of Defense and its contractors. Organizations may become eligible for this service by registering in accordance with Defense Logistics Agency Regulation 4185.10, Certification and Registration for Access to DoD Defense Technical Information, which is available from the Defense Technical Information Center, Cameron Station, Alexandria, Virginia 22314.

235.011 Data.

(a) The data clauses as required by Subpart 227.4 usually provide, among other things, for the reproduction and use for any purpose of the Government of any or all of the information to be provided under the contract. Contracting officers shall require contractors to furnish all such information resulting from research and development contracts.

235.014 Government property and title.

(b) The basic requirements to be observed by the Departments for establishing and maintaining control over Government Property are set forth in Part 245.

(1) In determining whether to grant the approval to the contractor, the contracting officer shall determine that the proposed acquisition is essential to performance of the contract. Approval may be granted either on a line item basis or for clearly defined classes of items.

(c) Headquarters, Air Force Systems Command (AFSC) (PMPR), Andrews Air Force Base, Maryland 20334, is responsible in the Department of Defense for obtaining and maintaining files of Letters of Assurance from nonprofit institutions of higher education and other nonprofit institutions which provide for the agreement specified in FAR 35.014(c). AFSC (PMPR) will distribute, and periodically update, a list of institutions which furnished a Letter of Assurance. Contracting organizations may request a copy of this list; or at any time, inquire as to whether a particular institution has furnished the required Letter of Assurance. If transfer of title to equipment is contemplated and the contractor has not furnished a Letter of Assurance, the contracting office will request, in writing, that AFSC (PMPR) obtain a Letter of Assurance from the contractor. This request must give the complete mailing address of the contractor.

235.015 Contracts for research with educational institutions and nonprofit organizations.

(b) *Basic agreements.*

(2) The responsibility for negotiating Basic Agreements with appropriate educational institutions and nonprofit organizations for DoD, except designated Federal Contract Research Centers (FCRC), is assigned to the Office of Naval Research, 800 North Quincy Street, Arlington, Virginia 22217. Copies of the agreements will be maintained by the Office of Naval Research and provided to DoD and other purchasing activities upon their request. The Office of Naval Research will periodically provide a listing of current Basic Agreements to the DAR Council for publication in a DoD FAR Supplement Circular. The need for special clauses should not preclude the purchasing office from utilizing these basic agreements. The Basic Agreement is incorporated by reference in Section I contract clauses, of the contract. Special clause requirements may be

incorporated into Section H—Special Provisions, of the contract.

(S–70) *Special use allowances for research facilities acquired by educational institutions.*

(1) *Definitions.*

"Research facility" means real property, other than land, and includes structures, alterations, and improvements, acquired for the purpose of conducting scientific research under contracts with agencies of the Department of Defense; and

"Special use allowance" means a negotiated direct or indirect allowance for buildings, structures, and real property, other than land, computed at an annual rate in excess of the rate which normally would be allowed under FAR Subpart 31.3.

(2) *Policy.* The expanding requirements of the Department of Defense for the performance of scientific research programs by educational institutions may create special situations wherein the acquisition or construction of additional research facilities by such institutions is essential for the effective performance of scientific research programs of major importance to the Department of Defense. Educational institutions are expected to furnish facilities required for the performance of Defense contracts, and the extent of reimbursement by the Government for the research programs of such institutions shall be governed by the principles set forth in FAR Subpart 31.3 However, in certain limited situations an educational institution may be unable to provide capital for new laboratories or other expanded facilities necessitated by Defense contracts unless the institution is given Governmental assistance in return for the risks and expenses it assumes in acquiring or constructing such facilities. Special use allowances constitute a means for recognizing these risks and expenses on the part of the educational institution and also provide a basis for permitting essential governmental research programs to go forward. The resort to special use allowances as provided by this paragraph is an extraordinary type of arrangement and constitutes an exception to the provisions for normal use allowances contained in FAR 31.311–10. Any specific agreement providing for a special use allowance shall be negotiated on a case-by-case basis using the criteria established herein.

(3) *Authorization of special use allowances.* The head of a contracting activity may approve special use allowances for the acquisition of construction costs of research facilities financed by educational institutions only when all of the following conditions are met:

(i) The research facility is essential to the performance of Department of Defense contracts;

(ii) The program requirements cannot be met practically and effectively by existing facilities, either Government or non-Government;

(iii) The proposed agreement for the special use allowances represents a sound business arrangement;

(iv) It is undesirable or impractical for the Government to provide Government-owned facilities for the performance of the research; and

(v) The proposed use of the research facility is consonance with the underlying objective of the Government in granting the special use allowance.

(4) *Negotiation and administration of contracts providing for special use allowance.* The negotiation and administration of contracts providing for special use allowances are subject to the conditions set forth in (S–70)(4)(i) through (S–70)(4)(xiii) below:

(i) The terms of the agreement for special use allowances authorized herein shall be specified or incorporated by reference in the applicable contracts.

(ii) When the special use allowance is based on the total acquisition cost, no normal use allowance or other use or depreciation charge will apply during the special allowance period nor after the educational institution has recovered the total acquisition cost under Government contracts or from other users. When the special use allowance is based on less than total acquisition cost of the research facility, the agreement will specify whether any normal use allowance or other use or depreciation charge will apply to the balance during the special use allowance period; however, no more than the normal use allowance computed in accordance with FAR Subpart 31.3 may be applied thereafter to the balance.

(iii) During the period of the special use allowance, and for subsequent periods to the extent agreed upon, the research facility shall be available for Government research use on a priority basis over non-Government use. Any significant use during such period other than which justified the special use allowance shall be subject to prior consent of the cognizant approval authority specified in (S–70)(3) above.

(iv) Special use allowances are applicable only in years in which the Government has contracts in effect with the educational institution for research to be conducted in the facility. The Government has no liability to the educational institution for the special use allowance in any year in which there is no Government contract. In any year when the level of research effort under Government contracts has been reduced to a point where the special use allowance is excessive in relation to the extent of the Government research funding, the parties may negotiate a special use allowance for that year at a mutually acceptable rate.

(v) When more than one Government contract is to be performed in the research facility, special use allowances generally should be allocated to using contracts on an equitable basis.

(vi) If during the period when a special use allowance is in effect, any substantial use is made of the research facility for parties other than the Government, only an allocable share of the special use allowance shall be charged to the Government.

(vii) Special use allowances shall not include any maintenance, utilities, or other operational costs.

(viii) Generally, the period for which a special use allowance is authorized shall be at least ten years. However, a shorter period of time is authorized where the total amount to be allowed is less than acquisition cost for the research facility.

(ix) Reimbursements under contracts for special use allowances shall not commence until the research facility is occupied and used for research under the contract. However, equitable adjustments may be made in the special use allowance during the construction period if the research facility is partially used for research under the contract.

(x) Determination of the amount of a special use allowance shall be based on the comparative need for the research facility by the Department of Defense and by the educational institution. In no event shall the institution be paid more than the acquisition costs.

(xi) In establishing the annual special use allowance, due consideration shall be given to rental costs for similar space in the area where the research facility is to be located.

(xii) No payment shall be made to the educational institution for costs of land or interest charges on capital, used or borrowed, for the acquisition of the research facility.

(xiii) Information copies of each special use allowance agreement negotiated shall be furnished to each authorizing official specified in (S–70)(3) and to the Deputy Under Secretary (Research and Advanced Technology), Office of the Under Secretary of Defense for Research and Engineering.

235.070 Indemnification against unusually hazardous risks.

(a) *Indemnification under research and development contracts.*

(1) *Use of clause.* Pursuant to the authority of 10 U.S.C. 2354 and when authorized by the Secretary concerned (or his designee under 10 U.S.C. 2356), a contract for research and development, or both, may provide for indemnification of the contractor and subcontractors against:

(i) Claims by third persons (including employees) for death, bodily injury, or loss of or damage to property; and

(ii) Loss of or damage to the contractor's property, to the extent that such liability, loss or damage—

(A) Results from a risk that the contract defines as "unusually hazardous",

(B) Arises out of the direct performance of the contract, and

(C) Is not compensated by insurance or otherwise.

When authorization has been obtained, the appropriate clause prescribed in 235.071 (a) or (b) shall be used.

(2) Each contract containing a clause authorized by (a) above shall clearly define the specific unusually hazardous risks to which the clause applies. This definition shall be submitted for approval with the request for authorization to grant indemnification. The definition may be included as an additional paragraph of the clause or inserted elsewhere in the contract. The fact that one or more risks under a contract may be appropriately define as unusually hazardous does not justify so defining other risks of contract performance which are not in themselves unusually hazardous; neither does it preclude indemnification of such other risks under other appropriate authority.

(b) *Indemnification under contracts involving both research and development and work that cannot be so classified.* Certain contracts require a substantial amount of research and development work as well as a substantial amount of work that cannot be so classified. When indemnification is to be provided for such contracts, an appropriate clause, utilizing the authority of both 10 U.S.C. 2354 and Pub. L. 85–804 may be used. In such cases, the use of Pub. L. 85–804 to provide indemnification is limited to work which cannot be indemnified pursuant to 10 U.S.C. 2354 and is subject to compliance with the provisions of FAR Subpart 50.4.

235.071 Contract clauses.

(a) The contracting officer shall insert the clause at 252.235–7000, Indemnification Under 10 U.S.C. 2354—Fixed Price, as provided for in 235.070.

(b) The contracting officer shall insert the clause at 252.235–7001, Indemnification Under 10 U.S.C. 2354—Cost Reimbursement, as provided for in 235.070.

(c) The contracting officer shall insert the clause at 252.235–7002, Recovery of Nonrecurring Costs on Commercial Sales, as provided for in 235.7103(a).

(d) The contracting officer shall insert the clause at 252.235–7003, Care of Laboratory Animals, in all contracts in compliance with law and in furtherance of the Department of Defense policy that all aspects of investigative programs involving the use of experimental or laboratory animals be humanely conducted in accordance with recognized principles. The clause shall be included in all contracts awarded in the United States, its possessions, and Puerto Rico which may involve the use of such animals.

(e) The contracting officer shall insert the clause at 252.235–7004, Frequency Authorization, in any contract which calls for developing, producing, constructing, testing, or operating a device for which a radio frequency authorization is required.

Subpart 235.70—Short Form Research Contract

Reserved, guidance will be included prior to 1 April 1984.

Subpart 235.71—Recovery of Nonrecurring Costs on Commercial Sales of Defense Products and Technology

235.71 Scope.

This subpart sets forth policy and procedures established in DoD Directive 2140.2 for the recovery of no recurring costs on commercial sales by contractors of products, components, and related technology developed with DoD appropriations or, in special cases, with Foreign Military Sales (FMS) funds. The objective of recovery is to ensure that a customer pays a fair share of the nonrecurring investment cost incurred by the Department of Defense or a foreign government.

235.7101 Policy.

(a) It is the policy of the Department of Defense to recover a fair share of its investment in nonrecurring costs related to products, and/or a fair price for its contribution to the development of related technology, when the products are sold, and when technology relating to the manufacture of the products is sold or licensed, to a foreign government, international organization, foreign commercial firm, or domestic organization (here referred to as "customers").

(b) Furthermore, in selected cases, it is DoD policy to recover, on behalf of a foreign government or international organization, a fair share of the nonrecurring costs for a special feature or product paid by the foreign government or international organization under an FMS case where subsequent customers purchase the same specialized feature(s). However, the U.S. Government will not collect this recoupment on behalf of a foreign government beyond 8 years from the date of the acceptance of the original DoD Offer and Acceptance (DD Form 1513) that included the nonrecurring investment.

235.7102 Applicability.

(a) This policy applies to those products and technologies for which investment costs equal or exceed $5 million for any of the following:

(1) Nonrecurring research, development, test, and evaluation (RDT&E) costs to develop defense products and related technology. The determination of RDT&E costs shall be based upon the current and predecessor models of an item or equipment.

(2) Nonrecurring production cost.

(3) RDT&E and nonrecurring production costs for special features under a foreign military sale when requested by the FMS customer and agreed to by the U.S. Government.

(b) In the event an end item contains one or more components that individually meet the above thresholds, recoupment will be made on a component when it is sold separately.

(c) In the case of product sales, if the dollar threshold is met for either nonrecurring RDT&E or production costs, recoupment for both categories of investment costs will be charged.

235.7103 Procedures.

(a) To assure the recovery of investment in nonrecurring costs and related technology, the clause in 252.235–7002, Recovery on Non Recurring Costs on Commercial Sales, shall be included in all RDT&E and production contracts and subcontracts of $1 million or more as prescribed at 235.071(c). This clause requires the contractor and qualifying subcontractors to pay to the U.S. Government the amounts established by the U.S. Government in the event of the contractor's commercial sale of products, or sale or license of related technology, that meet the thresholds of 235.7102.

(b) If the recoupment charge has been previously established, the contracting office, at the time of each commercial sale, shall determine if there have been significant changes in factors or assumptions used to compute the original charge (for example, changes in identifiable RDT&E cost of the anticipated production run). When significant changes are identified, the contracting office shall submit a request in accordance with departmental procedures to the Office of the Secretary of Defense (see (c) below) for authority to make appropriate changes in nonrecurring cost recoupment charges. Such revised charges shall not be retroactively applied to past sales or to sales that have been consummated by a written contract between the parties.

(c) If the recoupment charge has not been previously established, the contracting office shall expeditiously obtain a charge determination from the office in each DoD component that is responsible for establishing the charge. The Office of the Secretary of Defense must approve certain charges, as follows:

(1) The Director, Defense Security Assistance Agency (DSAA)—nonrecurring cost unit recoupment charges for the sale of major defense equipment (as defined in 252.235–7002).

(2) The Under Secretary of Defense for Research and Engineering (USDRE)—all technology charge determinations.

(d) The amount to be reimbursed to the U.S. Government for the commercial sale of products and components and for the sale or license of technology is provided for in 252.235–7002 and in DoD Directive 2140.2.

235.7104 Deviations.

(a) A DoD component, a foreign government, or a Defense contractor (vice president or higher) may request deviation, in whole or in part, from assessing the charges prescribed here for a commercial sale when it is considered to be in the best interest of the United States to satisfy a demonstrable right of the manufacturer or the purchaser or to obtain advantage to the Department of Defense. Consideration may also be given to nonmonetary returns that are advantageous to national security, foreign policy, and the public interest.

(b) Requests for deviation associated with product sales under foreign sales shall be submitted through channels to the Director of the Defense Security Assistance Agency. Requests for deviation for product sale charges to domestic organizations and requests for deviation for technology sales shall be submitted to the Under Secretary of Defense for Research and Engineering. A request for deviation from the otherwise appropriate charges shall contain:

(1) A summary statement of the facts;

(2) The Benefits expected, with justification;

(3) The specific areas to which the deviation would apply; and

(4) Calculations necessary to ascertain the extent of any monetary involvement and how the calculations are to be handled by either the DoD component or the contractor, as appropriate.

PART 236—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 236.1—General

236.102 Definitions.

"Construction Activity" means an activity, at any organizational level of the Military Departments, which has responsibility for the architectural, engineering, and other related technical aspects of the planning, design, and construction of facilities, and which receives its technical guidance from the Army Office of the Chief of Engineers, Naval Facilities Engineering Command, or Air Force Directorate of Civil Engineering.

236.103 Methods of contracting.

(a) Overseas contruction may be procured by means of formal advertising provided that the Head of a Contracting Activity, or his designee, determines that the use of formal advertising, in strict accordance with FAR Part 14, is practicable and advantageous to the United States as to a specific country or other geographic area outside the United States, its possessions, and Puerto Rico.

236.170 Sources of construction services.

Generally, military construction in the United States shall be performed by contract. The following exceptions to this policy are authorized:

(a) Military construction units, other military personnel and Civil Service maintenance personnel may:

(1) Perform construction in periods of emergency arising from fire, flood, explosion, pestilence or other disaster to provide essential facilities for shelter, safety, and protection of personnel and property.

(2) Perform construction where the isolated location of the work makes it impracticable to obtain qualified contractors.

(3) Perform construction where the necessity for obtaining security clearances for contractor personnel introduces unacceptable delays in operational schedules.

(b) Military construction units may perform construction in addition to that set forth in (a) above, but only when the integrity of the unit will be maintained and the project will contribute to the training of the unit of its wartime mission.

(c) Military personnel, other than military construction units, may, in addition to (a), above:

(1) Perform construction in connection with welfare and recreational facilities intended for their own use.

(2) Perform repair incident to maintenance:

(i) When required for reasons of security.

(ii) For disciplinary action arising from military offenses.

(iii) For training and maintaining competence in recognized trade skills.

(iv) In and around the barracks which they themselves occupy or are about to occupy.

(d) Civil Service maintenance forces may, in addition to (a), above:

(1) Perform construction where the work is of a minor nature.

(2) Perform construction where conditions are such that it is impracticable to prepare plans and specifications.

(3) Perform construction where the work must be performed intermittently to avoid disrupting other important operations.

(4) Perform repair incident to maintenance.

Subpart 236.2—Special Aspects of Contracting for Construction

236.201 Evaluation of contractor performance.

(a) *Preparation of performance evaluation reports.*

(1)(S–70) The contracting officer shall also prepare a performance evaluation report for each construction contract of $10,000 or more when any element of performance was either unsatisfactory or outstanding.

(c) *Distribution and use of performance reports.*

(1) The original of the performance evaluation report for every contract will be retained by the activity preparing the report for a minimum of six years after date of the report. In addition, the reviewing official will forward a copy of the following reports:

(i) Reports with an overall unsatisfactory evaluation.

(ii) Reports which cite outstanding performance, and

(iii) Reports for all contracts in excess of $200,000 to the:

Office of the Chief of Engineers, ATTN: DAEN-PR
Pulaski Building
Washington, DC 20314

This office is responsible for establishing procedures and practices which will assure appropriate distribution and utilization of performance evaluation data within the Departments.

(2) Performance evaluations of construction contractors shall be used in making responsibility determinations. In the selection of fully qualified responsible contractors for future awards or negotiation of construction contracts above $1,000,000, the contracting officer shall also obtain from the central data bank the following:

(i) A record of the number of contracts and the total dollar amount for all satisfactory evaluations; and

(ii) Complete transcripts of all performance evaluations showing unsatisfactory performance either on individual elements or overall evaluation, or remarks on outstanding performance. These transcript(s) or statement(s) may be obtained for smaller awards.

236.203 Government estimate of construction costs.

(c) The Government estimate shall be designated "For Official Use Only" unless the nature of the information therein requires a security classification, in which event it shall be handled in accordance with applicable security regulations. The "For Official Use Only" designation shall be removed only when the estimate is made public in accordance with instructions below. If the procurement is by formal advertising (except two-step formal advertising) a sealed copy of the detailed Government estimate shall be filed with the bids until bid opening. After the bids are read and recorded, the "For Official Use Only" designation shall be removed and the estimate shall be read and recorded in the same detail as the bids.

236.205 Statutory cost limitations.

(c) A bid or proposal containing prices that exceed applicable statutory cost limitations shall be rejected, unless for construction of cold storage or regular (general purpose) warehousing, barracks for enlisted personnel or bachelor officer's quarters, and the determination of the Assistant Secretary of Defense, Manpower, Reserve Affairs and Logistics (MRA&L) has been obtained that the limitations on construction costs in the annual Military Construction Act shall not apply as impracticable.

236.206 Liquidated damages.

A liquidated damages clause shall be included in all contracts in excess of $25,000 except cost-plus-fixed-fee contracts or those where the contractor cannot control the pace of the work. Use of a liquidated damages clause is optional for contracts of $25,000 or less. Where such a provision is used, the clause set forth in FAR 52.212–5 shall be included in the invitation for bids or request for proposals. Where different completion dates for separate parts or stages of the work are specified in the contract, this clause should be revised appropriately to provide for liquidated damages for delay of each separate part or stage of the work. The minimum amount of liquidated damages should be based on the estimated cost of inspection and superintendence for each day of delay in completion. Whenever the Government will suffer other specific losses due to the failure of the contractor to complete the work on time, such as the cost of substitute facilities, the rental of buildings, or the continued payment of quarters allowances, an amount for such items should also be included.

236.270 Minimum standards for responsible prospective contractors.

In evaluating the responsibility of a prospective contractor, the contracting officer shall consider whether a bid bond has been furnished and performance and payment bonds are to be furnished. Prior to underwriting bid performance and payment bonds, it is normal practice for each surety company to conduct a prequalification survey which examines, verifies and evaluates the contractor's financial resources, technical expertise for the type work involved, management and organization ability, current workload, and capability to complete the contract in the required time. Normally, the contracting officer is not expected to duplicate this effort in conducting the pre-award survey, but should emphasize in addition thereto the evaluation of information which is uniquely available to the Government, such as the Consolidated List of Debarred, Suspended, and Ineligible Contractors (see FAR 9.404), contractor experience lists, and performance evaluations on present or previous contracts with the Government. More extensive pre-award surveys should be conducted when the project requires unique or unusual construction expertise or when information available to the contracting officer indicates that the contractor may not be responsible (see FAR 9.104). The responsibility for determination of the extent of pre-award survey appropriate to the circumstances rests with the contracting officer. Where the prospective contractor is a joint venture, the sum of its financial resources and the individual capacities of all its members will be used in determining the responsibility of the joint venture.

236.271 Expediting construction contracts.

No expediting action, advancing the completion date and involving additional costs under a contract funded under the provisions of the annual Military Construction Appropriation Act or any similar legislations, shall be taken without the prior approval of the Assistant Secretary of Defense (MRA&L).

236.272 Cost-plus-fixed fee contracts.

Annual Military Construction Appropriation Acts provide that cost-plus-fixed-fee construction contracts estimated to exceed $25,000 to be performed within the United States, except Alaska, and to be charged to such appropriations shall not be executed unless the specific written approval of the Assistant Secretary of Defense (MRA&L), setting forth the reasons therefore, is obtained.

236.273 Prequalification of bidders and offerors.

(a) The prequalification procedures are used when it is necessary to assure timely and efficient performance of critical construction projects by limiting bidding or offers to concerns of proven competence to perform in the required manner. The result of a prequalification is a list of constructors who are determined to be qualified to perform a specific construction contract.

(b) The Head of a Contracting Activity may authorize the prequalification when he determines in writing that a construction project is of such urgency or complexity as to require prequalification.

(c) Procedures to be used shall be approved by the Head of a Contracting Activity. They shall provide, in connection with small business concerns, that:

(1) If the qualifying authority is of the opinion that a small business concern is not qualified for reasons relating to responsibility, the recommendation of the appropriate Small Business Regional Office shall be requested;

(2) If the office expresses the opinion that the concern appears to have the requisite responsibility, it shall be permitted to submit a bid or offer, and

(3) If a small business concern is found to be non-responsible, the procedures prescribed by FAR 19.6 shall be followed.

Subpart 236.3—Special Aspects of Formal Advertising in Construction Contracting

236.303 Invitation for bids.

(c)(S–70) *The Cost Limitations provision* (see 236.580–1 and 252.236–7081).

(S–70) If it appears that funds available for a project may be insufficient for all the desired features of construction, the contracting officer may provide in the invitation for a first or base bid item covering the work generally as specified and for one or more additive or deductive bid items which progressively add or omit specified features of the work in a stated order of priority. In such case, the invitation shall include a provision substantially as prescribed at 236.580–2, and the low bidder and the bid items to be awarded shall be determined as therein provided. The contracting officer, prior to the opening of bids, shall determine and record in the contract file the amount of funds available for the project. The amount so recorded shall be controlling for determining the low bidder but may be increased for determining the bid items to be awarded to him; *Provided* that award on such combination of bid items does not exceed the amount offered by any other conforming responsible bidder for the same combination of bid items.

Subpart 236.4—Special Procedures for Negotiation of Construction Contracts

236.401 Use of negotiated contracts.

(b)(2) See 236.103(a).

236.402 Price Negotiation.

(S–70) *Profit or fee.*

(1) *Fixed-price construction and architect-engineer contracts.* The guidance set forth in FAR 15.9, while not required, may be used in considering profit as an element of price under fixed-price construction and architect-engineer contracts.

(2) *Cost-reimbursement type construction contracts.*

(i) The fees of prime contractors under cost-plus-fixed-fee construction contracts shall be negotiated in accordance with Departmental procedures which have been approved by the Assistant Secretary of Defense (MRA&L).

(ii) The target fee of prime contractors in incentive fee contracts shall be established using the criteria and fee schedules provided for under Departmental procedures as a guide in conjunction with the reasonableness of the target cost, the maximum and minimum fees to be established and the fee adjustment formula.

(iii) Limitations of fees for cost-reimbursement type contracts are set forth in FAR 15.903(d).

(3) *Cost-plus-fixed fee contracts.* Annual Military Construction Appropriation Acts provide that cost-plus-fixed-fee architect-engineer contracts estimated to exceed $25,000 to be performed within the United States, except Alaska, and to be charged to such appropriations shall not be executed unless the specific written approval of the Assistant Secretary of Defense (MRA&L), setting forth the reasons therefore, is obtained.

Subpart 236.5—Contract Clauses

236.501 Performance of work by the contractor.

(a) The contractor shall be required to perform not less than 15 percent on housing and not less than 20 percent on other work.

236.570 Additional clauses.

Section 236.571 through 236.578 present additional clauses for insertion in contracts for construction and architect-engineer services.

236.571 Clauses.

The following Clauses are required in fixed-price construction contracts and solicitations.

236.571–1 Composition of contractor.

The contracting officer shall insert the clause at 252.236–7000, Composition of Contractor, in solicitations and contracts when a fixed-price construction contract is contemplated.

236.571–2 Modification proposals-price breakdown.

The contracting officer shall insert the clause at 252.236–7001, Modification of Proposals-Price Breakdown, in solicitations and contracts when a fixed-price construction contract is contemplated.

236.571–3 Contract drawings, maps and specifications.

The contracting officer shall insert the clause at 252.236–7002, Contract Drawings, Maps and Specifications, in solicitations and contracts when a fixed-price construction contract is contemplated.

236.571–4 Shop drawings.

The contracting officer shall insert the clause at 252.236–7003, Shop Drawings, in solicitations and contracts when a fixed-price construction contract is contemplated.

236.572 Clauses.

The following clauses will be inserted in fixed-price construction contracts and solicitations as set forth below.

236.572–1 Contract prices—bidding schedule.

The contracting officer shall insert the clause at 252.236–7004, Contract Prices—Bidding Schedule, in solicitations and contracts when a fixed-price construction contract is contemplated and the contract is to contain only unit prices for specified items.

236.572–2 Salvage materials and equipment.

The contracting officer shall insert the clause at 252.236–7005, Salvage Materials and Equipment, in solicitations and contracts when a fixed-price construction contract is contemplated and the contract will involve Government furnished property which is to be salvaged and reused.

236.572–3 Misplaced material.

The contracting officer shall insert the clause at 252.236–7006, Misplaced Material, in solicitations and contracts when a fixed-price construction contract is contemplated and the contract will involve work near or on navigable waterways.

236.572–4 Identification of employees.

The contracting officer shall insert the clause substantially as set out at 252.236–7007, Identification of Employees, in solicitations and contracts when a fixed-price construction contract is contemplated and identification of employees is required for security or other reasons.

236.572–5 Superintendence of subcontractors.

The contracting officer shall insert the clause at 252.236–7008, Superintendence of Subcontractors, in solicitations and contracts when a fixed-price construction contract is contemplated and the contract will be for work of a highly technical and complicated nature requiring extraordinary control by the contractor of the several parts of the work, or the contract will cover work spread over several places on the site of work.

236.572–6 Payment for mobilization and preparatory work.

The contracting officer shall insert one of the clauses at 252.236–7009 (see below) in solicitations and contracts when a fixed-price construction contract is contemplated which will contain a

separate bid item for mobilization and preparatory work with the approval of the Head of the Contracting Activity.

(a) In major construction contracts requiring major or special items of plant and equipment or large stockpiles of material which are considered to be in excess of the type, kind and quantity presumed to be normal equipment of a contractor qualified to undertake the work, insert the clause at 252.236–7009(a), Payment for Mobilization and Preparatory Work, Payment Item No. ——.

(b) In contracts involving major mobilization expense or plant equipment and material other than such as are covered in (a) above, which is occasioned by the location or nature of the work such as mobilization at an offshore location or towing a dredge to a remote location, insert one of the following clauses:

(1) When it is expected demobilization will occur at the time of contract completion or shortly thereafter, insert the clause at 252.236–7009(b)(1), Mobilization and Demobilization, Payment Item No. ——.

(2) When there is a likelihood that there will be substantial time lapse between demobilization and final payment under the contract due to such contractual requirements as clean-up or seeding of a disposal area, insert the clause at 252.236–7009(b)(2), Mobilization and Demobilization, Payment Item No. ——.

(c) The percentage of the lump sum price, for mobilization and demobilization in paragraph (a) of the clauses at 252.236–7009(b) (1) and (2), attributed to mobilization should generally be 60 percent and the remaining 40 percent considered to be the cost of demobilization. These percentages may be varied to reflect the situation contemplated under the particular contract, but in no event should mobilization exceed 80 percent of the payment item.

236.572–7 [Reserved]

236.572–8 Airfield safety precautions.

The contracting officer shall insert the clause at 252.236–7011, "Airfield Safety Precautions," in solicitations and contracts when a fixed-price construction contract is contemplated which is to be performed on or near airfields.

236.572–9 Contractor prepared network analysis system.

(a) The contracting officer is authorized to insert a clause substantially as set forth at 252.236–7012, "Contractor Prepared Network Analysis System," in solicitations and contracts when a fixed-price construction contract is contemplated in accordance with the instructions in (b) below. Since the clause is broad in scope, modifications thereto will be necessary to accommodate individual project requirements.

(b)(1) (See Paragraph (b)(2).) The requirements pertaining to the identification of separate buildings and features and to the minimum number of activities may be deleted for projects where this information is not needed. This portion should always be used when more than one line item is being constructed under a single contract to provide data for Government costing purposes. The column showing the minimum number of activities per building or feature may be deleted if not considered necessary.

(2) (See Paragraph (b)(3).) The requirement for time scaling the summary network diagram may be deleted. The use of time scaling provides a more easily comprehended diagram for those not intimately familiar with a project and hence is of value to higher level management. It is also of considerable value for evaluating the utilization of resources of manpower and equipment and the scheduling of those activities which have slack available. On the other hand, revisions are much more difficult to make on time scaled diagrams requiring considerable if not complete redrafting. This makes time scaling more expensive to maintain and may result in delays in submitting diagrams. The advantages to management as against the possibility of additional cost and delay in submission must be considered in deciding whether time scaling should be included. If time scaling is omitted, references thereto in paragraph (e) should also be deleted.

(3) (See Paragraphs (b)(4) and (b)(7).) Any items may be included or deleted as project requirements and local computer capabilities indicate. It should be noted that many computer system programs are written so as to provide only part of the information listed, and it is probable that there is no single program which will provide all. The listings should be revised to require only the minimum necessary for project management.

(4) (See Paragraph (b)(6)(i).) Two means of estimating the computing time required can be used, (i) based on normal work days (excluding Saturdays, Sundays and holidays), or (ii) based on calendar days. This paragarph should be retained if the former method is to be used. If the latter method is to be used, this paragraph should be deleted and the following inserted at the end of paragraph (b)(2):

In calculating activity durations, Saturdays, Sundays, holidays, and normal inclement weather should be considered.

(5) (See Paragraph (b)(6)(ii) and (iii).) Requirements for manpower loading and list of equipment will be deleted unless the nature of the project is such as to make their inclusion necessary for proper surveillance by the resident engineer. When these requirements are deleted here, references thereto in other sections should also be deleted.

(6) (See Paragraph (c).) The times allowed for the various submissions may be revised to fit individual project requirements based on project duration and complexity.

(7) (See Paragraph (e).) The time for submission of periodic reports may be changed based on project requirements. Normally, reports will be required twice a month with payments made once a month based on the work shown as accomplished in the last two reports.

(8) (See Paragraph (f).) For partially completed activities, a relatively broad estimate of the portion completed is normally adequate, for example, 25%, 50%, 75% or 100%, and the clause may be changed accordingly. Due to the multiplicity of activities and their normally small dollar value, a more precise evaluation frequently may be impractical. On activities with significant costs, a more precise estimate should be used.

(9) (See Paragraphs (g), (h) and (i).) The sheet size of diagrams and number of copies of report to be submitted may be revised to suit individual project requirements.

236.572–10 Government-prepared network analysis system.

The contracting officer is authorized to insert the clause at 252.236–7013, "Government-Prepared Network Analysis System," in solicitations and contracts when a fixed-price construction contract is contemplated in accordance with the following instructions:

(a) (See Paragraph (a).) This paragraph shall be used when the project is of long duration and a schedule of the first two months' operation is necessary for controlling the project until the "Construction Progress Schedule" is submitted. The blank will be filled in with the number of days desired. This pragraph will be deleted when the contruction project is of short duration.

(b) (See Paragraph (b).) Proper number of days for submittals shall be inserted by the contracting officer.

(c) Paragraphs (c)(1) and (c)(2) shall be modified to agree with detail and

type of network analysis system the Government proposes to prepare.

236.573 Clauses.

The following clauses are required in cost-reimbursement construction contracts and solicitations.

236.573-1 Statement of work.

The contracting officer shall insert the clause at 252.236-7014, Statement of Work, in solicitations and contracts when a cost-reimbursement construction contract is contemplated.

236.573-2 Estimated cost, performance period.

The contracting officer shall insert the clause at 252.236-7015, Estimated Cost, Performance Period, in solicitations and contracts when a cost-reimbursement construction contract is contemplated.

236.573-3 Direct payments.

The contracting officer shall insert the clause at 252.236-7016, Direct Payments, in solicitations and contracts when a cost-reimbursement construction contract is contemplated.

236.573-4 Approved construction plant.

The contracting officer shall insert the clause at 252.236-7017, Approved Construction Plant, in solicitations and constracts when a cost-reimbursement construction contract is contemplated.

236.573-5 Insurance.

The contracting officer shall insert the clause prescribed at 228.311-70 in solicitations and contracts when a cost reimbursement construction contract is contemplated.

236.574 Option for supervision and inspection services.

The contracting officer shall insert the clause at 252.236-7018, Option for Supervision and Inspection Services, in solicitations and contracts when a fixed-price architect-engineer contract is contemplated, and supervision and inspection services by the architect-engineer during construction are contemplated. The details of such services must be set out in Appendix A of the contract.

236.575 Notice and approval of restricted designs.

The contracting officer is authorized to insert the clause at 252.236-7019, Notice and Approval of Restricted Designs, in solicitations and contracts when a fixed-price architect-engineer contract is contemplated in accordance with 236.7202-6.

236.576 Patent indemnity.

The contracting officer shall insert the clause at 252.236-7050(a), Patent Indemnity, in accordance with 236.7202-3(a), and the clause at 252.236-7050(b), Items Excluded from Patent Indemnity, in accordance with 236.7202-3(b).

236.577 Rights in shop drawings.

The contracting officer shall insert the clause at 252.236-7051, Rights in Shop Drawings, in accordance with 236.7205-1(b).

236.578 Architectural designs and data-government rights.

The contracting officer shall insert the clause at 252.236-7052(a), Government Rights (Unlimited), in accordance with 236.7205-1(a), or the clause at 252.236-7052(b), Drawings and Other Data to Become Property of Government, in accordance with 236.7203(c) and 236.7205-1(a)(2).

236.580 Solicitation provisions.

This section prescribes additional solicitation provisions applicable only to construction contracting.

236.580-1 Cost limitations.

The contracting officer shall insert the provision at 252.236-7081, Cost Limitations, if the solicitation contains one or more items subject to statutory cost limitations, except when a waiver has been granted pursuant to FAR 36.205.

236.580-2 Additive or deductive items.

The contracting officer shall insert the provision at 252.236-7082, Additive or Deductive Items, under the conditions set forth at 236.303(S-70).

Subpart 236.6—Architect-Engineer Services

236.602 Selection of firms for architect-engineer contracts.

236.602-1 Selection criteria.

(a)(6) The volume of work previously awarded to the firm by the Department of Defense shall also be considered, with the object of effecting an equitable distribution of Department of Defense architect-engineer contracts among qualified architect-engineer firms, including small and small disadvantaged business firms, and firms that have not had prior Department of Defense contracts.

(S-70) For contracts estimated to cost more than $2,500, criteria which will be used to evaluate the qualifications of the architect-engineer firms to be considered should be established in advance. In addition to the general considerations listed in FAR 36.601, the criteria should be specific as to desired qualifications, size and expertise of staff, required past experience, and, as appropriate, esthetic considerations, special conceptual or design elements, and related factors. The information contained in the DD Form 1391 for the construction project, if applicable, should be used in preparing the criteria. The criteria shall be set forth in the public announcement as required by FAR 5.20.

236.602-2 Evaluation boards.

(a) Preselection boards are authorized. A preselection list of the maximum practicable number of qualified firms shall be prepared by a preselection board from data described in FAR 36.603 and other pertinent information which may be available, and the list shall be approved by the head of the construction activity, or his designee. Preparation of preselection lists for contracts estimated to cost more than $10,000, and selections for contracts estimated to cost more than $2,500, shall be accomplished by formally constituted boards consisting of at least three members.

236.602-4 Selection authority.

(a) All selection actions, including preselection, shall be under the cognizance of the construction activity responsible for the work.

(c) Approval authorities shall not add firms to any selection report. If the firms on a submitted selection report are deemed to be unqualified or the list is considered inadequate for other reasons, the approval authority shall record the reasons and return the report through channels to the preselection board for the preparation of a revised report. However, the finding that certain firms on the selection report are unqualified shall not preclude approval of the report provided that a minimum of three firms remain. In such cases the reasons for finding a firm or firms unqualified shall be recorded and reports may be approved with respect to the three or more qualified firms remaining.

(S-70) *Special approval of selections.* Special approval shall be required for certain selections as indicated below:

(1) When the estimated cost of a contract to be awarded by a field activity exceeds $200,000, the selection shall require the approval of the next higher organizational level of the construction activity;

(2) When a firm, to which a field contracting office has previously awarded contracts totaling over $200,000 during the current calendar year, has been selected for an additional award to be made by the same contracting office, the selection shall require, prior to negotiation with the firm, the approval

of the next higher organizational level of the construction activity;

(3) When a selection is made by the Army Corps of Engineers, the Naval Facilities Engineering Command, or the Air Force Directorate of Civil Engineering for a contract whose estimated cost is $500,000 or more, the selection shall require the approval of the Chief of Engineers, the Commander, Naval. Facilities Engineering Command, or the Director of Civil Engineering, respectively, or their designees;

(4) When supplemental work to be added to an existing contract will bring the total contract cost to any of the various levels of approval noted above, the selection for such work shall require approval as indicated for the appropriate level (such approval is not required for supplemental work accomplished pursuant to the Changes clause of the contract); and

(5) When approval of a selection for a contract has been obtained at a particular approval level, further approval shall not be required for the selection of the same firm to accomplish supplemental work under that contract, unless the total cost of the basic contract plus all supplemental work is an amount requiring approval of the selection at the next higher approval level.

236.604 Performance evaluation.

(a) *Preparation of performance reports.*

(1) For each contract over $10,000 awarded, a performance evaluation report shall be prepared by the cognizant construction activity. Such reports may also be prepared for contracts of lesser amounts. For contracts of over $10,000, the construction activity shall distribute the SF 1421 to all other offices within the region or geographical area as listed in the book, "How to Obtain Consideration for Architect-Engineer Contracts with the Department of Defense," and to the Washington, D.C. Headquarters of their respective construction activities. The SF 1421 shall be filed and utilized in a manner similar to the qualifications data (Standard Form 254).

(c) *Distribution and use of performance reports.* For the purposes of receiving and distributing architect-engineer qualification and performance data, the United States is divided into regions, and the rest of the world into general geographic areas. These regions and areas are described and delineated in a booklet entitled, "How to Obtain Consideration for Architect-Engineer Contracts with the Department of Defense," which is published by the Office of the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics) and is available from the Superintendent of Documents, Government Printing Office, Washington, DC 20402, or from DoD construction activities.

236.605 Government cost estimate for architect-engineer work.

(a) An independent Government estimate of the cost of architect-engineer services shall be prepared for each proposed contract or contract modification expected to exceed $10,000.

236.606 Negotiatons.

(S–70) Negotiations shall be conducted with the first selected architect-engineer until a price which is fair and reasonable and not in excess of the Government estimate, revised to correct errors of fact or judgment, has been obtained. Where the negotiations result in a price in excess of the Government estimate, as revised, the contracting officer shall terminate the negotiations and request a proposal from the architect-engineer next in order of preference.

(S–71) In no event shall a contract for architect-engineer services for the preparation designs, plans, drawings and specifications exceed the statutory limitation of six percent (6%) of the estimated construction costs of the project. If the contract also covers any other type services than the preparation of designs, plans, drawings and specifications, the part of the contract price for such other services shall not be subject to the six percent (6%) limitaions.

(S–72) Modifications. Where the modification involves work not initially included in the contract, the limitation on the total contract price set forth in 236.606–71 is applicable, as applied to the revised total estimated construction costs. Where redesign is required and the contract is modified, the following method shall be used to insure that the six percent (6%) statutory limitation is not exceeded:

(1) The estimated construction cost of the redesigned features will be added to the original estimated construction cost;

(2) The contract cost for the original design will be added to the contract cost for redesign; and

(3) The total contract design cost obtained by (S–72)(2) above will be divided by the total construction cost obtained by (S–72)(1) above. The resulting percentage may not exceed the six percent (6%) statutory limitation.

Subpart 236.70—Construction in Foreign Countries

236.7001 General.

Construction in foreign countries includes construction anywhere outside the United States, its possessions and Puerto Rico. In contracts which are entered into with foreign contractors or are for performance in foreign countries, the term "United States" will appear before the word "Government."

236.7002 Technical agreements.

When construction is contemplated in a foreign country, the Office of the Chief of Engineers, Department of the Army, or the Naval Engineering Facilities Command, Department of the Navy, as appropriate, should be invited to participate in the negotiations of any technical working agreement with a foreign government concerning the construction. This agreement negotiated between appropriate officials of the United States and the foreign government should, to the extent feasible and where not otherwise provided for in other agreements, cover all elements necessary for the construction required by the laws, regulations and customs of the United States and the foreign government relating to:

(a) The acquisition of all necessary rights;

(b) The expeditious, duty free importation of labor, material and equipment;

(c) The payment of taxes applicable to contractors, personnel, materials and equipment;

(d) The applicability of workmen's compensation laws and other labor laws to citizens of the United States, citizens of the host country and citizens of other countries;

(e) The provisions of utility services;

(f) The disposition of surplus materials and equipment;

(g) The handling of claims and litigation; and

(h) Any other problems which can be foreseen and appropriately resolved by such agreement.

236.7003 Labor laws of host country.

Contractors shall comply with the applicable labor laws of the host country. Exemption from such laws shall be sought by means of treaty, executive agreement or express authorization from proper officials, where compliance with the laws is impractical or serves no useful purpose.

Subpart 236.71—Termination of Contracts

236.7100 Scope.

This subpart sets forth policies and instructions unique to construction and architect-engineer contracts relating to termination of such contracts through default or for the convenience of the Government.

236.7101 Contractor inventory.

This subpart and FAR 45.6 cover the disposition of all contractor inventory generated under construction and architect-engineer contracts. It applies to termination inventory and to any other inventory which is:

(a) Excess because of a contract modification; or

(b) Excess under a price revision type contract; and the cost thereof is included in the contractor's claim for an equitable adjustment or revision in price. It also applies to all property which is excess to the requirements of a cost-reimbursement type contract and includes excess Government-furnished property under any type contract.

236.7101-1 Inventory schedules.

In addition to the requirements contained in FAR 45.606, construction equipment shall be submitted on separate schedules.

236.7101-2 Allocability of contractor-acquired property on inventory schedules.

It is the responsibility of the contracting officer to determine that all property listed on inventory schedules is qualitatively and quantitatively allocable to the terminated contract or the terminated portion thereof, taking into consideration any work in place. Also, where applicable, the contracting officer must determine that the difference between the cost of allocable property on the inventory schedules and the total cost of property included in the settlement has been incorporated in the work or consumed in the performance thereof.

236.7101-3 Contractor's certificate-property incorporated in work.

Each contractor whose settlement proposal includes the cost of property (materials, etc.) incorporated into the work shall execute a certificate to the effect that all property not accounted for on the inventory schedules has been incorporated into the work or consumed in the performance thereof.

236.7101-4 Inventory at construction site.

Every effort will be made by the contracting officer to relieve the contractor, as promptly as possible, of the responsibility for the preservation and protection of termination inventory located at the construction site. Property, including construction equipment, which is not to be included on inventory schedules shall be removed by the contractor as promptly as possible.

236.7101-5 Screening of contractor inventory.

Inventories of construction materials and equipment shall be screened in accordance with FAR 45.608 in the Army, by the Corps of Engineers; in the Navy, by the Naval Facilities Engineering Command; and in the Air Force, by the Director, Civil Engineering.

Subpart 236.72—Patents, Data, and Copyright

236.7200 Scope.

This subpart sets forth policies, instructions, and contract clauses pertaining to patents, data, and copyrights unique to the procurement of construction and architect-engineer services. The provisions of FAR Part 27 as they relate to supplies are applicable when the procurement is of construction materials or supplies as such, as distinguished from construction as defined in FAR 36.102. Similarly, the provisions of FAR Part 27 as they relate to research and development apply when one of the purposes of the procurement is experimental, developmental or research work, or test and evaluation studies of structures, equipment, processes, or materials for use in construction. When the proposed contract calls for either (a) experimental, developmental, or research work, or (b) supplies and materials, in addition to either construction or architect-engineer work, the pertinent provisions of FAR Part 27 shall be added to the contract pursuant to instructions contained in this subpart. In such cases, the contract shall indicate clearly which of the clauses apply only to the experimental, developmental, or research work, or to the supplies and materials being procured, and which apply only to the construction or architect-engineer work.

236.7201 Authorization and consent.

The Authorization and Consent clause shall be included in all contracts for construction materials or supplies and in all construction contracts, except when both complete performance and delivery (if any) are to be accomplished outside the United States, its possessions, or Puerto Rico. Normally, an authorization and consent clause shall not be included in an architect-engineer contract; however, the clause shall be included in architect-engineer contracts which require the delivery of models, samples, or other products, or which may require the use of patented devices or processes to test or perform any part of the work, under the architect-engineer contract, except where the contract is to be performed wholly outside the United States, its possessions, or Puerto Rico.

236.7202 Patent indemnification of Government by contractor.

236.7202-1 General.

A patent indemnity clause shall not be included in contracts calling solely for architect-engineer or experimental, developmental, or research work in the field of construction.

236.7202-2 Patent indemnity clauses in supply contracts.

The clauses required by FAR Part 27 relating to the procurement of supplies are applicable when the procurement is solely for construction materials or supplies.

236.7202-3 Patent indemnity clause in construction contracts.

(a) Except when performance is to be accomplished outside the United States, its possessions, and Puerto Rico, all contracts in excess of $25,000 calling for "construction" shall contain the clause at 252.236-7050(a).

(b) If it is determined that the construction will necessarily involve the use of structures, products, materials, equipment, processes, or methods which are nonstandard, noncommercial or special, the contract may list them in the specifications and may expressly exclude them from the patent indemnification by inserting in the contract the clause at 252.236-7050(b).

236.7202-4 Waiver of indemnity by the Government.

Exemption of specific patents from the patent indemnity provisions of the clauses prescribed in 236.7202-2 and 236.7202-3(a) shall be made only upon the authorization of the Secretary concerned or his authorized representative.

236.7202-5 Notice and assistance.

Subject to the prohibitions of FAR Part 27, all contracts calling for construction work shall include the Notice and Assistance Regarding Patent and Copyright Infringement clause.

236.7202-6 Approval of restricted designs.

Specifications for construction should allow for maximum latitude in the use of various types of commercially available products, materials, equipment or processes which will meet objective

Government requirements. However, Government requirements may necessitate, or the architect-engineer may contemplate the use of structures, products, materials, equipment or processes which are available only from a sole source. In such event the architect-engineer should report to the contracting officer the items known to him to be sole source, and the reasons therefore, and advise the contracting officer of the extent to which such items are considered necessary to meet the Government's requirements. This will make possible timely planning and arrangements for the use of sole-source items, or where appropriate, consideration of alternate items. This procedure is not intended to restrict the use of patented or copyrighted items, but is meant to give the Government an opportunity to consider whether the specifications being drawn by the architect-engineer, in regard to any one item, are unnecessarily restricted, according to objective Government requirements, to a single sole item. The procedure is primarily for use in instances where the proposed design is expected to be conventional or standard and where the design may be used in subsequent procurements. For this purpose, the clause in 252.236–7019 may be inserted in architect-engineer contracts.

236.7203 Patent rights.

(a) Any construction or architect-engineer contract which calls for or can be expected to involve the design, for use in the construction or operation of a Government facility, or novel structures, machines, products, materials, processes, or equipment, and any contract having as one of its purposes the performance of experimental, developmental, or research work or test and evaluation studies involving such work should include a patent rights clause in accordance with the policy and guidance of FAR Part 27.

(b) Any construction or architect-engineer contract which calls for or can be expected to involve only standard types of construction to be built by previously developed equipment, methods, and processes shall not include a patent rights clause. The term "standard types of construction" as used herein means construction in which the distinctive features, if any, in all likelihood will amount to no more than:

(1) Variations in size, shape or capacity of otherwise structurally orthodox and conventionally acting single structural members or multi-member structural groupings; or

(2) Purely artistic or esthetic (as distinguished from functionally significant) architectural configurations and designs of both structural and nonstructural members or groupings, which may or may not be sufficiently novel or meritorious to qualify for protection under the design patent or copyright laws. Rights of the Government in and to any such distinctive design or copyright features, as distinguished from inventions of a mechanical or functional nature resulting from an architect-engineer contract or from a contract for construction involving architect-engineer services are provided for in the clause at 252.236–7052(b) entitled, "Drawings and Other Data to Become Property of Government."

(c) Construction and architect-engineer contracts which require the development of novel structures, machines, products, equipment, materials or processes shall include the clause in 252.236–7052(b) in addition to the appropriate "Patent Rights" clause prescribed by FAR Part 27.

236.7204 Patent royalties.

The provisions of FAR Part 27, Concerning Patent Royalties are applicable to contracts for construction or construction supplies.

236.7205 Acquisition and use of plans, specifications and drawings.

236.7205–1 Architectural designs and data clauses for architect-engineer or construction contracts.

(a) *Plans and specifications and as-built drawings.*

(1) Except as provided in (a) (2) below, insert the "Government Rights (Unlimited)" clause in 252.236–7052(a) in contracts calling for architect-engineer services or in contracts for construction involving architect-engineer services.

(2) When the purpose of a contract for architect-engineer services or for construction involving architect-engineer services is to obtain a unique architectural design of a building, a monument, or construction of similar nature, which for artistic, esthetic or other special reasons the Government does not want duplicated by anyone else, the Government may desire to acquire exclusive control of the data pertaining to such design. In those cases only where the contracting officer determines for the foregoing reasons that it is desirable to maintain exclusive control over the design and data, the "Drawings and Other Data to Become Property of Government" clause shall be used. If the contract is for architect-engineer services, the "Government Rights (Unlimited)" clause at 252.236–7052(a) shall be deleted and the clause at 252.236–7052(b) substituted therefor. If the contract is for construction involving architect-engineer services, the clause in 252.236–7052(b) shall be included.

(b) *Shop drawings for construction.* In procuring shop drawings for construction, the Govenment shall obtain the unlimited rught to use and reproduce such drawings, but shall not exclude a similar right in the designer or others. Accordingly, in contracts calling for delivery of such drawings, insert the clause in 252.236–7051.

236.7205–2 Data clauses for construction supplies and research and development.

The provisions of FAR Part 27, relating to the acquisition of data and rights therein in connection with the procurement of supplies and materials and research and development are applicable where the procurement is confined to either construction supplies and materials or experimental, developmental, or research work, or both. In some circumstances the right to use such data, including drawings, may be limited in accordance with appropriate paragraphs of FAR Part 27.

236.7205–3 Mixed contracts.

Where the proposed contract calls for either (a) experimental, developmental, or research work, (b) supplies and materials, or (c) both, in addition to either construction or architect-engineer work, the pertinent clauses prescribed by FAR Part 27, shall be included in the contract, in addition to the appropriate clause or clauses prescribed by 236.7205–1. In such cases, the contract shall indicate clearly that the clauses prescribed by FAR Part 27, apply only to the experimental, developmental, or research work, or only to the supplies and materials being procured, or to both, and that the appropriate clause or clauses prescribed by 236.7205–1 apply only to the construction or archtect-engineer work.

PART 237—SERVICE CONTRACTING

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 237.1—Service Contracts-General

237.104 Personal services contracts.

(b) Also see 237.104(S–70)(b) for additional authority required by Defense activities for use of 5 U.S.C. 3109.

(S–70) Procurement of the personal services of experts or consultants.

(a) *Scope.* This subsection sets forth policy and procedures for the procurement by contract, pursuant to 5 U.S.C. 3109, of the personal services of

individual experts or consultants (including stenographic reporting services) from individuals and from firms, regardless of the terms of contract arrangements or whether with an individual expert or consultant or a firm employing such individuals. This subsection does not govern employment of individual experts or consultants by excepted appointment: the requirements for such employment are set forth in the Federal Personnel Manual, Chapter 304, "Employment of Experts and Consultants" and the regulations of the respective Departments. In addition, this subsection does not govern policy and procedures for advisory committees and their membership; the requirements for advisory committees are set forth in OMB Circular A–63, "Review of Federal Advisory Committees". Expert or consultant services as used in this subsection involve personal services contracts issued pursuant to 5 U.S.C. 3109 and may also involve "consulting" services subject to FAR 37.2 and 237.270 of this supplement.

(b) *Statutory authority.*

(1) Authority for the procurement by contract of the personal services of experts and consultants is found in 5 U.S.C. 3109, as implemented by annual appropriation acts or by other legislation. Most contracts for expert or consultant services are executed by the Departments pursuant to the authority contained in the General Provisions of the Annual Department of Defense Appropriation Act.

(i) 5 U.S.C. 3109 provides:

(a) For the purpose of this section—

(1) "agency" has the meaning given it by section 5721 of this title; and

(2) "appropriation" includes funds made available by statute under section 849 of title 31.

(b) When authorized by an appropriation or other statute, the head of an agency may procure by contract the temporary (not in excess of 1 year) or intermittent services of experts or consultants or an organization thereof, including stenographic reporting services. Services procured under this section are without regard to—

(1) the provisions of this title governing appointment in the competitive service;

(2) Chapter 51 and subchapter III of chapter 53 of this title; and

(3) Section 5 of title 41, except in the case of stenographic reporting services by an organization. However, an agency subject to chapter 51 of subchapter III of chapter 53 of this title may pay a rate for services under this section in excess of the daily equivalent of the highest rate payable under section 5332 of this title only when specifically authorized the procurement of the services.

(ii) Typical of the language which is enacted each year in the General Provisions of the Department of Defense Appropriation Act implementing 5 U.S.C. 3109 in Section 703 of the Act of December 21, 1979 (Pub. L. 96–154; 93 Stat. 1139), which provides:

During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with Section 3109 of Title 5, United States Code, under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty stations and return as may be authorized by law: Provided, that such contracts may be renewed annually.

(2) Contracts with individuals or firms for the personal services of experts or consultants are usually negotiated, normally under the authority of 10 U.S.C. 2304(a)(4), as implemented by FAR 15–204.

(c) *Definition of experts and consultants.*

(1) The terms "experts" and "consultants" shall include those persons who are exceptionally qualified, by education or by experience, in a particular field to perform some specialized service. For the purpose of this subsection, an "expert" is an individual who is a recognized professional or highly skilled practitioner normally used to perform an operation function rather than to provide advisory or consulting services. A "consultant" is an individual who primarily serves in an advisory capacity in a particular field, rather than in the performance or supervision of an operating function (or functions). Depending on how they are used individuals may be either experts or consultants.

(2) Stenographic reporting services by individuals is included in the term "expert or consultant services" for purposes of procurement by contract under this subsection.

(d) *Policy.* The proper use of experts and consultants is a legitimate and economical way to improve Government services and operations. Activities of the Departments can be strengthened by utilizing the highly specialized knowledge and skills of such individuals. However, the personal services of experts and consultants shall not be used to perform duties which can be performed by regular employees, to fill positions which call for full-time continuing employees, or to circumvent competitive civil service procedures and Classification Act pay limits.

(e) *Limitations on use of expert or consultant authority.* Obtaining the personal services of individual experts or consultants by contract, pursuant to 5 U.S.C. 3109, is subject to the following limitations:

(1) The employment of individual experts or consultants shall be by contract only when the services required cannot be obtained by excepted appointment in accordance with personnel regulations.

(2) The nature of the duties to be performed must be temporary (not more than one year) or intermittent (not cumulatively more than 130 days in one year). Accordingly, no contract shall be entered into for longer than one year at a time.

(3) Procurement of the services must be advantageous to the national defense.

(4) Such services shall not be used when existing facilities of the particular Department are adequate or when personnel with the necessary skills can be obtained through normal civil service appointment procedures.

(5) Procurement of such services by contract shall not be used as a means of circumventing manpower space ceilings.

(6) Preference shall not be given to former Government employees per se.

(7) Consultant services shall not under any circumstances be used to specifically aid in influencing or enacting legislation.

(f) *Contracts crossing fiscal years.* Because the implementing appropriation act authorizing the procurement of expert and consultant services expires and must be renewed each fiscal year—even in cases where funds could properly be obligated to a contract calling for services in parts of two fiscal years—unless it calls for an end product which cannot feasibly be subdivided for separate performances in each fiscal year. No contract shall cross fiscal years unless authorized to do so in accordance with 237.104(S–70)(g). This paragraph shall apply equally to personal services contracts with individuals and with firms.

(g) *Authorization to enter into contracts: "Determinations and findings".*

(1) All contracts to be entered into pursuant to 5 U.S.C. 3109 for the personal services of experts or consultants must be authorized in writing by a Determinations and Findings (D&F) signed in accordance with Departmental regulations. Ordinarily each contract shall be separately authorized. However, when the determinations can appropriately be made with respect to a class of

contracts, the authorizing official may issue blanket authority for that class of contracts by signing a class D&F.

(2) Each D&F shall authorize a contract or class of contracts to be entered into during a stated period not to exceed one year, which ordinarily shall be within one fiscal year. A D&F may be issued during one fiscal year to authorize a contract or class of contracts to be entered into during the following fiscal year, provided the determinations are reasonably expected to hold true at the time the contract or contracts are to be entered into and provided that either the D&F is made contingent upon enactment of implementing legislation or implementing legislation of the next fiscal year has already been enacted.

(3) Each D&F shall contain the following:

(i) A brief description of the services authorized to be procured, including for individual D&Fs the estimated time of performance and the estimated cost;

(ii) A determination by the authorizing official with respect to the particular contract or class of contracts that:

(A) The duties to be performed are of a temporary or intermittent nature;

(B) Procurement of the services is advantageous to the national defense;

(C) The existing facilities of his Department are inadequate to furnish the services;

(D) It is not feasible to obtain personnel with the necessary skills through normal civil service appointment procedures;

(E) A nonpersonal services contract is not practicable; and,

(F) Any other determination required by applicable statutes has been made;

(iii) A citation of statutory authority, namely 5 U.S.C. 3109 and (except where (g)(3)(vii) below, is applicable) appropriate implementing legislation; the latter may be the current annual Department of Defense Appropriation Act, a current temporary Department of Defense appropriation enactment, or other appropriate legislation;

(iv) A grant of authority to procure the required services and, if desired, to extend the contract;

(v) The condition that the necessary funds must be available for obligation;

(vi) The condition that no contract may be entered into for longer than one year at a time;

(vii) An added condition, in cases where the D&F covers a period for which implementing legislation has not yet been enacted, that at the time the procurement is entered into there must be in effect a law authorizing the procurement pursuant to 5 U.S.C. 3109 and requiring no further Secretarial action than that required by the implementing legislation current at the time the D&F is issued;

(viii) Where appropriate, authorization to contract across fiscal years (see 237.104(S–70)(f)), and in such cases, where the implementing authority cited is annual legislation, an added condition that in the event the implementing authority is not renewed for the following fiscal year the contracting officer shall terminate the contract in accordance with its terms; and

(ix) The date of expiration of the authority granted by the D&F.

(h) *Requests for determinations and findings.* Requests for authorization to procure the personal services of experts or consultants, pursuant to 5 U.S.C. 3109, whether from individuals or from firms, must contain statements required by Departmental regulations to support the determinations. The responsibilities of the various organizational levels in the Departments with respect to requests for D&Fs are also set forth in Departmental regulations.

(i) *Contracts with individual experts or consultants.*

(1) *Method and amount of payment.* The contract may provide for compensation at rate for time actually worked (e.g., amount per day, per week, per month, etc.) or it may provide for performance of a specific task at a fixed price, or it may provide for nominal compensation. The amount or rate of payment will be determined on a case-by-case basis, taking into account (among any other relevant factors) the relative importance of the duties to be performed, the stature of the individual in his specialized field, comparable pay positions under the Classification Act or other Federal pay systems, rates paid by private employers, and rates previously paid other experts or consultants for similar work. Compensation for personal services is subject to the limitation in 237.104(S–70)(1).

(2) *Benefits.* When an individual expert or consultant is furnishing personal services and the contract provides for a regularly scheduled tour of duty during each administrative work week, the contract shall also provide that the contractor will be accorded the same paid annual and sick leave benefits as those to which he would be entitled under Departmental personnel regulations if he were employed by excepted appointment during the period of the contract. The contract may also provide for similar benefits (e.g., paid holidays, paid administrative leave), but these shall in no event exceed those to which the individual would be entitled under excepted appointment. No benefits shall be accorded the contractor which are not specifically provided for in the written contract. The contracting officer shall effect necessary coordination with the cognizant civilian personnel office.

(3) *Taxes.* When the individual is to render personal services, the compensation generally is subject to FICA (Social Security), FUTA (Unemployment), and federal income witholding tax. It may also be necessary to report or withhold state income tax under 5 U.S.C. 84b. The contracting officer shall take appropriate steps in coordination with the cognizant civilian personnel office to have deductions and reports made where required by law.

(4) *Conflict of interest.* The contracting officer shall ensure that individual experts or consultants who are to render personal services under contract familiarize themselves with Executive Order 11222, May 8, 1965, "Prescribing Standards of Ethical Conduct for Government Officers and Employees", 30 FR 6469 (1965), and that they comply with it and with Departmental regulations implementing it.

(5) *Administrative treatments.* Individual experts or consultants who are to render personal services under contract are charged against personnel ceilings in the same way as experts and consultants employed by excepted appointment. Also, the cognizant civilian personnel office must maintain certain records on individual experts and consultants who render personal services. Therefore, the contracting officer shall effect necessary coordination with the coginzant civilian personnel office before award of a contract for personal services and may also designate the appropriate personnel office as his representative for the purpose of administering contract provisions relating to benefits, obtaining necessary data from contractor for tax withholding purposes, and administering applicable conflict of interest provisions.

(j) *Contracts with firms for expert or consultant services.* When contracts with firms for the services of specified individual experts or consultants are considered to be personal services contracts (see FAR 37.104), payment for the services of each expert or consultant is subject to the guidelines in 237.104(S–70)(i) and the limitations in 237.104(S–70)(e). Contracts with firms for consulting or other management support services, where those services are nonpersonal in nature, are not entered into pursuant to the authority of this subsection and should not specifically address individual compensation by the firm or with any other rights or

obligations as between the firm and these individuals, but should deal only with rights and obligations as between the Government and the firm.

(k) *Contracts for stenographic reporting services.*

(1) Stenographic reporting services normally are provided by regular civilian employees appointed under the usual civil service procedures. However, under certain circumstances these services may be procured by contract from individuals or firms (pursuant to 5 U.S.C. 3109, if personal) as where there are variable requirements or insufficient qualified personnel, and necessity or economy to the Government demand.

(2) Such contracts shall normally be written on an end-product basis and payment made according to delivered items (e.g., number of copies of transcript, words per page, etc.), and the contractor ordinarily shall be required to furnish the necessary materials (typewriter, paper, bindings, etc.).

(3) Contracts for stenographic reporting services may be considered to be for nonpersonal services, and therefore not subject to the provisions of this subsection, *provided* that:

(i) They are written in accordance with (b) above;

(ii) They do not involve ordinary, day-to-day stenographic or secretarial services;

(iii) They do not involve direct or indirect Government supervision of contractor employees; and

(iv) They involve temporary or intermittent requirements.

(l) *Limitation on payment for personal services.*

(1) When the personal services of individual experts or consultants are being procured pursuant to 5 U.S.C. 3109, payment of the services of each expert or consultants shall not exceed the highest rate fixed by the Classification Act pay schedule for grade GS–15-or, in the case of professional engineering services primarily involving research and development or professional services involving physical or natural sciences or medicine, the highest rate payable to a GS–18. In addition, the contract may provide for such per diem and travel expenses as would be authorized for a Government employee, including actual transportation and per diem in lieu of subsistence while the expert or consultant is traveling between his home or place of business and his official duty station.

(2) If a fixed-price contract which is predominantly for nonpersonal services also includes personal services, the requirements of (a) above are applicable to the personal services if it is feasible and practicable to price them separately.

(m) *Modification of contracts.* When supplemental agreements or change orders are required which substantially change the basis upon which the D&F was made, such as to revise substantially the scope of work or time limitations, or to apply additional funds, authorization shall be requested in the same way as authorization to procure the services by contract in the first place.

(n) *Extension of contracts.*

(1) A contract may provide for extension for a maximum of one year each time-by written notification to the contractor from the contracting officer.

(2) A contract shall not be extened unless either a new D&F has been issued, or the D&F authorizing the original contract (or a prior extension) has not yet expired and specifically authorizes the extension, or an unexpired class D&F covering that type of contract is in effect, (also see, 237.104(S–70)(f)).

(3) Extension of a contract legally creates a new contract; therefore, extension of a contract is improper unless all the requirements and limitations of this subsection have been complied with.

237.106 Funding and term of service contracts.

Categories of service contracts funded by annual appropriations that are authorized to extend beyond the end of the fiscal year of the annual appropriation used are as follows:

(a) A one year contract for maintenance of tools or facilities if authorized under the current Department of Defense Appropriations Act;

(b) A multi-year service contract;

(c) A one-year requirements or indefinite quantity contract, as defined in FAR 16.503 and FAR 16.504, in which any specified minimum quantities are certain to be ordered in the fiscal year current at the beginning of the contract term (but see FAR 32.705–1(b)); or

(d) A contract for the personal services of experts or consultants entered into in accordance with 237.104(S–70), or a contract for educational services, which cannot feasibly be subdivided for separate performance in each fiscal year.

Subpart 237.2—Consulting Services

237.204 Policy.

(S–70) For personal services contracts for or with individual consultants the requirements of 237.104(S–70) apply.

(S–71) For proposed contracts to be awarded as a result of an unsolicited proposal, the limitations of 215.507(b)(S–70) apply.

237.205 Management controls.

237.205–70 Responsibilities of the contracting officer.

(a) The contracting officer is also responsible, in coordination with the requiring/sponsoring activitiy, for determining whether a proposed contract requirement regardless of dollar value, is for services as defined in 237.270 of this document. The contracting officer's determination shall be final. In this regard the contracting officer, in coordination with the sponsor and the supporting comptroller, should assure that funds provided are proper to the category of service required.

(b) Prior to issuing any solicitation for the services covered by 237.270, the contracting officer shall assure that the applicable provisions of this part have been adhered to and that documentation required is complete and included in the official contract file.

(c) The contracting officer shall assure that the following written evaluations are included in each contract file (these evaluations shall normally be prepared by the sponsoring/requiring activity), when services as defined in FAR 37.201 or 237.270 herein are acquired:

(1) An evaluation discussing the timeliness and quality of performance and the contractor's compliance with the statement of work and terms of the contract, and;

(2) At contract completion, an evaluation documenting the use made of the services or products obtained and their value to the sponsoring organization.

(d) The contracting officer is responsible for timely and accurate reporting of contract actions for services described in this subpart. Contract awards for consulting services are reported on DD Form 350 under Item B9 as well in Item B8A.

237.205–71 Departmental procedures.

(a) Departments shall ensure that for all contract actions for services defined in FAR 37.201 and 237.270 of this supplement:

(1) Each requirement is appropriate; fully justified in writing; does not unnecessarily duplicate any previously performed work or services; and is approved in advance in accordance with (b) below and Departmental procedures.

(2) Work statements are specific and complete to the maximum extent practicable, and specify a fixed period

of performance of the services to be provided;

(3) Contracts are competitively awarded to the maximum extent practicable to ensure that prices are reasonable (see 215.507(b)(S–70) with regard to proposed contracts resulting from unsolicited proposals);

(4) Appropriate disclosure is required of, and warning provisions are given to, prospective contractors to avoid conflicts of interest;

(5) Contracts are properly administered and monitored to ensure that performance is satisfactory;

(6) Contract reports prominently display on the cover of the report the following information:

(i) Name and business address of the contractor;

(ii) Contract number;

(iii) Contract dollar amount;

(iv) A statement as to whether the contract was competitively or non-competitively awarded; and,

(v) Name of the sponsoring individual in the agency and his/her office identification and location; and

(7) The sponsoring element, at contract completion, documents the use made of the services or products obtained and their value to the sponsoring organization.

(b) Departments shall further ensure that the approval of the need for the use of the services defined in FAR 37.201 and 237.270 is based on the policy and guidelines contained in this section, and that, for actions greater than $50,000 the approval authority is not below the SES manager or General or Flag Officer level, except when 0–6 personnel are filling such command or management positions or have subordinate SES personnel.

237.270 Studies and analyses and professional and management services.

(a) *Definitions.*

"Professional and Management Services" means services of a "white collar" professional nature, e.g., preparation of reports or documentation, software development, development of logistics support plans, and other similar tasks, in support of management and control of programs.

"Studies and Analyses" means the broad class of intellectual activities characterized by the application of the tools of analysis to address a wide range of problems. Studies are analytic examinations used to support DoD decision-makers and activities. Studies contribute to greater understanding of relevant issues and provide one means for addressing those matters facing the Department of Defense. Studies and support of studies include development of data bases, models, and methodologies. Results of studies are documented products including oral and written briefings, formal reports, and computer products. Excluded from the scope of this definition are the following categories:

(i) Basic and applied research, development, and technology demonstrations;

(ii) Architect and engineering studies related to construction projects;

(iii) Value engineering;

(iv) System fabrication;

(v) System test;

(vi) Operational test and evaluation;

(vii) Technology development;

(viii) Clinical medicine;

(ix) Project/program planning or monitoring;

(x) Automatic data processing services;

(xi) National Foreign Intelligence Program;

(xii) General Defense Intelligence Program.

(b) Contract awards for these services are generally reported on the DD Form 350 under FSC Code R400 or R500 series. Management and support services for research and development activities should also be recorded appropriately under these codes.

(c) The management controls stated at FAR 37.205 and 237.205–70 herein also apply to these services.

Subpart 237.3—Dismantling, Demolition, or Removal of Improvements

237.302 Bonds or other security.

If the contracting officer determines that it is in the best interest of the Government to require the contractor to furnish a performance bond or other security, the "Bid Guarantee" clause at FAR 252.228–1 and the "Bonds or Other Security" provision at 252.228–7004 shall be included in the solicitation.

237.304 Contract clauses.

(S–70) *Statement of work.* The contracting officer shall insert the clause at 252.237–7000, "Statement of Work," in solicitations and contracts for dismantling, demolition or removal of improvements in order to specify the property to be dismantled, demolished or removed, the dates of commencement and completion of the work, requirements for conditioning, handling and storing property retained by the Government, and applicable bond requirements.

(S–71) *Composition of contractor.* The contracting officer shall insert the clause at 252.236–7000, "Composition of Contractor," in solicitations and contracts for dismantling, demolition or removal of improvements to specify that if the contractor is comprised of more than one legal entity, each such entity shall be jointly and severally liable for compliance with all provisions of the contract.

(S–72) *Misplaced material:* The contracting officer shall insert the clause at 252.236–7006, "Misplaced Material," in solicitations and contracts for dismantling, demolition or removal of improvements when the contract involves work on or near navigable waterways in order to set forth the contractor's responsibility for misplaced material.

(S–73) *Identification of employees.* The contracting officer shall insert the clause at 252.236–7007, "Identification of Employees," in solicitations and contracts for dismantling, demolition or removal of improvements when necessary for security or other reasons to require the contractor to furnish employee identification.

Subpart 237.70—Engineering and Technical Services

237.7001 Definitions.

"Contractor engineering and technical services" means the furnishing of advice, instruction, and training to Department of Defense personnel, by commercial or industrial companies, in the installation, operation, and maintenance of Department of Defense weapons, equipment, and systems. This includes transmitting the knowledge necessary to develop among those Department of Defense personnel the technical skill required for installing, maintaining and operating such equipment in a high state of military readiness.

(a) *Contract Field Services (CFS)* means those engineering and technical services provided on site at defense locations by the trained and qualified engineers and technicians of commercial or industrial companies.

(b) *Contract Plant Services (CPS)* means those engineering and technical services provided by the trained and qualified engineers and technicians of a manufacturer of military equipment or components, in the manufacturer's own plants and facilities.

(3) *Field Service Representatives* means those employees of a manufacturer of military equipment or components who provide a liaison or advisory service between their company and the military users of their company's equipment or components.

237.7002 Contracting for engineering and technical services.

(a) *General.* Every contract calling for engineering and technical services, whether it calls for only those services or whether it calls for those services in connection with the furnishing of an end item, shall show those services in connection with the furnishing of an end item, shall show those services as a separate and identifiable line item separately priced. The contract shall contain definitive specifications for the services and shall show the man-months involved.

(b) *Personal services.* Notwithstanding FAR 237.104, in the event unusual requirements involving essential mission accomplishment necessitate the procurement of contract field services (CFS) which appear to be personal services, those services may be obtained by contract for an interim period if that particular procurement is specifically authorized by the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics).

Subpart 237.71—Mortuary Services

237.7100 Scope.

Acquisition procedures peculiar to contracts for mortuary services (the care of remains) of military personnel within the United States are set forth in this subpart. These procedures may be used as guidance in areas outside the United States in procuring such services for both deceased military and civilian personnel.

237.7101 Method of acquisition.

(a) *Acquisitions by requirements type contract.* By agreement among the military activities involved, one military activity in each geographical area shall contract for the estimated requirements for the care of remains for all activities in the area. Acquisition shall be by use of a requirements type contract (see FAR 16.503) when the estimated annual requirements for the individual activity concerned, or for the activities using one contract, are 10 or more. Except where negotiation is authorized under FAR Subpart 15.2, such contracts shall be formally advertised.

(b) *Acquisitions by purchase order.* Where no contract exists, such services shall be obtained by use of DD Form 1155, "Order for Supplies and Services/Request for Quotations," and DD Form 1155r, "General Provisions" (see FAR 13.5), inserting in the Schedule the clauses prescribed in 213.505–2.

(c) *Solicitation planning.* Bids or offers for annual requirements for the next fiscal year shall be solicited in sufficient time to permit award prior to the beginning of the fiscal year.

(d) *Area of performance.* Each contract for care of remains (except Port of Entry Requirements contracts) shall clearly define the geographical area covered by the contract. The area shall be determined by the activity entering into the contract in accordance with the following general guidelines. It shall be an area using political boundaries, streets, or other features as demarcation lines. Generally, this should be a size roughly equivalent to the contiguous metropolitan or municipal area enlarged to include the activities served. In the event the area of performance best suited to the needs of a particular contract is not large enough to include a carrier terminal commonly used by people within such area, the contract area of performance shall specifically state that it includes such terminal as a pickup or delivery point.

(e) *Distribution of contracts.* In addition to normal contract distribution, three copies of each contract shall be furnished to each activity authorized to use it, and two copies to each of the following:

(1) HQDA (DAAG–PED), Alexandria, VA 22331.

(2) Bureau of Medicine and Surger, Department of the Navy (MED 3134), 23nd and E Streets, NW., Washington, DC 20372.

(3) Headquarters, AFMPC/MPCCM, Randolph AFB, TX 78150.

237.7102 Schedule formats.

(a) *Schedule format for other than port, of entry requirements contracts.* Set forth below is an example of a Schedule format suitable for use in solicitations and contracts for other than port of entry requirements. The estimated quantities are only illustrative.

Item No.	Supplies, services, and [illegible]	Estimated quantity	Unit	Unit price	Amount
0001	For a [illegible] size casket, supplies and services in accordance with specifications	10.	Each.		
[illegible]	Shipping [illegible] conforming to performance testing specification requirements of the air carrier and subsequent connecting carriers.	2.	Each.		
[illegible]	For an oversized casket, supplies and [illegible] services in accordance with specifications.	4.	Each.		
[illegible]	Shipping [illegible] conforming to performance testing specification requirements of the air carrier and subsequent connecting carriers.	1.	Each.		
0005	For transportation of remains, in accordance with specifications and as provided for in paragraphs (b) and (c) of the "Area of Performance" Clause of the Contract.	200 [illegible] miles.	[illegible] mile.)		

Additional items may be added (in numerical sequence), as required.

(b) *Schedule format for port of entry requirements contracts.* Set forth below is an example of a Schedule format suitable for use in solicitations and contents for port of entry requirements. The estimated quantities are only illustrative.

Item No.	Supplies, services, and transportation	Estimated quantity	Unit	Unit price	Amount
0001	For standard size casket, supplies and services in accordance with specifications.	[illegible]	Each	.....	.....
0002	Shipping container conforming to performance testing specification requirements of the air carrier and subsequent connecting carriers.	17	Each	.....	.....
0003	For an oversized casket, supplies and services in accordance with specifications.	5	Each	.....	.....
0004	Shipping container conforming to performance testing specification requirements of the air carrier and subsequent connecting carriers.	3	Each	.....	.....
0005	For inspection and/or reprocessing of casketed remains prior to delivery to selected common carrier.	[illegible]	Each	.....	.....
0006	For transportation of remains between _____ and processing facility.	31	(Loaded trip each.)	.....	.....
0007	For transportation of remains between processing facility and selected common carrier or National Cemetery as indicated below:	.....	(Loaded trip each.)	.....	.....
	X	[illegible]		.....	.....
	Y	10		.....	.....
	Z	[illegible]		.....	.....
0008	For transportation of remains between processing facility and any point within 100 miles as designated by the contracting officer.	.....		.....	.....

Additional items may be added (in numerical sequence), as required.

237.7103 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the provision at 252.237–7100, Award to Single Bidder, in formally advertised solicitations for mortuary services contracts.

(b) The contracting officer shall insert the provision at 252.237–7101, Award to Single Offeror, in negotiated solicitations for mortuary services contracts.

(c) The contracting officer shall insert the following clauses in mortuary services solicitations and contracts except those for port of entry requirements:

(1) 252.237–7102, Requirements;

(2) 252.237–7103, Area of Performance;

(3) 252.237–7104, Specifications;

(4) 252.237–7105, Using Activities;

(5) 252.237–7106, Delivery Orders and Invoices;

(6) 252.237–7107, Delivery and Performance;

(7) 252.237–7108, Subcontracting;

(8) 252.237–7109, Additional Default Provision;

(9) 252.237–7110, Group Interment;

(10) 252.237–7111, Professional Requirements;

(11) 252.237–7112, Facility Requirements;

(12) 252.237–7113, Preparation History.

(d) Except for the "Area of Performance" and the "Facility Requirements" clauses, the contracting officer shall insert all of the clauses in (c) above, as well as the Government-Furnished Property (Short Form) clause at FAR 52.245–4 in port of entry solicitations and contracts for mortuary services.

Subpart 237.72—Laundry and Dry Cleaning Services

237.7200 Scope.

This subpart contains instructions for the preparation and use of contracts for laundry and dry cleaning services within the United States. It may be used as guidance in all other locations.

237.7201 General policy.

Except for laundry and dry cleaning services acquired under small purchase procedures, the normal method of contracting for laundry and dry cleaning services shall be by formal advertising.

237.7202 Selection of count of articles or weight (unsorted or presorted) basis.

Laundry services in support of hospitals may be acquired on the basis of (a) a count of articles or (b) by bulk weight. Acquisitions by weight may be on either a pre-sorted (bag type) or unsorted (simple bulk weight) basis. The basis of acquisition shall be at the discretion of the requiring activity in conjunction with advice of the contracting officer based on consideration of such factors as price, administrative costs, aseptic requirements, risk of contamination/cross-contamination, volume and nature of articles to be serviced. All other laundry and dry cleaning services shall be acquired on a count of articles basis.

237.7203 Schedule format.

Set forth below are examples of schedule formats suitable for use in solicitations. The estimated quantities are only illustrative.

(a) Count of articles.

Item No.		Item	Estimated quantity for contract period	Unit	Unit price	Estimated amount
		LOT I *Laundering*				
0001	Pillowcase (P)		100,000	Each		
0002	Nurses Uniform, with belt	(S) (P) (OH)*	25,000	Each		
0003	Slippers		50,000	Pair		

Item No.	Item	Estimated quantity for contract period	Unit	Unit price	Estimated amount
	LOT II *Dry Cleaning*				
0004	Curtains	500	Each		
0005	Trousers (P)	5,000	Each		
	LOT III** *Individual Laundry*				
0006	Individual bundle (26 piece)	1,000	Each		
0007	Individual bundle (13 piece)	1,000	Each		
***					

* (S)—Starched, (P)—Pressed, (OH)—Item delivered on hanger (hanger included in Unit Price), and ( ) Other instructions as required.
** Include in contracts containing the Individual Laundry clause at 252.237-7206.
*** See Subpart 204.71 for Line Item Numbering Procedures.

(b) Bulk weight (unsorted).

Item No.	Item	Estimated quantity of serviced laundry for contract period	Unit	Unit price	Estimated amount
0001	Laundry services for the items listed below *	100,000	Lb		
	*The following articles are to be serviced. Separate prices are not to be submitted for these articles:				
	Towels, hand	40,000	Lb	NSP	
	Sheets	40,000	Lb	NSP	
	Wash cloths	20,000	Lb	NSP	

(c) Bulk weight (bag type).

Item No	Item	Estimated quantity of serviced laundry for contract period	Unit	Unit price	Estimated amount
0001	BAG TYPE I (Patient items; sheets, pillow cases.)	200,000	Lb		
0002	BAG TYPE II (Terry Type: Towels, wash cloths.)	100,000	Lb		
0003	BAG TYPE III (Surgical items: masks, caps, shirts.)	80,000	Lb		
0004	BAG TYPE IV CONTAMINATED (May include any or all items in above listed bag types.)	75,000	Lb		

237.7204 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert a provision similar to that set forth at 252.237-7200, Instructions to Bidders (Count of Articles), in solicitations for laundry and dry cleaning services when such services are to be provided on a count of articles basis.

(b) The contracting officer shall insert a provision similar to that set forth at 252.237-7201, Instructions to Bidders (Bulk Weight), in solicitations for laundry services when such services are to be provided on a bulk weight basis.

(c)(1) The contracting officer shall insert the clause at 252.237-7202, Count of Articles, in solicitations and contracts for laundry and dry cleaning services to be provided on a count of articles basis.

(2) When laundry and dry cleaning services are to be provided to individual personnel on a count of articles basic, the contracting officer shall use the clause with its Alternate I.

(d) The contracting officer shall insert the clause at 252.237-7203, Loss or Damage (Count of Articles), in solicitations and contracts for laundry and dry cleaning services to be provided on a count of articles basis.

(e) The contracting officer shall insert the following clauses, substantially the same as the clauses prescribed below, in solicitations and contracts for laundry services to be provided on a bulk weight basis:

(1) 252.237-7204, Weight of Articles (Bag Type), for bag type laundry;

(2) 252.237-7205, Weight of Articles (Unsorted), for unsorted laundry;

(3) 252.237-7206, Loss or Damage (Weight of Articles);

(4) 252.237-7207, Maximum Weight Loss.

(f) The contracting officer shall insert the clause at 252.237-7208, Individual Laundry, in solicitations and contracts for laundry services to be provided to individual personnel.

(g) The contracting officer shall insert the clause at 252.237-7209, Special Definitions of Government Property, in solicitations and contracts for laundry and dry cleaning services.

Subpart 237.73—Educational Service Agreements

237.7300 Scope.

This subpart prescribes acquisition procedures for agreements with established schools, colleges, or universities, or other educational institutions for educational services using the institution's facilities, standard courses, and prevailing tuition and fees applicable to the general public. As used in the Part, "facilities" does not include the institution's dining rooms or dormitories. Also, as used in the subpart, "fees" does not include charges for meals or lodging. Tuition assistance agreements, i.e., payment by the Government of partial tuition under the off-duty educational program, are not included under this subpart. Except in connection with the detailing of commissioned officers to law schools pursuant to 10 U.S.C. 2004, no agreement

shall be made under this subpart which will provide for, or results in, payments of Government funds for tuition or other expenses in connection with training in any legal profession.

237.7301 Educational service agreement.

An educational service agreement is one which calls for educational services to be provided under the following conditions:

(a) The Government pays all normal tuition and fees for educational services provided to a student by the contractor under its regularly established schedule of tuition and fees applicable to all students generally; and

(b) Enrollment is at the contrator's institution under his regular rules and in courses and curricula which the institution offers to all students meeting the contractor's admission requirements, with no special courses or special fees applicable to Government students.

237.7302 Method of acquisition.

(a) An educational service agreement is not a contract, but is a continuing offer which may be accepted by the Government by the placing of requests for services. Each request for services results in a separate contract.

(b) The terms of the educational service agreement provide that requests for services are negotiated under the authority of 10 U.S.C. 2304(a)(5) when the contractor is in the United States, its possessions, or Puerto Rico, or 10 U.S.C. 2304(a)(6) if elsewhere.

237.7303 Duration.

Educational service agreements shall be for an indefinite duration and shall remain in effect until terminated. However, the issuing activity shall establish procedures to review each educational service agreement at least once each year (with due regard to the institution's academic calendar and at least 30 days before the beginning of a term) for the purpose of incorporating changes to reflect requirements of any Statute, Executive Order, or this regulation. If the parties do not agree on such required changes, the contracting officer shall terminate the agreement in accordance with its terms.

237.7304 Format and clauses for educational service agreements.

Educational service agreements authorized by this Subpart shall be on locally reproduced forms consisting of a cover page, general provisions, schedule, and signature page, in the format set forth in this paragraph. The contracting officer may add to the schedule any other provisions necessary to describe the requirements of the Department, as long as such provisions do not contradict any of the general provisions or schedule provisions prescribed by this paragraph or otherwise alter the concept of acquiring educational services in the form of standard course offerings at the prevailing rates of the institution.

(a) *Cover page.* The cover page shall contain the following provisions and necessary information to complete the provisions.

Educational Service Agreement

Agreement No. ——.

1. This agreement entered into on the — day of ————, 19—, between the United States of America, hereinafter called the "Government", represented by the Contracting Officer, and (name of institution), an educational institution located at ———— (City) ———— (State), herein after called the "Contractor", is for educational services to be provided to Government personnel at the Contractor's institution. The parties intend that the Contractor shall provide instruction with standard offerings of courses available to the public and shall receive payment for services rendered in accordance with the Contractor's schedule of tuition and fees applicable to the public and in effect at the time the services are performed.

2. This agreement may be amended only by mutual consent of the parties.

3. The Government will review this agreement annually before the anniversary of its effective date for the purpose of incorporating changes required by Statutes, Executive Orders, the Federal Acquisition Regulation, or the DoD FAR Supplement; such changes will be evidenced by a modification to this agreement or by a superseding agreement. If the parties fail to agree upon any such change, the Government will terminate this agreement.

4. This agreement shall commence on the effective date above and shall continue until terminated.

5. The estimated annual cost hereunder is $————; however, this estimate is for administrative purposes only and shall not impose any obligation on the Government to request any services or to make any payment except as provided herein.

6. Requests for services hereunder are negotiated under the authority of 10 U.S.C 2304(a)(5) when the contractor is in the United States, its possessions, or Puerto Rico, or (6) if elsewhere.

7. Advance payments are authorized by 31 U.S.C. 529i.

8. Submit invoices to: ———— (Name and Address of Activity).

9. This agreement consists of this cover page, a Schedule of ———— (number of pages) pages, General Provisions of ———— (number of pages) pages, and a Signature Page.

(b) *Schedule provisions.*

Schedule Provisions

1. *Ordering procedures and services to be provided.*

(a) The Contractor shall promptly deliver to the Contracting Officer one copy of each catalog applicable to this agreement, and one copy of any subsequent revision thereof.

(b) The Government will request educational services under this agreement by delivery to the Contractor of (insert type of request that will be used; e.g., delivery order, official Government order, or other written communication) containing the number of this agreement and designating as students at the Contractor's institution under this agreement one or more Government-selected persons who have already been accepted for admission under the Contractor's usual standards of admission.

(c) All students under this agreement shall register in the same manner, be subject to the same academic regulations, and have the same privileges, including the use of all facilities and equipment as regular non-Government students (hereinafter called civilian students).

(d) Upon enrolling each student pursuant to this agreement, the Contractor shall, where the resident or nonresident status involves a difference in tuition or fees:

(i) Determine the resident or nonresident status of the student and notify the student and the contracting officer of such determination, and if there is an appeal of such determination, process the appeal in accordance with the Contractor's standard procedures and notify the appellant of the result; and

(ii) Make the above determination a part of the student's permanent record.

(e) The Contractor shall not furnish any instruction or other services to any student pursuant to this agreement prior to the effective date of a request for such services in the form specified above.

2. *Change in curriculum.* The Contracting Officer may vary the curriculum for any student enrolled under this agreement but shall not require or make any change in any course as offered by the Contractor without the Contractor's consent.

3. *Payment.*

(a) The Government shall pay the Contractor the regularly established tuition and fees which the Contractor charges civilian students pursuing the same or similar curricula, except for any tuition and fees which this agreement specifically excludes. The Contractor shall have the right to change any tuition and fees, provided that the Contractor publishes such revisions in a catalog or otherwise publicly announces such revisions and applies them uniformly to all students pursuing the same or similar curricula as Government students enrolled under this agreement. The Contractor shall provide the Contracting Officer notice of such changes prior to their effective date.

(b) The Contractor shall not establish any tuition or fees which apply solely to Government students.

(c) If the Contractor regularly charges higher tuition and fees for students who are not residents of the state in which the Contractor is located, the Contractor may charge the Government such regularly established nonresident tuition and fees for those Government students who are in fact nonresidents. The Government shall not claim resident tuition and fees for any

student solely on the basis of his residing in the state as a consequence of enrollment under this agreement.

(d) The Contractor shall charge the Government only the tuition and fees (which may include (i) penalty fees for late registration or change of course occasioned by action of the Government and (ii) mandatory health fees and health insurance charges) which relate directly to enrollment as a student and are a consequence of his being a student. The Contractor shall not charge the Government for permit fees, such as vehicle registration or parking fees, unless specifically authorized in the request placed hereunder. In addition to the above, the Contractor shall not make any charge under this agreement for any equipment, refundable deposits, or any items or services (such as computer time) related to student research. However, any flat rate charge applicable to all students registered for research and which appears in the Contractor's publicly announced fee schedule shall be chargeable under this agreement.

(e) Normally the Contractor shall not directly charge individual students for application fees or any other fee roperly chargeable to this agreement. However, if the Contractor's standard procedures require payment of any fee before the student is enrolled under this agreement, the Contractor shall reimburse the student in full for any such fee when the Contractor receives payment therefor under this agreement.

(f) For each term in which the Contractor enrolls students under this agreement the Contractor shall submit —— copies of an invoice listing charges for each student separately. Contractors shall submit invoices within —— days after the start of the term it covers and shall include:

(i) Agreeement number and inclusive dates of the term to which the invoice applies;

(ii) Name of each student;

(iii) Schools which charge by credit hour shall list each course of each student;

(iv) The resident or nonresident status of each student (if applicable to the Contractor's school);

(v) Breakdown of charges for each student, identifying each element; e.g., Credit Hours: $———, Tuition: $———, Application Fee: $———, Labor Fee (Chem 300): $———, Contractor shall show the *total of fees for each student and grand total for all students listed on the invoice.*

(g) If unforeseen events require additional charges which are otherwise payable in accordance with the Contractor's published tuition and fee schedule, the Contractor may submit a supplemental invoice or make the adjustment on the next regular invoice under this agreement. In either case the Contractor shall clearly identify and explain the supplemental invoice or the adjustment.

(h) The Contractor shall apply to subsequent invoices submitted under this agreement any credits resulting from withdrawal of students, or from any other cause in accordance with its standard procedures. Such credits should appear on the first invoice submitted after the action resulting in such credits. If no subsequent invoice is submitted, the Contractor shall deliver to the Contracting Officer a check drawn to the order of the office designated for contract administration. Contractor shall identify the reason for the credit and the applicable term dates in all cases.

4. *Withdrawal of students.*

(a) The Government may, at its option and at any time, withdraw financial support for any student by issuing official orders. The Government shall furnish —— copies of such orders to the Contractor within a reasonable time after publication.

(b) The Contractor may request withdrawal by the Government of any student for academic or disciplinary reasons.

(c) If such withdrawal occurs prior to the end of a term, the Government shall pay any tuition and fees due for the current term in which the student may be enrolled, and the Contractor shall credit the Government with any charges eligible for refund under the Contractor's standard procedures for civilian students in effect on the effective date of such withdrawal.

(d) Withdrawal of students by the Government shall not be the basis for any special charge or claim by the Contractor other than as provided by the Contractor's standard procedures.

5. *Transcripts.* Within a reasonable period of time after withdrawal of a student for any reason, or after graduation, the Contractor shall send to the Contracting Officer (or to such other address as the Contracting Officer may specify) one copy of an official transcript showing all work by the student at the Contractor's institution until such withdrawal or graduation.

6. *Student teaching.* Awarding of fellowships and assistantships by the Contractor to students attending school under this agreement is not anticipated. In the case of graduate students, however, should both the student and the Contractor deem it to be in the best interests of the student for him to assist in the teaching program of the institution, the Contractor may provide nominal compensation for such students' part-time service in accordance with the Contractor's established practices and procedures for other students of similar accomplishment in that department or field. Such compensation shall be applied as a credit against any invoices presented for payment for any period in which he performed the part-time teaching service.

7. *Termination of agreement.*

(a) Either party may terminate this agreement by giving thirty (30) days advance written notice of the effective date of termination. In the event of termination, the Government shall have the right, at its option, to continue to receive educational services for those students already enrolled in the Contractor's institution under this agreement until such time that the students complete their courses or curricula or the Government withdraws them from the Contractor's institution. The terms and conditions of this agreement in effect on the effective date of the termination shall continue to apply to such students remaining in the Contractor's institution.

(b) Withdrawal of students pursuant to Schedule Provision 4 shall not be considered a termination within the meaning of this provision.

(c) Termination by either party shall not be the basis for any special charge or claim by the Contractor other than as provided by the Contractor's standard procedures.

(c) *General provisions.*

General Provisions

1. *Definitions.* Insert the clause at FAR 52.202–1, Definitions, with the following additional paragraphs.

(d) The word "term" means the period of time into which the Contractor divides the academic year for purposes of instruction; this includes "semester," "trimester," "quarter," or any similar word the Contractor may use.

(e) The word "course" means a series of lectures or instructions, and/or laboratory periods, relating to one specific representation of subject matter, such as Elementary College Algebra, German 401 or Surveying. Normally, student completes a course in one term and receives a certain number of semester hours credit (or equivalent) upon successful completion.

(f) The word "curriculum" means a series of courses having a unified purpose and belonging primarily to one major academic field. It will usually include certain required courses and elective courses within established criteria. Examples include Business Administration, Civil Engineering, Fine and Applied Arts, and Physics. A curriculum normally covers more than one term and leads to a degree or diploma upon successful completion.

(g) The word "catalog" means any medium by which the Contractor publicly announces terms and conditions for enrollment in the Contractor's institution, including tuition and fees to be charged. This includes "bulletin," "announcement," or any other similar word the Contractor may use.

(h) The word "tuition" means the amount of money charged by an educational institution for instruction, not including fees as defined below.

(i) The word "fees" means those applicable charges directly related to enrollment in the Contractor's institution. This shall not include any permit charge (e.g., parking, vehicle registration or charges for services of a personal nature (e.g., food, housing, laundry) unless specifically called for in the request placed hereunder.

2. *Gratuities.* Insert the clause at FAR 52.203–3.

3. *Covenant against contingent fees.* Insert the clause at FAR 52.203–5.

4. *Officials not to benefit.* Insert the clause at FAR 52.203–1.

5. *Approval of contract.* Insert clause from FAR 52.204–1 in accordance with Departmental procedures when it is desired to cover the subject matter thereof.

6. *Order of precedence.* Insert clause from FAR 52.215–18.

7. *Conflicts between agreement and catalog.* Insert the following clause:

Conflicts Between Agreement and Catalog

To the extent of any inconsistency between the provisions of this agreement and any catalog or other document incorporated in this agreement by reference or otherwise or

any of the Contractor's rules and regulations, the provisions of this agreement shall govern.

8. *Disputes.* Insert the clause at FAR 52.233–1.

9. *Convict labor.* Insert the clause at FAR 52.222–3.

10. *Equal opportunity.* In accordance with FAR 22.802, 22.807, and FAR 22.810 insert the appropriate clause from FAR 52.222–26.

11. *Assignment of claims.* Insert the following clause:

Assignment of Claims

No claim under this agreement shall be assigned.

12. *Examination of records by Comptroller General.* In accordance with the requirements of FAR 52.215–1 insert the clause therein.

13. *Alterations in contract.* Insert the clause at FAR 52.252–4 in accordance with Departmental procedures when it is desired to cover the subject matter thereof.

(d) *Signature page.* The signature page shall be in the following format:

Subpart 237.74—Communication Services

237.7401 Definitions.

"Appropriate Governmental Regulatory Body" means the Federal Communications Commission, any state-wide regulatory body, or any body with less than state-wide jurisdiction when operating pursuant to state authority. Regulatory bodies whose decisions are not subject to judicial appeal and regulatory bodies which regulate a company owned by the same entity which creates the regulatory body are not "appropriate governmental regulatory bodies" for the purposes of this subpart.

"Common Carriers" means any person, partnership, association, joint-stock company, trust governmental body, or corporation engaged in the business of providing communications services to the general public, normally authorized or franchised by the Federal Communications Commission (FCC) or other appropriate governmental body.

"Communications Services" means those services provided by all types of systems and facilities connected therewith that employ electric or electromagnetic signals to transmit information between two or more points by means of radio, wire, cable, satellite, and other media. Included are telephone, telegraph, teletypewriter, remote writing, remote display, data transmission, facsimile and television transmission services, as well as terminal devices, switches, private branch exchanges, transmission facilities and other components of the systems that supply these services. Also included are all local, post, camp, station or long distance services, as well as all fixed or mobile facilities that are interconnected to systems providing these types of services.

"Foreign Carrier" means any person, partnership, association, joint-stock company, trust, governmental body, or corporation not subject to regulation by an appropriate United States governmental regulatory body and not doing business as a citizen of the United States, which provides communications services outside the territorial limits of the United States.

"Noncommon Carrier" means any entity other than a common carrier which offers communications facilities, services or equipment for lease.

237.7402 Applicability.

This subpart applies to acquisition of communications services from communications common carriers regulated by the Federal Communications Commission or an appropriate governmental regulatory body. In addition, except as otherwise specifically provided, this subpart provides guidelines for the acquisition of all other communications services (e.g., from nonregulated common carriers, noncommon carriers and foreign carriers) but is not mandatory for use in such acquisitions.

237.7403 Policy.

In accordance with instructions contained in Department of Defense directives and implementing departmental regulations concerning the operation of commercial and industrial type activities, and specifically with those concerning the sources for communications services, the Department of Defense generally procures communications services of a kind offered by common carriers, including equipment and facilities incidental to those services, from common carriers in accordance with tariff provisions, and at tariff rates established with the Federal Communications Commission (FCC) or with other appropriate governmental regulatory bodies unless cost or operational requirements dictate otherwise.

237.7404 Regulatory bodies.

(a) The Federal Communications Commission (FCC) and other appropriate governmental regulatory bodies generally publish rules and regulations governing the operations of common carriers and prescribe accounting principles to be employed in the establishment of rates. Notwithstanding other provisions of this Supplement, the regulations, practices, and decisions of the FCC and other appropriate governmental regulatory bodies concerning rates, cost principles, and accounting practices shall be recognized in the procurement of communications services from common carriers. With respect to those issues concerning common carrier services (1) on which the appropriate governmental regulatory body has not expressed itself, (2) over which the appropriate governmental regulatory body has declined jurisdiction, or (3) as to which there is no appropriate governmental regulatory body to make a decision, specific provisions should be made in the contract for adoption of FCC-approved practices or the generally accepted practices of the industry.

(b) Since the Department of Defense frequently requires unusual or special communications services advancing the "state of the art," Defense Department activities frequently move into areas which the cognizant governmental regulatory bodies have not explored. In such situations, the Defense Department frequently is the sole or primary user of many of a given common carrier's offerings. In addition, because of the large volume or normal services which the Defense Department requires, the day-to-day decisions of governmental regulatory bodies may have a vast dollar impact upon it. It is not Defense Department policy to duplicate the efforts of appropriate governmental regulatory bodies or to act as a second regulatory body. On the other hand, the Defense Department's self interest requires that it act as an informed and intelligent consumer, seeing to it that its sidde of the case is presented to the cognizant bodies and working with the common carriers to ensure that in those areas in which the FCC cannot or will not rule, sound regulatory practices are followed. Every effort should be made to avoid the time and expense of litigation by full and fair disclosure of both the carrier's and the Government's position in advance. Nevertheless, in the event actions short of litigation are not productive or just, reasonable or otherwise lawful rates, or when there is a refusal to provide required services or file appropriate tariffs, legal actions

should be initiated and vigorously pursued. All contacts with the regulatory bodies should be through cognizant counsel in accordance with established Departmental and Defense Communications Agency procedures.

(c) Upon receipt of tariff information received in accordance with 252.237–7411, Tariff Information, the contracting officer shall immediately provide copies to the cognizant counsel.

237.7405 Sources for communications services.

237.7405–1 Common carriers.

(a) Generally, communication services shall be procured from the communication common carrier authorized by the appropriate regulatory body to operate within the service area in which the services are required.

(b) Although normally only one carrier is authorized to provide a specific type of service at any given location, there are locations at which no single communication common carrier has the exclusive right to provide the required service. When this is the case and more than one common carrier is authorized and can provide the required service, the procurement shall be made from the source offering the lowest cost to the Government, if practicable. If this is not practicable, the contract file shall be documented as to the reasons for selection of another source (e.g., unique ability to meet service date; more timely and effective maintenance; security reasons; system integrity). In any event, special assembly items and entire communications systems shall be acquired on a competitive basis to the maximum extent practicable; and every effort should be made to exclude from the service contract any provisions which would require the Government to leasc from the source of service any associated and related items such as circuits, circuit extensions, and terminal equipment.

237.7405–2 Noncommon carriers.

While communications services generally shall be acquired from common carriers; they may be acquired from noncommon carriers when equipment and the services function as a complete communication system or are an integral part of a communication system. Equipment and services shall be considered an integral part of a communication system if the combination of equipment and services is necessary to perform the desired services.

237.7405–3 Foreign carriers.

The acquisition of communication services within or between foreign countries and the acquisition from a foreign carrier of communication services from a foreign country to the Unites States present problems beyond the scope of this subpart. Frequently, foreign carriers are owned by the Government of the country in which they operate, and their methods of doing business are prescribed by the foreign Government. In many countries, an international agreement with the host country prescribes guidelines for how the Defense Department will obtain communication services. In addition, there are frequently severe problems with taxes on communications in foreign countries. In other countries, a corporate subsidiary of a carrier not indigenous to the country (often a U.S. parent) is the sole source for communication services. As a general rule in foreign countries, rates and practices should be spelled out in as much detail as possible in a contractual document. It consistently has been Defense Department policy not to pay discriminatory rates and to pay no more for communication services in a foreign country than does the military of that country. Special problems with communications procurement in foreign countries should be channeled to higher headquarters for resolution with the assistance of State Department representatives as appropriate.

237.7406 Who may acquire communication services.

(a) The general authority of the Head of a Contracting Activity contained in FAR 1.601 includes the acquisition of communication services. In addition, the Administrator, General Services Administration, has delegated to the Secretary of Defense under the terms of the Federal Property and Administrative Services Act, as amended, authority to enter into contracts for communication services extending beyond the fiscal year, but not longer than ten years under the following circumstances:

(1) The Government obtains lower rates, larger discounts, or more favorable conditions of service than those available under a contract for a definite term not extending beyond the current fiscal year; or

(2) Nonrecurring or termination charges payable under contracts for a definite term not extending beyond the current fiscal year are eliminated or reduced; or

(3) The carrier refuses to render the desired service except under contract for a definite term extending beyond the current fiscal year.

(b) The secretary of Defense has delegated the authority to him by the Administrator, GSA, to the Secretaries of the Military Departments and the Director, Defense Communications Agency, who have in turn delegated it to the following (with power of redelegation):

(1) For the Department of the Army: The Commanding General, United States Army Communications Command; and the Commanding General, United States Continental Army Command.

(2) For the Department of the Navy: The Commander, Naval Facilities Engineering Command;

(3) For the Department of the Air Force: The Deputy Chief of Staff, Research Development and Acquisition; and the Director of Contracting and Manufacturing Policy, DCS/RD&A, HQ USAF;

(4) For the Defense Communications Agency: The Chief, Defense Commercial Communications Office;

(5) For the Defense Logistics Agency: For the leasing of local telecommunications facilities and services, Commanders of DLA centers, depots, and DCAS regions; and

(6) For the Defense Nuclear Agency: For contracts not in excess of $1,000,000, The Commander, Field Command, DNA.

(c) The ten-year limitation of (a) above does not apply to "general contracts" (see 237.7408) but to obligating the Government for a longer period than ten years by orders placed under the general contract.

237.7407 Cost of pricing data.

(a) Rates or preliminary estimates quoted by a common carrier for tariffed services are considered to be prices set by regulation within the provisions of Pub. L. 87–653, even if the tariff will not be established until after execution of the contract. Accordingly, except as provided in (b), common carriers are not required to submit cost or pricing data prior to award of contracts for tariffed services. On the other hand, rates or preliminary estimates quoted by a common carrier for nontariffed service or by a noncommon carrier for any service are not considered to be prices set by regulation; and the provisions of Pub. L. 87–653 and FAR 15.804 shall be applied accordingly.

(b) Even when not required by Pub. L. 87–653, certified cost or pricing data shall be obtained whenever the contracting officer is unable to determine that the prices are reasonable on the basis of price analysis (see FAR 15.805–2). However certified cost or pricing data shall not be required to support annual recurring costs below $5,000 and nonrecurring costs or basic termination liabilities below $10,000. Situations in which cost or pricing data

may be found necessary within the above policy are:

(1) A tariff, whether filed or contemplated to be filed is for new services installed or developed primarily for Government use (and the data shall cover special construction charges in connection therewith);

(2) A tariff, whether filed or contemplated to be filed, in which specific rates and charges are not included;

(3) More than one commercial source (one or more of which is a noncommon carrier) can offer the desired service but price competition is not considered adequate;

(4) To support the reasonableness of special assembly rates and charges;

(5) To support the reasonableness of special construction and equipment charges;

(6) To support the reasonableness of those contingent liabilities which are fixed at the outset of the service; or

(7) To support proposed cancellation and termination charges (pursuant to the clause entitled "Cancellation or Termination of Orders") and reuse arrangements (pursuant to the clause entitled "Reuse Arrangements").

(c) Cost or pricing data need not be obtained for each order in the case of services obtained by delivery order under a general call type contract which is negotiated for use by Government ordering activities and includes detailed and approved price schedules as a part of the general contract.

(d) As to the form and detail of cost or pricing data, the following will apply:

(1) For data submitted by common carriers, the data may be in the same form and detail normally submitted to the governmental regulatory body having jurisdiction over the carrier in question; provided, this form and detail is sufficient for the Government to make an adequate evaluation.

(2) For data submitted by other than common carrier, the data should be that required by FAR 15.8.

(e) In the case of noncommon carriers or common carriers quoting for services not to be furnished pursuant to tariff, the contracting activity shall require that the cost or pricing data be accompanied with a certificate as required in FAR 15.804–4. In the case of a common carrier furnishing service pursuant to a tariff filed or to be filed, the contracting activity shall require that data submitted pursuant to (b) above be accompanied with a certificate that to the best of the company's knowledge the data are accurate, complete, and a statement that either:

(1) The rates for services in question are based on these data which will be used or are currently being used to justify the tariff for such service; or

(2) The rates for services in question are not based on these data but are based upon filed tariffs.

The contracting activity shall inform carriers required to furnish cost or pricing data under this subparagraph (e) that the data and certifications will be used by the Government, if appropriate, in any subsequent proceedings relative to this tariffed service.

(f) If any noncommon carrier or any common carrier providing a service not to be furnished pursuant to tariff refuses to furnish cost or pricing data required under this paragraph, applications for waiver shall be processed in accordance with FAR 15.804.

237.7408 Type of contract.

237.7408–1 General.

Generally, the procurement of communication services is facilitated by a contractual arrangement which (a) permits the activities served to order services directly from time to time as specific requirements are developed; and/or (b) provides a written instrument of understanding between the Department of Defense or a contracting activity and the contractor which sets forth the basis under which future procurements will be entered into as required during the term of the agreement.

237.7408–2 General agreements.

General agreements, referred to as "general contracts" within the communication industry, are widely used to facilitate awards for communication services. Such an instrument is not a contract, but rather represents a written instrument of understanding executed between a procurement activity and a communications contractor which sets forth the negotiated contract clauses and other matters which shall be applicable to future procurements entered into between the parties during the term of agreement. The general agreement together with the order issued thereunder (see 237.7408–3) represents the contract. General agreements shall not be used in any manner to restrict available competition. All general agreements will be executed in the name of the United States Government.

237.7408–3 Communication Service Authorization (CSA).

DD Form 428, Communication Service Authorization (CSA), or an electronic data processing substitute (when the volume of transactions necessitates preparation of orders by other than manual process, a format suitable for an electronic data processing system may be used in lieu of DD Form 428, provided that all essential elements of the DD Form 428 are incorporated) shall be used to order services under the general contract and to modify, cancel, or terminate services when a CSA has been used to establish the service. As a general rule, prices should be established prior to authorizing the contractor to begin work. However, when the contractor is allowed to begin work prior to pricing in accordance with this paragraph, an estimated price or ceiling shall be included; and the contractor and the contracting officer shall proceed with definitive pricing as soon as practicable. In addition, a CSA may be issued which includes a ceiling or a series of ceilings for the states services. Normally, this type of CSA is called a "maximum limit authorization" in the communications industry. This maximum limit authorization also may provide, in addition to the established ceilings, limited authority to designated individuals to effect modifications in service within the dollar ceilings by the use of work orders designated for this purpose. Each CSA issued under a general agreement shall be subject to such reviews, approvals and determinations and findings specified in this Supplement as would be applicable if the CSA were a contract entered into apart from the general contract.

237.7408–4 Federal Supply Schedule contracts.

General Services Administration Federal Supply Schedule contracts covering communication services, including equipment and facilities incidental to the services, are optional for use by the Department of Defense and may be used in accordance with FAR 8.404 when it is not more advantageous to negotiate a separate contract. The DD Form 428 may be used as a delivery order.

237.7409 Funding of Communication Service Authorizations (CSA) under general contracts.

(a) Funding is a comptroller responsibility and shall be handled in accordance with appropriate Department of Defense comptroller related directives and departmental implementations thereof. The guidelines in (b) through (e) below are provided for the contracting officer's information.

(b) In acquisitions of communication services, unlike other types of acquisitions, obligations are usually recorded when the service starts or if and when a cancellation or termination

is ordered. The funds are not obligated by the "general contract," but are ordinarily obligated by CSAs issued under the "general contracts" (see 252.237–7408, Ordering of Facilities and Services—Common Carriers).

(c) Each individual CSA establishes a basis for the obligation of funds to cover recurring charges for services to be provided during the fiscal year in which the CSA is issued, together with such onetime charges as are applicable to those services.

(d) The same CSA continues to be the basis for the obligation of funds when the same services are required to be continued into subsequent fiscal years. However, obligation of funds for recurring charges for such subsequent fiscal years must be subject to the availability of appropriations therefor; and in the event funds are not appropriated, a cancellation or termination CSA must be issued.

(e) The contracting officer, through his comptroller, must insure that funds are available at the time service is provided or at the time a cancellation or termination CSA is issued. FAR 32.702–2 does not apply to the issuance of CSAs.

237.7410 Special construction.

237.7410–1 General.

(a) Special Construction, as defined by tariffs, normally involves the furnishing of some special service or facility by a common carrier incident to the performance of the basic service. Under a given tariff, this may include (1) moving or relocating specified equipment, (2) providing temporary facilities, (3) expediting provision of facilities, or (4) providing channel facilities which must be specially constructed to meet the requirements of the Government. The procurement of "special construction," as that term is used in the communication industry, shall be governed by the provisions of this part and shall not ordinarily be subject to the provisions of FAR Part 36.

(b) Special construction costs may take the following forms:

(1) Contingent liability for utilizing the services for a shorter period of time than the specified minimum to reimburse the contractor for his unamortized nonrecoverable costs and usually expressed in terms of a termination liability, as provided in the contract or by tariff;

(2) A onetime special construction charge;

(3) Recurring charges for constructed facilities;

(4) A minimum service charge;

(5) An expediting charge; or

(6) A move or relocation change.

(c) When a common carrier submits a proposal or quotation of charges which indicates that special construction will be necessary, he shall be required to submit a detailed special construction proposal as well. All special construction proposals shall be analyzed to (1) determine the adequacy of the proposed construction; (2) disclose excessive or duplicative construction; and (3) when different forms of charge are possible, insure that the form most advantageous to the Government is provided for.

(d) When possible, special construction charges should be analyzed and approved prior to provision of the service. If, because of operational requirements, prior approval is not possible and a contractor is authorized to proceed, a ceiling cost for the special construction shall be imposed. Special construction charges must be approved and authorized prior to total payment thereof.

(e) Special construction provisions shall be administered by the contracting officer issuing the CSA. This involves administration of the cost and payment provisions, recording the unamortized termination liabilities (if any), and monitoring minimum service charges, (MSC) reuse of MSC facilities—all in coordination with the requiring Department, office or agency and with the Defense Contract Audit Agency, as appropriate.

237.7410–2 Applicability of construction labor standards to CSAs for special construction.

(a) The construction labor standards in FAR 22.4 ordinarily do not apply to "special construction." However, if the special construction includes construction (as defined in FAR 36.102) of a public building or public work, the construction labor standards may be applicable. Applicability must be determined under FAR 22.402.

(b) Individual CSAs which are subject to construction labor standards under FAR 22.402 shall specifically recite that fact.

237.7411 Special assembly.

(a) Special assembly is the designing, manufacturing, arranging, assembling or wiring of an item or items of equipment to provide service that cannot be provided with equipment normally employed for general use.

(b) Special assembly rates and charges shall be based on estimated costs and shall be negotiated prior to commencement of service whenever possible. When it is not possible to negotiate in advance, the initial rates and charges shall be preliminary and tentative only and shall be subject to adjustment to the extent appropriate at the time that final rates and charges are negotiated.

237.7412 Cancellation and termination.

(a)(1) Cancellation is the discontinuance of a requirement subsequent to the placing of an order, but prior to initiation of service.

(2) Termination is the discontinuation of a service for the convenience of the Government after the service has been initiated.

(b) Cancellation or termination charges shall be determined in accordance with the provisions of the applicable tariff or contract.

(c) At the conclusion of a cancellation or termination settlement negotiation, the contracting officer shall document the contract file as to the principal elements involved in the settlement and in a manner which will enable reviewing authorities to understand the appropriateness of the proposed settlement.

(d) Pursuant to the Cancellation or Termination of Orders clause, partial payments on cancellation or termination claims may be made prior to settlement under the applicable policy and procedures of FAR 49.112–1

237.7413 Contract clauses.

(a) The contracting officer shall insert the following clauses, modified if necessary to meet the specific requirements of an appropriate governmental regulatory agency or when the basic intent is not changed, in solicitations and contracts when a contract for communications services with a common or a noncommon carrier is contemplated.

(1) The clause at 252.237–7400, Definitions (Communications);

(2) The clause at 252.237–7401, Patent Indemnity (Communications);

(3) The clause at 252.237–7402, Access;

(4) The clause at 252.237–7403, Amendment of Contract; and

(5) The clause at 252.237–7404, Obligation of the Government.

(b) The contracting officer shall insert the following clauses, modified if necessary to meet the specific requirements of an appropriate governmental regulatory agency or when the basic intent is not changed, in solicitations and contracts when a contract for communications services with a common carrier is contemplated.

(1) The clause at 252.237–7405, Authorization and Consent—Common Carriers;

(2) The clause at 252.237–7406, Continuation of Orders;

(3) The clause at 252.237–7407, Facilities and Services to be Furnished—Common Carriers;

(4) The clause at 252.237–7408, Ordering of Facilities and Services—Common Carriers;

(5) The clause at 252.237–7409, Rates, Charges, and Services—Common Carriers;

(6) The clause at 252.237–7410, Payment—Common Carriers;

(7) The clause at 252.237–7411, Tariff Information;

(8) The clause at 252.237–7412, Cancellation or Termination of Orders—Common Carriers;

(9) The clause at 252.237–7413, Reuse Arrangements;

(10) The clause at 252.237–7414, Submission of Cost or Pricing Data—Common Carriers;

(11) The clause at 252.237–7415, Audit and Records—Common Carriers; and

(12) The clause at 252.237–7416, Term and Termination of Contract—Common Carriers.

(c) The contracting officer shall insert the following clauses, modified if necessary to meet the specific requirements of an appropriate governmental regulatory agency or when the basic intent is not changed, in solicitations and contracts when a contract with a common or a noncommon carrier is contemplated and when special construction charges are expected:

(1) The clause at 252.237–7417, Special Construction and Equipment Charges; and

(2) The clause at 252.237–7418, Title to Communication Facilities and Equipment.

Subpart 237.75—Services of Students at Research and Development Laboratories

237.7500 Scope.

This subpart prescribes procedures for the acquisition by contract under the authority of 10 U.S.C. Section 2360, of the temporary or intermittent services of students at institutions of higher learning for the purpose of providing technical support at defense research and development laboratories.

237.7501 Definitions.

For the purpose of this subpart, the following terms are defined:

"Institution of Higher Learning." An institution of higher learning means any public or private post-secondary school, junior college, college, university, or other degree granting educational institution located in the United States, its possessions, and Puerto Rico with an accredited education program approved by an appropriate accrediting body and offering a program of study at any level beyond that of high school.

"Nonprofit Organization." A nonprofit organization means any organization described by Section 501(c)(3) of Title 26 of the United States Code which is exempt from taxation under Section 501(a) of Title 26.

"Student." A student means an individual who is enrolled (or has been accepted for enrollment) prior to the term of the student technical support contract and remains in good standing at an institution of higher learning in a curriculum designed to lead to the granting by that institution of a recognized degree, during the term of the contract.

"Technical Support." Technical support means any scientific or engineering work in support of the mission of the DoD laboratory involved. It does not include services of an administrative or clerical nature.

237.7502 Policy.

These contracts shall not be used solely to circumvent personnel ceilings or to provide for an increase in the civilian workforce.

237.7503 General.

Pursuant to this subpart, acquisition of services of students at institutions of higher learning generally shall be acquired by contract between a nonprofit organization employing the student and the Government. When it is in the best interest of the Government to do so, however, contracts may be made directly with students.

(a) *Special considerations.* Any contract entered into pursuant to this subpart shall be considered to be a nonpersonal service contract for the purposes of FAR Part 13. Such contracts are not subject to the provisions of FAR 19.202, 19.501, 19.508(a), or FAR 13.105.

(b) *Contract Authority.* Contracts under this subpart are negotiated acquisitions and shall cite 10 U.S.C. 2304(a)(17) and 10 U.S.C. 2360 as authority.

237.7504 Contract clauses.

Any contract with an individual student made pursuant to this subpart shall contain the clauses at FAR 52.232–3, Payments Under Personal Services Contracts, and FAR 52.249–12, Termination (Personal Services).

PART 238—FEDERAL SUPPLY SCHEDULE CONTRACTING

No DoD FAR Supplement.

PART 239—MANAGEMENT, ACQUISITION, AND USE OF INFORMATION RESOURCES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

(See Part 270.)

Subchapter G—Contract Management

PART 242—CONTRACT ADMINISTRATION

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, DoD FAR Supplement 201.301.

Subpart 242.1—Interagency Contract Administration and Audit Services

242.101 Policy.

(d) *Reimbursement.*

(1) Except as noted in (d)(2) and (3) below, reimbursement for services shall be required from non-DoD organizations covered by this part as the current standard rate determined by the Assistant Secretary of Defense (Comptroller).

(2) Reimbursement is not required for quality assurance, inspection, and contract audit services under an effective reciprocal agreement which provides for such services to be rendered on a no-charge basis.

(3) Reimbursement is not required for services performed under contracts awarded by the Small Business Administration in accordance with FAR Subpart 19.9.

(4) Request for exceptions other than those noted in (d)(2) and (3) above shall be submitted to the ASD (Comptroller) for resolution or approval when it can be shown that such exceptions are in the best interests of the U.S. Government.

242.102 Procedures.

(S–70) *Department of National Defense Production (Canada).*

(1) Department of Defense components shall, upon direct request, provide contract administration services to the Department of National Defense Production (Canada). Performance for other Canadian Government organizations shall be in accordance with 242.102–70(b).

(2) Performance without charge of contract administration services by the Department of Defense components is provided for in 225.7105 concerning Canadian purchases.

(S–71) *Foreign governments and international agencies.*

(1) *Performance of services in the United States.* Department of Defense contract administration services

components shall, on receipt of requests from the DoD Central Control Point, provide contract administration services to foreign governments and international organizations who are making direct purchases from United States producers. "Direct purchase" is the purchase of defense supplies in the United States by a foreign government or contractor or international organization in which the supplies are purchased through commercial channels for use by the foreign government or international organization.

(2) *Operations of DoD Central Control Point (CCP).* Requests from foreign governments and international organizations shall be forwarded to the Defense Contract Administration Services Region (DCASR), New York, NY, which is the designated CCP. The CCP will—

(i) Determine that the request is from a friendly foreign government or from an international agency in which the United States is a participant;

(ii) Determine that the services requested are consistent with Department of Defense mutual security program policies (questions as to eligibility of foreign governments or international organizations to receive services from DoD contract administration services components will be referred to the Assistant Secretary of Defense (International Security Affairs));

(iii) Assure that the reimbursement arrangements are consistent with 42.101(d);

(iv) Determine that the requested services can be provided, and acknowledge receipt of the request;

(v) Distribute the procurement documents and related material to the cognizant contract administration services component, receive statements of costs from performing contract administration services components, bill the foreign governments or international organizations for services rendered, and distribute the remittance when received.

(S–72) *Performance of services outside the United States.* When services are performed by Department of Defense contract administration services personnel outside the United States, the levels of technical capability and the administrative procedures, not already prescribed in existing laws or Department of Defense policies, shall be in accordance with arrangements suitable and acceptable to the United States country teams or commanders of unified and specified commands, as appropriate.

(S–73) *Payment for services rendered.* Department of Defense components shall pay for services rendered at the rate established by the performing activity for such services, except where formal agreements provide for reciprocal performance without reimbursement. When services are requested from foreign governments and international organizations, DoD components should check with the Office of the Assistant Secretary of Defense (Comptroller) to determine whether any reciprocal agreements are in effect which would preclude payment for services requested.

Subpart 242.2—Assignment of Contract Administration

242.203 Retention of contract administration.

(a) When any field contract administration service is required, the contract will be assigned for administration regardless of dollar value.

(1) The purchasing office may retain responsibility for administration of contracts listed below:

(i) Contracts of or in support of the National Security Agency;

(ii) Contracts for coal or bulk petroleum;

(iii) Research and development contracts;

(iv) Grants;

(v) Contracts for flight training;

(vi) Contracts for headstones and gravemarkers;

(vii) Contracts for industry technical representatives;

(viii) Contracts for consultant support services;

(ix) Geodetic mapping, air charting, and information center contracts;

(x) Base, post, camp, and station purchases;

(xi) Contracts for operation or maintenance of, or installation of equipment at radar or communications network sites, e.g., SAGE, BMEWS, JCSAN, WHITE ALICE, etc.;

(xii) Communications service contracts;

(xiii) Contracts for installation, operation and maintenance of spacetrack sensors and relays;

(xiv) Dependents Medicare Program contracts;

(xv) Stevedoring contracts;

(xvi) Contracts for construction and maintenance of military and civil public works, including harbors, docks, port facilities, military housing, development of recreational facilities, water resources, flood control, and public utilities;

(xvii) Architect-engineer (A–E) contracts;

(xviii) Contracts for airlift and sealift—Military Airlift Command and Military Sealift Command may perform contract administration services at contractor locations involved solely in performance of airlift or sealift contracts;

(xix) Contracts for subsistence supplies;

(xx) Ballistic missile site contracts—supporting administration of these contracts may be performed at missile activation sites during the installation, test, and checkout of the missiles and associated equipment; and

(xxi) Contracts for operation and maintenance of, or installation of equipment at, military test ranges, facilities, and installations.

(b) To avoid duplication of field contract administration capability, except for the performance of (a)(2)(xviii) and (xx) above, contract administration personnel from the purchasing office shall not be located at contractors' facilities. If field assistance from a DoD contract administration services component is needed in the administration of these contracts, such assistance will be requested by assignment of supporting contract administration to the contract administration offices listed in DoD Directory 4105.59–H as cognizant of the contractor's facility (facilities) at which the supporting contract administration function(s) is required. Specific instructions as to the assistance needed will be furnished. If field assistance is needed in the performance of the major portion of applicable contract administration functions, the contract will be reassigned to the cognizant contract administration office.

242.204 Supporting contract administration.

(a) Generally, the office for performing supporting functions shall be selected from the list in DoD Directory 4105.59–H. However, in special circumstances (for example, when contractor's worksite is a military base), a component of a military command not listed in DoD Directory 4105.59–H may be selected to perform supporting contract administration when prior coordination between the offices concerned has indicated that such an arrangement is feasible and that adequate resources are available, but see 242.270. Where supporting contract administration is required on a contractor purchase order or subcontract which includes FMS requirements, the requesting CAO shall clearly indicate "FMS Requirement" on the face of the document and provide the FMS case identifier code, associated item quantity, and related DoD prime contract number and contract line/

subline item number. When more than one FMS case is involved, the information shall be provided for each.

242.205 Designation of the Paying Office.

(a) *Defense contract administration services disbursing office.* Contracts assigned to an office of Defense Contract Administration Services for administration shall also specify disbursement by the cognizant Defense Contract Administration Services Regional Office if funded with DoD funds (i.e., Department codes 17 (Navy), 21 (Army), 57 (Air Force), 97 (OSD, including Defense Agencies), and 43 (Civil Defense). For any other department or agency funds, the payment office serving that department or agency must be cited for the portion of the contract covered by non-DoD funds, even though the contract is otherwise wholly administered by the DCASR.

(b) *Other disbursing office(s).* Any contract not assigned to a Defense Contract Administration Services Office for administration shall designate a disbursing office in accordance with Departmental or Agency regulations. Such contract, if issued for requirements of more than one Department or Agency, may provide for payment by more than one disbursing office.

(c) *Disbursement for Air Force missile propellant contracts.* The Department of the Air Force shall retain the disbursement function on all contracts for Air Force missile propellants.

242.270 Contracts requiring performance of contract administration services (CAS) on military installations.

(a) Contract administration functions on a military installation are normally performed by the installation commander who is responsible for its continued operation as a military base. Where work on the military installation is unrelated to the base mission and requires skills and resources which exceed the installation commander's capability, DCAS shall, upon request by the relevant service, provide the required contract administration functions. When a contractor's normal place of industrial operation is located on a military base because of the availability of real estate or the existence of an industrial facility on that base, DCAS shall have cognizance of that facility, unless cognizance has otherwise been assigned to a Military Department in accordance with DoDI 4105.59.

(b) The Military Departments shall coordinate their Departmental contract administration efforts so as to avoid mixed contract administration arrangements which result when more than one CAS activity performs CAS at the same military installation.

(c) DCAS shall provide preaward survey assistance for post, camp, and station work performed on military installations. The purchasing office and the DCAS preaward survey monitor shall jointly determine the scope of the survey and individual responsibilities.

(d) All requests from the Military Departments for Defense Logistics Agency/Defense Contract Administration Services support under (a) above should be coordinated to ensure availability of the capability and resources for performing requested functions.

Subpart 242.3—Contract Administration Office Functions

242.302 Contract administration functions.

(a)(11) (ii) and (iii) For those contractors with which the Tri-Service Contracting Officer negotiates advance agreements pursuant to FAR 42.10, he shall have full authority for determinations related to CAS 420.

(S–70) Perform industrial readiness and mobilization production planning field surveys and schedule negotiations.

(S–71) Perform post award surveillance of contractor progress toward demonstration of Cost/Schedule Control Systems to meet the Cost/Schedule Control Systems Criteria, provide assistance in the review and acceptance of contractors' Cost/Schedule Control Systems, and perform contractors' accepted systems. The contracting officer shall insert the clauses at 252.242–7001, Notice of Cost/Schedule Control Systems, and 252.242–7002, Cost/Schedule Control Systems, when required by DoDI 7000.2.

(S–72) Monitor the contractor's costs as prescribed under FAR 242.302(a).

(S–73) In connection with classified contracts, administer those portions of the Industrial Security Program designated as ACO responsibilities in the ISR and ISM. (See Appendix C, Industrial Security Regulation, DoD 5220.22–R, for partial listing of primary responsibilities (also see FAR 4.401).)

Subpart 242.4—Correspondence and Visits

242.402 Visits to contractors' facilities.

(a) If access to classified information will be involved, the contractor must be given advance notice, in writing, as required by the Industrial Security Regulation (DoD 5220.22–R).

Subpart 242.5—Postaward Orientation

242.501 General.

The need for a postaward orientation conference normally will be established as a result of substantive review and analysis of the contract by the Contract Administration Office. However, the contracting officer or technical representative of the purchasing office may initiate the request for a conference. A conference of Government personnel normally shall be held prior to notifying and conferring with the contractor to assure that the Government position on all matters is established.

242.503–1 Postaward conference arrangements.

(a)(2) the agenda of the postaward conference may include such matters as are indicated on DD Form 1484.

242.503–2 Postaward conference procedure.

The chairperson shall use the DD Form 1484 in conducting the conference to assure that all significant matters are covered.

242.503–3 Postaward conference report.

The chairperson may use the DD Form 1484 as the summary report where appropriate.

Subpart 242.6—Corporate Administrative Contracting Officer

242.602 Assignment and location.

(a)(1) If a particular corporate complex does not meet the criteria for the establishment of a CACO, but a Department believes a CACO assignment is required, such determination requires approval of the Secretary of his designee.

(2) When a corporate entity has divisions under the contract administration cognizance of more than one Department, CACO assignments shall be determined by the Department concerned. When agreement cannot be reached, the matter shall be referred to the DUSD(AM), Office of Under Secretary of Defense, Research and Engineering, for resolution.

242.603 Responsibilities.

The CACO shall be responsible for the negotiation of advance agreements for independent research and development costs and bid and proposal costs except when this responsibility is assigned in the master list published annually in a Defense Acquisition Circular for Tri-Service Department negotiation. Departmental Tri-Service

contracting activities may delegate such negotiations to established CACOs.

Subpart 242.7—Indirect Cost Rates

242.705 Final indirect cost rates.

242.705-1 Contracting officer determination procedure.

(a)(1) When a multi-divisional contractor has a CACO, the decision as to whether final overhead rate negotiations will be on a coordinated or centralized basis will be made jointly by the CACO and the individual ACO's based upon the degree of centralization within the contractor complex and the requirements of the parties concerned. When negotiations are conducted on a coordinated basis, individual ACO's are responsible for coordinating with the CACO to assure consistency of cost determinations.

(b)(1) In addition to submitting a final indirect cost proposal to the contracting officer, the contractor shall also submit a copy of the proposal to the cognizant auditor.

(b)(3) Particularly when there is a significant difference of opinion between the Government and contractor concerning the allowability or reasonableness of indirect costs or the acceptability of the bases used in developing the overhead rates, representatives of the audit activity, the technical activity, and the contracting officer will discuss the areas of disagreement prior to the negotiation conference with the contractor. Special attention should be directed to those issues which impact prospective and subsequent final overhead rate determinations. Such issues should be resolved in order to preclude repetitive consideration of the same items.

242.705-2 Auditor determination procedure.

(b)(2)(iii) The agreement shall be signed by the contractor and the auditor-in-charge.

(b)(2)(v) If, under the auditor determination procedure agreement with the contractor cannot be reached, the auditor, in addition to submitting an advisory audit report to the contracting officer pursuant to FAR 42.705-2(b)(iv), will issue DCAA Form 1 detailing the items of exception to which the contractor can submit a request in writing to the cognizant ACO to reconsider the auditor's determination.

242.705-3 Educational institutions.

(a)(3) In addition to following the procedure in FAR when negotiating postdetermined final indirect cost rates, the contracting officer shall also follow the guidance in 242.705-1(b).

242.706 Distribution of documents.

(a) One executed copy of the overhead rate agreement will be furnished to the contractor, the cognizant CACO (if assigned), the cognizant ACO, and the cognizant auditor. In addition, copies will be distributed to other Departments, and (upon specific request) any other interested Government agencies. Departments may make further distribution to activities within their departments and shall insert one copy in each contractor general file (see S-101.2 and S2-102.4).

(b)(1) One copy of the overhead negotiation memorandum, if prepared under contracting officer determination procedures, or the audit report, if prepared under auditor determination procedures, will be furnished to the cognizant CAO (if assigned), the cognizant ACO, and the cognizant auditor. Upon specific request, a copy will be furnished to other Departments or Government agencies.

Subpart 242.8—Disallowance of Costs

242.801 Notice of intent to disallow costs.

(e) A Corporate Administrative Contracting Officer (CACO) need not obtain the approval of local cognizant ACOs for items of corporate expense.

242.803 Disallowing costs after incurrance.

(a) *Contracting officer receipt of vouchers.* This procedure is applicable only for Cost-Reimbursement Type Contracts involving Canadian Contractors (see 225.7104(c)).

(1) On contracts with the Canadian Commercial Corporation (CCC), CCC will certify and forward the invoice with Standard Form 1034 (Public Voucher) to the ACO for further processing and transmittal to the disbursing officer.

(2) On contracts placed directly with Canadian firms, invoices, as provisionally approved by the ASB/DSS auditor and accompanied by Standard Form 1034 (Public Voucher), are forwarded to the ACO for further processing and transmittal to the disbursing officer. In the event that costs claimed are suspended or disapproved, the ACO shall issue the DCAA Form 1, "Notice of Contract Costs Suspended and/or Disapproved" to the contractor. DCAA Form 1 will be processed in the same manner as indicated in FAR 42.803(b)(3) with regard to contractor appeals.

(b) *Auditor receipt of vouchers.*

(1) and (2) The contract auditor is the authorized representative of the contracting officer for these functions, except that vouchers are approved for provisional payment and transmitted to the cognizant disbursing officer (but see 242.803(a) for certain Canadian contracts). DCAA Form 1, "Notice of Contract Costs Suspended and/or Disapproved", shall be used for this purpose. In addition, the contracting officer may direct the issuance of DCAA Form 1 with respect to any cost that he has reason to believe should be suspended or disapproved. The contract auditor will approve fee portions of vouchers for provisional payment in accordance with the contract schedule and any instructions received from the administrative contracting officer. Completion vouchers shall be forwarded to the ACO for approval and transmittal to the cognizant disbursing officer.

Subpart 242.10—Negotiating Advance Agreements for Independent Research and Development/Bid and Proposal Costs

242.1005 Lead negotiating agency responsibilities.

(b) The technical evaluation, performed or arranged for by the lead negotiating agency, shall include an opinion as to the potential relationship of the proposed IR&D program to relevancy requirements established under 231.205-18.

(c) The contractor shall be provided a contracting officer's determination concerning the potential relationship of proposed IR&D/B&P projects to the relevancy requirements established under 231.205-18.

242.1006 Conducting negotiations.

(a) In negotiating ceilings, the contracting officer shall pay attention to the determination of the potential relationship of the company's IR&D/B&P to a military function or operation.

242.1007 Content of advance agreements.

Advance agreements negotiated in accordance with this subpart shall include, where appropriate:

(S-70) A statement that a relevancy review has been performed and a determination made that the Government's allocable share of the negotiated ceiling(s) passes the relevancy test at the time of negotiation.

(S-71) For those companies meeting the threshold requirements, a provision that the recovery of IR&D/B&P costs under Government contracts shall not exceed the lesser of (i) such contracts' allocable share of incurred costs up to the total ceiling or (ii) the amount of incurred costs having a potential relationship to a Government function or operation.

242.1008 Administrative appeals.

Each Department will establish an appeals hearing group consisting of an acquisition member, who shall be chairman, a technical member and a legal member. Determinations of the appeals group shall be the final and conclusive determination of the Department of Defense. Members shall be appointed as follows:

(S–70)(1) *For the Army.* The Deputy Assistant Secretary (Acquisition) will appoint the acquisition member. The Deputy Assistant Secretary (Research, Development and Systems) will appoint the technical member. The Deputy General Counsel (Logistics) will appoint the legal member.

(S–70)(2) *For the Navy.* The Principal Deputy Assistant Secretary (Shipbuilding and Logistics) will appoint the acquisition member. The Principal Deputy Assistant Secretary (Research, Engineering and Systems) will appoint the technical member. The Deputy General Counsel (Logistics) will appoint the legal member.

(S–70)(3) *For the Air Force.* The Deputy Assistant Secretary (Acquisition Management) will appoint the acquisition member. The Deputy Assistant Secretary for Systems will appoint the technical member. The Assistant General Counsel (Procurement) will appoint the legal member.

(S–70)(4) *For the Defense Logistics Agency (DLA).* The Director, DLA (or the Deputy Director, DLA) will appoint the acquisition member, the technical member, and the legal member.

Subpart 242.11—Production Surveillance and Reporting

242.1101 General.

Delinquency includes—

(a) Actual failure by the contractor, that is, his failure, regardless of reason, to meet the contract delivery or performance schedule; and

(b) Potential failure by the contractor, that is, his failure, regardless of reason, to maintain such progress in contract performance as is required to meet his contract delivery or performance schedule.

242.1104 Surveillance requirements.

(a)(S–70) *Initial contract review.*

(i) The contract administration office shall, during initial contract review, assign contracts to production surveillance or review categories as follows:

(A) Category 1 is conducted by an industrial specialist or other person qualified to assess the contractor's plan for production and evaluate progress toward the successful accomplishment of that plan. This type of effort is adaptable to contracts which have a production/performance lead time of at least several months, and which entail identifiable milestone or pacing events against which progress may be measured. Contracts assigned this category should include those contracts which are of the complexity described under FAR 42.1104(a) and have a Criticality Designator A or are with a contractor which has either a history of generally poor production performance or a poor performance history on the same or similar supplies or services as those on the current contract.

(B) Category 2 is conducted by personnel qualified to assess information provided by the contractor in terms of delivery probability. They may be assisted by industrial specialists or other technically qualified personnel who will visit the production facility when there is probability of failure by the contractor to deliver or perform according to schedule, or when contractor-furnished information is questionable, or when contractor-furnished information is questionable, or in other occasions when the assistance of technical personnel may contribute to the avoidance or minimizing of a delinquency. This category of surveillance entails, as a minimum, a written or telephonic reminder to the contractor in advance of the required delivery or performance date(s) including inquiry as to whether he will perform on schedule or as to the cause and duration of any anticipated delay, and periodic followup and expediting of supplies or services not delivered or performed on time. This category is adaptable to contracts which warrant surveillance effort by the Government in advance of the required due date. Any contract with a Criticality Designator A not assigned to Category 1 shall be assigned to Category 2. All Criticality Designator B contracts and those Criticality Designator C contracts placed with contractors having a history of generally poor production performance also shall also be assigned to this category.

(C) Category 3 is conducted by the same personnel assigned Category 2 contracts. This category of surveillance entails inquiry and expediting effort after a failure to delivery or perform within the contract schedule has occurred, and periodic followup. It may involve assistance by technical personnel.

(ii) Regardless of assigned category, if a contract is reported by DD Form 375, Production Progress Report, as delinquent or anticipated to become delinquent, the surveillance efforts will provide continuous knowledge of the status of the problems causing the delinquency and of the corrective efforts being taken.

(iii) If Category 1 is assigned to a contract, the contract administration office shall also:

(A) Review the contract in conjuction with any preaward survey (see FAR 9.1) to ascertain what contract performance difficulties may be expected.

(B) Determine the extent of postaward orientation required in the production area (see FAR 42.5).

(C) Determine any special procedures to be followed.

(b) The contract administration office shall determine, in accordance with FAR 42.1104(a), the extent of production surveillance required regardless of dollar value.

(d) After deliquency has occurred, and before the PCO has determined the action to be taken, it is particularly important that surveillance be limited to fact finding to avoid waiver of the contract delivery and performance schedules.

242.1105 Assignment of criticality designator.

(a) The assigned designator may be changed only by the purchasing office. Ordinarily, unilateral purchase orders shall be assigned Criticality Designator C.

(b) DoD contract items on which a priority 01, 02, 03, or 06 (if emergency supply of clothing) has been assigned based on DoDD 4410.6, Uniform Material Movement and Issue Priority System and nonstocked items which otherwise meet the criteria for Force Activity Designator 1 and Urgency or Need Designator A thereunder shall fall under Criticality Designator A.

242.1106 Reporting requirements.

(b)(1) If the contractor's report indicates that the contract schedule will be met and the contract administration office is required.

(2) If, on the other hand, either the contractor forecasts delivery or performance failure, or the contract administration office does not concur in the contractor's no failure report, and in either case the delay is expected to be for more than 30 days, or purchasing office action, in any case, is deemed necessary, the contract administration office shall add an endorsement and forward a copy to the purchasing office and to the inventory control manager unless otherwise specified in the contract, within 4 working days after

receipt of the contractor's report. The endorsement shall include:

(i) Comments as to nonconcerrence, if applicable;

(ii) Action taken by the contractor and by the Government to overcome the anticipated or actual delinquency.

(iii) Action required—a positive recommendation to the purchasing office of the action necessary to correct the delinquency, including any realistic schedule revision which can be met by the contractor and the extent to which the contractor may have excusable cause of delay. When other actions are indicated, such as those leading to default termination, the contract administration office shall indicate specific dates by which Government action should be taken to preserve the Government's rights.

(c) *Reports initiated by contract administration offices.* Reports may be furnished by use of:

(1) DD Form 375–2, or DLA Form 1654 (Test), Delay in Delivery (Flash Notices); or

(2) DD Form 375, Production Progress Report and DD Form 375c (continuation).

242.1107 Contract clause.

(b)(1) Contract schedule provisions supporting the clause at FAR 52.242–2 shall contain but not be limited to instructions relative to:

(i) The frequency and timing (normally 5 working days after each reporting period of reporting);

(ii) The contract line items, exhibits, or exhibit line items for which reporting is required;

(iii) Offices and mailing addresses to which reports shall be sent including the purchasing office, the contract administration office (3 copies), status control activities and inventory managers, if appropriate; special requirements as to codes and formats.

(2) When reporting an actual or potential delinquency, the contractor-prepared DD Form 375c shall, as a minimum, contain the following data:

(i) Problem—a statement of the difficulty, the reasons therefor, and whether caused by the Government or the contractor;

(ii) Items and quantities affected;

(iii) Date of commencement of the anticipated or actual delinquency;

(iv) Action taken by the contractor to overcome the anticipated or actual delinquency.

(v) Estimated recovery date based upon evaluation of the factors contributing to the delinquency; and

(vi) A realistic schedule revision which can be met by the contractor. In the absence of an actual or potential delinquency, the DD Form 375c may be used to provide any information which the contractor deems appropriate.

Subpart 242.12—Novation and Change-of-Name Agreements

242.1203 Processing agreements.

(b)(1) The list of contracts required by FAR 42.1204(c)(2) will be included with the notice. Notice shall be provided to the Departments and Defense Agencies and NASA having contracts with the contractor or contractors concerned. Notice shall include the list of contracts required by FAR 42.1204(c)(2). Each list need contain only those contracts issued by purchasing offices of the addressee. Such notice shall be transmitted to the appropriate addressee listed below. In the case of contracts awarded by Departments or agencies not listed below, the notice shall be furnished directly to the cognizant contracting or contract administration office.

Department of the Army: HQ, U.S. Army Material Development and Readiness Command, ATTN: DRCGC-P, 5001 Eisenhower Avenue, Alexandria, VA 22333

Department of the Navy: Chief of Naval Material, ATTN: MAT 023D, Washington, DC 20360

Department of the Air Force: HQ, U.S. Air Force Systems Command, ATTN: PMP, Washington, DC 20331

Defense Logistics Agency, ATTN: DLA-PPR, Cameron Station, Alexandria, VA 22314

National Aeronautics and Space Administration, Assistant Administrator for Procurement, ATTN: HR, Washington, DC 20546

(c) Where substantial alterations or additions to the formats shown at FAR 42.1204(e) and FAR 42.1205(b) are considered appropriate by the cognizant ACO processing the proposed agreement, coordination will be made with the appropriate addressees listed above involved prior to execution. Any objection shall be resolved before the agreement is executed. If, for any reason, NASA indicates a desire to consummate a separate agreement with the contractor, the cognizant ACO shall continue to process the agreement only for the Departments and Defense agencies concerned.

(e)(S–70) In addition to the distribution prescribed in FAR 42.1203(e), two copies of the agreement will be sent to the appropriate addresses listed in (b)(1) above. When the ACO responsible for the corporate office is the cognizant ACO, one copy will be distributed to each CAO responsible for contract administration at a plant or division. The CAO will, in turn, reproduce and distribute copies for each of its affected contracts. Each purchasing office will reproduce the necessary number of copies of the administrative change and will make distribution as determined necessary by that office. Reproduction and distribution of copies for CAOs will be accomplished by the ACO who executed the administrative change.

(e)(S–71) Novation and change-of-name agreements amending contracts and basic agreements for storage and related services for personal property of military and civilian personnel shall be forwarded to the cognizant area command of the Military Traffic Management Command as set forth below for execution without regard to other provisions.

Commander, Eastern Area, Military Traffic Management Command, ATTN: MTE-PPS, Bayonne, NJ 07002

Commander, Western Area, Military Traffic Management Command, Oakland Army Base, ATTN: MTW-PPS, Oakland, CA 94625

(f) NASA contracts shall not be included in this list since NASA will issue its own administrative change. A total of 2 copies of the administrative change, with the list of contracts affected, shall be furnished to the appropriate addressee(s) listed in (b)(1) above. Each list need contain only those contracts issued by purchasing offices of the addressee.

Subpart 242.14—Traffic and Transportation Management

242.1402 Volume movements within the Continental United States.

(a)(1)(i) On FMS shipments, the aggregate will be 200,000 pounds or more.

(a)(2)(S–70) As soon as production schedules and planned destinations have been established, the contracting officer should report this information to the transportation office serving the purchase office. The transportation office will review the contracts and report planned volume movements in accordance with Chapter 201 of the Military Traffic Management Regulation (AR55–355, NAVSUP PUB 444 (Rev), AFM 75–2, MCO P4600 14A, DLAR 4500.3) (MTMR).

(S–71) The purchasing office shall forward a copy of the volume movement report to the contract administration office. The transportation office serving the CAO shall submit a volume movement report when:

(A) It is determined, upon review of the contract, that no volume movement report has been submitted by the purchasing office.

(B) Movement requirements are refined or changed to such a degree that

a revised volume movement report should be submitted.

(S–72) On FMS shipments the volume movement report should also include the destination country, foreign forwarder, and port of embarkation, if known.

242.1403–1 U.S. Government bills of lading (GBLs).

(a) See 242.1472 for procedures whereby contractors shall obtain GBLs.

242.1403–2 Contractor-prepaid commercial bills of lading.

(a)(S–70) The term commerical bill of lading (CBL) includes the use of any commercial form or procedure.

(a)(S–71) Appendix V of the MTMR contains the list of carriers and carrier associations that have entered into agreements with MTMC to provide the required transportation under commerical forms and procedures within CONUS.

(S–70) Contract clause. The contracting officer shall insert the clause at 252.242–7000, Submission of Commercial Freight Bill to the General Services Administration for Audit, when transportation costs are to be reimbursed to the contractor under a cost reimbursement type contract.

242.1404–2 Contract clauses.

(a) The clause at FAR 52.242–10 will not be included in those f.o.b. origin supply or service contracts containing the Fast Payment Procedure clause, FAR 52.213–1.

(b) The clause at FAR 52.242–11 will not be included in those f.o.b. origin supply or service contracts containing the Fast Payment Procedure clause, FAR 52.213–1.

(S–70) When the clauses at FAR 52.242–10 or FAR 52.242–11 are used in DoD contracts, the contract or ordering instrument shall instruct contractors desiring to obtain GBLs under paragraph (b) of those clauses to submit DD Form 1659, Application for United States Government Bills of Lading/Domestic Route Order/Export Traffic Release.

242.1405 Discrepancies incident to shipment of supplies.

(S–70) Improper markings or consignment deficiencies may result in misdirected shipments or additional handling or stowing of shipments, or affect identification of contents which necessitates opening of containers.

(S–71) The administrative procedures required in Chapter 221 of the Military Traffic Managment Regulation govern the actions to be taken with respect to discrepancies caused by carriers.

242.1470 Routing, tracing, and expediting shipments.

(a) Routing of military freight consists of determining a mode of transportation and the carrier which will effect safe and timely delivery of supplies at the lowest overall costs.

(b) Tracing is the procedure used for locating unduly delayed shipments.

(c) Expediting is the procedure used when a shipment is urgently needed at destination or when congestion is likely to occur on the lines of the carriers over which the shipment is to move.

(d) Methods for tracing or expediting shipments are outlined in Chapter 220, Military Traffic Management Regulation.

242.1471 Demurrage and detention charges.

(a) Demurrage is a fixed charge made by rail carriers on cars held by, or for, a consignor or consignee for loading, unloading, or for any other purpose. A contractor who detains cars for these reasons is required to pay the carrier's published tariff charges for demurage. Generally, carrier demurrage rules allow a definite period called "free time" for loading or unloading cars or for any other purpose, and impose a definite per day per car charge for cars held beyond this period. The free time allowed is usually 48 hours for loading or unloading cars and 24 hours when cars are held for reconsignment, diversion, reshipment, or held in transit on orders of the shipper or consignee. Normally, the free time starts from the first 7 a.m. (excluding Saturdays, Sundays, and holidays) after placement of the car.

(b) Detention is the term used when motor carrier equipment is held by, or on behalf of, a shipper or cosignee beyond a reasonable period allowed for loading, unloading, forwarding directions, or for any other purpose. Motor carrier detention rules and charges are not uniform and are published in individual carrier or agency tariffs. Detention charges are usually based on an hourly rate.

(c) Procedures involving payment or collection of demurrage or detention charges are contained in paragraph 219010 of the Military Traffic Management Regulation.

242.1472 DD Form 1659 (1 Apr 70), Application for U.S. Government Bill(s) of Lading/Domestic Route Order/Export Traffic Release.

DD Form 1659 shall be prepared by the contactor for submission of advance shipping data to the cognizant contract administration office. In response, the transportation office shall furnish the required U.S. Government bill of lading, Domestic Route Order or Export Traffic Release when necessary, required for use in connection with Government contract.

Subpart 242.70—Monitoring Contractors' Costs

242.7000 Scope.

This subpart sets forth guidelines for monitoring the policies, procedures, and practices used by contractors to control direct and indirect costs related to Government business. These procedures are intended to eliminate duplication in monitoring contractors' costs.

242.7001 Purpose.

To ensure the most efficient and economical performance of DoD contracts, it is essential that contract costs be managed effectively. Contractors are responsible for managing and controlling their direct and indirect costs. However, DoD components need to systematically monitor the management of such costs to assure that contractors are fulfilling their responsibilities.

242.7002 Application.

A formal program of Government monitoring of contractor policies, procedures, and practices to control costs should be conducted at:

(a) All major contractor locations where—

(1) Sales to the Government are expected to exceed $50 million during the contractor's next fiscal year on other than firm-fixed-price and fixed-price-with-escalation contracts:
